Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Swahili

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Swedish

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Tagalog

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Tahitian

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Top

Language Skills Development: Taiwanese

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Tamil

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Thai

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Tongan

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Trukese

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Turkish

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Top

Language Skills Development: Twi

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Top

Language Skills Development: Ukrainian

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Top

Language Skills Development: Urdu

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Foreign Language Teaching Methods

Teaching methods specific to teaching less commonly taught language courses. Lectures, demonstrations, and microteaching. Topics include curriculum/lesson planning, reflective teaching, and communicative language teaching.

FLANG 377R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Native- or advanced-level proficiency in the target language.
Note	Prospective teachers and TAs shoiuld take this course before or while teaching the target language course.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Teaching

Design and deliver effective target-language instruction appropriate to learners' needs.

Principles

Discuss and apply basic principles of second-language acquisition.

Assessment

Discuss and apply basic principles of formal and informal assessment.

Reflection

Reflect on and justify instructional choices and actions.

Special Studies in Second Language Applications

Faculty-supervised instruction for advanced students. Individual or group study. Course work established by contract and director's approval.

FLANG 490R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Specified Application

Meet learning outcomes specified by the Center for Language Studies relative to a specific language application.

Top

European Fine Arts

Art, design, music, and theatre of host countries and other European cultures.

FNART 270R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Identify and Analyze

Students will identify and analyze art, design, music, and theatre of host countries and other European cultures.

Top

Creativity and Collaboration in the Arts and Communications

Explore theories of creativity, collaboration, and innovation in a modern, arts-based mediated world; engage in principles of team-building and communication; practice skills of ideation, research, and execution of interdisciplinary projects from conception to completion. Classes are project-based and vary from semester to semester. Please contact the Laycock Center (A-360 HFAC, 801-422-7161) for more information.

FNART 301R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Principles of collaboration

• analyze principles and theories of group dynamics, innovation, creativity, and collaboration

Skills of collaboration

• practice and develop skills in group dynamics, innovation, and creative and collaborative processes

New knowledge

• assimilate and apply new knowledge and skills in disciplines outside their major expertise

Reflection

• self-assess and reflect upon their strengths, weaknesses, and contributions in group dynamics, innovation, and creative and collaborative processes

Top

First-Year French, Part 1

Development of the four language skills: understanding, speaking, reading, and writing.

FREN 101

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Comprehension

Comprehend French as you hear and read authentic language relating to familiar topics.

Speaking

Speak French well enough to satisfy immediate needs. (You will learn to communicate in basic social situations, meet routine travel needs, obtain food and lodging, carry out simple transactions, and talk about a variety of topics of common interest primarily in the present, with limited use of other time frames.)

Writing

Write short messages and well-articulated sentences in French on familiar topics.

Top

First-Year French, Part 2

Continuation of French 101.

FREN 102

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Fren 101 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Write

Write well-articulated sentences and loosely connected texts related to personal experiences and common events.

Comprehend

Comprehend French as you hear and read authentic language relating to familiar topics.

Speak

Speak French well enough to handle a variety of simple communicative tasks in basic social situations. You will be able to meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.

Top

Intensive Reading in French

Reading for research purposes, including reading skills in area of student's specialization or interest. Conducted in English.

FREN 121

Hours	0.5 - 4.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Note	For students with little or no French. Graduate students will be graded pass/fail. Undergraduates will receive letter grades.
Taught	

Course Outcomes

Reading

Evaluate authentic written French from different eras and in different discourse types.

Vocabulary

Acquire basic (5000-7000 lexemes) and discipline-specific vocabulary for the purposes of reading.

Top

Intermediate French, Part 1

Reading, writing, conversation, vocabulary building, and review of grammar.

FREN 201

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Fren 102 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Real-Life Use

Improve your ability to use French in real-life situations and for real-life purposes.

Elaboration

Create elaborated utterances and group them into paragraphs and narratives.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Language Structures

Review and increase understanding of basic language structures.

Culture

Discuss in French selected current events and various francophone regions of the world and some of their cultural practices.

Honors Intermediate French, Part 2

Final course for GE Foreign Language requirement (except for returned missionaries); extensive reading in French literature and culture.

FREN 202

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Fren 201 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Literary Analysis

Read beyond basic plot and learn to apply tools of literary analysis.

French Literature

Recognize and analyze key genres in French literature.

Literary Movements

Identify and define key characteristics of the important French literary movements.

Cultural and Historical Context

Place literature in a meaningful cultural and historical context.

French Culture

Broaden and deepen your perception and appreciation of French culture.

Reading and Writing

Improve your reading and writing skills in French.

Intermediate French, Part 2

Final course for GE Languages of Learning requirement (except for full-time French speaking returned missionaries); extensive reading in French literature and culture.

FREN 202

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Fren 201 or equivalent.
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Literary Analysis

Read beyond basic plot and learn to apply tools of literary analysis.

French Literature

Recognize and analyze key genres in French literature.

Literary Movements

Identify and define key characteristics of the important French literary movements.

Cultural and Historical Context

Place literature in a meaningful cultural and historical context.

French Culture

Broaden and deepen your perception and appreciation of French culture.

Reading and Writing

Improve your reading and writing skills in French.

Second-Year Conversation

FREN 211R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Fren 102 or equivalent. May be taken concurrently with Fren 201.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Narration and Description

Describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Speaking in Context

Speak in contexts related to autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions and coping with gaps in knowledge.

Vocabulary

Speak using an apporopriate variety of vocabulary related to autobiographical and concrete topics.

Understood by Native Speakers

Be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Third-Year Conversation

FREN 311R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Fren 211R or instructor's consent.
Note	May be taken concurrently with Fren 340.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Narration and Description

Describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Speaking in Context

Relate current events, plots of books or movies and state opinion.

Skills for coping with communication problems

Initiate and maintain fluent conversations, and cope with gaps in knowledge in contexts related to concrete topics.

Lexical mastery

Speak using an apporopriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

Fluency

Be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Top

(Fren-Ital) French and Italian Cinema

Background for understanding and appreciating the best of motion picture art in France and Italy. Includes components of critical theory essential for analyzing film. Language of instruction is English; no knowledge of French or Italian required.

FREN 317

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Major filmmakers and cinematic movements

Identify the major filmmakers and cinematic movements in the history of French and Italian cinema, with particular attention to the socio-historical contexts that shaped their creation.

Film as technical art

Explore the essential aspects of cinema as an artistic medium and master the technical and critical terminology necessary to intelligently discuss the creative process.

Aesthetic Judgment

Develop critical skills for aesthetic judgment in applying acquired techincal knowledge to the films of individual filmmakers from these two traditions.

Expected course outcome

Analyze cinema as an art form and "read" individual films in terms of the specificity of an artistic, authorial message.

Top

Advanced French Part 1

Grammar and composition, listening and speaking skills.

FREN 321

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Recommended	Fren 202 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Advanced Functions in Speech and Writing

Students will be able to narrate and describe in the present and past time frames, use connected discourse, and acquire strategies for managing communicative complications in French.

Composition strategies

Students will develop strategies for writing a variety of descriptive and narrative texts.

Language Accuracy

Students will demonstrate proper use of grammatical, lexical, phonological and stylistic features of the French language.

Top

Advanced French Part 2

Grammar and composition, listening and speaking skills.

FREN 322

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	FREN 321
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Advanced Functions in Speech and Writing

Students will be able to narrate and describe in the present, past and future time frames, use connected discourse, and acquire strategies for managing complications in the French language.

Superior Functions in Speech and Writing

Students will be able to support their opinions and hypothesize about abstract topics in the context of extended discourse.

Communicative Genres

Students will acquire techniques to produce a variety of text types, such as summaries, detailed descriptions and narrations, analyses and argumentative essays.

Critical Thinking, Accuracy, Text Types

Students will analyze and employ proper grammatical, lexical, phonological and stylistic features of Advanced-level French language in summaries, detailed descriptions and narrations, analyses and argumentative essays.

Top

Individual French Language Review

Guided individual online language practice.

FREN 325R

Hours	1.0 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	FREN 202
Recommended	Fren 211.
Note	May be taken as supplemental bridge between Fren 202 and Fren 321 or for extra practice while taking any 300- or 400-level French course.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Improved language ability

Students will demonstrate improvement in their French language ability through performance on tests.

Top

Introduction to Literary Analysis

How to read French prose, drama, and poetry and apply methods of literary criticism.

FREN 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Fren 321 or concurrent enrollment.
Note	Capstone course for GE Languages of Learning requirement for returned missionaries
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Contextualization and Analysis

Contextualize and analyze French literature of various periods and genres.

Analytical Writing

Write analytically about the literature in well-formatted essays.

Basics Terms

Identify basic terms of literary analysis. (The specific list is available on the syllabus.)

Top

Francophone Culture

FREN 345

Hours	3.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	Fren 102 or equivalent.
Note	Study Abroad only.
Taught	

Course Outcomes

Paris Walks

The purpose of this course is to provide an organized, meaningful, and memorable overview of Paris as well as sites visited during organized excursions.

Top

French Choir

French choir practice.

FREN 346R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Culture and Language

Improve language skills and enhance cultural appreciation through choral singing.

French Civilization from the Beginning to 1715

Historical survey of institutions, fine arts, and social conditions to the death of Louis XIV.

FREN 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 321.
Recommended	Fren 322.
Note	Fulfills GE Arts or Letters elective.
Taught	Fall, Winter, Spring

Course Outcomes

Chronology of French Civilization

Demonstrate knowledge of the chronology of French civilization and identify the major intellectual and artistic movements, their defining characteristics and contexts.

Locating and Evaluating Resources

Locate and evaluate resources relevant to course assignments.

Methods of Investigation

Apply appropriate methods of investigation (e.g., formulate hypotheses, make valid arguments, use evidence, cope with ambiguity, evaluate competing interpretations of a given event or topic and communicate findings coherently).

Time Period Connections

Establish connections between events, movements, and ideas for the time period covered in this course.

Cultural Topics

Articulate and defend clear, orderly thought on cultural topics.

French Civilization from 1715 to the Present

Historical survey of institutions, fine arts, and social conditions.

FREN 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 321.
Recommended	Fren 322.
Note	Fulfills GE Arts or Letters elective.
Taught	Fall, Winter, Summer

Course Outcomes

Chronology of French Civilization

Demonstrate knowledge of the chronology of French civilization and identify the major intellectual and artistic movements, their defining characteristics and contexts.

Locating and Evaluating Resources

Locate and evaluate resources relevant to course assignments.

Methods of Investigation

Apply appropriate methods of investigation (e.g., formulate hypotheses, make valid arguments, use evidence, cope with ambiguity, evaluate competing interpretations of a given event or topic and communicate findings coherently).

Time Period Connections

Establish connections between events, movements, and ideas for the time period covered in this course.

Cultural Topics

Articulate and defend clear, orderly thought on cultural topics.

Contemporary French Civilization

Current cultural, political, and social trends and issues in France as well as the francophone world.

FREN 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 321.
Recommended	Fren 322.
Note	Fulfills GE Global and Cultural Awareness requirement.
Taught	Fall, Winter

Course Outcomes

Locating and Evaluating Resources

Locate and evaluate resources relevant to course assignments.

Chronology of French Civilization

Demonstrate knowledge of the chronology of French civilization and identify the major intellectual and artistic movements, their defining characteristics and contexts.

Methods of Investigation

Apply appropriate methods of investigation (e.g., formulate hypotheses, make valid arguments, use evidence, cope with ambiguity, evaluate competing interpretations of a given event or topic and communicate findings coherently).

Time Period Connections

Establish connections between events, movements, and ideas for the time period covered in this course.

Cultural Topics

Articulate and defend clear, orderly thought on cultural topics.

Introduction to French Language Teaching

Language acquisition theories and instructional practices specific to French language classrooms. Includes teaching phonological features and pronunciation. Lectures, demonstrations, and microteaching.

FREN 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 321; FLang 276 (if a French teaching major)
Note	Taught in French and English.
Taught	Fall

Course Outcomes

Teaching

Design and deliver effective French instruction appropriate to learners' needs.

Assessment

Discuss and apply basic principles of formal and informal assessment.

Principles

Discuss and apply basic principles of language acquisition.

Reflection

Reflect on and justify instructional choices and actions.

Phonology

Describe the phonological features of French and diagnose your own pronunciation problems.

French Language Teaching Procedures and Practicum

Designing and practicing instruction for French classes in secondary schools. Developing teaching, critical thinking, and assessment skills.

FREN 378

Hours	2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Fren 377; 491 with minimum rating of advanced--low on the French oral proficiency exam; fingerprinting and FBI clearance for students planning to do an internship or student teach in the public schools.
Note	Taught in French and English.
Taught	Fall, Winter

Course Outcomes

Application of Principles

Begin to apply principles of second language teaching and acquisition in public-secondary school settings.

Teaching

Design and teach basic culture, vocabulary, comprehension, grammar and oral communication lessons in a secondary school.

Assessment and Reflection

Begin to apply formal and informal assessment principles. Document and reflect on teaching and learning.

Top

Academic Internship: French Language Field Experience

On-the-job experience in French.

FREN 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Integration

Improve professional experience and appreciation of cultural practices in an international context.

Top

Fourth-Year Conversation

FREN 411R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Fren 311R or equivalent.
Taught	

Course Outcomes

Linguistic Fluency

Initiate and maintain fluent conversations, and cope with gaps in knowledge in contexts related to concrete topics.

Top

Introduction to French Linguistics

Subfields (phonetics, morphology, syntax, lexicology, semantics) and approaches (socio-linguistics, semiology, and pragmatics).

FREN 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 321.
Recommended	Fren 322, 340, 361, 362.
Taught	Fall

Course Outcomes

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Linguistics Research

Conduct independent research (finding examples of the linguistic phenomena examined in the course, applying analytical diagrams, comparing linguistic phenomena in various languages, using various instruments of linguistic analysis) and identify the most significant databases of francophone linguistic research.

Linguistics

Identify the fundamental elements of French linguistics (basic terms and concepts of phonetics, phonology, morphology, syntax, lexicology, and semantics)

Linguistic Diversity

Evaluate and appreciate francophone diversity.

History of French

Introduction to the diachronic study of French beginning with its roots in Latin.

FREN 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Fren 431 or concurrent enrollment.
Taught	Fall

Course Outcomes

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Language

Demonstrate improved language ability

Top

Studies in French Linguistics

Advanced study of linguistic features such as phonetics and phonology, semantization, lexical development, morphology, and contrastive syntax.

FREN 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Fren 431 or concurrent enrollment.
Taught	Winter

Course Outcomes

French Linguistics

Demonstrate mastery of the elements of advanced French linguistics.

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Data Analysis

Codify and draw conclusions from the data analyzed.

Top

Advanced Francophone Culture

FREN 445

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 321.
Note	Research paper required.
Taught	Spring, Summer
Offered	Study Abroad only.

Course Outcomes

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Language

Demonstrate improved language ability

Studies in Period, Movement, and Theme

Various periods and movements (e.g., medieval, classicism, romanticism) or themes (e.g., Arthur, Faust). Topics vary.

FREN 452R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 340.
Taught	Winter

Course Outcomes

Period, Movement, Theme

Evaluate and contextualize a particular period, movement, or theme in French or Francophone studies and justify the limitations of its definitions.

Language

Demonstrate improved language ability

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Studies in Genre

In-depth study of various genres (e.g., epic, novel, lyric, film) and problems of genre in French.

FREN 453R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 340.
Taught	Winter

Course Outcomes

Genre

Evaluate basic concepts of a particular genre and explain the limitations of generic categorizations.

Language

Demonstrate improved language ability

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Studies in Author

In-depth study of major French or Francophone authors (e.g., Rabelais, Moliere, Diderot, Balzac).

FREN 454R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 340.
Taught	Winter

Course Outcomes

Author

Evaluate and contextualize the unique contributions of a particular author.

Language

Demonstrate improved language ability

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Studies in Literary Theory

In-depth study of primary texts by contemporary literary theorists (e.g., Barthes, Genette, structuralism, etc.). Language of instruction is English.

FREN 455R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 340.
Taught	Winter

Course Outcomes

Application of Theory

Apply theoretical models to various cultural artifacts and practices

Theory

Investigate a variety of theoretical models for the analysis of literature and cultural phenomena.

Language

Demonstrate improved language ability

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Top

Francophone Studies

Readings from major French-speaking writers from countries outside France, such as Canada, Africa, and the Caribbean.

FREN 456R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 340.
Taught	

Course Outcomes

Identity

Analyze and compare the cultures and practices that create African Francophone identities.

Literary Analysis

Analyze and interpret literary texts of the French-speaking world.

Top

Studies in French Culture

In-depth study of French historical, political, and social issues or artistic trends.

FREN 457R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Fren 361, 362, or 363.
Taught	

Course Outcomes

French Culture

Evaluate and contextualize a significant component of French or Francophone culture.

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Direct Enrollment in French University

Register for this course in consultation with department internship coordinator. To be taken only when enrolled directly in French university as part of BYU professional program in France. Only enroll when curriculum of other BYU courses do not correspond to the course enrolled in French university.

FREN 470R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	FREN 321 & FREN 322
Recommended	Fren 340.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

French University

Students will fulfill learning outcomes of the French university course in which they are enrolled.

Culture

Students will write analytically about the course content and about cultural differences in the educational system.

Connections

Students will articulate connections between their course experience and their future goals.

Top

Individual Study in French

Faculty-supervised instruction/research to fit the individual needs of the advanced student. Terms must be established by contract and approved by chair.

FREN 490R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research and Critical Thinking

Formulate and express in writing critical arguments on a specialized topic reflecting an understanding of primary and secondary sources.

Top

Senior Oral Proficiency Evaluation

Evaluation required of all French majors during the senior year and all French-teaching majors and minors before enrolling in Fren 378.

FREN 491R

Hours	0.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Linguistic Proficiency

Establish an oral proficiency rating by taking the Oral Proficiency Interview.

Top

Senior Portfolio Seminar

Capstone experience for French studies majors, including revision and assessment of writing.

FREN 495

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Recommended	Fren 321, 322, 340.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

French Degree and Future Plans

Identify connections between French degree and future plans.

ACTFL Assessments

Pass OPI and WPT at Advanced Low or higher.

Resume

Compose a professional resume with feedback from the advisement center.

Revising Best Papers

Identify and revise your best papers from French courses.

Top

Honors Thesis

FREN 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Research

Develop advanced skills in research techniques and academic writing and produce an acceptable Honors thesis.

Top

MA Practicum 1

Critical strategies and interpretative skills necessary for MA examinations.

FREN 510

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Fall

Course Outcomes

Reading List 1 (up to XVIIIth century)

Discuss significant works of French and Francophone literature, explain their historical context, importance, influence, and distinctive features.

Top

MA Practicum 2

Critical strategies and interpretative skills necessary for MA examinations.

FREN 511

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Winter

Course Outcomes

Reading List II (XVIIIth century to present)

Discuss significant works of French and Francophone literature, explain their historical context, importance, influence, and distinctive features.

Top

MA Practicum 3

Research tools and methods, the process of selecting a thesis topic, compiling a bibliography, and writing a prospectus.

FREN 512

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Fall

Course Outcomes

Bibliography

Generate a preparatory bibliography that will establish a scholarly foundation for the thesis.

Prospectus

Generate a well-conceived, clearly-articulated, and well-documented prospectus for the MA thesis.

Advanced Studies in French Linguistics

Advanced study of linguistic features such as phonetics and phonology, semantization, lexical development, morphology, and contrastive syntax.

FREN 533

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Linguistics

Demonstrate mastery the elements of advanced French linguistics.

Research

Write at least one substantive research paper that effectively incorporates secondary sources.

Analysis

Codify and draw conclusions from the data analyzed.

Top

Academic Internship: French Language Field Experience

On-the-job experience in French; research paper analyzing the experience and other requirements as graduate coordinator sees fit.

FREN 599R

Hours	3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional and Cultural

Improve professional experience and appreciation of cultural practices in an international context.

Top

The Geographic Approach

Overview of the discipline of geography and the faculty and geography major at BYU.

GEOG 100

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Fall, Winter

Course Outcomes

Conceptualize Geography

Develop your own personal conceptual framework for the idea and disciplinary development of geography.

Explain Your Major

Be able to explain to your parents, spouse, children, neighbor, a complete stranger why you are a geography major.

Know Your Faculty

Be able to identify all of the faculty members in the department by name and area of interest.

Careers and Graduate school

Be able to identify possible careers related to your program emphasis and/or potential graduate schools.

Global Environment: Understanding Physical Geography

Physical environment, distribution and interrelationships of climates, landforms, ecosystems and their human significance.

GEOG 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Outcome 1

To be conversant in the language and vocabulary of physical geography.

Outcome 2

Appreciate the extraordinary powers and delicate balances involved in the dynamic biophysical world in which you live.

Outcome 3

Make rational decisions with respect to current and future environmental challenges.

Outcome 4

Understand why biophysical phenomena occur where they do.

Landscapes of Disaster: An Introduction to Natural Hazards

Exploring natural and social science of disturbances by analyzing causes, consequences, and role of human behavior in causing and mitigating natural disasters.

GEOG 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Dimensions of disasters

Define and categorize environmental hazards along several dimensions, and situate disasters within their physical and societal contexts

Application of scientific principles and reasoning

Use scientific principles and reasoning to evaluate environmental hazards, investigate the causes and consequences of disasters, and suggest appropriate mitigation and disaster reduction strategies

Interactions of Physical and Human Factors

Evaluate the physical, cultural, and socioeconomic factors influencing human vulnerability to disasters in a global context

Top

Geography and World Affairs

Survey of the world, stressing geography of major political regions.

GEOG 120

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also. Independent Study also.

Course Outcomes

World knowledge

Identify where all the countries of the world are located and, more importantly, learn about these "countries and kingdoms" that you might "be prepared in all things" (Doctrine and Covenants 88:78-79).

Interconnections

Better understand the interconnectedness of the world so we will appreciate those who contribute to making our life so abundant and easy and so we will be more willing to help those who have less.

Stewardship

Become better stewards of the earth through an increased understanding of how human behavior impacts the environment and affects the lives of others.

World development

Understand what factors have led some regions of the world to be more developed that others.

Current affairs

Gain enough familiarity with the world to be a more informed reader of the daily news.

Basic knowledge

Develop an understanding of basic geographic terms.

Travel

Learn to enjoy the journey by being a more observant, interested, adventuresome, and curious traveler.

Top

Honors Geography and World Affairs

Survey of the world, stressing geography of major political regions.

GEOG 120

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

World knowledge

Identify where all the countries of the world are located and, more importantly, learn about these "countries and kingdoms" that you might "be prepared in all things" (Doctrine and Covenants 88:78-79).

Interconnections

Better understand the interconnectedness of the world so we will appreciate those who contribute to making our life so abundant and easy and so we will be more willing to help those who have less.

Stewardship

Become better stewards of the earth through an increased understanding of how human behavior impacts the environment and affects the lives of others.

World development

Understand what factors have led some regions of the world to be more developed that others.

Current affairs

Gain enough familiarity with the world to be a more informed reader of the daily news.

Basic knowledge

Develop an understanding of basic geographic terms.

Travel

Learn to enjoy the journey by being a more observant, interested, adventuresome, and curious

traveler.

Top

Introduction to Human Geography

Culture distributions and their relationship to existing geographic phenomena.

GEOG 130

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Learning Outcome #1

be able to define geography, explain why it is different from other academic disciplines, and discuss why an understanding of geography is essential in today's world.

Learning Outcome #2

learn fundamental geographic concepts and increase basic geographic knowledge and vocabulary.

Learning Outcome #3

using examples from regions and countries around the world, learn and understand the five geographic themes the course is based on and be able to apply them to real world situations and experiences. The themes are: culture region, cultural diffussion, cultural landscape, cultural interaction, and cultural ecology.

Map Use and Interpretation

Maps as tools for spatial analysis of problems in physical and cultural geography.

GEOG 211

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

The Big Three

Identify each component of the "Big Three" when using or observing geographic technologies. The Big Three includes 1) Geographic Information Systems, 2) Global Positioning Systems, and 3) Remote Sensing.

Map Scale

Complete all typical map scale calculations related to land distance and area including unit conversions.

Datum and Coordinate Systems

Give and take coordinate references in UTM and lat / long and convert between the two.
select a datum and coordinate system appropriate for a given job-related task. Explain the logic of and give / take a reference in the PLSS

GPS

Configure a GPS receiver properly to use both with and without a map.
Lay-in and follow the course in a GPS receiver.

Topographic Maps

Measure elevation, distance, direction, slope, and aspect from digital or paper topographic maps.
Perform a simple statistical analysis of data on a USGS topographic map.

Thematic maps

When presented with a typical specimen, perform a simple interpretation of a thematic map (e.g. Choropleth, Isoline)

Introduction to Geographic Information Systems

Concepts in the use of small- and large-scale digital map data, emphasizing landscape interpretation and feature description.

GEOG 212

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Data Management

Acquire geospatial data from common sources and manipuate them for a specific application.

GIS Analysis

Analyze data using GIS to solve real world problems.

GIS Applications

Describe several applications in which GIS is used to solve geographic problems.

GIScience

Understand basic spatial concepts and data models that form the foundation of GIS.

Cartography & Visualization

Design and use maps to explore and communicate geospatial information.

Earth Observation and Image Interpretation

Principles of earth observation: primarily air photo/large-scale satellite imagery interpretation, basic field methods, photogrammetry.

GEOG 213

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Measurements

Students will be able to complete simple measurements from historical air photos including height, distance, area, scale, and coordinate-related problems.

Electromagnetic radiation

Students wil be able to complete simple problems related to electromagnetic radiation and atmospheric effects.

Interpretation

Students will be able to perform a simple cultural / physical interpretation of simple monoscopic imagery.

Top

Programming for Geographers

Object-oriented analysis of geographic information using Visual Basic.

GEOG 217

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Language Familiarity

To introduce Visual C# 2010 specifically

Programming

To introduce basic and intermediate programming approaches and constructs within a GIS / GPS / remote sensing context

Thinking

To help build critical thinking skills related to computer programming in Geography

Statistics for Geographers 1

Methodology of spatial analysis. Theory and techniques in geographic data description and population inference.

GEOG 222

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

LO1

Determine appropriate methods for identifying, collecting, and analyzing primary and secondary data and develop an understanding of the nature and limitations of data used in geographical analysis

LO2

Explain basic descriptive and inferential statistical techniques (both spatial and aspatial) and identify what kind of methods would be appropriate for the solution of geographic questions/problems/issues

LO3

Conduct moderately complex data analysis using appropriate computer software (e.g. SPSS, Excel, SpaceStat)

LO4

Demonstrate the practice of statistical thinking by taking a real-life problem and a potential statistical procedure, describe whether the procedure can be safely applied, accurately describe the implications of statistical outcomes on the practical problem at-hand (i.e. inference → practical conclusion), and cast judgment in short reports citing appropriate statistical components reflecting an engagement in self-learning and critical contemplation.

Geography of Utah

Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

GEOG 245

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 101,120, 130.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Fundamental Principles of the Physical Environment

Understand the fundamental principles of the physical environment, the ongoing changes therein, and the interactions between the physical environment and human activity

Understanding of current world societies

Explain the development and current activities of human societies at world, national and local scales

Practical and theoretical issues in Geography

Study practical and theoretical issues in geography, using a variety of methods such as quantitative and qualitative analysis, documentary research, map analysis, geospatial technologies, and written communication

Evaluate and Recommend Solutions

Evaluate the core human and environmental processes which create the context for global issues. Recommend viable solutions to current world problems.

United States and Canada

Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

GEOG 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Learning Outcome #1

Become familiar with the physical, cultural, and economic geography of the United States and Canada.

Learning Outcome #2

Recognize and understand the unique aspects of the North American landscape.

Learning Outcome #3

Appreciate the cultural complexities of the United States and Canada.

Learning Outcome #4

Be informed about current events happening within the regions under study.

Middle and South America

Environmental, cultural, economic, and political parameters of Latin American societies.

GEOG 255

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter Contact Department

Course Outcomes

Physical Geography

To gain a working knowledge of the connection of the underlying physical "stage" of Latin America to the distributions of people and their activities.

Cultural Geography

To gain an understanding of the geographic structure of Latin America's cultural components including languages, ethnic groups, settlement patterns, and religious beliefs.

Latin American Impact

To discover the significance of Latin America's increasing impact on the world's economy, as well as the growing Hispanization of the United States and the Church of Jesus Christ of Latter-day Saints

Writing

To develop geographic writing and research skills that result in papers that are fluent, relevant, and creative.

Collaboration

To use other students' input to effectively enhance Latin American geographic understanding through group work and discussions

Top

Europe

Systematic approach to physical base, social and political problems, economic issues, and regional summary.

GEOG 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Collaboration

To use other students input to effectively enhance European geographic understanding.

Physical Geography

To demonstrate the connection of the underlying physical "stage" of Europe to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.

Cultural Geography

To comprehend the regional geographic structure of Europe's cultural components including languages, demographics, ethnic groups, and religious beliefs.

Geographic Interconnections

To explicate and define the important historical and contemporary geographic linkages in Europe including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).

Economic and Political Change

To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era. Emphasis will be given to the formation and spread of the European Union.

Geographic Themes

To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of the European realm.

Writing

To write geographic research that is fluent, relevant, and creative.

Top

Russia and the Former Soviet Union

Physical features, resources, political issues, economy and industries, population concerns, and role in world affairs.

GEOG 265

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Collaboration

To use other students input to effectively enhance geographic understanding of the region.

Cultural Geography

To comprehend the regional geographic structure of the region's cultural components including languages, demographics, ethnic groups, and religious beliefs.

Geographic Interconnections

To explicate and define the important historical and contemporary geographic linkages in the region including settlement structure and major industries (e.g., agriculture, manufacturing, tourism, and transportation).

Economic and Political Change

To become knowledgeable concerning the ongoing geographical manifestations of political and economic restructuring in the modern era, including relationship to the European Union and other political entities.

Geographic Themes

To grasp how the “5 Themes of Geography” [Location, Place, Human Environment Interaction, Region, and Movement] relate to our overall studies of this region.

Physical Geography

To demonstrate the connection of the underlying physical "stage" of the region to the distributions of people and their activities. This includes studying the locations and distributions of climates, mountains, rivers, and natural barriers of the region.

Writing

To write geographic research that is fluent, relevant, and creative.

Middle East

Physical and cultural geography of Southwest Asia and North Africa, emphasizing the cultural mosaic, geopolitics, environment, and resources of the region.

GEOG 271

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Geographic Literacy

Identify where all of the countries, important cities and regions of the Middle East are located along with significant physical features like mountains, rivers and seas.

Geographic Linkages

Understand the linkages between geography (territory, location, climate, resources etc) and human activity

Peaceful Partitioning

Apply geographic principles to better understand and perhaps modify the territorial divisions of the Middle East region.

Conflict Resolution

Use written communication to describe, evaluate and resolve resource and territorial disputes between states and nations.

Global Awareness

Develop a greater appreciation and understanding for the peoples and cultures of the region.

East Asia

Region of monsoon Asia and its basic human (demographics, nations and ethnic groups, settlement patterns, religious beliefs, transportation and communication systems, political structures), and physical geographic characteristics (land forms, physiography, climatic characteristics, and natural resources).

GEOG 272

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Learning Outcome #1

Gain an understanding of the geographic foundation of the East Asia region (China, Japan, South Korea, North Korea, and Taiwan) including demographics, social issues, settlement patterns, cultural attributes, agriculture systems, economics, and politics.

Learning Outcome #2

Gain an understanding of the natural geographic base of East Asia. This includes physiography, climates, natural resources, and natural hazards.

Learning Outcome #3

Learn the locations of countries, major cities, and physical features (e.g. rivers, mountains ranges, seas) of East Asia.

Learning Outcome #4

Obtain a framework of geographical concepts and approaches useful in analyzing events in East Asia and other parts of the world

Top

Southeast Asia

Fundamental issues of geography relating to Southeast Asia, including the extraction and marketing of natural resources, economic development, neighborly relations, and how diffusion has influenced the unique cultural, religious, and linguistic characteristics of the region.

GEOG 273

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department

Course Outcomes

LO1

Gain an understanding of the geographic foundation of the Southeast Asia region including demographics, social issues, settlement patterns, cultural attributes, agriculture systems, economics, and politics.

LO2

Gain an understanding of the natural geographic base of Southeast Asia. This includes physiography, climates, natural resources, and natural hazards.

LO3

Learn the locations of countries, major cities, and physical features (e.g. rivers, mountains ranges, seas) of Southeast Asia.

LO4

Obtain a framework of geographical concepts and approaches useful in analyzing events in Southeast Asia and other parts of the world.

Africa South of the Sahara

Geographical analysis focusing on resource management, political issues, development, environmental problems, economic development, and urban-rural change; case studies from selected countries.

GEOG 285

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter Contact Department

Course Outcomes

Outcome 1

At the end of the course the student should be able to apply to the realm and sub-regions of Africa a variety of geographic terms, concepts, and ideas.

Outcome 2

At the end of the course the student should be able to identify and analyze key global human and biophysical patterns and how Africa fits into, and is impacted by, these patterns.

Outcome 3

At the end of the course the student should be able to read and discuss Africa's current events with greater insight resulting from enhanced familiarity with the realm's human and biophysical geography.

Biogeography

Broad-scale distribution of plants and animals. Theoretical and practical applications to conservation and effects of global environmental change.

GEOG 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 101.
Taught	Fall

Course Outcomes

Basic concepts

Demonstrate an understanding of basic concepts and processes in biogeography

Patterns of distribution

Recognize and be able to explain patterns of plant and animal life at many different scales

Human impacts

Explain how humans have affected the distribution and diversity of plants and animals, and apply concepts to decisions regarding human use of the environment

Current research themes

Demonstrate a knowledge of prominent professional biogeographers and ecologists and their current research themes

Future changes

Plan for future changes in species distributions and diversity as a result of environmental and human-induced pressures

Top

Geography of Climates

Elements, controls, distribution, and classification of the earth's climates.

GEOG 304

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 101.
Taught	Winter

Course Outcomes

World Climates

Gain an understanding of the key determinants of the world's main climates

Human Climate Change

Gain an appreciation of the complex nature and implications of human climate change.

Impact of Weather Events

Understand how extreme weather events occur and their potential impacts on humans.

Methods of Collecting Data

Understand the methods climatologists use to collect data about past and present climate.

Critical Thinking

Improve writing, critical thinking and your ability to apply knowledge to solve geographic problems.

Geography of Landforms

Elements of landforms: distributions and cultural significance.

GEOG 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 101.
Taught	Fall Contact Department

Course Outcomes

History of Geomorphology

Examine the history of landform study and the key individuals in the history of geomorphology.

Landforms

Explain the physical processes that produce landforms.

Physical Landscape

Examine a physical landscape and describe why it looks the way it does.

Human Impact

Describe how human settlement and recreation patterns are influenced by landforms.

Dating Techniques

Understand dating techniques geomorphologists use to understand earth's history.

Public Land Conservation

Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

GEOG 306

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

LO1

Following this course the student should be able to discuss in-depth the Spatial and Historical nature of federal public lands--where, when, why?

LO2

Following this course the student should be able to discuss in-depth the policies of historical federal public land use and how they interface with modern uses and issues.

LO3

Following this course the student should understand why and how protective designations have blossomed on federal public lands during the past fifty years.

LO4

Following this course the student should understand and be able to discuss a wide variety of interest groups--their issues, institutional efforts, and ideological underpinnings.

LO5

During this course the student should develop an initial set of conflict resolution skills as pertaining to land use conflicts.

Landscape Ecology

Interaction between spatial patterns and spatial processes in an ecological context. Methods, theories, and practical applications of landscapes at various scales.

GEOG 307

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 101, 212, 213.
Taught	Winter

Course Outcomes

basic concepts

Demonstrate an understanding of the basic concepts of landscape ecology

pattern and process

Understand the relation between pattern and process in landscapes across multiple spatial and temporal scales

Literature

Read, understand, and critique research articles in scholarly journals related to landscape ecology

Landscape metrics

Understand and be able to use landscape metrics and associated methodologies and technologies to quantitatively analyze landscapes

Research communication

Identify and address a research question in landscape ecology, and effectively communicate the results orally and in writing

Application

Apply landscape ecology concepts to environmental planning and conservation biology

Top

Introduction to Urban and Regional Planning

Introduction to the profession and practice of urban and regional planning.

GEOG 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Understanding the History and Theory of Urban Planning

- Explain the purpose and meaning of planning and its ethical, visionary, and normative imperatives. (PAB 4.2.2a)

Understanding the History and Theory of Urban Planning

- Explain the history of urban planning practice and the development of urban planning profession in the United States. (PAB 4.2.2b)

Understanding the History and Theory of Urban Planning

- Explain the creation, use, and knowledge of comprehensive and other types of plans. (PAB 4.2.2e)

Understanding the History and Theory of Urban Planning

- Explain the adoption, administration and implementation of plans and related policy including knowledge of the relevant regulations (zoning, review processes), incentives, techniques (public finance and capital budgeting) and technologies, and agencies conducting planning or employing planners. (PAB 4.2.2f)

Understanding the History and Theory of Urban Planning

- Demonstrate knowledge of the ways in which planners and planning practice have succeeded in altering the policies, institutions, and decisions that oppose the needs of disadvantaged persons. (PAB 4.2.2g)

Intermediate Geographic Information Systems

Collecting, managing, and analyzing spatial data to solve common geographic tasks.

GEOG 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 212
Taught	Winter

Course Outcomes

Geographic Information Theory

Understand the fundamental concepts of geographic information, and use those concepts to explain the core data models and procedures of GIS.

Data Management

Obtain existing GIS data and create new data that are appropriate for a given need, and transform data sets to make them appropriate for a given project, using tools such as format conversion, reprojection, and reclassification.

Spatial Analysis

Perform common and novel GIS analysis procedures to solve practical geographic tasks.

Lifelong Learning

Learn new concepts and technologies as needed to solve novel GIS management problems, with minimal supervision, using a variety of information resources.

Cartographic Design

Graphic perception, layout, typography, color, statistical methods, and symbolization of thematic maps through computer-aided techniques.

GEOG 312

Hours	4.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	GEOG 211 & GEOG 212
Taught	Fall

Course Outcomes

Map planning

Develop a map-based solution to a need, focusing on purpose and audience.

Cartographic data

Gather and process data needed for a map.

Design techniques

Design maps to be clear, useful, and attractive, employing appropriate techniques such as thematic map types, composition, symbology, color, and text.

Learning from Critique

Continue to learn design skills through map critique and self-training

Quality Design

Appreciate quality work and put forth the effort necessary to produce quality results

Remote Sensing 1

Introduction to airborne and spaceborne sensors, including characteristics and image acquisition. Emphasizes land cover mapping applications appropriate for environment monitoring.

GEOG 313

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 213
Taught	Fall

Course Outcomes

Basic remote sensing concepts

Have a functional understanding of basic remote sensing concepts and applications.

Remote sensing data and techniques

Be familiar with remotely sensed data characteristics and methods of data acquisition, storage, and manipulation.

Remote sensing in geography and other geosciences

Understand the role of remote sensing in geography and its relation to other geosciences.

Electromagnetic spectrum

Know the general characteristics of the electromagnetic spectrum and electromagnetic energy.

Image interpretation

Develop basic image interpretation skills.

Analytical Cartography

Geocoding, spatial data representation, spatial algorithms, and map based transformations.

GEOG 317

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 217
Taught	Winter

Course Outcomes

Data structures and algorithms

Students will be able to express simple data structures and algorithms in computer code. These data structures and algorithms will be illustrative of either raster or vector GIS.

Object oriented methods

When given a simple geographic problem specification, students will be able to create computer methods and classes that address the problem or meet the specification.

Problem solving

When presented with a problem amenable to the application of geographic computer programming (intermediate level difficulty), students will design and implement a software system including computer program(s) to solve the problem.

Top

Statistics for Geographers 2

Advanced techniques in geospatial analysis.

GEOG 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 222
Taught	Fall, Winter

Course Outcomes

Statistical Competence

To master an advanced set of quantitative methods that are particularly appropriate for geographers, becoming especially skilled in one statistical area.

Determination

To determine what quantitative methods are appropriate for answering different research questions.

Application

To apply statistical analysis to geographic problems in a competent and worthwhile way

Knowledge

To understand and appreciate published academic geographic research that uses a variety of quantitative methods.

Research

To develop and carry out an excellent research project complete with collaborative work and a crisp oral and professional visual presentation.

Economic Geography

Introduction to economic processes and spatial patterns, emphasizing theoretical approaches, locational strategies, and changing economic land-use patterns.

GEOG 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Geog 100 or instructor's consent.
Taught	Fall

Course Outcomes

Conceptualizing EconGeog

Identify and discuss the basic concepts and theoretical frameworks in Economic Geography

Patterns and Trends

Recognize and explain spatial patterns and trends of economic activities

Data and Methods

Data: Locate, acquire, clean-up and use secondary economic data
Methods: Use various geographic tools of analysis to understand and visualize geographic trends and patters

Spatial Reasoning

Use spatial quantitative reasoning to identify (and possible suggest viable solutions to) global problems/issues

Top

Urban Geography

History and theory of urban development, including why cities exist and how cities function.

GEOG 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Understanding Human Settlement as it Relates to Planning

Demonstrate knowledge of the social sciences (history, economics, sociology, political science, anthropology, psychology, and geography) as they relate to human settlements including knowledge of the social and spatial structure of urban and regional systems, local public finance, economics of development, infrastructure provision, and effects of globalization.

Top

Political Geography

Spatial analysis of global politics; focus on geopolitics, territory and conflict, nationalism, and the politics of resources.

GEOG 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Geographic Literacy

Identify where all of the countries of the earth are located along with other important political entities, cities and capitals

Global Awareness

Become an informed reader of a daily international newspaper

Geographic and Political Linkages

Understand the linkages between geography (territory, location, resources etc) and political actions and processes.

Nationalism

Define and assess the relative importance of forces of conflict and cooperation among peoples, societies and states as they influence the division and control of the Earth's surface

Establish World Peace

Use written and oral communication to describe, evaluate and resolve territorial disputes between states and nations (people/minority groups).

Top

Population Geography

Spatial perspective on wide field of population studies, focusing on distribution, development, structure, and movement of populations, emphasizing basic demographic measures.

GEOG 346

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Geog 100 or instructor's consent.
Taught	Winter

Course Outcomes

Conceptualize

Distinguish and critically evaluate basic concepts and ideas in population geography

Demographic Data

Obtain, evaluate, and use demographic data

Methods

Learn about and use various demographic methods

Analyze

Analyze demographic data in order to answer important geographic questions

Context

Situate your own life within the context of larger demographic patterns and trends

Tourism: A Conceptual Framework

Introduction to tourism as a field of study; four elements of tourism: dynamic, service, functional, and consequential.

GEOG 347

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Learning Outcome #1

gain an understanding of how geographers approach the study of travel and tourism using basic geographic concepts (e.g. location, place, diffusion, etc.)

Learning Outcome #2

acquire an understanding of the geographical issues in the theory and practice of tourism.

Learning Outcome #3

idenify and explain the historical "tourism benchmarks" that influenced the geography and nature of travel and tourism.

Top

Tourism: Patterns and Analysis

Patterns in domestic and international tourism; interrelationship between geography and tourism in understanding the patterns and their impact.

GEOG 348

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Learning Outcome #1

Gain an overview of global travel patterns.

Learning Outcome #2

Use a conceptual framework to explain and understand global travel patterns.

Learning Outcome #3

Understand why some people travel and others do not.

Learning Outcome #4

Understand the interrelationships between geography and tourism.

Learning Outcome #5

Understand the impact of tourism on various regions / areas of the world.

Global Adventure Travel

Historical and emerging trends in global adventure travel and tourism. Detailed case studies selected from across world regions.

GEOG 349

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

LO1

Following this course the student should be able to discuss the spatial and historical origins of adventure travel including connections early geographical exploration.

LO2

Following this course the student should be able to discuss and outline current geographic patterns in adventure travel--where, when, by whom, and why?

LO3

Following this course the student should be able to apply core geographic principles to case studies involving the evolution of adventure travel in specific places.

LO4

Following this course the student should be able to give specific examples of the impacts on places that have undergone transformations resulting from their emergence as popular adventure travel destinations.

Tourism Planning

Applying regional development and planning concepts, principles, and approaches to tourism destinations to enhance sustainable economic, ecological, and social development.

GEOG 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 347.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcome #1

Define and explain key concepts and issues concerning tourism planning and tourism public policy.

Learning Outcome #2

Critically evaluate several important tourism planning approaches and models.

Learning Outcome #3

Identify key elements of demand and supply in tourism planning.

Learning Outcome #4

Identify key stakeholders involved in tourism planning and policy-making.

Learning Outcome #5

Understand the economic, environmental, social, and political aspects of tourism planning and assess government and industry roles and responsibilities in tourism planning and policy-making.

Learning Outcome #6

Critically analyse and evaluate tourism planning and policy issues.

Heritage and Cultural Tourism

Heritage and culture (places, people, relics, and traditions) as tourism resources examined within the context of supply and demand, conservation, interpretation, management, planning, and politics.

GEOG 353

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 120, 130, 347, 348.
Taught	Winter

Course Outcomes

Learning Outcome #1

Identify the concepts, theories and approaches geographers use in the study of heritage and cultural tourism. Expalin the role geography plays in this sub-discipline.

Learning Outcome #2

Explain why heritage attractions exist using geographic principles and concepts, including the factors of supply, demand and the reasons for conservation. Identify the various reasons why heritage sites are created and what this tells us about society.

Academic Internship

On-the-job experience.

GEOG 399R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	GEOG 100
Note	3 hours required. No more than 3 hours total in cooperative education may be counted in major.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship

Complete a supervised internship in an employment setting or agency related to geography.
Link academic learning with these professional experiences.
Complete a minimum of 45 hands-on hours per credit.

Top

Urban Planning Methods

Applications of methods and techniques commonly used in the urban planning process, emphasizing data collection and analysis, fieldwork, and writing skills.

GEOG 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 310.
Taught	Winter

Course Outcomes

Understanding the History and Theory of Urban Planning

Demonstrate planning methods that anticipate and envision future changes to society and the built environment, such as knowledge of forecasts, risk assessment, futures scenarios and other tools for creating plan alternatives. (PAB 4.2.2d)

Possess the Skills Needed to Practice Planning

Use numerical reasoning and computation skills to conduct quantitative analysis of social and geographic information for basic professional planning purposes, problems and projects. (PAB 4.2.3d.
Use forecasts and scenarios to anticipate and describe future changes in society and the built environment. (PAB 4.2.3g)

Top

Issues in Computer Cartography

Current techniques for compilation, integration, and display of digital map data.

GEOG 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 312
Taught	Winter Contact Department

Course Outcomes

Application Development

Use programming to develop a geospatial application that integrates GIS, Remote Sensing, and Cartography.

Web Map Design

Design effective maps and interactive web interfaces to serve a particular audience and purpose.

Lifelong Learning

Learn new skills, technologies, and techniques on your own, using a variety of learning resources.

Advanced Geographic Information Systems

Performing geographic tasks in resource management decision support and scientific research using spatial data management and analysis tools and techniques.

GEOG 412

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	GEOG 212 & GEOG 311
Recommended	Geog 222.
Taught	Fall Contact Department

Course Outcomes

Geographic Data Management

Obtain or create geographic data that is appropriate for a particular GIS need, and manage that data using technologies that are appropriate for that need.

Analysis Procedures

Evaluate geographic tasks (both scientific and managerial), and develop and implement analysis procedures to solve them.

Continued Learning

Independently learn and implement new tools and procedures.

Top

Remote Sensing 2

Computer processing of low-altitude and satellite images for geographic analysis of physical and cultural phenomena on earth.

GEOG 413

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 313
Taught	Winter

Course Outcomes

Outcome 1

Understand and implement remote sensing pre-processing techniques.

Outcome 2

Perform image classification and evaluate classification accuracy.

Outcome 3

Understand and perform change detection.

Outcome 4

Complete an entire remote sensing project from beginning to end.

Applied Urban Environmental Modeling

Complexities of urban environment through use of geographic techniques, including remote sensing, GIS, GPS, aerial photo and map interpretation, and fieldwork. Modeling human impact on the physical environment by examining local case studies and completing group projects. Developing and building technical skills as tools in understanding the urban environment.

GEOG 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 212, 213, 313.
Taught	Winter Contact Department

Course Outcomes

Complex urban environments

Understand the complexity and heterogeneity of the urban environment.

Geospatial technologies

Use Geographic Information Systems and remote sensing to map the biotic and abiotic components of the urban environment.

Model urban processes

Use geospatial technologies to map and model complex urban processes.

Geographic Field Methods

Learning different methods used by geographers in the field through hands-on involvement in real faculty research.

GEOG 415R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	GEOG 101
Taught	Spring Contact Department, Summer Contact Department

Course Outcomes

Field Work and the Scientific Method

Practice the scientific method, including developing research questions, conceptual framework, research design, sample collection, and data analysis

Communication skills

Communicate scientific research by developing a professional-quality poster and presentation

Urban Planning Law

The political and legal context within which urban planning takes place.

GEOG 421

Hours	2.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 310.
Taught	Fall

Course Outcomes

Understanding Human Settlements

Demonstrate knowledge of constitutional rights and principles, state and local government law, administrative rules and regulations, especially those focusing on the use and taxation of land. (PAB 4.2.1d)

Understanding the History and Theory of Urban Planning

Explain the laws and policies relating to environmental planning and the principles and scientific support for assessing the capacity of natural and built resources. (PAB 4.2.2h)

Understand the different values and ethical standards affecting the practice of planning

Demonstrate ability to comprehend and discriminate among the goals that an individual, group, community and organization holds when considering the future including the values of justice, equity, fairness, efficiency, order and beauty. (PAB 4.2.4a)
Demonstrate ability to assess and choose among different forms of democratic decision making that support and improve the quality of plans and planning related activity including the values of fair representation, equal opportunity and non-discrimination. (PAB 4.2.4b)
Demonstrate ability to compare and respect the complex social, historical and ecological legacies that accompanies urban settlement across the globe including the values of social equity, cultural and historical preservation and environmental conservation and sustainability. (PAB 4.2.4c)

Top

Principles of Urban Design

Theories and principles of urban design emphasizing specific design criteria. Planning and design tools used within the U.S. by local government. Basic principles of architecture and landscape architecture. Field trips.

GEOG 422

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 310.
Taught	Fall

Course Outcomes

Possess the Skills Needed to Practice Planning

Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations.

Understanding Human Settlements

Demonstrate knowledge of the design arts (architecture, landscape architecture, art, urban design) including knowledge about the relationship between the design of the built environment and its functional, aesthetic and social precedents and consequences.

Planning for Unique and Sensitive Lands

Unique aspects of land affecting land-use planning positively or negatively depending on sensitivity of design. Landscape ecological principles introduced and examined for usefulness in land-use planning.

GEOG 423

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 310.
Taught	Winter

Course Outcomes

Understanding Human Settlements

Explain the environmental sciences (biology, ecology, environmental studies) including knowledge about ecological and physical systems in relation to human activity at different geographic scales.

Possess the Skills Needed to Practice Planning

Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations. (PAB 4.2.3c)

Top

Urban Transportation Planning

Theories and principles of transportation planning emphasizing environmental, energy, economic, and social issues.

GEOG 424

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 310, 410.
Taught	Winter

Course Outcomes

Understanding Human Settlements

Demonstrate knowledge of the social sciences (history, economics, sociology, political science, anthropology, psychology, geography) as they relate to human settlements including knowledge of the social and spatial structure of urban and regional systems, local public finance, economics of development, infrastructure provision and effects of globalization. (PAB 4.2.1a)

Understanding the History and Theory of Urban Planning

Demonstrate knowledge of the institutions that both shape and respond to plans and planning-related activities: including knowledge of the economic, social and political institutions that influence planning and that are susceptible to purposeful change. At a minimum this study should include institutions across scale (e.g. local to global) and sector (e.g. public, private and nonprofit). (PAB 4.2.2c)

Top

Seminar in Geography and Geospatial Intelligence 1

Capstone seminar, part 1, for students in geospatial intelligence emphasis, emphasizing synthesis of material learned in major and application of knowledge and skills through research project.

GEOG 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall

Course Outcomes

Components of intelligence

Describe the use of intelligence collection (e.g. SIGINT, HUMINT), as welll as structured methods of analyzing the collected data. These are critical thinking methods. Be able to write intelligence reports (dissemination) at an introductory level. To a large extent, this is competence in all areas traditionally called the intelligence cycle.

The intelligence community

Understand the intelligence community in the US, with special emphasis on deficiencies and the need to improve it in accordance with 9/11 commission recommendations. Understand the need for intelligence in a time of continuing symmetric and assymetric threats. Be able to list the qualities required in an intelligence officer. Describe the ethics of an intelligence officer.

All-source intelligence.

Demonstrate the need for all-source Intelligence as well as how to gather it, analyze it, and disseminate it. Students will be able to write reports (of entry level quality) from deep-search all-source intellligence.

National security

Be able to discuss the major national security threats of the US as well as the actors of those threats. This will be done both topically (e.g. WMD) as well as by discussing current events (e.g. IS in Iraq). Students will also be able to analyze threats to national security as well as compose threat assessments of professional quality (given limited open-source data).

Top

Seminar in Geography and Geospatial Intelligence 2

Capstone seminar part 2 for students in geospatial intelligence emphasis, emphasizing synthesis of material learned in major and application of knowledge and skills through research project.

GEOG 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 441
Taught	Winter

Top

Special Problems

GEOG 493R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Geography major or departmental approval.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Special Topics

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in geography.

Supported learning

Students will learn to investigate a problem on their own with the support of a faculty member.

Mentored Research

Participating in research integrating material learned in major. Emphasizes individual or collaborative research and creative thinking through active learning and reflective analysis.

GEOG 495R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentored Research

Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

Learning on your own

Students will learn to investigate a problem on their own with the support of a faculty member.

Top

Seminar in Geography

Detailed investigation of selected systematic and regional geographic topics.

GEOG 501R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Topical expertise

Students will become familiar with current topics in this content area.

Collaboration

Within the seminar environment, students will build and strengthen their ability to collaborate while they develop understanding in the content area.

Participation & Writing

Students will learn the value of consistent class participation through class discussions and written work that is peer-reviewed.

Geographic Information Systems

Using geographic information for solving advanced spatial problems. Introduction to using and producing maps and computer-based geographic information systems (GIS) as geographic tools. Hands-on research applications in the students' disciplines.

GEOG 503

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Graduate standing.
Note	For nonmajors who have not taken Geog 211 or 212 or equivalent.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

GIScience

Understand basic spatial concepts and data models that form the foundation of GIS.

GIS Applications

Describe several applications in which GIS is used to solve geographic problems.

GIS Analysis

Analyze data using GIS to solve real world problems.

Data Management

Acquire geospatial data from common sources and manipulate them for a specific application.

Cartography and Visualization

Design and use maps to explore and communicate geospatial information.

Top

Professional Planning Studio

Assessing problem and issue identification, goal formulation, data gathering, synthesis and summary, plan concept and format, and public policy adoption while writing a general plan for a community in Utah.

GEOG 510

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Geog 410.
Taught	Fall

Course Outcomes

Problem solving

Use problem solving skills to select, diagnose and solve relevant aspects of a complex planning problem including attention to the needs and interests of diverse stakeholders and the guidance provided by conceptual and empirical expertise. (PAB 4.2.3a)

Community Connection

Work with diverse communities, especially communities consisting of disadvantaged groups and persons and racial and ethnic minorities, or immigrant communities. (PAB 4.2.3i)

Plan implementation

Use techniques for the adoption and implementation of plans including relevant regulations, incentives, techniques and technologies. (PAB 4.2.3h)

Plan preparation

Use ideas about the creation of plans, programs or projects to prepare an individually crafted product for a specific planning purpose and audience; demonstrating skill and judgment preparing a planning project that meets minimum professional standards. (PAB 4.2.3f)

Collaboration

Collaborate with peers in joint learning activities organized to produce a plan or planning product for a relevant professional clientele, to mediate disagreements, to interpret contested purposes, and to negotiate between diverse and competing interests. (PAB 4.2.3e)

Communication

Use written, oral and graphic skills to compose clear, accurate and compelling text, images and maps in documents and oral presentations. (PAB 4.2.3c)

Geographic Information Practicum

Integration of various geographic technologies to solve a practical problem. Advanced topics in GIS, remote sensing, cartography, and programming as needed.

GEOG 521R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOG 212 & GEOG 217
Recommended	Geog 222, 311, 312, 313, 317, 412.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Practicum

Students will learn integration of various geographic technologies to solve a practical problem using advanced topics in GIS, remote sensing, cartography, and programming as needed.

Application Development

Use programming to develop an geospatial application that integrates GIS, Remote Sensing, and Cartography.

Web Map Design

Design effective maps and interactive web interfaces to serve a particular audience and purpose.

Lifelong Learning

Learn new skills, technologies, and techniques on your own, using a variety of learning resources.

Dinosaurs

Hands-on examination of vertebrate fossils -- especially dinosaurs. For nonscience majors. Field trips.

GEOL 100

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer

Course Outcomes

Relationship between Science & Religion

Be able participate in meaningful discussions on the relationships of science and religion.

Deep Time, Diversity of Life, Plate Tectonics

Confidently explain the relationships between deep time, the diversity of life, and plate tectonics.

How Science Works

Be able to explain how science works via examples from geology and paleontology.

Awe & Wonder

Have an infectious sense of awe and wonder for today's biotic and abiotic realms as part of an ever-changing Earth.

Genealogy of the Dinosauria

Using cladistic methods be able to explain the basic phylogenetic relationships within Dinosauria, including birds.

Top

Introduction to Geology

Cultural focus on physical and environmental geology for nonscience majors; rocks and minerals. Field trips.

GEOL 101

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Fall, Winter, Summer
Offered	Honors also.

Course Outcomes

Rocks and Minerals

1. Understand the difference between minerals and rocks.
2. Be able to identify common rocks and minerals.
3. Know where and when the basic rock and mineral types form and how they are related to the hydrologic and tectonic systems.

Rocks and Minerals

1. Understand the difference between minerals and rocks.
2. Be able to identify common rocks and minerals.
3. Know where and when the basic rock and mineral types form and how they are related to the hydrologic and tectonic systems.

Hydrologic System

1. Understand how the hydrologic system helps to shape the Earth and how the different sub-systems interact.
2. Learn the reasons for climate change in both ancient and modern times.

Hydrologic System

1. Understand how the hydrologic system helps to shape the Earth and how the different sub-systems interact.
2. Learn the reasons for climate change in both ancient and modern times.

Tectonic System

1. Learn the basic evidences and ideas that support the Theory of Plate Tectonics.
2. Understand how the plate tectonic system works, including the role of the different types of plate boundaries and the forces that help to drive the system.
3. Learn how the plate tectonic system has helped to shape the Earth's surface.

Tectonic System

1. Learn the basic evidences and ideas that support the Theory of Plate Tectonics.
2. Understand how the plate tectonic system works, including the role of the different types of plate boundaries and the forces that help to drive the system.
3. Learn how the plate tectonic system has helped to shape the Earth's surface.

Geologic Time

1. Gain a greater insight into the enormous length of geologic time and the evidences that support this claim.
2. Learn the different ways that scientists can determine geologic ages.

Geologic Time

1. Gain a greater insight into the enormous length of geologic time and the evidences that support this claim.
2. Learn the different ways that scientists can determine geologic ages.

Other Planets

Learn how and why the other planets and moons in our solar system are different from Earth.

Other Planets

Learn how and why the other planets and moons in our solar system are different from Earth.

Top

Geological Field Studies

Outdoor examination of geological processes via afternoon canyon hikes and other hands-on activities.

GEOL 102

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For nonscience majors.
Taught	

Course Outcomes

Rocks and Minerals

1. Understand the difference between minerals and rocks.
2. Be able to identify common rocks and minerals.
3. Know where and when the basic rock and mineral types form and how they are related to the hydrologic and tectonic systems.

Hydrologic System

1. Understand how the hydrologic system helps to shape the Earth and how the different sub-systems interact.
2. Learn the reasons for climate change in both ancient and modern times.

Tectonic System

1. Learn the basic evidences and ideas that support the Theory of Plate Tectonics.
2. Understand how the plate tectonic system works, including the role of the different types of plate boundaries and the forces that help to drive the system.
3. Learn how the plate tectonic system has helped to shape the Earth's surface.

Geologic Time

1. Gain a greater insight into the enormous length of geologic time and the evidences that support this claim.
2. Learn the different ways that scientists can determine geologic ages.

Top

Life of the Past

Cultural focus on historical geology for nonscience majors; fossils. Field trips.

GEOL 103

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Climate and the Earth System

Chemical, physical, and biological processes shaping the Earth's surface and climate, emphasizing quantitative methods for measuring and evaluating contemporary climate and environmental changes relative to the last several thousand years.

GEOL 108

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Fundamentals

Define and describe the components and dynamics of Earth's climate system.

Climate Change

Discuss the causes (forcings) of climate change, the natural response of the many components of Earth's climate system to those forcings, and the interactions and feedbacks among these components.

Climate History

Evalute the evidence for and causes of climate change throughout Earth's history and assess the role of greenhouse gases within the climate system at multiple time scales (from tectonic-scale changes to anthropogenic changes).

Quantitative Reasoning

Quantify the response of the climate system to changes in climate forcings through problem sets and laboratory experiments. Use these results to critically evaluate climate sensitivity and climate change over time.

Geology of the Planets

Origins and distinctive histories of the planets in our solar system as revealed by study of their surface features.

GEOL 109

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For nonscience and science majors.
Taught	Winter

Course Outcomes

Scientific Method

Learn to piece together new information, draw inferences, reexamine older geological theories based only on our terrestrial experience, and formulate new theories about the way planets behave and how they originated. Finally, you may be able to propose novel ways to test these new ideas.

History of the Solar System

Be able to reconstruct the histories of the planets, their moons, and other bodies.

Geology Fundamentals

Understand the fundamental principles of geology by studying the development of the planets in the solar system.

Life on Earth

Gain a greater appreciation of how our own planet functions and why it is uniquely suited for life.

Top

Geological Science Laboratory

Minerals, rocks, and landforms; the use of topographic and geologic maps; the interpretation of aerial photos.

GEOL 110

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	GEOL 101
Taught	Fall, Winter

Course Outcomes

Geological Materials

1. Learn the basic mineral types, how they form, and how they differ structurally.
2. Understand how minerals are put together to form rocks.
3. Learn the names and how to recognize the basic sedimentary, igneous, and metamorphic rock types.

Hydrosphere

1. Understand the basic atmospheric and hydrologic systems and how they affect the Earth's rocks. Demonstrate this by completing lab activities treating this subject.
2. Learn how man has influenced these systems and what the possible future outcomes of this influence might be.

Tectonic Sytems

1. Learn the basic workings of the Earth's tectonic system and the evidences that support the plate tectonic theory. Successfully complete lab activities that elucidate these concepts.
2. Understand how to interpret geologic structures and rocks in terms of the tectonic system.

Science and Society

1. Understand the nature of fossil fuel resources, their origin, and the magnitude of reserves of coal, oil, natural gas, etc.
2. Understand the nature of metallic resources, including their origin, distribution across the globe, and the magnitude of reserves.
3. Appreciate the environmental consequences of fossil fuel and metallic resource extraction.
4. Become aware of the major hazards posed by earthquakes, volcanic eruptions, and their attendant phenomena.
5. Understand the fundamental processes that regulate the climate, as well as the role of human activity in climate change.
6.Complete lab activities that demonstrate the relationship between geological processes and human activities.

Top

Physical Geology

Materials, structure, and surface features of the earth and the geologic processes involved in their development. Field trips and lab studies, use of aerial photos.

GEOL 111

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Earth Materials

1. Learn the basic mineral types, how they form, and how they differ structurally.
2. Understand how minerals are put together to form rocks.
3. Learn the names and how to recognize the basic sedimentary, igneous, and metamorphic rock types.

Dynamics of the Hydrosphere

1. Understand the basic atmospheric and hydrologic systems and how they affect the Earth's rocks.
2. Learn how man has influenced these systems and what the possible future outcomes of this influence might be.

Dynamics of the Tectonosphere

1. Learn the basic workings of the Earth's tectonic system and the evidences that support the plate tectonic theory.
2. Understand how to interpret geologic structures and rocks in terms of the tectonic system.

Writing

Learn some fundamental skills in preparation to conduct research and ultimately write research papers in other classes, including:
1. Using online databases (GEOREF, Web of Science) to obtain information on a particular topic.
2. Using online resources (Refworks) to manage and format references.
3. Reading articles in the primary geologic literature and drawing out primary information such as the topic of and article and its conclusions even if the student is not prepared (at this stage) to understand the methodology employed.
4. Appreciate the need to properly format cited literature in a research paper.
5. Learn the content and proper voice for the abstract of a research paper.

Introduction to Earth Systems and Heat Transfer

1. Learn or review the large scale features of the Earth's interior and exterior, including the basic

features of the tectonic and hydrological systems.
2. Appreciate the role of heat transfer, and in particular convection, in making both the hydrosphere and tectonosphere dynamic.

Geology, the Environment, and Humankind

1. Understand the nature of fossil fuel resources, their origin, and the magnitude of reserves of coal, oil, natural gas, etc.
2. Understand the nature of metallic resources, including their origin, distribution across the globe, and the magnitude of reserves.
3. Appreciate the environmental consequences of fossil fuel and metallic resource extraction.
4. Become aware of the major hazards posed by earthquakes, volcanic eruptions, and their attendant phenomena.
5. Understand the fundamental processes that regulate the climate, as well as the role of human activity in climate change.

Top

Historical Geology

Developmental history of the earth, its landforms, and life forms, emphasizing the North American continent. Field trips and lab studies.

GEOL 112

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	GEOL 111
Taught	Winter

Course Outcomes

Fundamentals

Demonstrate understanding of the fundamentals of uniformitarianism and the scientific methods for determining the relative and absolute ages of Earth materials and events.

Sedimentary Rock Record

Demonstrate a basic understanding of the origin and historical significance of sedimentary rocks. Be able to identify common clastic and non-clastic sedimentary rock types in hand sample and on outcrop. Be able to determine the depositional environment from rock type and outcrop pattern. Understand the age and significance of Sloss' depositional sequences.

The Record of Life

Be able to recognize the nature and mode of fossil preservation. Be able to identify the major invertebrate fossil groups and signify the environmental significance of each. Use fossils to recognize the age of sedimentary strata.

Descent with Modification

Demonstrate a basic knowledge of organic evolution including the key concepts of natural selection and its role in producing the fossil record. Be able to explain the evidence that led Darwin to the theory of natural selection as well as post-Darwinian discoveries.

Ecological Evolution

Understand that modern Earth is a product of the coevolution of the biosphere, lithosphere, atmosphere, and hydrosphere over 4.6 billion years of earth history. Demonstrate knowledge of key biological, depositional, tectonic, and climatic events in the context of the geological timescale.

Geological Maps

Be able to decipher the geological history of an area from a geological map.

Communicating Science

Demonstrate mastery of a scientific concept and ability to convey that concept to a body of peers using PowerPoint and/or other professional means.

Historical Geology Lab

Applying fossils, rocks, stratigraphy, correlation, and geologic maps to interpret Earth's history.

GEOL 113

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Geol 103 or concurrent enrollment.
Taught	Winter

Course Outcomes

The Record of Life

Be able to recognize the nature and mode of fossil preservation. Be able to identify the major invertebrate fossil groups and signify the environmental significance of each. Use fossils to recognize the age of sedimentary strata.

Geological Maps

Be able to decipher the geological history of an area from a geological map.

Top

Field Studies

Procedures in observing, collecting, and recording field data concerning properties of rock units.

GEOL 210

Hours	3.0 Credit, 0.0 Lecture, 9.0 Lab
Prerequisites	GEOL 111 & GEOL 112
Note	Contact Geological Sciences Department before April 15 for dates of upcoming August trip.
Taught	Fall

Course Outcomes

Geologic Tools

Learn how to take accurate and complete field notes.
Learn how to use a compass to measure strike and dip on outcrops in the field.
Learn how to read topographic and geologic maps and relate the map to what you see in the field.

Rock and Minerals

Review rocks and minerals learned in earlier courses and be able to accurately identify them in the field.
Understand the relationships between igneous rocks and minerals and magmatic processes.
Understand the relationships between metamorphic rocks and minerals and the processes that formed them.
Understand the significance of sedimentary rocks in understanding depositional systems and regional tectonics.

Collecting and Interpreting Geologic Data

Learn the basics of making a geologic map.
Learn how to interpret the geology on a map to draw a geologic cross-section.
Write up the results of data you collected along with your interpretation in a clear, consise manner.

Field Observation

Become detailed observers of field geology

Utah's National Parks

Understand the formative processes of the geology of Utah's National Parks including Zion NP, Bryce Canyon NP, and Capitol Reef NP.

Landscape Evolution

Develop an understanding of the interelationships of stratigraphy, structural geology, and surficial processes on landscape evolution.

Geological Communications

Introduction to writing within the discipline and designing and creating publishable geologic maps and illustrations. Tools include ArcGIS, Adobe Illustrator, and Photoshop. Student portfolio initiated.

GEOL 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOL 111
Taught	Fall

Course Outcomes

Use Software Tools

Become proficient in using the leading software tools including ArcGIS, Illustrator, Photoshop, Acrobat, and MS Excel.

Apply Software Tools to Geology

Design and create publishable geologic maps,illustrations, figures, and tables from geologic data and models.

Quantitative Analysis

Analyze geologic data through basic statistical techniques and simple numerical models.

Scientific Writing

Write concise, scientific descriptions of geologic data and illustrations.

Top

Geology for Engineers

Geological processes and materials bearing on engineering practices. Field trips.

GEOL 330

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Earth Materials

1. Learn the basic mineral types, how they form, and how they differ structurally.
2. Understand how minerals are put together to form rocks.
3. Learn the names and how to recognize the basic sedimentary, igneous, and metamorphic rock types.
4. Understand the structural and engineering aspects of these materials.

Hydrosphere Dynamics

1. Understand the basic atmospheric and hydrologic systems and how they affect the Earth's rocks.
2. Learn how man has influenced these systems and what the possible future outcomes of this influence might be.

Tectonic Systems

1. Learn the basic workings of the Earth's tectonic system and the evidences that support the plate tectonic theory.
2. Understand how to interpret geologic structures and rocks in terms of the tectonic system.
3. Understand geological hazards and engineering concerns related to the operation of the tectonic system.

Geology and Mankind

1. Understand the nature of fossil fuel resources, their origin, and the magnitude of reserves of coal, oil, natural gas, etc.
2. Understand the nature of metallic resources, including their origin, distribution across the globe, and the magnitude of reserves.
3. Appreciate the environmental consequences of fossil fuel and metallic resource extraction.
4. Become aware of the major hazards posed by earthquakes, volcanic eruptions, and their attendant phenomena.
5. Understand the fundamental processes that regulate the climate, as well as the role of human activity in climate change.

Top

Mineralogy

Principles of crystallography and crystal chemistry. Physical, chemical, and crystallographic properties of minerals.

GEOL 351

Hours	4.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	MATH 112; Chem 105 or 111 or concurrent enrollment.
Taught	Fall

Course Outcomes

Fundamentals

Demonstrate understanding of the fundamental ideas that govern the arrangement of atoms into a crystalline structure (chemical bonding, atomic size, coordination number, polymerization of polyhedra, bond strength and bond valence, stability, etc.)

Symmetry of Crystals

Demonstrate a basic understanding of atomic level symmetry. Enumerate and describe the crystal systems in terms of both symmetry and unit-cell metrics, recognize symmetry elements in well-formed natural crystals, and determine crystal classes of such crystals.

Instrumental Methods

Describe the applications and limitations of important instrumental/analytical methods used in mineralogy.

Mineral Identification

Identify specimens of the 60-70 most common minerals at least 70% of the time.

Phenomena

Demonstrate an understanding of the mechanisms and implications of various mineralogical phenomena, including solid solution, exsolution, polymorphism, atomic ordering, polytypism, color, and twinning.

Relationships

Discuss the interrelationships among crystallography, composition, and the physical properties of minerals.

Application

Demonstrate the ability to apply principles learned to minerals not specifically encountered in the

course.

Computer Software

Use computer software for reduction of mineralogical data and be able to discuss its limitations.

Scientific Inquiry and Writing

Demonstrate the ability to work in teams to collect and analyze mineralogical data and incorporate it into an original, high quality research paper on an assigned subject of mineralogical significance.

Top

Petrology

Compositions, fabrics, and field relations of igneous and metamorphic rocks; behavior of rock-forming systems. Field trips.

GEOL 352

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	GEOL 210 & GEOL 351 & CHEM 105; or GEOL 210 & GEOL 351 & CHEM 111
Taught	Winter

Course Outcomes

Magma Generation and Evolution

Explain how magmas form and differentiate at divergent and convergent plate boundaries and at mantle plumes.

Metamorphism

Describe how metamorphic rocks form and their relationships to global tectonics.

Petrography

Identify the minerals and rock types using hand samples and thin sections of the major rock types.

Top

Sedimentology and Stratigraphy

Erosion; sediment entrainment, transport, and deposition; depositional systems and facies analysis; principles of stratigraphy. Field trips.

GEOL 370

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	GEOL 112 & GEOL 210 & GEOL 230
Taught	Winter

Course Outcomes

Application of Concepts

Apply problem solving, critical thinking, and communication skills relative to depositional models and interpreting the stratigraphic record.

Depositional Systems

Understand depositional systems, facies relationships, and introductory aspects of sequence stratigraphy.

Process Sedimentology

Discuss processes and forces that weather, transport, and deposit sedimentary grains under both sunaqueous and subarial conditions.

Rock Classification

Observe and describe sedimentary rocks objectectively. Gain the ability to communicate using appropriate scientific vocabulary.

Top

Structural Geology

Geometric, kinematics, and dynamic analysis of tectonic structures. Several studies will be conducted in the field.

GEOL 375

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	GEOL 210 & GEOL 230 & MATH 112; Geol 351 or concurrent enrollment; Phscs 105 or concurrent enrollment.
Taught	Fall

Course Outcomes

General Statement of Course Objectives

My goal is for each of student to learn to become a part of the ongoing conversation about how Earth's crust deforms. This means learning the language of structural geology and using it to share the discoveries they make for themselves. Discoveries in structural geology come through applying best-fit kinematic and dynamic models to geometric reconstructions of observed geological structure. The discovery is complete when they are communicated effectively through writing, illustrations and oral presentation.

Identify in the field and interpret the major deformational

1. Identify and measure brittle Structure (extensional and shear fractures, fault-related folds)
2. Identify and measure ductile Structure (flow folds, cleavage, foliation and rock fabrics)

Conduct a geometric structural analysis

1. Acquire reliable measurements of the geometry of structures with a compass
2. Present and manipulate data using stereographic projection
3. Interpret stress and kinematic histories from structural measurements
4. Infer geometry of subsurface and missing parts of structures from measurements in order to construct a viable geologic cross-section.

Conduct a kinematic structural analysis

1. Identify and interpret sense-of-shear indicators associated with both brittle and ductile structures in the field
2. Reconstruct the deformation path of a structural feature or deformed region

Conduct a Dynamic Sturctural Analysis

1. Derive the normal and shear stress components for rock failure from lab data.
2. Use these results to derive the constituitive equations for deformation
3. Quantify the contribution of each deformational mechanism in a region.

Forecast the next major earthquake along the Wasatch Fault

1. Measure the orientation, slip rate and direction of the Wasatch Fault
2. Combine these measurements with GPS and EDM results on strain accumulation rates
3. Determine the most likely location and magnitude of the next large earthquake along the Wasatch Fault.

Societal relevance of structural geology

1. Use structural data to predict the best location to drill for water, oil and gas.
2. Use structural data to predict the location of mineral resources
3. Use structural data to predict the environmental impact of toxic waste disposal

Top

Academic Internship

GEOL 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Experience

Gain experience in a real world work or research lab that will strengthen your understanding of the concepts learned in class.

Applied Mathematics in the Geological Sciences

Provides a broad survey of mathematical methods that are relevant for geological problems. Focuses on casting geological problems in mathematical terms and solving them. Strong emphasis on setting up equations and on the quality of written solutions.

GEOL 405

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MATH 113 & GEOL 111
Recommended	Geol 230.
Taught	

Course Outcomes

Mathematical Methods

Determine appropriate mathemathical methods to solve a given geological problem.

Mathematical Solutions

Set up equations describing geological problems and solve them symbolically.

Quantitative Reasoning

Discuss the relevance of a given quantitative solution to our understanding of the geological system of interest.

Mathematical Presentation

Present quantitative solutions in a logical, understandable manner emphasizing the geological relevance of the problem.

Geomorphology and Remote Sensing

Interpretive analysis of landforms and their geologic significance. Use of aerial/satellite images of Earth and other planets, topographic/bathymetric maps, multi-wavelength image data. Field trips.

GEOL 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOL 111; or GEOL 330
Taught	Fall

Course Outcomes

Form and Process

Understand the relationships between landscapes and the processes that created them

Interpretation of Landscape

Develop an ability to read and interpret geology and geomorphology from topographic maps, air photos, and satellite data

Quantifying Process

Become comfortable with quantitative analyses of landforms and geomorphic processes

Change over Time

Acquire an appreciation for the unique and complex way the landscapes of Earth and the planets evolved to their present-day morphologies

Top

Geological Field Methods

Introduction to methods used to collect and interpret field data in a variety of geologic and environmental investigations. Extensive hiking requires students to be physically fit.

GEOL 420

Hours	2.0 Credit, 0.0 Lecture, 16.0 Lab
Prerequisites	GEOL 352 & GEOL 370 & GEOL 375; concurrent enrollment in Geol 421 and Geol 422.
Taught	Spring

Course Outcomes

GEOL 420 - Geologic Field Mapping

1. Measure and describe a "section" of sedimentary strata, and subdivide the section into lithostratigraphic units.
2. Interpret rock features in context of sedimentary depositional models.
3. Collect and interpret structural data, including attitudes of contacts, fractures, faults, fold hinge lines and dip domains, cleavage and foliation, lineations and estimates of strain and paleostress directions.
4. Evaluate fluid flow in the context of structural features (e.g. faults and joints).

Geological Mapping

Application of field procedures and mapping techniques to a variety of geologic problems. Synthesis of geologic principles leading to the construction and interpretation of geologic maps.

GEOL 421

Hours	2.0 Credit, 0.0 Lecture, 16.0 Lab
Prerequisites	GEOL 352 & GEOL 370 & GEOL 375; concurrent enrollment in Geol 420 and Geol 422.
Taught	Spring

Course Outcomes

GEOL 421 - Geological Mapping

1. Demonstrate proficiency in basic mapping skills, such as locating formational contacts, measuring strike and dip, and drawing a map and cross-section.
2. Map, describe and interpret a suite of metamorphic rocks.
3. Map, describe and interpret intrusive and extrusive igneous rocks

Top

Geologic Writing

Preparation of professional geologic reports and illustrations using digital tools.

GEOL 422

Hours	2.0 Credit, 0.0 Lecture, 16.0 Lab
Prerequisites	GEOL 352 & GEOL 370 & GEOL 375; concurrent enrollment in Geol 420 and Geol 421.
Taught	Spring

Course Outcomes

GEOL 422 - Scientific Writing

1. Produce a synthesis report describing the rock column, structural styles, and geologic history of the field mapping area in the context of plate tectonics.
2. Create professional figures using ArcGIS and Illustrator.
3. Demonstrate increased proficiency in the student's chosen career pathway by participating in deeper learning experience.

Top

Senior Thesis

Faculty-supervised research on a project of limited scope. Project is chosen and completed by the student. Written and oral presentation of findings required.

GEOL 430

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	GEOL 352 & GEOL 370 & GEOL 375
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research Experience

1. Gain a greater understanding of your area of interest by working on a mentored research project under the supervision of a faculty member.
2. Learn better writing and communication skills by compiling your research into a senior thesis.

Top

Introduction to Groundwater

Introduction to the occurrence, movement, and properties of subsurface water; surface and groundwater relationships.

GEOL 435

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOL 111; or GEOL 330; Math 110 or equivalent.
Taught	Fall

Course Outcomes

Water budgets

Demonstrate knowledge of the hydrologic cycle by creating a basin-scale water budget.

Darcy's law

Evaluate the relationship between grain size, sorting, and hydraulic conductivity using Darcy's Law.

Groundwater level measurements

Produce a potentiometric surface map and water table map for a well field.

Physics of groundwater flow

Evaluate the relationship between mechanical energy, hydraulic head, and force potential.

Flow nets

Construct a flow net to describe groundwater flow.

Aquifer tests

Evaluate different aquifer test methods for calculating aquifer parameters.

Groundwater recharge

Evaluate different methods for estimating groundwater recharge rates.

Groundwater flow paths

Describe groundwater flow paths for confined and unconfined aquifers.

Basin hydrogeology

Produce a consulting-type report that synthesizes the groundwater resources, flow paths, and

aquifer characteristics of a basin.

Top

Solid Earth Geophysics

Physics of the earth, including earthquake seismology. Gravity, seismic, magnetic, electrical, and heat flow properties and methods.

GEOL 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 106 & MATH 112 & GEOL 111
Taught	Winter

Course Outcomes

Physics of the Earth

Understand the fundamental principles of plate motions, seismic waves, gravity, magnetics, heat flow, and mantle convection

Problem Solving

Develop the ability to analyze processes in Earth's interior and on its surface through use of mathematics and problem solving

Science Writing

Become comfortable with reading scientific papers, analyzing their content, and writing summaries of your analyses

Earth as a Planet

Acquire an appreciation for the unique and complex processes in Earth's interior and the resulting surface manifestations and implications for development of life

Geochemistry

Applying elementary chemical principles to understand geologic processes and materials.

GEOL 445

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 106 & CHEM 107 & GEOL 352; or CHEM 112 & GEOL 352
Taught	Winter

Course Outcomes

Mathematical Competence

Students will mathematically describe geochemical fractionation, mixing, kinetics, transport, and equilibrium.

Chemical Computation

Students will solve geochemical problems both analytically and using computer software.

Scientific Writing

Students will improve their scientific writing skills.

Petrography to Petrogenesis

Principles of optical mineralogy and their application to the identification of minerals in thin section Petrographic analysis and its relation to rock-forming processes in igneous, metamorphic, and sedimentary rocks.

GEOL 452

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	GEOL 351 & GEOL 352
Taught	Winter even years

Course Outcomes

Petrography to Petrogenesis

Demonstate the ability to use the petrographic microscope to identify the common rock-forming minerals.
Demonstrate the ability to use the petrographic microscope to determine 2V and other optical parameters to determine mineral compositions.
Demonstate a familiarity with the common textures and microstructures of igneous and metamorphic rocks and understand the petrogenetic implications of these textures/microstructures.

Economic and Resource Geology

Nature and genesis of metallic and non-metallic mineral deposits, including laboratory study of economic minerals. Field trips.

GEOL 460

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	GEOL 352
Taught	Winter

Course Outcomes

Ore Mineralogy

Identify important ore-forming minerals, textures, and structures in hand sample and in the field.

Ore Genesis

Compare and contrast the principal ore-forming processes: magmatic, hydrothermal, and sedimentary.

Ore Deposit Models

Use observed characteristics of an ore deposit to develop a genetic model for its origin.

Resource Exploration Strategies

Develop an exploration strategy for an ore deposit based on a genetic model.

Top

Introduction to Seismic Interpretation

Fundamental techniques; analyzing seismic reflection data. Reviewing fundamentals of seismic trace and geologic implications. Basic mapping of subsurface structure and stratigraphy.

GEOL 476

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOL 370 & GEOL 375
Taught	Fall

Course Outcomes

What is a seismic wavelet?

Understand and able to explain what a reflection wavelet is. i.e. polarity, phase and amplitude

2D Interpretation

Able to identify and interpret, using colored pencils, seismic reflectors on a set of intersecting 2D seismic lines.

Geologic Implications

Uses geologic knowledge to infer structure and stratigraphy from seismic reflection data.

Spatial Intelligence

Develop three-dimensional thinking skills.

Facetime I

Able to coherently and concisely prepare and present technical presentations from:
1) Scientific articles
2) Seismic interpretation and research

Contouring

Generation of a hand-drawn time-structure map using the interpretation generated in Learning Outcome "2D Interpretation"

3D Interpretation

Learning of 3D interpretation software. Able to interpret 3D data and generate digital time-

structure map.

Top

Paleontology

Distribution, morphology, paleoecology, evolution, and stratigraphic significance of organisms in the geologic record. Field trips.

GEOL 480

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	GEOL 112
Taught	Fall

Course Outcomes

Fundamentals

Demonstrate understanding of the nature of fossils and types of fossilization that turn organic remains into fossils.

Nature of the Fossil Record-Taphonomy

Be able to explain the incompleteness of the fossil record and the taphonomic processes that affect fossils between death and burial and burial and discovery.

Taxonomy and Morphology

Be able to recognize the major groups of invertebrate fossils on the basis of their morphology and be able to identify key index fossils to the species level.

Uses of Fossils

Demonstrate understanding of the uses of fossils in solving geological problems: paleoenvironments, relative age, paleocology.

Evolution

Understand the role of fossils in demonstrating the patterns of evolution through time.

Short Courses

Short, undergraduate-level courses and extended field trips offered on an irregular basis.

GEOL 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

In-depth Study of Special Topics

Gain a greater understanding of a particular geologic topic.

Geology Seminar

Seminar on various geologic topics by guest speakers.

GEOL 491R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Broad Geological Knowledge

Demonstrate familiarity with diverse topics in geological sciences addressed by a series of seminar speakers.

Meet Leading Geoscientists

Interact with geoscientists that have specialized in disciplines of interests of like-minded students.

Top

Career Pathways Seminar

Seminar on graduate school and career opportunities by guest speakers.

GEOL 492R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Geology 492R - Career Pathways Seminar

LEARNING OUTCOMES:

- Students will become familiar with career options in various sub disciplines within the geological sciences.
- Students will learn and be exposed to networking skills for career opportunities.
- Students will attend 70 % of the seminars offered this semester and write a one page summary of the topic discussed at each seminar attended.

Geological Research

Conducting original research under faculty supervision. Project must be approved before registration or starting project.

GEOL 497R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research Experience

Learn research methods and techniques through faculty mentored research.

Honors Thesis

GEOL 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

The Scientific Method

1. Be able to design a scientific study that involves the collection, analysis, and interpretation of data.

Thesis

Complete a thesis that describes and contextualizes original observational and/or theoretical work in the geosciences.

Scientific Literacy

1. Be able to frame a scientific problem within the current literature on that subject.
2. Be able to conduct a search for publications on a particular topic.

Field and Lab Methods

1. Demonstrate competence in data collections.
2. Become familiar with the analytic techniques germaine to the Honor's thesis.

Scientific Writing

Learn some fundamental skills in preparation to conduct research and ultimately write research papers in other classes, including:
1. Using online databases (GEOREF, Web of Science) to obtain information on a particular topic.
2. Using online resources (Refworks) to manage and format references.
3. Reading articles in the primary geologic literature and drawing out primary information such as the topic of and article and its conclusions even if the student is not prepared (at this stage) to understand the methodology employed.
4. Appreciate the need to properly format cited literature in a research paper.
5. Learn the content and proper voice for the abstract of a research paper.

Top

(Geol-Chem-C S-Math-MthEd-Phscs-Stat) Business Career Essentials in Science and Math

Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

GEOL 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Global Geology Field Studies

In-depth study of classic geologic localities, such as Hawaii, the Bahamas, and the Appalachians, preliminary to on-site field study.

GEOL 504R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Any senior-level geology course; instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

GEOL 504R - Global Geology Field Studies

Course Learning Outcomes

- Students will apply their understanding of geologic principles in unique and specific settings found across the Earth.
- Students will learn how to carry out field studies in their type locale.
- Students will acquire an understanding of, and interact with people of, different cultures, political conditions and geography in the setting of geologic studies unique to those regions in the world.

Borehole Geophysics and Geology

Applied well log analysis, including conventional and new techniques. Subsurface geology and lithology determined from many logs. Determining porosity, permeability, and fluid saturation with hydrology, and hydrocarbon applications.

GEOL 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Recommended	Phscs 105, 106, Geol 351, 370; or equivalents.
Taught	Winter

Course Outcomes

Learning Outcome 1

Understand the theoretical basis of well-logging tools that recover information about subsurface rocks and their fluids.

Learning Outcome 2

Be able to interpret the results of well-logging operations.

Learning Outcome 3

Have real-world experiences in classroom and outdoor “lab” settings that will mimic a professional environment.

Petroleum Systems Analysis

Properties of petroleum; exploration methods; generation and migration of hydrocarbons, reservoirs, traps, and seals; sedimentary basin classification; energy resources. Extended field trip required.

GEOL 525

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Geol 370 or equivalent.
Taught	Fall even years

Course Outcomes

Ingredients of a Petroleum Sysytem

Understand the 5 critical ingredients of any petroleum accumulation. Understand to a basic level how these 5 criteria are risked in an economicic evaluation of any proposed well. Understand the dynamics and interconnectivity of a petroleum system.

Resource Categorization

Understand the variety of conventional and non-conventional resource plays. Understand some of the technologies required to produce these resources.

Term Presentation

Investigate and present to peers the hydrocarbon system of a significant petroleum field or play.

Sedimentary Basin Classification

Understand sedimentary basin types as dictated by their tectonic setting. Under, to a basic level, the hydrocarbon potential of these various basins and the variables that determine their potential or lack of potential. Understand the importance of looking for the exception to the rule.

Geological Communications Laboratory

Designing and creating a variety of student-selected geological illustrations emphasizing maps and cross-sections.

GEOL 530

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent; graduate status.
Taught	Fall

Course Outcomes

Learn Software Tools

Become proficient in using the leading software tools including ArcGIS, Illustrator, Photoshop, Acrobat, and MS Excel.

Apply Software Tools to Geology

Design and create publishable geologic maps, illustrations, figures, and tables from geologic data and models.

Quantitative Analysis

Analyze geologic data through basic statistical techniques and simple numerical models.

Scientific Writing

Write concise, scientific descriptions of geologic data, illustrations, and analyses.

Top

Geoscience Data Analysis

Basic scientific computing skills in MATLAB, and application of statistical and numerical modeling techniques to geoscientific problems.

GEOL 531

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Stat 121 or equivalent.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Contaminant Hydrogeology

Principles, tools, and applications used to solve heavy metal, organic, and radionuclide groundwater contamination problems. Topics include regulations, mass transport, multiphase flow, transformation, retardation, and attenuation.

GEOL 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Geology 435 or equivalent.
Taught	Winter odd years

Course Outcomes

Fundamentals of Fate and Transport

1. Learn the fundamental processes by which contaminants are transported in groundwater, including: diffusion, advection, and dispersion.
2. Understand process that delay or limit contaminant transport, including: sorption, reaction, decay (chemical and radioactive), and colloid transport.
3. Learn the fundamentals of tranport in the vadose zone, as well as multiphase flow.
4. Appreciate the processes involved in the transport of inorganic (including radionuclides) and organic compounds.
5. Understand the fundamental principles of ground water monitoring, site characterization, and remediation, including the major federal laws that govern such actions.

Principles of Glaciology

Geophysical problems involving ice in the environment and its role in global change. Topics include atmospheric ice, snow pack, glaciers, ice sheets, sea ice, permafrost, and ice age theories.

GEOL 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Fundamentals

Describe the components of the cryosphere, their geographical extent, and their physical and chemical properties.

Applied Physics and Chemistry

Apply principles of physics and chemistry to quantify the formation of ice in the environment, mass and energy budgets of cryospheric components, dynamics of large ice masses, and the processes and rates of landscape evolution that result from ice dynamics.

Relevance

Evaluate the role of the cryospheric components in global environmental change and discuss the importance of cryospheric change on society.

Quantitative Analysis

Demonstrate the ability to quantify cryospheric formation, dynamics, sensitivities, and interactions through rigorous numerical problem sets and laboratory exercises.

Scientific Inquiry, Writing, and Oral Presentation

Demonstrate the ability to work in teams to collect and analyze glaciological data, incorporate it into an original, high quality research poster on a student-chosen topic of significance, and present the research and results orally in a poster session.

Top

Isotope Geochemistry-High Temperature Applications

Use of stable and radioactive isotope systematics in geochronology in investigation of the origins of igneous and metamorphic rocks and in the study of tectonics.

GEOL 545

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Geol 352 or equivalent.
Taught	Fall odd years

Course Outcomes

Isotope Fundamentals

1. Appreciate the structure of nuclides as the relate to radio-, radiogenic, and light stable isotopes.
2. Learn to use the chart of the nuclides.
3. Learn mechanisms and fundamental equations governing decay and ingrowth of nuclides.

Evolution of Radiogenic Nuclides in the Earth and Solar Syst

1. Understand the relationship between chemical fractionation and the evolution of isotope ratios in the Rb/Sr, Sm/Nd, and U/Pb systems. By ANALOGY, students will be prepared to understand Re/Os, Lu/Hf, K/Ca, etc should the need arise.
2. Understand the isotopic evolution of these systems in the solar system, bulk earth, rock bodies, and individual minerals.
3. Appreciate how these systems can be employed as geochronometers, and perhaps more importantly, as tracers of earth processes in the crust and mantle.

Evaluation of Multi-Component Systems

1. Learn the fundamentals of mixing, or mixing and assimilation combined with fractionation when confronted with isotope ratios of two systems, or isotope ratios and elemental abundances.

Geochronology and Thermochronology

1. Review some of the most commonly applied (and state-of-the-art) geochronometers, including: 40Ar/39Ar, U-series, 14C, 3H, and 210Pb. Emphasis changes from semester to semester based on the research goals of enrolled graduate students

Light Stable Isotopes

Understand the fundamental processes that lead to isotopic fractionation among the light stable isotopes, including:

1. Temperature-dependent equilibrium processes.
2. Kinetic fractionations.
3. Distillation.
4. Biological fractionation in plants, animals, and microorganisms.
Conduct a survey of the major applications of C, N, O, H, and S isotopes in geologic, hydrologic, and climate studies.

Seminar Days

On selected class periods throughout the semester, individual class members present, and all class members read, scientific papers that highlight the application of one or more isotope systems that have been discussed. This enables students to:
1. Learn how others have applied isotopic methods to understand how processes occur in nature.
2. Deepen their understanding of the principles discussed in class.
3. Learn to critically read, discuss, and present the findings of others.

Top

Isotope Geochemistry-Low Temperature Applications

Use of stable, radioactive, and radiogenic isotope systematics in geochronology and in investigation of the origins of fluid, sediment, and organic matters in low temperature settings.

GEOL 546

Hours	3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	Geol 445 or equivalent.
Recommended	Geol 435.
Taught	Fall even years

Course Outcomes

Real-World Problem Solving

Students will design, implement, and report on a geochemical investigation.

Scientific Writing

Students will write a competently organized and executed scientific report.

Top

Environmental Soil Chemistry

Chemistry of soil systems at macroscopic and microscopic scales, examined from the perspective of scientists interested in environmental assessment and remediation.

GEOL 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chem 105, 106, 107; or equivalents.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Scientific Writing

Students will competently organize and write a scientific report.

Chemistry Fundamentals

Students will demonstrate the ability to apply fundamental chemical principles (equilibrium, kinetics, redox) to soil systems.

Knowledge of Soil Chemistry

Students will demonstrate familiarity with the identity and behavior of the main chemical species that control soil-chemical conditions.

Environmental Impact

Students will demonstrate knowledge of environmental impacts of soil contamination, and associated remediation strategies.

Advanced Mineralogy

Crystallography, structure, and crystal chemistry of major silicate mineral groups.

GEOL 551

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Geol 351 or equivalent.
Taught	Winter Contact Department

Course Outcomes

Crystal Chemistry

Students will demonstrate mastery of the principles of crystal chemistry, using the concepts of atomic size, valence, and electronic structure to explain the distribution of elements in the Earth.

Structural Chemistry

Students will be able to predict the structural characteristics of minerals based on the concepts of atomic size, valence, and electronic structure.

Mathematical Crystallography

Students will demonstrate a basic understanding of mathematical crystallography.

X-Ray Diffraction

Students will demonstrate a basic knowledge of Powder X-Ray Diffraction techniques and software.

Igneous Petrology

Origin and evolution of magmas, emphasizing trace element and isotopic compositions and intensive properties as calculated from mineral compositions.

GEOL 552

Hours	3.0 Credit, 4.0 Lecture, 3.0 Lab
Prerequisites	Geol 352 or equivalent.
Taught	Fall odd years

Course Outcomes

Volcanology

Identify the nature and causes of volcanic eruptions.

Petrotectonics

Understand the link between tectonic setting and igneous rock composition.

Minerals and Intensive Parameters

Explain how mineral compositions can be used to deduce intensive parameters

Analytical Geochemistry

Understand the use of analytical equipment and interpretation of analytical data

Petrologic Modeling

Develop quantitative skills using calculations in a spreadsheet to model igneous processes.

Presentation Skills

Refine ability to make oral and written presentations.

Top

Metamorphic Petrology

Principles of metamorphism, including chemical equilibrium and thermodynamics of metamorphic reactions, geothermobarometery, origin and interpretation of zoned metamorphic minerals, pressure-temperature paths, and metamorphism of pelites, mafic, ultramafic and carbonate rocks. Additional subjects based on interest of the students.

GEOL 553

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	GEOL 352
Taught	Fall even years

Course Outcomes

Metamorphic Petrology

Understand the relationships between tectonic settings and metamorphic facies.
Demonstrate an understanding of the thermodynamics of metamorphic reactions.
Understand how mineral zoning can be used to interpret changing metamophric conditions.
Understand the use of analytical equipment and interpretation of analytical data.
Develope the quantitiative skills using thermobarometic calculations to determine metamorphic P-T paths.

Volcanoes and Ore Deposits

Examination of the role of volcanic rocks and processes in the generation of ore deposits.

GEOL 555

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Geol 352 or equivalent.
Taught	Fall even years

Course Outcomes

Volcano Types

Understand the major types of volcanic eruptions and volcanoes

Volcanoes in the Field

Explain how outcrop characteristics can be used to deduce eruption processes and volcano evolution

Quantitative Skills

Develop quantitative skills using calculations in spreadsheets to model magmatic processes

Scientific Literature

Refine ability to make read and understand scientific literature

Reflection Seismology Theory

Principles, tools, and methods used in seismic geophysics, with exploration, engineering, environmental, and hydrological applications.

GEOL 560

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Recommended	Geol 375, Phscs 105, 106; or equivalents.
Taught	Fall

Course Outcomes

Learning Outcome 1

Introduction tothe seismic method, especially for the reflection case.

Learning Outcome 2

Provide a quantitative and theoreticalunderstanding of how the seismic method operates.

Learning Outcome 3

Enable students to comprehend how reflection data are acquired, processed, and interpreted.

Learning Outcome 4

Process seismic reflection data acquired by USGS/ BYU using state-of-the-art tools.

Top

Geophysical Field Methods

Geophysical data acquisition processing and computer-assisted interpretation, emphasizing field deployment techniques, use of commercial data processing, and visualization software.

GEOL 561

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Recommended	Geol 375, Phscs 105, 106; or equivalents.
Taught	Fall Contact Department

Course Outcomes

Learning Outcome 1

Become expert at using an exploration seismograph and ground-penetrating radar (GPR) for subsurface surveying.

Learning Outcome 1

Become expert at using an exploration seismograph and ground-penetrating radar (GPR) for subsurface surveying.

Learning Outcome 2

Be able to design and supervise a seismic/GPR survey.

Learning Outcome 2

Be able to design and supervise a seismic/GPR survey.

Learning Outcome 3

Have real-world experiences in mostly outdoor “lab” settings that will mimic a professional environment.

Learning Outcome 3

Have real-world experiences in mostly outdoor “lab” settings that will mimic a professional environment.

Learning Outcome 4

Become acquainted with basic data processing and modeling software tools.

Learning Outcome 4

Become acquainted with basic data processing and modeling software tools.

Top

Special Topics in Geology

The following topics may be offered on demand: geology for teachers, ore deposits, solid-water interface chemistry, X-ray crystallography.

GEOL 565R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Specific Competence

Demonstrate competence in a specific topic within the geological sciences.

Sedimentology and Ecology of Modern Carbonate Systems

Field course in the Caribbean emphasizing factors that produce carbonate sediments. Investigation of tidal flat to off-shore barrier reef environments and Pleistocene outcrops.

GEOL 571

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Geol 370 or equivalent.
Taught	Winter Contact Department

Course Outcomes

Fundamentals

Demonstrate an understanding of the origin and meaning of carbonate sediments as contrasted with their siliciclastic counterparts by studying them in the field.

Petrography

Be able to identify and interpret the meaning of basic carbonate grain types in modern carbonate sediment from the Bahamas and South Florida.

Depositional Environments

Collect and interpret samples from a range of modern tropical carbonate depositional environments including ooid shoals, tidal flats, reefs, lagoons, tidal channels, and open shelves.

Carbonate Sequence Stratigraphy

Be able to interpret the stratigraphy and facies of late Pleistocene parasequences as seen in outcrop and in subsurface GPR profiles.

Diagenesis

Understand the diagenetic potential of modern carbonate sediments and the processes that turn them to rock as well as the effects of meteoric water on Pleistocene outcrops.

Top

Advanced Stratigraphy

Studying the stratigraphic record through modern methods of correlating stratal packages, emphasizing concepts of sequence and seismic stratigraphy, and utilizing methods of chronostratigraphy, biostratigraphy, lithostratigraphy, and absolute dating. Extended field trip required.

GEOL 574

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Geol 370 or equivalent.
Recommended	Geol 480.
Taught	Winter even years

Course Outcomes

Sequence Stratigraphy

Understand the vocabulary and fundemental concepts of sequence stratigraphy as they apply to outcrop, core, and seismic sections. Understand how the fundementals of these concepts change when working in siliciclastic depositional systems as compared to carbonate depositional systems.

Nature of the Stratigraphic Record

A basic understanding of the stratigraphic record and the stratigraphic methods that researchers use to understand Earth history through strata. These methods include biostratigraphy, lithostratigraphy, magnetostratigraphy, seismic stratigraphy, and sequence/chronostratigraphy. The student should understand the fragmentary nature of the straigraphic record and the importance of recognizing hiatuses and unconformities.

Demonstration and Term Presentation

Students will demonstrate their understanding by working through problems associated with field trips to outcrops and core repositories. A term presentation on the sequence or seismic stratigraphy of a given unit of rock is given to further demonstrate that understanding.

Top

Advanced Structural Geology

In-depth discussions of a variety of topics in structural geology, emphasizing current literature and problems.

GEOL 575

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Geol 375, 410; or equivalents.
Taught	Winter

Course Outcomes

detailed analysis of various types of structual and tectonic

1. Use primarily the scientific literature to discover various deformational features and mechanisms at a variety of spatial and temporal scales
2. Use analog and numerical models to investigate how rocks and regions deform

Top

Three-Dimensional Subsurface Mapping and Evaluation

Advanced interpretation of 3D seismic reflection data. Integrating well and seismic data to interpret complex geologic systems. Implications for understanding hydrocarbon reservoirs.

GEOL 576

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GEOL 476
Taught	Winter

Course Outcomes

Well log Integration

Ability to relate basic well log information to seismic character and reflections.

Sum is greater

Improvement of team interaction skills to understand that teamwork yields greater insights. i.e "the sum is greater than the addition of the parts"

Facetime II

Able to coherently and concisely prepare and present technical presentations from:
1) Scientific articles
2) Seismic interpretation and research

Complex 3D Intepretation

1) Interpretation of assigned 3D dataset(s):
2) Ability to determine structural and stratigraphic history/timing.

Project management

Able to effectively:
define project objectives
define timelines for deliverables
manage time and effort to deliver/report project results

Top

Principles of Paleontology

Modern approaches to fossil study applied to areas of evolution, paleoecology, and biostratigraphy.

GEOL 580

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Geol 480 or equivalent.
Taught	Winter Contact Department

Course Outcomes

Fundamentals

Demonstrate understanding of advanced concepts in paleontology, such as biostratigraphy, paleoecology, evolution, and taxonomy with respect to specific fossil taxa.

Nature of the Fossil Record-Taphonomy

Be able to recognize the influence of physical and biological processes on fossils and be able to interpret a fossil's post-depositional history.

Taxonomy and Morphology

Be able to recognize and identify key fossil groups down to the genus and species level.

Use of Fossils

Be able to accurately determine the age, depositional setting, and diagenesis of sedimentary strata based upon fossil content and preservation.

Collections

Become familiar with techniques use by specialists in collecting, preparing, and curating a range of fossil taxa.

Top

Vertebrate Paleontology

Paleobiology, osteology, and phylogeny of the vertebrates. Field trips required. Lab studies.

GEOL 586

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Evolution of Vertebrate Paleontology

Demonstrate your understanding of how science works by writing a four page history of paleontological methodologies, including contributions of significant scientists, and how the methods evolved from the early 1800's to present.

Until death do us part - Taphonomy

Understand (1) the goals of taphonomy, (2) the basics elements of how to conduct a taphonomic analysis of a vertebrate site, and (3) the process of permineralization.

The Leg Bone is Connected to the....

Be able to identify (1) the bones in an amniote skeleton, and(2) the major histologic components of bone.

The Vertebrate Tree

(1) Understand core principles of phylogenetic systematics, (2) be able to interpret and construct cladograms, and (3), be able to explain to a peer the derived diagnostic osteologic characters for major vertebrate clades, (i.e., Craniata, Tetrapoda, Amniota, Sauropsida, Diapsida, and so on).

Field & Museum Methods

Be able to locate, collect, document, and interpret fossils in the field and curate specimens once in a repository with a level of competence equal to that of an entry-level field technician.

Relationship between Plate Tectonics and Evolution

Be able to explain to a biology graduate the impact of plate tectonics on biodiversity though deep time using examples from the fossil record and extant mammals.

Science and Religion

Be able participate in meaningful discussions on the relationships of science and religion.

Short Courses

Short graduate-level courses offered on a random basis.

GEOL 590R

Hours	1.0 - 3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Specific Competence

Demonstrate competence in a specific topic within the geological sciences, to be specified by the instructor.

Seminar

Seminar on various geologic topics by guest speakers.

GEOL 591R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Total of 1 credit hour required.
Taught	Fall, Winter

Course Outcomes

Broad Geological Knowledge

Demonstrate familiarity with diverse topics in geological sciences addressed by a series of seminar speakers.

Career Pathways Seminar

Seminar on graduate school and career opportunities by guest speakers.

GEOL 592R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years, Winter Contact Department

Course Outcomes

Geology 592R - Career Pathways Seminar

LEARNING OUTCOMES:

- Students will become familiar with career options in various sub disciplines within the geological sciences.
- Students will learn and be exposed to networking skills for career opportunities.
- Students will attend 70 % of the seminars offered this semester and write a one page summary of the topic discussed at each seminar attended.

Academic Internship

GEOL 599R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

GEOL 599R - Geology Academic Internship

Course Learning Outcomes

- The students will reflect on and process internship experiences.
- The students will utilize a significant range of skills and abilities in a professional setting
- The students will put into practice the knowledge and theories they have learned in university courses in a real-world work experience.

First-Year German

Listening, speaking, reading, writing, grammar, and culture.

GERM 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Note	For those who have had no German.
Taught	Fall, Winter, Spring

Course Outcomes

Listening and Understanding Sentence-Length Utterances

Listen and understand sentence-length utterances, primarily in face-to-face conversation about familiar topics and learned material, when strongly supported by context.

Reading and Understanding Simple Factual Texts

Read and understand main ideas and some details in simple factual texts about familiar topics.

Speaking in Simple Sentences

Speak in simple sentences to convey basic information about concrete social situations on familiar topics.

Writing Simple Sentences

Write simple sentences using basic word order and structures to express personal meaning on familiar topics.

Language Learning Strategies

Use appropriate language learning strategies to achieve both formal understanding of and communicative ability with German.

Basic Grammar Concepts

Understand and apply basic grammar concepts correctly when focused on accuracy.

Basic Cultural Awareness

Function with basic cultural awareness of cultural differences in German-speaking countries.

Top

First-Year German

Listening, speaking, reading, writing, grammar, and culture.

GERM 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	C grade or better in Germ 101 or equivalent.
Taught	Fall, Winter, Summer

Course Outcomes

Listening and Understanding Sentence-length Utterances

Listen and understand sentence-length utterances, primarily in face-to-face conversation about familiar topics and learned material, when strongly supported by context.

Reading and Understanding Simple Factual Texts

Read and understand main ideas and some details in simple factual texts about familiar topics and short literary texts.

Speaking in Simple Sentences

Speak in simple sentences to convey basic information about concrete social situations on familiar topics

Writing Simple Sentences

Write simple sentences using basic word order and structures to express personal meaning on familiar topics.

Writing Short Stories or Essays

Write short stories or essays on familiar topics using coherent sentences and paragraphs.

Basic Awareness of Cultural Differences

Function with basic awareness of cultural differences in German-speaking countries.

Language Learning Strategies

Use appropriate language learning strategies to achieve both formal understanding of and communicative ability with German.

Basic Grammar Concepts

Understand and apply basic grammar concepts correctly when focused on accuracy.

Top

Pro-Seminar 1

Introduction to German cultural studies, mentored research, and professional skills development.

GERM 115

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

Second-Year Proficiency Tutorial

Individualized skill building in listening, speaking, reading, writing, and grammar.

GERM 200R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Germ 102 or equivalent.
Note	For students in Germ 102, 201, and 202 who require additional tutorial assistance.
Taught	Fall, Winter

Course Outcomes

Language

Students will demonstrate an advanced level of knowledge and language proficency.

Top

Second-Year German

Reading, writing, grammar, culture, listening, and speaking.

GERM 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	C grade or better in Germ 102 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Speaking

- Students will be able to converse in German about everyday topics, abstract ideas about familiar topics, personal opinions, simple interpretation of text, and current events. Students will complete presentations in class.

Grammar

- Students will be able to demonstrate understanding and mastery of a wide range of grammatical structures and constructions, especially those principles presented in the designated units of the online course materials.

Reading

- Students will demonstrate their ability to read, comprehend and analyze authentic written German, including a level-appropriate longer text such as a filmscript and discover and explore grammar principles and idiomatic language in the texts.

Listening

- Students will demonstrate aural comprehension of authentic spoken German about general or everyday topics, social conversation, as well as literary German with average complexity.

Culture

- Students will demonstrate a level-appropriate knowledge of the culture and traditions of German-speaking countries, including an in-depth understanding of the significant events and issues that shaped German-speaking cultures as presented in the five films selected for this course. Students will be able to discuss, analyze and write intelligently about these events and issues in the German language.

Writing

- Students will be able to demonstrate command of level-appropriate writing, including sophisticated sentences modeled on authentic German sentences. Their writing will incorporate sentences with one or more subordinate clause, as well as accurate use of

punctuation and capitalization.

Vocabulary

- Students will demonstrate the ability to incorporate words, phrases, and idiomatic constructions into their own speaking and writing. These new vocabulary items will be drawn from films studied in this course.

Pronunciation

- Students will demonstrate enough pronuncation accuracy that native Germans who are not used to foreign speakers can understand them easily.

Integrated Language Learning

- Students will be able to demonstrate level-appropriate (Intermediate/Bi or higher) proficiency in all of the 8 basic language modalities: Speaking, Listening, Reading, Writing, Grammar, Vocabulary, Culture, and Pronunciation.

Top

Second-Year German

Culminating course for Languages of Learning requirement emphasizing culture and literature. Continued writing, grammar, listening, and speaking.

GERM 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	C grade or better in Germ 201 or equivalent.
Note	Prerequisite to all 300- and 400-level courses. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Fall, Winter, Summer

Course Outcomes

Speaking

Students will be able to converse in German about everyday topics, abstract ideas about familiar topics, personal opinions, simple interpretation of text, and current events. Students will complete presentations in class.

Grammar

Students will be able to demonstrate understanding and mastery of a wide range of grammatical structures and constructions, especially those principles presented in the designated units of the online course materials.

Reading

Students will demonstrate their ability to read, comprehend and analyze authentic written German, including a level-appropriate longer text such as a filmscript and explore grammar principles and idiomatic language in the texts.

Listening

Students will demonstrate aural comprehension of authentic spoken German about general or everyday topics, social conversation, as well as literary German with average complexity.

Culture

Students will demonstrate a level-appropriate knowledge of the culture and traditions of German-speaking countries, including an in-depth understanding of the significant events and issues that shaped German-speaking cultures as presented in the five films selected for this course. Students will be able to discuss, analyze and write intelligently about these events and issues in the German language.

Students will be able to demonstrate command of level-appropriate writing, including sophisticated sentences modeled on authentic German sentences. Their writing will incorporate

sentences with one or more subordinate clause, as well as accurate use of punctuation and capitalization.

Vocabulary

Students will demonstrate the ability to incorporate words, phrases, and idiomatic constructions into their own speaking and writing. These new vocabulary items will be drawn from films studied in this course.

Pronunciation

Students will demonstrate enough pronunciation accuracy that native Germans who are not used to foreign speakers can understand them easily.

Integrated Language Learning

Students will be able to demonstrate level-appropriate (Intermediate/Bi or higher) proficiency in all of the 8 basic language modalities: Speaking, Listening, Reading, Writing, Grammar, Vocabulary, Culture, and Pronunciation.

Top

Intermediate Conversation

Intensive vocabulary building and conversation practice. Can be fulfilled through language residency program.

GERM 211R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Germ 102 or equivalent experience.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding Teacher Instructions

· I can show I understand the teacher's instructions by doing what is required.

German Terminology

· I demonstrate my knowledge of the correct German terminology by role playing diverse practical settings and by discussions about related topics

Carry Out Research

Students wil be able to carry out research on one aspect of Germanic linguistics and ommunicate a clear synthesis and analysis of their research in both written and oral form.

Conversing about Novels

· I demonstrate understanding of contents and interpretations of a novel by participating in conversations about them.

Finding Sources for Research

Students will be able to seek sources on topics in Germanic linguistics, including journal articles, handbooks, speech recordings, etc.

Communicating Needs

· I can communicate my needs.

Annotated Bibliography

Students will be able to write an annotated bibliography.

Summarizing Reading Passages

· I can summarize reading passages.

Data, Quotes and Citations

Students will be able to identify appropriate data and useful quotes that help them support their thesis and the arguments they are making. Students will be able to introduce and cite all quotes and data properly, providing adequate and correct citations for all points they are making or ideas they are drawing on from the works of other scholars.

Explaining hard to understand Concepts

· I can explain hard to understand concepts to others.

Logical Arguments

Students will be able to argue their points and theses effective by using logical and cohesive arguments.

Synthesizing and Shareing Interpretations from Reading Passa

· I can synthesize and share my interpretation of reading passages in a novel.

Reviewing One's Own Work and that of Others

Students will become less dependent on their professor's grades, feedback and comments to improve their work. They will develop the ability to candidly evaluate their own performance and work, providing effective peer review for the work of others, identifying both the strengths and weaknesses of papers in terms of structure, form, citations, writing to the thesis, and overall organisation. To do so, students will be able to identify the key sentences in their own work and the work of others, shaping paragraphs and sections to ensure they fit with the thesis and topic of the research paper.

Express Views on Contemporary Issues

· I can express my views on contemporary issues using relevant terminology.

Using Publications as an Example for Writing Own Paper

Students will be able to draw upon published sources and the articles of others to use as examples of 1) how to organise their papers (including sections and paragraphs); 2) how to cite and incorporate data (including in tables) and the ideas of others; 3) compose a bibliography, 4) format their papers, and 4) correctly use the terminology and turns of phrased used in the field in question.

Oral Presentations

· I can give an oral presentation from prepared notes.

Pronouncing German Consonants

· I can pronounce the German consonants correctly.

Pronouncing Germal Vowels

· I can pronounce the German vowels correctly.

Stress Patterns

· I can apply the correct stress patterns.

Fluent Speech Rate

· I can speak at a fluent speech rate.

Correct Word Endings

· I can use the correct word endings (gender, case, number).

Correct Word Order

· I can use the correct word order, also in complex phrases.

Correct Verb Forms

· I can use the correct verb forms.

Words in Correct Contexts and Correct Connotations

· I can use words in the right context and with the right connotations.

Motivated to Learn German

· I am motivated to learn German and show this by giving my best each time.

Language Learning Strategies

· I know what works best for me in achieving proficiency and I can use a variety of strategies.

Using German Outside of the Classroom

· I find ways to use German outside the classroom.

Cultural Differing Viewpoints

· I keep an open mind to understand cultural differing viewpoints.

Autonomous Learning and Class Preparation

· I can learn grammar points on my own and show this by being prepared for class.

Vocabulary

· I remember vocabulary by forming useful associations with new words and use these in oral and written communication.

Top

Pro-Seminar 2

Introduction to mentored scholarly research in German cultural studies. How to apply for ORCA grants, Fulbright and other fellowships. Continued professional skills development.

GERM 215

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Students will become less dependent on their professor’s grades, feedback and comments to improve their work. They will develop the ability to candidly evaluate their own performance and work, providing effective peer review for the work of others, identifying both the strengths and weaknesses of papers in terms of structure, form, citations, writing to the thesis, and overall organisation. To do so, students will be able to identify the key sentences in their own work and the work of others, shaping paragraphs and sections to ensure they fit with the thesis and topic of the research paper.

Using Publications as an Example for Writing Own Paper

Students will be able to draw upon published sources and the articles of others to use as examples of 1) how to organise their papers (including sections and paragraphs); 2) how to cite and incorporate data (including in tables) and the ideas of others; 3) compose a bibliography, 4) format their papers, and 4) correctly use the terminology and turns of phrased used in the field in question.

Top

(Germ-Scand) German and Scandinavian Cinema

Background for understanding and appreciating the best of motion picture art in Germany and Scandinavia.

GERM 217

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	A first-year writing course.
Note	Language of instruction is English; no knowledge of German or Scandinavian languages is required.
Taught	Fall, Winter Contact Department

Course Outcomes

Analysis and Writing

Students will develop skills to allow them to view, analyze, critically interpret, and write about films that come from a wide variety of cinematic genres.

Analytic Vocabulary and Critical Skills

Students will develop an analytic vocabulary and critical skills that will allow them to participate in scholarly discussions of key cinematic texts from Nordic and German history.

Reading, Critiquing and Writing Formal Sequence Analyses

Students will be able to read, critique and write formal sequence analyses of key scenes from German and Scandinavian films.

Developing Intellectually Sound Interpretations

Students will be able to develop their own well-informed, critically provocative, and intellectually sound interpretations of different cinematic texts and be able to defend and expand these interpretations in classroom discussions and in writing assignments. A list of these specific skills can be found in the grading rubric for each of these assignments.

Increasing Cultural Literacy

Because the course is structured around a variety of historical, theoretical, and cultural questions, students will develop and demonstrate an increased cultural literacy as they grapple with questions of ideology, identity, class, race, gender and memory in the context of the German and Scandinavian cultures and film history.

Becoming more Aware of Student habits of Seeing and Thinking

As students are confronted with the startling and strange and intriguing ways that Germans and Scandinavians represent the world, they will become more aware of their own habits of seeing and thinking. In several of their written assignments and class discussions, students will demonstrate their ability to thoughtfully reflect upon these different visual practices and to engage these different ideas into meaningful dialogue.

Top

Third-Year Proficiency Tutorial

Individualized skill building in listening, speaking, reading, writing, and grammar.

GERM 300R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Germ 202 or equivalent.
Note	For students in Germ 301 and higher who require additional tutorial assistance.
Taught	Fall, Winter

Course Outcomes

Langugage

Students will demonstrate an advanced level of language proficency.

Top

Intermediate German

Integration of different aspects of language learning including speaking, listening, culture, writing, reading, pronunciation, vocabulary, and grammar. Geared toward "high-intermediate" level language learner.

GERM 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Germ 202 and/or a score of "Intermediate" or lower on the 300-Level German Placement Test.
Recommended	Germ 101, 102, 201, 202.
Note	Counts as an elective towards the German major or minor.
Taught	Fall, Winter

Course Outcomes

Increasing Vocabulary

The specific objectives of the course are:

- to greatly increase the vocabulary base by learning a multitude of expressions and applying them regularly in conversation

Becoming More Fluent

- to become more fluent speakers by practicing conversation in every class period and for at least one hour outside of class each week

Fluently reading of Authentic Literary Texts and Newspaper a

- to practice reading authentic literary texts and newspaper articles fluently. We will read one complete drama, one complete novel, a dozen short stories and articles, and several dozen poems.

Pronouncing German Correctly

- to pronounce German correctly

German History and Culture

- to deepen the understanding of German history and culture

Applying Grammar Correctly

- to become proficient by applying grammar correctly

Increasing Understanding of Spoken German

- to increase understanding of spoken German by listening to the instructor and other

students, and by listening to news broadcasts, films, DVDs, etc. for at least one hour a week.

Idioms, Vocabulary, and Learned Expressions

- to incorporate idioms, appropriate vocabulary and other learned expressions and grammar principles in oral presentations and written reports.

Top

Advanced German Language 1

Integration of different aspects of language learning including speaking, listening, culture, writing, reading, pronunciation, vocabulary, and grammar.

GERM 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	An "advanced" score on the 300-Level German Placement Test (administered in Germ 301 or 330).
Recommended	Germ 301, 330 if major language exam score is "intermediate" or lower; Study Abroad in Berlin or Vienna.
Note	Required for German major or minor. Geared toward the "advanced" level language learner.
Taught	Fall, Winter

Course Outcomes

Grammar

The student (who applies him- or herself) will build on his or her firm foundation of basic grammar by coming to understand and correctly employ more advanced principles and structures. Specifically: gender patterns, Konjunktiv I, Partizipialkonstruktionen, rules of punctuation, Ausklammerung, modal particles, and the more difficult forms of the relative clause.

Writing

The student will gain in fluency, accuracy, and idiomatic correctness in his or her writing German through frequent writing assignments, both formal and informal. The student will learn to revise based on expert feedback. The student will also gain confidence in moving between different registers or styles.

Listening

The student will become considerably more proficient at understanding spoken German as presented in the German media.

Reading

The student will gain competency in reading difficult German texts of various styles. The student will also acquire non-language-specific skills in close reading and literary analysis.

Culture

The student (including returned missionaries) will be become profoundly more familiar with modern German life by regularly watching and discussing the German news and other television/video broadcasts. The student will also become more familiar with post-war German history through select literary texts. In general, the student will become aware of German and/or European perspectives that may differ from his or her own, or that may have never even occurred to the student.

Vocabulary

The student will expand his or her vocabulary considerably by watching the German media and maintaining a vocabulary list that will be employed for certain writing assignments.

Speaking

The student will develop his or her speaking proficiency through participation in group and class discussions, although serious improvement will require extracurricular involvement on the student's own initiative. Come to *Stammtisch,* hang out at the German house, go to the weekly Filmabend, find a German-speaking partner, or best of all: go abroad on an internship or study program!

Pronunciation

The student will improve the accuracy of his or her pronunciation through repeated exposure to native German (e.g. the German news) and spontaneous pronunciation guidance in class.

Top

Advanced German Language 2

Continuation of Germ 302. Integration of different aspects of language learning including speaking, listening, culture, writing, reading, pronunciation, vocabulary, and grammar.

GERM 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GERM 302
Recommended	Germ 330; Study Abroad in Berlin or Vienna.
Note	Required for German major or minor. Geared toward the "advanced" level language learner.
Taught	Fall, Winter

Top

Advanced Conversation

GERM 311R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Germ 211R or equivalent experience.
Note	Intensive vocabulary building and conversation practice. Can be fulfilled through language residency program.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding Teacher Instruction

I can show I understand the teacher's instructions by doing what is required.

Comptemporary Issues in German

I demonstrate understanding of contemporary issues in German by participating in discussions about them.

Contents and Interpretations of Novels

I demonstrate understanding of contents and interpretations of a novel by participating in conversations about them.

Communicating Needs

I can communicate my needs.

Summarizing Reading passage

I can summarize reading passages.

Explaining Hard to Understand Concepts

I can explain hard to understand concepts to others.

Synthesizing and Sharing Intrepretations of Reading Passages

I can synthesize and share my interpretation of reading passages in a novel.

Contemporary Issues

I can express my views on contemporary issues using relevant terminology.

Oral Presentations

I can give an oral presentation from prepared notes.

Pronouncing German Consonants

I can pronounce the German consonants correctly.

Pronouncing German Vowels

I can pronounce the German vowels correctly.

Stress Patterns

I can apply the correct stress patterns.

Fluent Speech Rate

I can speak at a fluent speech rate.

Correct Word Endings

I can use the correct word endings (gender, case, number).

Correct Word Order

I can use the correct word order, also in complex phrases.

Using Correct verb forms.

I can use the correct verb forms.

Using Words in Right Context and with the Right Connotations

I can use words in the right context and with the right connotations.

Motivated to Learn German

I am motivated to learn German and show this by giving my best each time.

Language Learning Strategies

I know what works best for me in achieving proficiency and I can use a variety of strategies.

Using German outside of the classroom

I find ways to use German outside the classroom.

Differing Cultural Viewpoints

I keep an open mind to understand cultural differing viewpoints.

Autonomous Language Learning

I can learn grammar points on my own and show this by being prepared for class.

Vocabulary

I remember vocabulary by forming useful associations with new words and use these in oral and written communication.

Top

Directed Research in Lit/Film/Culture 1

Mentored research building toward honors thesis, capstone paper, or publishable paper. Continued opportunity to work on grant and fellowship applications. Professional skills development.

GERM 315

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

Directed Research in Linguistics 1

Introduction to mentored scholarly research in German linguistic studies. Focus on gathering and analyzing data. Continued professional skills development.

GERM 316

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Students will demonstrate an advanced level of knowledge in a chosen specialty area and conduct research in that area.

Top

Cultural History of German-Speaking Peoples

Culture, with listening, speaking, reading, writing, and grammar as secondary emphases. Includes International Cinema.

GERM 330

Hours	3.0 Credit, 3.0 Lecture, 1.5 Lab
Prerequisites	Germ 202 or equivalent experience.
Note	Entry course for returned missionaries or others with equivalent German language experience. Required course for obtaining language credit by examination (Germ 101, 102, 201, 311R). Prerequisite to all 400-level courses. Culminating course for Languages of Learning requirement.
Taught	Fall, Winter
Offered	Honors also.

Course Outcomes

Course Content

German 330 is meant for two different kinds of students: 1) those who have learned German in an academic setting and 2) returned missionaries.German 330 courses cater to the needs of both of these groups equally, and do not marginalize the learning needs of either group.
(Corresponds to German Literature Program Learning Objectives #1 and #2)
German 330 students will learn about multiple aspects of German cultural history. In addition to basic historical narrative, students will learn about music, art, architecture, literature, philosophy, the German language, and cultural narratives such as gender, race, class, religion, etc.
(Corresponds to German Literature Program Learning Objectives #4 and #5)
Students will be able to demonstrate their knowledge of basic historical eras and intellectual/aesthetic movements including the Carolinginian period, the Renaissance, the Reformation, the Enlightenment, Romanticism, the Revolutionary period, the Gründerzeit, Modernism, Historicism, the Weimar Republic, The Rise of Fascism, Post-War period, the Reunification, and Post-Modernism.
(Corresponds to German Literature Program Learning Objectives #4 and #5)
All students of German 330 will take the Department 300-Level Placement exam. This is the test that places students into German 301 or 302 according to their language skills. The students' scores on the placement exam will in no way affect their grade in the course. Some students may choose to use this test as their 16-credit Residency Exam. These students need to receive the appropriate forms and instructions from their professors.
(Corresponds to German Literature Program Learning Objectives #1 and #2)

Writing

(All of the below Correspond to German Literature Program Learning Objectives #3)
Students will demonstrate that they can write a coherent, logical and organized argument in formal

writing assignments that they complete each week or every two weeks.
Students will complete at least 30 pages (12-point font, double spaced) of formal academic writing over the course of the semester.
A significant portion (one fourth to one half or more) of the writing should be in German.
A 5-7 page final research paper or a significant re-write of a previously-written paper will be required for all 330 students.
All 330 students will complete a final exam in addition to their final paper.

Presentations

(All of the below Correspond to German Literature Program Learning Objectives #3)
Each 330 student will be required to give at least one presentation in front of the entire class. If these reports are in German, the evaluation of language skills will only make up a small fraction of the grade (5-10%). The rest of the grade will evaluate the student's organization, research, argument, intellectual rigor, relevance, presentation skills, power point, visual aids, etc.
The Professor will spend dedicated time in class instructing students about the basics of an acceptable academic oral presentation, and provide the students with detailed grading criteria that insure a high quality of student presentations.
Students will be responsible for the information that they learn from their fellow students' presentations. This will be evaluated through papers, in-class essays, interviews, or some other means to be decided by the instructor.

Research

(Corresponds to German Literature Program Learning Objective #3 and #5)
Each 330 student will be required to complete advanced library and bibliographic research in some aspect of the course.

Honors

(Corresponds to German Literature Program Learning Objectives #3 and #5)
Each 330 course will include a 330H honors section. Students in these sections will be required to participate in some sort of extra research project, such as the Sophie Project of mentored student learning. As per the instructions from University Honors, Honors students should not just complete more of the usual assignments for the regular section of the 330 class, rather they should participate in a unique research experience.

Writing About Literature

Methods of literary interpretation. Reading, writing, and research skills integral to the literary analysis expected in German major or minor courses.

GERM 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fills GE Advanced Written and Oral Communication requirement.
Taught	Fall
Offered	Honors also.

Course Outcomes

Articulating Interpretive Ideas

Articulate their interpretive ideas in class discussions, written assignments and class presentations. (Class discussions, homework, presentations) [Outcomes 3, 5]

Analyzing Theoretical and Literary Texts

Deeply analyze theoretical and literary texts of varying genres, critically asking questions of the texts in order to produce their own individual interpretation. (Homework, class discussions, final paper) [Outcome 5]

Library and Online Research

Conduct serious library and online research and build a correct bibliography on the topic of their seminar paper. (Homework, final paper) [Outcome 3]

Seminar Paper

Write an original, significant, persuasive seminar paper which interprets some aspect of a text from the class readings, and which is presented in correct MLA format. (Homework, final paper) [Outcomes 3, 5]

Introduction to Literary Analysis

Close reading of texts; examining various critical theories and their application to German prose, drama, poetry, and film. Preparation for 440R - 445R sequence. Includes International Cinema.

GERM 343

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	None
Recommended	Germ 302, 303, 330, 340.
Taught	Fall, Winter
Offered	Honors also.

Course Outcomes

Theoretical and Critical Approaches

- Identify the basic premises, goals and questions used by the proponents of different theoretical approaches such as Formalism, Reader Response criticism, Structuralism, etc. [Measures: Quizzes, final exam] #4
- Isolate basic ideas from the different critical approaches studied in the course and apply them to the primary literature assigned in the class (novels, stories, films, poetry, etc.) [Measures: Homework, final exam, papers] #4,5
- Choose a specific literary text from a pre-determined selection and analyze it from the perspective of one or more critical approaches. [Measures: Papers, Final exam] #3,4,5

Negotiating Complext Secondary Texts

Demonstrate in their Toolbox assignments that they can negotiate complex secondary texts, skim the parts that are less useful to them, and extract useful quotes that will help in their reading and interpretation of texts. [Measures: Homework] #3,5

Top

Introduction to Phonetics

Perfecting listening and speaking skills through applying phonetics and acoustic analysis; practicing speaking and listening.

GERM 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Germ 301, 302, 303, 330.
Taught	Fall, Winter

Course Outcomes

Principles of Phonetics

Understand and be able to describe the general principles of phonetics, e.g., what the difference is between stops, fricatives, nasals, how voicing is produced, the parts of the articulatory tract, etc.;

German Phonetic and Phonemic Systems

be able to describe the German phonetic and phonemic system and how it differs from the native language (i.e., English) and be able to provide the names of each of the sounds in both English and German;

Pronunciation Refinement

have eliminated phonemic errors (wrong sounds) and further refined their own pronunciation (reducing or eliminating foreign accent);

International Phonetic Alphabet

be able to use IPA (International Phonetic Alphabet) to transcribe the German language;

Articulation of German Phonemes and Allophones

be able to describe the articulation of the German phonemes and allophones;

Evaluating and Improving Pronunciation

be able to employ the tools learned in class to both evaluate and improve their own pronunciation of German as well as the pronunciation of others (including but not limited to articulatory explanations, rudimentary acoustic analysis, etc.);

Improving General Proficiency

have taken the opportunity to improve their general proficiency, including grammar, vocabulary, cultural knowledge and functional ability;

Describing and Evaluating Variation in Spoken German

be able to describe and evaluate variation in spoken German by both native and non-native speakers.

Top

Field Studies in German

Field studies to help develop mastery of study abroad specific skills such as research data gathering, ethnographic observation, interviews, as well as intensive understanding of art and architectural history, drama and musical performances, investigations of cultural differences, etc.

GERM 345R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Study abroad, internship, or direct enrollment only.
Recommended	Germ 102.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Methods in Teaching German

Developing meaningful and engaging instruction for secondary students in German; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

GERM 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Germ 303, 344, FLang 276 for teaching majors and minors.
Taught	Fall, Winter

Course Outcomes

Expected Learning Outcomes:

1. Demonstrate an understanding of current theories of second language acquisition research.
2. Design unit and daily lesson plans in alignment with the *World-readiness Standards for Learning Languages* and ACTFL Proficiency Guidelines.
3. Create lesson segments that reflect theory and practice.
4. Design performance-based assessments.
5. Use technology as a tool for professional development and to promote student learning.
6. Develop the ability to reflect on their teaching, student learning and to make changes as warranted.
7. Be an active professional participant in the field of language teaching.

Top

Practicum in Teaching German

Implementing meaningful and engaging instruction for secondary students in German; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

GERM 378

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	concurrent enrollment in Germ 377.
Taught	Fall, Winter

Course Outcomes

Learning Outcomes

1. Recognize effective strategies of foreign language teaching.
2. Demonstrate how to design lesson plans based on the *World-readiness Standards for Learning Languages* and ACTFL Proficiency Guidelines.
3. Demonstrate how to teach effective lessons based on the *World-readiness Standards for Learning Languages* and ACTFL Proficiency Guidelines.

Top

Academic Internship: German Work

On-the-job ten-week summer language experience in German-speaking countries. Report required.

GERM 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Not applicable to German major or minor.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Work-related skills

In their final reports and interviews, students who have completed German 399R will be able to demonstrate the following:
Students will be able to identify a list of five work-related skills that they learned during their internship experience.

Increasing knowledge of technical language

Students will be able to provide a list of work-specific vocabulary and technical terms that they learned over the course of their internships.

Awareness of increased competitiveness

Students will be able to articulate specific ways that their internship has made them more competitive in the employment market including experience, improved language skills, specific job skills, networking opportunities, etc.

Certifications and endorsements

Students will be able to explain and contextualize thelanguage certifications, endorsements and course completion documents that they have received from their host institutions.

Cultural differences

Students will be able to list specific differences between American workplace culture and the work ethic, practices and ideas they learned in a German-language working environment.

Fourth-Year Proficiency Tutorial

Individualized skill building in listening, speaking, reading, writing, and grammar. Open to students of all levels. For graduating seniors, completed portfolios reviewed, and final proficiency examination administered.

GERM 400R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Required for one credit in one of final two semesters for graduating seniors.
Taught	Fall, Winter

Course Outcomes

Polishing and Improving German Language Skills

1. Under the direction of the instructor, prepared students will define areas of language competency in which they are weak and will work at their own pace to polish and improve these German language skills.
2. Under the direction of the instructor, graduating students will prepare for the Senior Proficiency Exam by defining areas of language competency in which they are weak and working at their own pace to polish and improve these German language skills.
3. As part of the course requirements, graduating students will complete all parts of the Senior Proficiency Exam (vocabulary, reading, listening comprehension, grammar, strong verbs, OPI and WPT)
4. As part of the course requirements, graduating students will complete their student portfolios and submit them.

Directed Research in Lit/Film/Culture 2

Mentored research leading to completion of capstone paper, honors thesis, ORCA paper, or other publishable papers. Review of portfolio. Direction in submitting papers for publication, reading papers at conferences. Continued professional skills development, including how to apply for graduate school and completion of Fulbright and other fellowship applications.

GERM 415

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Students will demonstrate an advanced level of knowledge in a chosen specialty area and conduct research in that area.

Top

Directed Research in Linguistics 2

Introduction to mentored scholarly research in German linguistic studies. Focus on conducting linguistic research and writing about the results of linguistic studies. Continued professional development skills.

GERM 416

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Students will demonstrate an advanced level of knowledge in a chosen specialty area and conduct research in that area.

Top

German Literary Periods and Movements

In-depth study of a period or movement such as medieval, Renaissance, baroque, eighteenth century, romanticism, classicism, realism, fin-de-siecle Vienna, naturalism, expressionism, post-war, or contemporary.

GERM 440R

Hours	1.0 - 5.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	Germ 302, 303, 330, 340, 343.
Taught	

Course Outcomes

Reading, Understanding and Synthesizing Sophisticated German

Students in German seminars will demonstrate that they are able to do the following:
Read, understand and synthesize sophisticated German-language primary and secondary texts (unless the course is being taught in English).
(Corresponds to German Program Learning Outcomes 1 and 5)

Participating in Class Discussions

Participate actively in class discussions, having completed reading and writing assignments.Answer questions about the text and to provide insight that contributes to the course discussion.
(Corresponds to German Literature Program Learning Objectives #4 and #5)

Speaking and Writing about Intellectually Challenging Topics

Wherever possible, use German to speak and write about intellectually challenging topics.
(Corresponds to German Literature Program Learning Objectives #1 and #2)

Oral Presentations

Provide organized and insightful oral presentations that demonstrate good public speaking skills and a knowledge of technology and etiquette
(Corresponds to German Literature Program Learning Objectives #3)

Using Secondary Articles to Illuminate Primary Texts

Use ideas and terms from theoretical texts and cultural and historical information from secondary articles to illuminate a primary literary text.
(Corresponds to German Literature Program Learning Objectives #4 and #5)

Final Research Paper

Write an English-language (or-voluntarily-a German-laguage) final research paper that does the following:
a) identifies a question or problem that is centered in a text
b) answers that question or problem with a hypothetical thesis statement,
c) proves that statement with a well-crafted argument.That argument consists of a series of paragraphs that substantiate specific claims made in the thesis statement and in each paragraph's easily-identifiable topic sentence.
(Corresponds to German Literature Program Learning Objective #3)

Completing Original Research

Complete original research for the research paper, properly citing all sources and including an up-to-date review of literature that shows what new insight the student is bringing to established literary scholarship.Use proper in-text citations, a works cited page, and footnotes or endnotes where appropriate, to give credit to the sources of the ideas in the paper.
(Corresponds to German Literature Program Learning Objective #3)

Top

Studies in German Literary Genres

In-depth study of a genre such as drama, novel, novella, lyric, or film.

GERM 441R

Hours	1.0 - 5.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	Germ 302, 303, 330, 340, 343.

Using Secondary Articles to Illuminate Primary Texts

Use ideas and terms from theoretical texts and cultural and historical information from secondary articles to illuminate a primary literary text.
(Corresponds to German Literature Program Learning Objectives #4 and #5)

Research Paper

Write an English-language (or-voluntarily-a German-laguage) final research paper that does the following:
a) identifies a question or problem that is centered in a text

b) answers that question or problem with a hypothetical thesis statement,
c) proves that statement with a well-crafted argument.That argument consists of a series of paragraphs that substantiate specific claims made in the thesis statement and in each paragraph's easily-identifiable topic sentence.
(Corresponds to German Literature Program Learning Objective #3)

Completing Original Research

Complete original research for the research paper, properly citing all sources and including an up-to-date review of literature that shows what new insight the student is bringing to established literary scholarship.Use proper in-text citations, a works cited page, and footnotes or endnotes where appropriate, to give credit to the sources of the ideas in the paper.
(Corresponds to German Literature Program Learning Objective #3)

Studies in Literary Theory

In-depth study of primary texts by contemporary literary theorists. May include topics such as Frankfurter school, feminist criticism, reader response, or post-structuralism.

GERM 443R

Hours	1.0 - 5.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	Germ 302, 303, 330, 340, 343.
Taught	Fall

Course Outcomes

Paradigms, Concepts and Principles of Critical Approaches

Describe at a deep level the paradigms, concepts and principles underlying the most significant critical approaches to text developed by theorists in the 20th/21st centuries. #4

Development of Modern European Philosophy

Trace the development of modern European philosophy from a focus on metaphysics to **a focus on language, and describe the significance of this change** for our modern culture, education and critical discourse.#4

Critical Vocabulary

Produce a critical vocabulary with definitions of key terms utilized in the ideas and theories under discussion.#3, 4,5

Questions to Ask by Specific Theoretical/Analytical Approach

Produce a thorough list of the kinds of questionsthat would be asked of a text by the specific theoretical/analytic approaches discussed in class. #3,4,5

Applying Critical Approaches

Apply a particular critical approach to the interpretation of a pre-selected text. #3,4,5

Applying Reading Strategies

Apply well-developed reading strategies for coping with complex, lengthy texts in order to focus on the concepts that are most valid and valuable to an understanding of what is being said. #3,4,5

Top

Interdisciplinary Studies

Studies linking German literature, film, and the arts within German culture or across national boundaries.

GERM 444R

Hours	1.0 - 5.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	Germ 302, 303, 330, 340, 343.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Reading, Understanding, and Synthesizing Texts

Students in German seminars will demonstrate that they are able to do the following:
Read, understand and synthesize sophisticated German-language primary and secondary texts (unless the course is being taught in English).
(Corresponds to German Program Learning Outcomes 1 and 5)

Participating in Class

Participate actively in class discussions, having completed reading and writing assignments.Answer questions about the text and to provide insight that contributes to the course discussion.
(Corresponds to German Literature Program Learning Objectives #4 and #5)

Speaking and Writing about Intellectually Challenging Topics

Wherever possible, use German to speak and write about intellectually challenging topics.
(Corresponds to German Literature Program Learning Objectives #1 and #2)

Oral Presentations

Provide organized and insightful oral presentations that demonstrate good public speaking skills and a knowledge of technology and etiquette
(Corresponds to German Literature Program Learning Objectives #3)

Using Secondary Articles to Illuminate Primary Literary Text

Use ideas and terms from theoretical texts and cultural and historical information from secondary articles to illuminate a primary literary text.
(Corresponds to German Literature Program Learning Objectives #4 and #5)

Research Paper

History of the German Language

Linguistic survey of the German language from Indo-European to modern times, including phonology, morphology, syntax, and lexicon.

GERM 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GERM 302 & GERM 303 & GERM 344
Taught	Fall

Course Outcomes

Basic Principles and Processes of Language Change

1. be able to discuss generally the basic principles and processes of language change regarding phonological, morphological, syntactic, lexical and semantic change;

Types of Language Change

2. be able to identify examples of such types of language change as they pertain to the history of the German language, e.g., assimilation, affrication, etc.;

Proto-Indo-European

3. be able to provide a general description of Proto-Indo-European and its relationship to its daughter languages

Changes that Distinguished Germanic from Proto-Indo-European

4. be able to identify and describe the changes which distinguished Germanic from Proto-Indo-European including Grimm's Law, Sievers' Law, accent shift, etc.

Relationship between Branches of Germanic

5. be able to describe the relationship between the three main branches of Germanic, namely Gothic, Northern Germanic and West Germanic and outline the major Germanic languages, including the West Germanic languages;

Changes Distinguishing West Germanic from other Germanic Bra

6. be able to identify and describe the changes distinguishing West Germanic from other Germanic branches;

Changes Distinguishing Germanic from West Germanic Languages

7. be able to identify and describe the changes which distinguished German from the other West Germanic languages as well as the changes from Old High German to Middle High German to

Modern German;

Main Dialects of Old High German, Middle High German, and Mo

8. be able to identify the main dialects of Old High German, Middle High German and Modern German and describe their location and distinguishing features;

External Influences that Shaped the History of the German La

9. understand and be able to describe the external influences which helped shape the history of the German language, e.g., Luther's influence, Charlemagne, the printing press, grammarians, war, trade, etc.;

German Dialects

10. can outline and discuss the meaning of the word dialect in its linguistic sense and appreciate the various dialects of German as legitimate linguistic entities of equal value;.

Why Language Changes

11. be able to describe reasons why languages change

Research

12. be able to carry out research on one aspect of the history of the Germanic languages and provide a brief and clear overview of a topic related to a change in one of the Germanic languages in both written and oral form to communicate my findings in a paper in a clear manner using primary literature (journal articles);

Seeking Sources on Topics in Germanic Linguistics

13. be able to seek sources on topics in Germanic linguistics;

Applying Learned Material to English and Other Languages

14. be able to make connections between what we learn in class about the history of German to better understand English, the German language and how languages (including my own language use) can change and/or differ from others' language;

Identifying Supporting Quotes

15. be able to identify useful quotes that will help me support the thesis of my paper;

Using Logical Arguments

16. be able to argue my point effectively using a logical argument

Identifying data that Supports an Argument

17. be able to identify data that supports the arguments I am making or citing;

Introducing and Citing Quotes

18 be able to introduce and cite quotes properly;

Providing Adequate and Correct Citations

19. be able to provide adequate and correct citations for the points I am making or drawing on from

the works of others;

Top

Structure of Modern German

Structural and socio-linguistic study of contemporary German.

GERM 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GERM 302 & GERM 303 & GERM 344
Taught	Winter

Course Outcomes

Overview of the Origin of German

1. Students will be able to provide a brief overview of the origin of German and its position in the Germanic language family;

Hochdeutsch

2. be able to define Hochdeutsch and its position in German language use;

Sounds of German

3. be able to identify and describe the sounds of German, including the features which distinguish them from one another, and whether these sounds are separate phonemes or allophones;

Phonological Processes

4. be able to identify and describe the phonological processes, e.g., *Auslautverhärtung*, dissimilation, reduction, umlaut, etc. which affect how the sounds of German interact;

Prosodic Structure of German

5. be able to outline the prosodic structure of German, including syllable structure, phonotactics, accent placement and foot structure;

Word Formation Rules and Morphology

6. be able to identify various word formation rules in German and be able to describe the core morphological foundation of German, including differences between derivational and inflectional morphology and the roles that paradigms play in organising words in their various forms;

Prosody and Morphology

7. be able to describe how prosodic structure helps shape some aspects of the morphology, including plural and *i*-cropping formations;

Breaking Down German Sentences into Basic Constituents

8. be able to break down German sentences into their basic constituent structure and understand the structural difference between V2 and Verb-at-end sentences;

Phrases which are Complements of Various Words

9. be able to identify the types of phrases which are complements of various words in German;

Basic Concepts of Dialectology

10. understand the basic concepts of dialectology to define and differentiate between the major dialects of German;

Various Dialects of German

11. understand the meaning of the word dialect in its linguistic sense and appreciate the various dialects of German as legitimate linguistic entities of equal value;

Various Changes in Spelling

12. be able to describe the various changes in spelling brought about by the new *Rechtschreibung* and understand the motivating factors behind language and orthographic normalisation;

Contemporary Trends in Spoken Modern German

13. be able to identify and discuss contemporary trends in spoken modern German such as lexical borrowing, youth language, use/loss of dialects, etc.

Disambiguating Ambiguous Sentences

14. to be able to disambiguate ambiguous sentences and words and describe how the internal structure of words or sentences (in addition to accent placement) explains the multiple meanings behind the ambiguity.

Community-Based Application for Learning

Students will apply their learning in given classes to create projects that help contribute to the enrichment of others outside of those classes. They will move their research beyond the culmination of a final product submitted for a grade, bringing their work into the community and public domain, including helping projects outside the classroom in concrete ways, e.g., developing materials for an online lexicon project, creating enrichment materials and activities for K-16 German classes, creating posters and papers for conferences, being able to help other students in their learning and resarch. As a result, students will be able to articulate how their learning can be applied in real life and can be extended outside of the classroom and ultimately that their learning has and should have community impact.

Top

Secondary Student Teaching

Capstone, field-based, semester-long, full-time experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

GERM 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Improve language, culture, and teaching skills

Improve your German language proficiency, your cultural understanding, and your ability to help students see patterns in the language.

Integrate learning into teaching

Critically integrate professional readings, coursework, and teaching experiences into a repertoire of options for professional thought and action

Create appropriate learning experiences

Craft standards-based, developmentally and contextually appropriate, meaningful learning experiences in Spanish that support the growth of students' language proficiency

Engage students in culture learning

Contextualize language learning experiences in cultural products, practices, and perspectives and use various techniques for engaging students in critical thinking and problem-solving regarding culture

Utilize communicative techniques and technologies

Utilize a variety of communication techniques and emerging technologies to foster active inquiry and collaboration in the classroom, to develop language proficiency and cultural competence, to foster students' intrinsic motivation, and to support your own professional productivity and growth

Assess student learning

Develop and adapt a variety of traditional and alternative assessments (including performance-based assessments, portfolios, projects, and self-assessments) to inform instruction, to evaluate students' proficiency across all three modes of communication, to provide feedback that will improve student performance, and to report student progress

Adapt instruction for diverse learners

Adapt learning experiences appropriately to better meet the needs of culturally diverse learners, including students with a variety of learning styles andspecial needs

Engage in professional development and reflection

Participate professionallyin the school community, in professional organizationsand professional development activities, and engage in professional dialogue and reflection with colleagues and community agencies to support students, improve your teaching, and strengthen your program

Special Studies in German

GERM 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Note	Variable credit for individual or group study as approved for special circumstances. Not applicable to German major or minor.
Taught	Fall, Winter

Course Outcomes

Increased learning through experiential and mentored learnin

Students will increase their proficiency and understanding of the German language and culture by means of experiential learning and/or mentored research opportunities.

Top

Academic Internship: German Teaching

Capstone, field-based, year-long, full-time experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

GERM 496R

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Completion of all course work or departmental approval. Requires a major GPA of 2.85. At least a C- grade in Germ 377.
Taught	Fall, Winter

Course Outcomes

Internship

Students will apply appropriate teaching skills in a public school classroom.

Top

Senior Seminar in German Language

Culminating senior-level course in which acquired knowledge and critical skills are brought to bear on a selected language topic. In-depth capstone paper on one aspect of topic.

GERM 497R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Senior status.
Taught	Fall

Course Outcomes

Key Theories and Analyses

General Learning Outcomes for German 497
1. understand and be able to describe keytheories and analyses proposed to account for topics and phenomena related to the relevant field of study investigated in the course, e.g., for the acquisition of new sounds in a second language (L2), contrastive analysis, markedness differential hypothesis, as well as new theories such as Flege's SLM and Best's PAM;

Core Arguments of Published Research

2. be able to identify and explain the core arguments of published research on the topic of study, and be able to interpret and report on the findings outlined in the data and articles studied;

Explaining Individual Beliefs and Views

3. be able to describe and explain our individual beliefs and views on a given topic related to Germanic linguistics discussed in class and be able to reassess our views and beliefs by weighing the evidence presented in published research, defininghow these findings support or contradict our views;

Identifying Relevant Topics in Germanic Linguistics

4. be able to identify atopic of relevance in Germanic linguistics relating to the course topic, and carry out research on the topic by identifyingand understandingthe key articles on that topic and synthesise the findings in a clearly communicated paper and presentation to othersin which the student's points are effectively and logically argued;

Seeking out Sources

5. be able to seek out sources on topics in Germanic linguistics and/or second language acquisition;

Critical Reading, Summarizing, and Communicating

6. be able to critically read, summarise and clearly communicate the core arguments and findings of published research on Germanic linguistics topics related to the course theme by means of an annotated bibliography, paper overview, final paper and presentation;

Identifying Useful Quotes

7. be able to identify useful quotes and data that will help support the thesis of the research and will be able to incorporate quotes and data properly using the conventions used in linguistics; and

Indentifying main Contributors

8. be able to identify the main contributors to researchin the field of study discussed in the course

Top

Preparing for Professional/Graduate School

Preparation for professional schools and graduate programs. Focuses upon the rigors of the application process, developing relevant skills, adn becoming conversant with current intellectual discourses.

GERM 498R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Junior or senior status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

Honors Thesis

GERM 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Progress on Honors Thesis

The student will make significant progress towards the completion of an Honors Thesis, in consultation with the Thesis director.

Top

First-Year Greek (First Semester)

GREEK 101

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Basic Forms, Grammatical Structures, and Vocabulary

Successful students will have command of basic forms, grammatical structures, and vocabulary of Classical Greek.

Read Classical Greek

Successful students will be able to read Classical Greek at an elementary level with a high degree of understanding.

Top

First-Year Greek (Second Semester)

GREEK 102

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	GREEK 101; or departmental approval.
Taught	Winter

Course Outcomes

Basic Forms, Grammatical Structures, and Vocabulary

Successful students will have command of all basic forms, grammatical structures, and vocabulary of Classical Greek.

Read Classical Greek

Successful students will be able to read Classical Greek at an elementary level with a high degree of understanding.

Top

Intermediate Greek

Readings from Xenophon with review and continuation of grammar.

GREEK 201

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	GREEK 102; or departmental approval.
Taught	Fall

Course Outcomes

Greek Morphology

Successful students will master Greek morphology. All of the forms introduced in Greek 101/102 should be mastered in Greek 201. Students should be able to identify fully the forms of nouns, adjectives, verbs (finite and infinitive forms), adverbs, participles, etc.

Greek Grammar and Syntax

Successful students will master Greek grammar and syntax. They should be able to recognize and identify grammatical and syntactical constructions. In other words, students should be able not only to identify the form of a Greek word, but also the function of that word. For example, a student should be able to indentify a verb form as third person singular present active subjunctive, and then explain why the subjunctive mood is being used.

Greek Translation

Successful students should be able to translate a representative Classical Greek text into good English.

Greek Authors

Successful students should be able to locate the literary accomplishments of the chosen author (such as Xenophon) in the context of Greek literature generally and of his own literary context specifically.

Top

Classical Greek Poetry: Homer's Iliad

GREEK 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 201
Taught	Fall

Course Outcomes

Homeric Greek Morphology

Successful students should master Homeric Greek morphology. Students should be able to identify fully the Homeric forms of nouns, adjectives, verbs (finite and infinitive forms), adverbs, participles, etc.

Homeric Greek Grammar, Syntax, and Meter

Successful students should acquire a foundation in the grammar and syntax of Homeric poetry. They should also acquire a basic knowledge of the principles of scanning Greek verse. Homer's *Iliad* is regularly chosen as an example.

Poetic Text Translation

Successful students should be able to translate a Greek poetic text into good English.

Literary Accomplishments

Successful students should be able to locate the literary accomplishments of the chosen author (such as Homer) in the context of Greek literature generally and of his own literary context specifically.

Top

Classical Greek Prose

GREEK 302

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	GREEK 201
Taught	Winter

Course Outcomes

Greek Morphology

Successful students will refine their mastery of Classical Greek morphology. They will be able to identify fully the forms of nouns, adjectives, verbs (finite and infinitive forms), adverbs, participles, etc.

Greek Grammar and Syntax

Successful students should master Greek grammar and syntax and begin to master Greek rhetoric. While they should be able to recognize and identify grammatical and syntactical constructions-a practice already refined in Greek 201, they should also be able to recognize and identify rhetorical devices employed by the author(s) being read and begin to understand the effect of those devices as employed.

Greek Translation

Successful students should be able to translate a complex Greek prose text into good English.

Place in Literary History

Successful students should be able to locate the literary accomplishments of the chosen author(s) (such as Lysias and Plato) in the context of Greek literature generally and of their own literary context specifically.

Top

New Testament in Greek: Gospels

GREEK 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 201
Taught	

Course Outcomes

Morphology, Syntax, and Vocabulary

Successful students will begin to master the forms, syntax, and substantial vocabulary of *Koine* Greek, specifically as found in the gospels of the New Testament.

Reading Gospels in Greek

Successful students will learn techniques of reading the *Koine* Greek of the New Testament Gospels with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the New Testament Gospels.

Literary History and Context

Successful students will begin to understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Evaluation of Texts

Successful students will evaluate texts through close reading in the original language and express this in examinations and essays.

Top

Greek Prose Composition

Exercises in composing Greek prose.

GREEK 401

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 302; or concurrent enrollment.
Taught	Fall odd years

Course Outcomes

Critical Theory

Successful students will understand and apply principles and practice of critical theory, with specific reference to Greek texts.

Reading Comprehension and Stylistic Awareness

Successful students will be able to read Greek prose literature with a high degree of understanding and with stylistic awareness.

Greek Text Evaluation

Successful students will be able to evaluate texts through a close reading in the original language.

Classical and Late Greek Literary History

Successful students will understand the literary history of Classical and later Greek prose literature.

Greek Composition, Grammar, and Style

Successful students will be able to compose grammatically correct and stylistically appropriate Greek prose with proficiency.

Apocalypse

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Grammar, Syntax, and Vocabulary

Successful students will master all the forms, syntax, and substantial vocabulary of *Koine* Greek.

Reading Koine Greek

Successful students will learn techniques of reading *Koine* literature with subtlety and precision.

Literary History and Context

Successful students will understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Apostolic Fathers

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the New Testament and related texts.

Evaluation of Texts

Successful students will evaluate texts through close reading in the original language and express this in examinations and essays.

Top

Greek New Testament and Early Christian Greek Texts

Topics include Greek New Testament, the transmission and translation of New Testament manuscripts, and selections from other early Christian Greek writings.

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the New Testament and related texts.

Evaluation of Texts

Successful students will evaluate texts through close reading in the original language and express this in examinations and essays.

Johannine Writings

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Grammar, Syntax, and Vocabulary

Successful students will master all the forms, syntax, and substantial vocabulary of *Koine* Greek.

Reading Koine Greek

Successful students will learn techniques of reading *Koine* literature with subtlety and precision.

Literary History and Context

Successful students will understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Top

Luke-Acts

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Knowledge

Students will have a deeper understanding of Luke and Acts.

New Testament Apocrypha

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Grammar, Syntax, and Vocabulary

Successful students will master all the forms, syntax, and substantial vocabulary of *Koine* Greek.

Reading Koine Greek

Successful students will learn techniques of reading *Koine* literature with subtlety and precision.

Literary History and Context

Successful students will understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Pauline Epistles

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Grammar, Syntax, and Vocabulary

Successful students will master all the forms, syntax, and substantial vocabulary of *Koine* Greek.

Reading Koine Greek

Successful students will learn techniques of reading *Koine* literature with subtlety and precision.

Literary History and Context

Successful students will understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Top

Post-Nicene Fathers

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the New Testament and related texts.

Evaluation of Texts

Successful students will evaluate texts through close reading in the original language and express this in examinations and essays.

Top

Pre-Nicene Fathers

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the New Testament and related texts.

Evaluation of Texts

Successful students will evaluate texts through close reading in the original language and express this in examinations and essays.

Synoptic Gospels

GREEK 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 311; Greek 302 or concurrent enrollment.
Taught	

Course Outcomes

Grammar, Syntax, and Vocabulary

Successful students will master all the forms, syntax, and substantial vocabulary of *Koine* Greek.

Reading Koine Greek

Successful students will learn techniques of reading *Koine* literature with subtlety and precision.

Literary History and Context

Successful students will understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Herodotus

GREEK 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 302
Taught	

Course Outcomes

Reading Greek

By studying the text of Herodotus, successful students will learn techniques of reading Greek prose literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the text of Herodotus.

Literary History

Successful students will understand Herodotus' place within the literary history of Classical antiquity and locate his work in the larger context of political and cultural history.

Text Evaluation

Successful students will intelligently evaluate the text of Herodotus through close reading in the original language and express this in examinations and essays.

Top

Homer's Odyssey

GREEK 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 301
Taught	

Course Outcomes

Reading Homeric Greek

By approaching the text of Homer's *Odyssey*, successful students will learn techniques of reading Greek Epic poetry with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method with specific reference to the texts of Homer.

Literary History

Successful students will understand the place of Homeric epic in literary history of Classical antiquity and locate Homeric epic poetry in the larger context of political and cultural history.

Close Reading

Successful students will intelligently evaluate the *Odyssey* through close reading in the original language and express this through examinations and essays.

Thucydides

GREEK 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 302
Taught	

Course Outcomes

Reading Greek

By approaching the texts of Thucydides, successful students will learn techniques of reading Greek prose literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method with specific reference to the text of Thucydides.

Literary History

Successful students will understand the place of Thucydides in the literary history of Classical antiquity and locate his work in the larger context of political and cultural history.

Close Reading in Original Language

Successful students will intelligently evaluate texts of Thucydides through close reading in the original language and express this in examinations and essays.

Top

Introduction to the College of Humanities

Introductory course to provide an understanding of the Humanities within the context of the Gospel, the academy, the global economy and students' lives. Students learn about strategies and resources to connect humanities to careers.

HCOLL 110

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understanding

Students will be understand the nature of the Humanities programs, what expectations are for them throughout their program, and what employment opportunities are available to Humanities graduates.

Top

International Cinema

Students will view significant films and discuss them in a seminar setting in order to increase cultural awareness, enrich language acquisition, enhance critical analysis abilities, and develop understanding of cinematic art.

HCOLL 290R

Hours	1.5 Credit, 1.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Film Criticism

Students will demonstrate a capacity to use principles of film criticism in their own critical practice as they write about particular films.

Top

Humanities Leadership and Professional Development

Orientation on building leadership and professional competencies including cultural competence, professional relationships, project management, and effective teams, communication, and data use.

HCOLL 396R

Hours	1.0 - 2.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Term 2, Winter Term 2, Spring

Course Outcomes

Skills

Learn skills that will enable service on the Humanities student council

Experience

Practice leadership while serving on the Humanities student council.

Top

Internship Preparation

Orientation on building leadership and professional competencies including cultural competence, professional relationships, project management, and effective teams, communication, and data use.

HCOLL 396R

Hours	1.0 - 2.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Skills

Learn skills that will enable service on the Humanities student council

Top

Academic Internship

Internship experience. Implement, enhance, and master the professional competencies introduced during the internship prep course (HColl 396R).

HCOLL 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Recommended	HColl 396R.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mastery

Create and document a series of meaningful internship experiences yielding evidence of professional skills mastery and deeper self-awareness.

Top

Humanities Research Seminar

Research, writing, and discussion exploring enduring questions from perspectives offered by humanities disciplines.

HCOLL 480R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Research

Students will select a research topic, collect and analyze data, and produce a document summarizing the topic, methods of data collection and analysis, and results of the research.

Top

Readings in Humanities and Leadership

HCOLL 480R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Interdisciplinary study

Make connections among Humanities disciplines in order to address a question or problem that reaches across those fields.

Independent research

Research and report upon findings regarding an interdisciplinary problem or question in the Humanities.

Top

Humanities Lecture Series

Lecture and discussion by scholars in the humanities, with supplementary reading and writing.

HCOLL 490R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

International Cinema Studies Capstone

Producing a final portfolio and project by International Cinema Studies minors.

HCOLL 491

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	IHUM 390R
Taught	Winter

Course Outcomes

Synthesis

Students will demonstrate an advanced level of knowledge that reflects the culmination of work done throughout their program coursework.

Top

Humanities On-campus Experiential Projects

Practical, on-campus (not in the field) projects in which education is directly applied to real-world solutions for companies and other organizations. Students apply and are accepted to work on specific projects based on their skills, interests, and major emphasis.

HCOLL 494R

Hours	3.0 Credit, 0.5 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Application

Students will demonstrate an advanced level of knowledge in a chosen specialty area and complete a special project based on that area of study.

Top

Introduction to Hebrew

Beginning Hebrew.

HEB 100R

Hours	0.5 - 1.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Offered at the Jerusalem Center for Near Eastern Studies only.

Course Outcomes

Hebrew 100R Learning Outcomes:

Upon completion of this course, participants will have acquired the skills necessary to:
- Speak Modern Hebrew at beginning levels
- Read and engage beginning level texts in Hebrew, and express thoughts and ideas in written Hebrew
- Understand the modern Israeli cultural tradition (including music, art, and literature)

Top

First-Year Modern Hebrew 1

Modern Hebrew as spoken in Israel today.

HEB 101

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Hebrew 101 Learning Outcomes:

Upon completion of this course, participants will have acquired the skills necessary to:
-Speak Modern Hebrew at beginning levels, utilizing pa'al verbs
-Read and engage beginning level texts in Hebrew, and express thoughts and ideas in written Hebrew
-Understand the modern Israeli cultural tradition (including music, art, and literature)

Top

First-Year Modern Hebrew 2

Modern Hebrew as spoken in Israel today.

HEB 102

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

Hebrew 102 Learning Outcomes:

Upon completion of this course, participants will have acquired the skills necessary to:
- Speak Modern Hebrew at beginning levels, utilizing pa'al, pi'el, hif'il, and hitpa'el verbs in the present and past tense
- Read and engage beginning level texts in Hebrew, and express thoughts and ideas in written Hebrew
- Understand the modern Israeli cultural tradition (including music, art, and literature)

First-Year Biblical Hebrew

Old Testament Hebrew. Provides foundation in grammar and vocabulary; reading Hebrew prose texts in Bible.

HEB 131

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Summer

Course Outcomes

Hebrew 131 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
1. Recite the Hebrew alphabet and recognize the vowels;
2. Analyze and discuss most of the fundamental elements of Hebrew grammar;
3. Read and translate elemental biblical historical narrative texts with limited use of a lexicon;
4. Analyze and parse the verbal system: *Pa'al (Qal);*
5. Define approximately 315 vocabulary words from the Hebrew Bible.

Top

First-Year Biblical Hebrew

Old Testament Hebrew. Provides foundation in grammar and vocabulary; reading Hebrew prose texts in Bible.

HEB 132

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	HEB 131
Taught	Winter, Summer

Course Outcomes

Hebrew 132 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
1. Analyze and discuss the fundamental elements of Hebrew grammar.
2. Read and translate elemental biblical historical narrative texts with limited use of a lexicon.
3. Analyze and parse the verbal system: *pa'al, niphal, piel, pual, hiphil, hophal, hithpael*.
4. Define approximately 400 vocabulary words from the Hebrew Bible.

Second-Year Modern Hebrew 1

HEB 201

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Heb 102 or equivalent.
Taught	Fall

Course Outcomes

Hebrew 201 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
- Speak Modern Hebrew at intermediate levels, utilizing the past tense as well as pa'al and piel future tense verbs
- Read and comprehend intermediate level texts in modern Hebrew, and write in Modern Hebrew at the intermediate level
- Understand the modern Israeli cultural tradition (including music, art, and literature)

Speaking

Speak Modern Hebrew at intermediate levels, demonstrating an ability to communicate with others

Grammar

Use and understand past tense as well as pa'al and piel future tense verbs

Reading

Read and comprehend intermediate level texts in modern Hebrew, including newspapers and Israeli literature

Writing

Write in Modern Hebrew at the intermediate level

Culture

Appreciate and value the modern Israeli cultural tradition (including music, art, and literature)

Second-Year Modern Hebrew 2

HEB 202

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Heb 201 or equivalent.
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter

Course Outcomes

Hebrew 202 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
- Speak Modern Hebrew at intermediate levels, utilizing the future tense and passive verb systems
- Read and comprehend intermediate level texts in Modern Hebrew, and express thoughts and ideas in written Modern Hebrew at the intermediate level
- Understand the modern Israeli cultural tradition (including music, art, and literature)

Speaking

Speak Modern Hebrew at intermediate levels, demonstrating an ability to communicate with others.

Reading

Read and comprehend intermediate level texts in Modern Hebrew, including newspapers and Modern Israeli literature.

Grammar

Use and understand the future tense and passive verb systems.

Writing

Express thoughts and ideas in writing Modern Hebrew at the intermediate level.

Culture

Appreciate and value the modern Israeli cultural tradition (including music, art, and literature).

Hebrew Conversation

Daily practice speaking and understanding Modern Hebrew, beginning at the ACTFL intermediate-low level.

HEB 211R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	HEB 102
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

1. Expected learning outcomes:

a. Students will learn to speak Modern Hebrew with more accurate pronunciation, accent and intonation.
b. Students will be able to understand spoken Modern Hebrew with greater accuracy.
c. Students will acquire facility in using Modern Hebrew to discuss daily life situations in their apartments.

Top

Second-Year Biblical Hebrew - Grammar and Narrative

Review of Hebrew verb forms and parsing, as well as practice in reading Hebrew narrative prose passages.

HEB 231

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	HEB 132
Taught	Fall

Course Outcomes

Hebrew Alphabet

Recite the Hebrew alphabet and recognize the vowels

Fundamental Hebrew grammar

Analyze and discuss most of the fundamental elements of Hebrew grammar

Reading and translation

Read and translate elemental biblical historical narrative texts with limited use of a lexicon

Verbal system

Analyze and parse the verbal system: Pa'al (Qal)

Vocabulary

Define approximately 315 vocabulary words

Top

Second-Year Biblical Hebrew - Narrative 2

Continuation of practice in reading Biblical Hebrew narrative prose passages as well as parsing Hebrew verb forms.

HEB 232

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	HEB 231
Taught	Winter

Course Outcomes

Hebrew grammar

Analyze and discuss the fundamental elements of Hebrew grammar.

Translation

Read and translate elemental biblical historical narrative texts with limited use of a lexicon.

Verbal system

3. Analyze and parse the verbal system: pa'al, niphal, piel, pual, hiphil, hophal, hithpael.

Vocabulary

4. Define approximately 400 vocabulary words.

Third-Year Modern Hebrew 1

Intermediate-advanced modern Hebrew as spoken in Israel today.

HEB 301

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	Heb 202 or equivalent.
Taught	Fall

Course Outcomes

Hebrew 301 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
-Speak Modern Hebrew at intermediate-advanced levels, utilizing all tenses and verb systems
- Read and comprehend intermediate-advanced level texts in modern Hebrew, and write in Modern Hebrew at the intermediate-advanced level
- Understand the modern Israeli cultural tradition (including music, art, and literature)

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Hebrew 311 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
- Speak Modern Hebrew at intermediate levels, demonstrating an ability to communicate with others
- Read and comprehend intermediate level texts in Modern Hebrew
- Understand the modern Israeli cultural tradition (including music, art, and literature)

Hebrew Media

Emphasizes reading, aural comprehension, and speaking Hebrew. Includes newspaper reading, listening to local news on radio and television, and in-class discussion of current events.

HEB 312

Hours	2.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	HEB 101 & HEB 102
Note	Heb 312 (Hebrew Media), Heb 313, Heb 411R (Advanced Conversation), and Heb 421 are offered in the intensive modern Hebrew program. Arab 312 (Arabic Media) and 411R (Advanced Conversation) are offered in the intensive modern Arabic program. The intensive Hebrew and Arabic programs are offered alternate years during the winter programs only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Readings in the Old Testament

Readings in the Old Testament in Hebrew.

HEB 313

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Heb 312 (Hebrew Media), Heb 313, Heb 411R (Advanced Conversation), and Heb 421 are offered in the intensive modern Hebrew program. Arab 312 (Arabic Media) and 411R (Advanced Conversation) are offered in the intensive modern Arabic program. The intensive Hebrew and Arabic programs are offered alternate years during the winter program only.
Taught	

Course Outcomes

Knowledge

Students will demonstrate an advanced level of knowledge in the reading of the Old Testimant.

Top

Intermediate Hebrew Language in Jerusalem

Emphasizes intermediate conversation in everyday situations. Students role play various situations in class and then apply learning in Jerusalem.

HEB 314R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	HEB 202
Note	Offered at the Jerusalem Center for Near Eastern Studies only. Replaces Jerusalem Center core course equivalent of Hebrew 100R.
Taught	Spring, Summer

Course Outcomes

Knowledge

Students will deepen their understanding of Hebrew Language.

Top

Intermediate Conversation and Media

Capitalizing on daily life in Jerusalem to increase speaking, reading, writing, and listening comprehension in modern Hebrew.

HEB 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HEB 101 & HEB 102
Taught	
Offered	Offered at the Jerusalem Center for Near Eastern Studies only.

Course Outcomes

Application

Students will deepen their understanding of Hebrew Language in conversation.

Third-Year Biblical Hebrew - Prophecy and Poetry 1

Grammar review and vocabulary building through reading historical and prophetic books.

HEB 331

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	HEB 232
Taught	Fall

Course Outcomes

Hebrew 331 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
1. Define the top 500 vocabulary words from the Hebrew Bible.
2. Analyze and discuss the fundamental elements of Hebrew grammar.
3. Analyze and categorize the verbal system: *pa'al, piel, hiphil, hophal, niphal, pual, and hithpael.*

Third-Year Biblical Hebrew - Prophecy and Poetry 2

Readings in Biblical Hebrew poetry, including prophetic and wisdom literature.

HEB 332

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	HEB 331
Taught	Winter

Course Outcomes

Vocabulary

Define the top 600 vocabulary words from the Hebrew Bible.

Hebrew grammar

Analyze and discuss the fundamental elements of Hebrew grammar.

Verbal system

Analyze and categorize the verbal system: pa'al, piel, hiphil, hophal, niphal, pual, and hithpael.

Poetry and figures of speech

Understand elemental forms of Hebrew parallelistic poetry and figures of speech.

Top

Studies in Hebrew Culture

Examining and focusing on various topics in Israeli and Hebrew culture, such as history geography, film, literature, language, linguistics, political issues, social structure, philosophy, religion, aesthetics, art, and music.

HEB 341R

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None

Taught	Spring, Summer

Course Outcomes

Knowledge

Students will deepen their understanding of Isreali and Jewish Civilization.

Advanced Conversation

Emphasizes conversation in everyday situations. Students role play various situations in class and then apply their learning in Jerusalem.

HEB 411R

Hours	1.0 - 4.0 Credit, 4.0 Lecture, 4.0 Lab
Prerequisites	Heb 311R or equivalent.
Note	Heb 312 (Hebrew Media), Heb 313, Heb 411R (Advanced Conversation), and Heb 421 are offered in the intensive modern Hebrew program. Arab 312 (Arabic Media) and 411 (Advanced Conversation) are offered in the intensive modern Arabic program. The intensive Hebrew and Arabic programs are offered alternate years during the winter program only.
Taught	

Course Outcomes

Hebrew 411 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
- Speak Modern Hebrew at advanced levels, demonstrating an ability to communicate with others
- Read and comprehend advanced level texts in Modern Hebrew
- Understand the modern Israeli cultural tradition (including music, art, and literature)

Readings in the Hebrew Translation of the New Testament

Readings in the New Testament in Hebrew translation.

HEB 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Heb 312 (Hebrew Media), Heb 313, Heb 411R (Advanced Conversation), and Hebrew 421 are offered in the intensive modern Hebrew program. Arab 312 (Arabic Media) and 411R (Advanced Conversation) are offered in the intensive modern Arabic program. The intensive Hebrew and Arabic programs are offered alternate years during the winter program only.
Taught	

Course Outcomes

KNowledge

Students will deepen their understanding of Hebrew New Testament.

Top

Ancient Hebrew Texts

HEB 432R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	HEB 331
Taught	Fall, Winter

Course Outcomes

Hebrew 432R Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:
1. Define the top 1000 vocabulary words from the Hebrew Bible.
2. Analyze and discuss the fundamental elements of Hebrew grammar.
3. Analyze and categorize the verbal system: *pa'al, piel, hiphil, hophal, niphal, pual, and hithpael*.

Top

Postbiblical Hebrew: Mishnah

Introduction to the grammar of Mishnaic Hebrew. Readings from various tractates of the Mishnah.

HEB 441

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	HEB 331
Taught	

Course Outcomes

Hebrew 441 Learning Outcomes

1. Explain the fundamental differences between Biblical Hebrew and Misnaic Hebrew grammar.
2. Read and translate (with the limited use of a Mishnaic Hebrew Dictionary) passages from the Mishnah.

Top

Individual Study in Hebrew

Focused acquisition of knowledge. Students will concentrate on a specific topic of study and increase their knowledge of and ability to use Hebrew language appropriate to that field.

HEB 490R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will deepen their understanding of Hebrew special topics.

Thetean Editing

HIST 190R

Hours	1.0 - 2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	HIST 200
Taught	Fall, Winter

Course Outcomes

Editing Experience

Students will gain experience in reviewing and editing the research of their peers; this research will be published in the history department's research journal, the Thetean.

Publication Experience

Students will gain experience in the practicalities of research publication by producing an issue of the history department's research journal, the Thetean.

Top

Thetean Production

HIST 190R

Hours	1.0 - 2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	HIST 200
Taught	Fall, Winter Term 2

Course Outcomes

Editing Experience

Students will gain experience in reviewing and editing the research of their peers; this research will be published in the history department's research journal, the Thetean.

Publication Experience

Students will gain experience in the practicalities of research publication by producing an issue of the history department's research journal, the Thetean.

Top

Thetean Publication

Editing, production, and publication of student academic journal "The Thetean."

HIST 190R

Hours	1.0 - 2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	HIST 200
Taught	Fall, Winter

Course Outcomes

Editing Experience

Students will gain experience in reviewing and editing the research of their peers; this research will be published in the history department's research journal, the Thetean.

Publication Experience

Students will gain experience in the practicalities of research publication by producing an issue of the history department's research journal, the Thetean.

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

HIST 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department chair's and cooperative education coordinator's consent
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Learning Objectives

Together with internship and academic supervisors, students will develop individual learning objectives based on internship assignment or position

Skill Application

Students will master the skills and abillities required during the internship experience.

Writing and Application

Students will write interim and final reports demonstrating historical knowledge, analysis and application during the internship experience.

The Historian's Craft

History within the broader framework of liberal education; nature of history; questions historians ask; skills and resources needed to study, understand, and write history.

HIST 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required of all history majors.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Critical Analysis

Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.

Effective and Ethical Research

Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.

Effective Communication

Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Top

Honors World Civilization to 1500

World civilization from Greek antiquity to Renaissance; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

HIST 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Independent Study also.
Taught	Fall

Course Outcomes

Critical Analysis

Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions

Historical and Geographical Knowledge

Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development

Historical Comparisons

Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles

Analytical Reading

Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).

Cultural Works and Values

Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples-including, how they understood the natural world, what it meant to be human, and their relationship with the divine.

Analytical Writing

Improve the clarity and grace of their analytical writing.

Lifelong Learning

Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

Top

Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples-including, how they understood the natural world, what it meant to be human, and their relationship with the divine.

Analytical Reading

Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).

Analytical Writing

Improve the clarity and grace of analytical writing.

Lifelong Learning

Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history

Top

World Civilization from 1500

World civilization from Renaissance to present; explores fundamental questions in the human experience, examines formative events in history, and seeks to teach value of important texts.

HIST 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Historical and Geographical Knowledge

Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development.

Historical Comparisons

Be able to identify major societies of the post-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles.

Critical Analysis

Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.

Cultural Works and Values

Gain an appreciation of influential cultural works produced in a variety of modern societies and through them come to a clearer understanding of the fundamental values held by past peoples-including, how they understood the natural world, what it meant to be human, and their relationship with the divine.

Analytical Reading

Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (post-1500 C.E.).

Analytical Writing

Improve the clarity and grace of analytical writing.

Lifelong Learning

Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history

Top

The Family Historian's Craft

Introduction to genealogical methods applicable in American and international research. Discussion of technology in genealogical research and introduction to censuses and vital records (US and international).

HIST 217

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

The United States Through 1877

Discovery, colonization, American Revolution, establishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

HIST 220

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent study also.

Course Outcomes

Critical Analysis

Hone the ability to analyze questions and issues in American history to 1877, assess historical information accurately, and distinguish between questionable and valid historical assertions in exams and papers.

American History to 1877

Gain knowledge of some of the major developments in American history to 1877 (discovery, colonization, American Revolution, establishment of the Constitution, foreign affairs, westward expansion, gender, slavery, sectionalism, Civil War, and Reconstruction), including an understanding of key historical terms and theories. Demonstrate this knowledge in exams, papers, and class discussions.

Research Skills and Ethics

Learn through example and practice in classroom activities, papers, and exams to evaluate primary and secondary sources skillfully and honestly.

Effective Communication

Learn to skiillfully integrate data into coherent arguments expressed through a clear, well-written style in exams, papers, class discussion, and other classroom learning activities.

Top

The United States Since 1877

Industrialization, immigration, urbanization, political and social movements, and foreign policy.

HIST 221

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

American History 1877 to Present

Gain knowledge of some of the major developments in American history from 1877 to the present (industrialization, immigration, urbanization, political and social movements, gender, and foreign policy), including an understanding of key historical terms and theories. Demonstrate this knowledge in exams, papers, and class discussion.

Critical Analysis

Hone the ability to analyze historical questions and issues in American history from 1877 to the present, assess historical information accurately, and distinguish between questionable and valid historical assertions in exams and papers.

Research Skills and Ethics

Learn from example and practice in classroom activities, papers, and exams to evaluate primary and secondary sources skillfully and honestly.

Effective Communication

Learn to integrate data into coherent arguments expressed through a clear, well-written style in exams, papers, class discussions, and other classroom learning activities.

Top

In Quest of the American Character

An exploration of the American character and the idea of a distinctive American culture.

HIST 225

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 200 & HIST 220 & HIST 221
Taught	Fall

Course Outcomes

Historical analysis dealing with American peoples

Students will learn about the danger and difficulty of generalizaing about peoples and cultures, even as they learn to draw conclusions about what people believe defines them.

Reading primary and secondary sources

Students will learn to read and analyze a variety of primary and secondary sources, including an unabridged edition of Tocqueville's Democracy in America.

Effective writing

Students will improve their writing skills in papers and exams.

Top

Introduction to East Asian History

Major themes in the history, thought, and culture of Asian societies from antiquity to the present.

HIST 231

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Critical Analysis

Students will be able to analyze historical arguments.

Research Literature

Students will be able to analyze and interpret primary source documents.

Historical Knowledge of Asia

Students will be able to explain and analyze the major political, economic, and social developments in the history of China, Korea, and Japan from antiquity to the present

Critical Interpretation

Students will be able to interpret and discuss the meaning and significance of historical events on contemporary identity and foreign relations.

Top

Introduction to the History of Christianity

Survey of major developments in Christianity from its origins in the ancient Roman Empire to its global presence today.

HIST 232

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical knowledge of Christianity and Christian movements

Students will be able to explain and analyze the basic developments in Christianity from its origins in the Roman Empire to its various manifestations around the world today.

Analysis of primary sources

Students will learn to analyze and interpret brief primary short documents from each major historical period in Christian history.

Oral communication

Students will be able to debate and discuss the meaning of developments in Christian history and documents dealing with Christian history with peers of all Christian faiths.

Ancient Near East to 330 BC

Ancient cultures of the Near East (Egypt, Mesopotamia, Syro-Palestine, Anatolia, Iran) from the beginnings of civilization to the conquests of Alexander the Great.

HIST 238

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Critical Analysis

Students will develop an ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions about ancient Near East primary sources.

Historical Knowledge of Ancient Near East

Students will gain a historical consciousness of the Ancient Near East by demonstrating a critical literacy of major developments in Ancient Near East history, key historical terms, primary sources, and narratives of Ancient Near East history up to Alexander.

Effective and Ethical Research

Students will develop use of the historical method of research effectively by skillfully and honestly using primary and secondary sources in the formation of answers to major questions surrounding the narratives of the ancient Near East

Analytical Writing

Students will develop their writing ability through a range of pre-writing and writing assignments.

Top

Ancient Near East, 330 BC - 640 AD

Cultures and empires of the Near East (Persia, Hellenistic kingdoms, Judaism, early Christianity, Rome, and Byzantium) from Alexander the Great to the Arab conquests.

HIST 239

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Historical Knowledge of Hellenistic, Christian Near East

Gain a firsthand understanding of the Hellenistic and Christian Near East through studying and analyzing primary sources, using a template of (suggested) questions

Historical Knowledge of Origins of Christianity

Understand the basic historical issues surrounding the origin of Christianity

Historical Knowledge of Christian Roman Empire

Understand the development of the *Christian* Roman Empire (Byzantium)

Understand Faith and Reason

Understand basic issues of faith and reason, as they relate to Christianity and Judaism in the formative period of the former

Research Literature

Master an early Christian primary source well enough to present, as a group, its gist, meaning, and significance

Critical Analysis

Understand how the political and social changes in the Eastern Mediterranean in the Hellenistic period contributed to the development of science, technology, philosophy, and religion

Top

Middle East History to 1800

History of the Middle East from the rise of of Islam until 1800.

HIST 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Islamic Near East 640-1800

Students will be able to explain and analyze the major political, economic, social, cultural and religious developments in the Islamic Near East between approximately AD 640-1800.

Research Literature

Students will be able to analyze and interpret translations of primary source documents from the Islamic Near East.

Middle East History from 1800

History of the Middle East in the modern period form 1800; rise of nation states, relationship with West, role of Islam.

HIST 241

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Research Literature

Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions by using the historical method of research effectively by skillfully and honestly using primary and secondary sources.

Historical Knowledge of Middle East

Gain a historical consciousness by demonstrating a knowledge of major developments in Middle East and world history and understand key historical terms and theories.

Effective Communication

Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Faith and Reason

Demonstrate how faith and reason intersect.

Top

(Hist-NES 347R) Arab and Islamic Civilization

Social science/humanities core course covering Arab and Islamic civilization; historical evolution of Middle East to present. Overview of modern Palestinian society.

HIST 242R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Elective credit for major and minor in Near Eastern Studies. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Historical Knowledge

Students will analyze the major historical events that pertain to the history of Arab and Islamic Civilization.

Analysis of Texts

Students will read and analyze historical texts (primary and secondary sources) dealing with Arab and Islamic Civilization.

Historical Context for the Present

Students will be able to explain the historical context for the current political, economic, and cultural situation in the modern Middle East.

Top

(Hist-NES 349R) Jewish Civilization

Social science/humanities core course; broad introduction to Jewish self-understanding and history, focusing on relationships among people, faith, and land.

HIST 243R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Elective credit for major and minor. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Historical Knowledge

Students will gain an understanding of the major historical events in Jewish history.

Historical Ties to the Present

Students will be able to link historical events to modern developments in Jewish self-understanding and culture.

Top

Jewish History: A.D. 70 to the Present

Jewish diaspora, Jewish life in Moslem and Christian countries; Jewish religious movements; development of Zionism; Jewish communities in modern Israel and the United States.

HIST 244

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Historical Knowledge of Jewish History

Gain a historical consciousness by demonstrating an understanding of major developments in Jewish and history, and understand key historical terms and theories.

Effective and Ethical Research

Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using interdisciplinary prinary and secondary sources.

Critical Analysis

Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.

Analytical Writing

Skillfully integrate sources into a coherent argument expressed through a clear, well-written style and throrough oral communication.

Recognize Anti-Semitism

Recognize anti-Semitic arguments.

Understand Jewish Identity

Gain an understanding of the complexities of modern Jewish identity.

Appreciate Jewish Contributions

Appreciate the contribution of Jewish people to the world.

Top

(Hist-ClCv 304) Greek History

Political, economic, social, and intellectual history of Greece from Mycenaean times to the Hellenistic period.

HIST 247

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Ancient Greek Historical Sources

Successful students will consider available primary sources of information for ancient Greek history and be able to evaluate the reliability of those sources.

Primary Source Analysis

Successful students will consider available primary sources of information for ancient Greek history and be able to evaluate the reliability of those sources.

Greek Literature Analysis

Successful students will be exposed to selections of Greek literature and be able to evaluate those texts as sources for Greek history; critical skills will be improved by the careful treatment of historiographical texts.

Critical Theories

Successful students will discuss critical theories that are relevant to the texts treated in class and be able to evaluate and judge the rhetorical complexities facing the various authors discussed and how those authors resolved those complexities as they composed their historical narratives.

Historical Texts and Ancient Historiography

Successful students will be able to locate the historical texts treated in class in the context of Classical literature generally and of ancient historiography specifically.

Historical Knowledge of Greek History

Successful students will demonstrate a basic understanding of Greek History from the Bronze Age to the Hellenistic Age

(Hist-ClCv 307) Roman History

Political, economic, social, and intellectual history of Rome from the foundation of the city to Constantine.

HIST 248

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historiography and Historical Evaluation

Successful students will be exposed to selections of Latin and Greek literature and be able to evaluate those texts as sources for Roman history; students' critical skills will be improved by the careful treatment of historiographical texts.

Primary Sources of Information

Successful students will consider available primary sources of information for ancient Roman history and be able to evaluate the reliability of those sources.

Critical Analysis

Successful students will discuss critical theories that are relevant to the texts treated in class and be able to evaluate the rhetorical complexities facing the various authors discussed and how those authors resolved those complexities as they composed their historical narratives.

Research and Historiography

Successful students will be able to locate the historical texts treated in class in the context of Classical literature generally and of ancient historiography specifically.

Knowledge of Roman History

Successful students will demonstrate a basic knowedge of Roman history from the Regal period to the decline of the Roman Empire.

Europe 1500 to the Present

Overview of key political, cultural, economic and social developments in Europe during the early modern and modern periods, 1500—Present.

HIST 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	WRTG 150.
Taught	Fall

Course Outcomes

Historical knowledge of key events in European history

Demonstrate a solid understanding of key ideas, events and individuals in the political, social and cultural history of Europe from 1500 to the present.

Geographical knowledge of Europe

Demonstrate a basic geographical knowledge of Europe, as well as an understanding of the complexities and limitations of the notion of European unity.

Historical analysis of the growth of European unity

Trace and explain the transformation of Europe from the rivalries and divisions of the early modern period to its current state of union.

Historiographical knowledge and analysis

Show the ability to analyze historical debates and questions with accuracy and balance.

Reading and analysis of primary and secondary sources

Learn to read, analyze, and discuss both primary and secondary source documents dealing with European history.

Historical writing

Refine the clarity and grace of analytical writing and speaking skills.

Top

Conquest and Colonization of Latin America

Pre-Columbian civilizations, Iberian exploration and conquest of the New World, and colonial development of Hispanic and Portuguese America from 1492 to 1823.

HIST 251

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Latin America

Students will be able to explain and analyze the major political, economic, social, religious, and cultural characteristics of Spanish and Portuguese colonialism in the Americas between 1492 and 1825.

Research Literature

Students will be able to analyze and interpret primary source documents.

Effective Communication

Students will gain experience in historical research and improve writing skills.

Critical Analysis

Students will analyze historical questions and place them in historiographical context.

Top

Modern Latin America

National period (1810 to present): independence, institutional development, culture, and inter-American relations.

HIST 252

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Historical Knowledge of Modern Latin America

Students will be exposed to the major economic, political, and cultural shifts that shaped the "modern" Latin American state in the nineteenth and twentieth century, as well as its variants, notably the cult of caudillo rule and its twentieth century offshoots

Research Literature

Students will become conversant with major theoretical arguments and approaches to Latin American history in the contemporary era.

Literature Survey and Analytical Writing

Students will either broaden their understanding of literature on one topic in Latin American history by way of an intensive literature survey or deepen their knowledge on a particular topic in Latin American history by way of an original research paper.

Critical Discussions

Students will gain oral proficiency in discussing historiographical and thematic issues in modern Latin America during weekly discussion.

Critical Analysis

Students will make connections between cultural and polotico-economic issues by way of a wide variety of course readings that expose students to literature, as well as traditional historical themes.

Modern Africa

Survey of the history of the African continent from circa 1800, focusing on experiences and perspectives of Africans. Topics may include culture and identity, colonialism, independence movements, religion, gender relations, the environment, and economic development.

HIST 261

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Modern Africa and its People

Students will gain a greater knowledge of major events, developments, and questions in modern African history and understand that African cultures and people have changed over time

Critical Analysis

Students will improve their ability to weigh evidence, assess conflicting viewpoints, and evaluate arguments

Analytical Writing

Students will improve their ability to write clearly and organize evidence to build an argument

Self-examination through studies of race, identity, and liberation

Students will re-consider the way they interact with their own society and how Africa has related to the rest of the world by considering questions about identity, race, domination and liberation in African history

Top

Exploration of Teaching - Social Science

Field-based, initial teaching experience directed at helping prospective teachers experience the demands and opportunities associated with teaching secondary students.

HIST 276

Hours	3.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major-area preadmission requirements; FBI fingerprint and background clearance.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Northern US Family, Local, and Social History Research Since 1790

Records, geographical-historical background, paleography, and methodologies for reconstruction of invididual families and development of family history studies in the northern states, including New England, the Midwest, and some Mid-Atlantic states in the 19th and 20th centuries.

HIST 280

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall

Course Outcomes

Knowledge of family history sources in northern US research

Students will be able to describe the key content and utility of major family history sources in northern US research, viz., census and vital records, church and town records, county histories, tax records, probate and other court records, land records, immigration sources, and compiled family histories, as well as related secondary-source indexes and databases.

Familiarity with the Family History Library in Salt Lake City

Students will be able to conduct research in family history sources, primary and secondary, on film or otherwise, at the world's largest genealogical repository, the Family History Library in Salt Lake City.

Competence in genealogical research reports

Students will be able to produce clear, well-written genealogical research reports demonstrating a high level of critical thinking in pedigree analysis and genealogical evidentiary analysis.

Competence in writing compiled lineages

Students will be able to produce well-written compiled lineages that incorporate the historical background of the time, relating histories of individual families to larger historical processes.

Southern US Family, Local, and Social History Research Since 1790

19th and 20th century records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in the southern states.

HIST 281

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Winter

Course Outcomes

Knowledge of family history sources in southern US research

Students will be able to demonstrate content knowledge of historical sources for the United States, as well as those peculiar to each of the Southern States, including primary and secondary sources located in libraries, archives, online, and filmed resources.

Familiarity with the Family History Library in Salt Lake City

Students will be able to use family history sources, primary and secondary, on film or otherwise, at the world's largest genealogical repository, the Family History Library in Salt Lake City.

Competence in genealogical research reports

Students will be able to produce clear, well-written genealogical research reports demonstrating a high level of critical thinking in pedigree analysis and genealogical evidentiary analysis.

Competence in writing compiled lineages

Students will be able to produce well-written compiled lineages that incorporate the historical background of the time, relating histories of individual families to larger historical processes.

Colonial US Family, Local and Social History Research

Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in colonial American studies.

HIST 282

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall

Course Outcomes

Knowledge of family history sources in colonial US research

Students will be able to describe the key content and utility of major family history sources in colonial US research, viz., tax records, church and town records, probates, court records, deeds, and compiled family histories and related secondary-source indexes and databases.

Familiarity with the Family History Library in Salt Lake City

Students will be able to use family history sources, primary and secondary, on film or otherwise, at the world's largest genealogical respository, the Family History Library in Salt Lake City.

Paleographic skills

Students will demonstrate paleographic skills allowing them to research original and manuscript sources.

Competence in genealogical research reports

Students will be able to produce clear, well-written genealogical research reports demonstrating a high level of critical thinking in pedigree analysis and genealogical evidentiary analysis.

Competence in writing compiled lineages

Students will be able to produce well-written compiled lineages that incorporate the historical background of the time, relating histories of individual families to larger historical processes.

Top

Nature and History: The Earth's Environmental Past

Human historical interactions with animals, plants, and landscapes. Global histories of climate, population, whaling, fossil fuels, the car, animal rights, suburban sprawl, eco-theology, environmentalism, ecotourism, etc.

HIST 290

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Analysis

Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.

Historical Knowledge of Global Relationship with Nature

Students will become academically conversant with the major historical developments in our global relationship with nature.

Historical Research

Students will be able to formulate historical questions and answer them by careful and systematic research in primary and secondary sources.

Analytical Writing

Students will be able to write history that is coherent and persuasive by following discipline's norms for writing and careful documentation.

Food and History

History of tomatoes, potatoes, sugar, and spice. How food and foodways engage broader historical questions and illuminate aspects of human cultures.

HIST 292

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Research Methods

Students will refine and improve historical research, writing and analytical skills.

Effective Communication

Students will refine and improve oral presentation skills.

Historical Knowledge of the Study of Food

Students will be able to discuss the theoretical underpinnings of the study of food, and will be able to discuss key aspects of the impact of food on human history.

World War II in History and Memory

Causes, flow, global impact of the war emphasizing American and Japanese experience, ways in which it shaped lives of individual participants, and how it is remembered.

HIST 293

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Global Conflict of 1939 to 1945

Students will be able to explain and analyze the history and memory of the global conflict of 1939 to 1945.

Research Literature

Students will be able to analyze and interpret primary and secondary source documents.

Critical Analysis

Students will be able to interpret and discuss the meanings and history and memory.

Critical Interpretation

Students will be able to formulate historical arguments based on primary sources and place them in a historiographical context.

Eighteenth-Century Revolutions: America, France, and Haiti

The American, French, and Haitian revolutions. Readings include primary and secondary sources on revolutionary politics and culture.

HIST 294

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Historical Knowledge of American, French and Haitian Revolut

Students will be able to explain and assess the major events and processes that shaped the American, French and Haitian revolutions.

Research Literature

Students will be able to analyze and contextualize primary documents from the late eighteenth and early nineteenth centuries.

Critical Debates

Students will be able to debate historical questions and historiographical issues related to the American, French, and Haitian revolutions.

Top

Latin America in the Age of Revolution, 1750-1850

Examine the origins of the Latin American revolutions for independence, the course of the wars, and the struggles to form new nations. The course considers the issues new nations confronted and the concepts of cultural continuity, including ramifications today.

HIST 295

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 200 & HIST 252
Taught	Fall odd years

Course Outcomes

Historical knowledge of the Age of Revolution

Students will obtain historical knowledge of the Age of Revolution in general, and of Latin American revolutions in particular.

Reading primary and secondary sources

Students will be able to read and understand both primary and secondary historical sources, and how those sources have been used in Age of Revolution historiography, and to be able to express that understanding in writing.

Effective historical research

Students will further develop their ability to write clearly, persuasively, and logically, using primary and secondary sources found in the library and elsewhere.

The Early Middle Ages

Decline of Rome and the early formative stages of early medieval civilization; analysis of political, economic, and social changes from A.D. 285 to 950.

HIST 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge

Students will be able to explain and analyze the major political, economic, social, and religious developments in the Early Middle Ages.

Research Literature

Students will be able to analyze and interpret primary source documents.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Critical Communication

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers

Top

The Late Middle Ages

Europe from 950 to 1350; maturation of medieval civilization; failure of German, success of French leadership; economic, religious, cultural, intellectual trends.

HIST 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Historical Knowledge

Students will be able to explain and analyze the major political, economic, social, and religious developments in the Late Middle Ages.

Research Literature

Students will be able to analyze and interpret primary source documents.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Critical Communication

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers

Top

The Italian Renaissance

Major political, social, and cultural events in Italy from 1200 to 1530, emphasizing concept of the Renaissance in modern historiography.

HIST 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of Italian Renaissance

Students will understand and be able to analyze the major political, economic, social, and religious developments in Italian Renaissance history

Research Methods

Students will refine and improve historical research, writing and analytical skills

Identify Historiographical Evolution

Students will be able to trace the historiographical evolution of the Italian Renaissance and analyze historical questions within this historiographical context

Top

The Reformation: Age of Turmoil

Sixteenth-century religious upheaval; ideological, cultural, political, and socioeconomic struggles to mid-seventeenth century.

HIST 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Europe (1500-1700)

Students will be able to explain and analyze the major religious developments in Europe during the Reformation (1500-1700).

Research Methods using Primary Sources

Students will be able to analyze and interpret primary source documents.

Research Methods using Secondary Sources

Students will be able to analyze and interpret secondary source documents

Critical Interpretation

Students will be able to interpret and debate the meanings and historical value of primary and secondary source texts with their peers.

Historical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

The Expansion of Europe, 1400-1800

Early voyages of discovery and the actions of Europeans in the wider world from about 1400 to 1800.

HIST 304

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of European Expansion

Students will learn content knowledge including: historical actors, critical events, and historical details.

Critical Analysis

Students will master the skills necessary to summarize, evaluate, and critique historical arguments.

Research Literature

Students will analyze historical documents

Compiling a Bibliography

Students will produce a bibliography using historical standards.

Analytical Writing

Students will make arguments based on reasoned evidence, and recognize the subjectivity in the use of evidence.

Top

The Age of Enlightenment

Developments in Europe from 1650 to the French Revolution, emphasizing political thought, science, and philosophy in the Enlightenment.

HIST 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Knowledge of Europe between 1650 and 1815

Students will be able to explain and analyze the major political, economic, social, intellectual, and cultural developments in Europe between 1650 and 1815.

Research Literature

Students will be able to analyze and interpret primary source documents.

Historical Knowledge of Enlightenment

Students will understand the ideas central to the Enlightenment.

Analytical Writing

Students will gain experience in historical research and improve writing skills

Critical Analysis

Students will analyze historical questions and place them in historiographical context

Top

Nineteenth-Century Europe

Political, economic, social, and intellectual history of Europe from 1815 to 1914.

HIST 306

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of 19th C Europe

Students will understand and be able to explain and analyze the international affairs and the political, intellectual, social, and economic history of Europe from 1789-1914

Research Literature

Students will understand how to use and will be able to analyze and interpret primary source documents.

Critical Analysis

Students will be able to review, critique, and evaluate historiographical works from a variety of European nations, as well as analyze historical questions and place them in a historiographical context.

Effective Communication

Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts.

Europe Since 1914

International affairs and political and economic history of major European countries (including Russia) from World War I to the present.

HIST 307

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Critical Evaluation

Students will be able to review, critique, and evaluate historiographical works.

Research Literature

Students will understand how to use and will be able to analyze and interpret primary source documents.

Effective Communication

Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts.

Effective Discussion

Students will be able to analyze and discuss current events from more than one national viewpoint.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Historical Knowledge of Europe since 1914

Students will understand and be able to explain and analyze the international affairs and the political, cultural, military, social, and economic history of Europe from the two world wars until the present

The Mediterranean

Examining the historiography and key political, cultural, economic, and social developments of the Mediterranean in the medieval and/or early modern periods.

HIST 308

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Analysis

Students will be able to trace the historiographical evolution of Mediterranean history and analyze historical questions within this historiographical context

Historical Knowledge of Mediterranean History

Students will understand and be able to analyze the major political, economic, social, and religious developments in Mediterranean history

Research Methods

Students will refine and improve historical research, writing and analytical skills.

Effective Communication

Students will refine and improve oral presentation skills.

European Revolutions Since 1500

Social and political revolutions in European history since 1500. Successful and unsuccessful cases of state breakdown; the Dutch Revolt, English Revolution, French Revolution, Revolution of 1848, and Russian Revolution.

HIST 309

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Historical Knoweldge of European Revolutions

Students will gain a historical consciousness by demonstrating knowledge about crisis and change in European societies.

Research Literature

Students will acquire the ability to evaluate and analyze historical documents

Critical Analysis

Students will understand the way evidence is used to construct historical arguments.

Collaboration Experience

Students will gain experience collaborating with each other in formulating and carrying out a research project using historical research skills.

European Economic History

Economic development of Europe from antiquity to the early twentieth century; impact of the economy on social and political institutions.

HIST 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring odd years

Course Outcomes

Critical Analysis

Students will master the skills necessary to summarize, evaluate, and critique historical arguments.

Historical Knowledge of Economic History of Europe

Students will acquire content knowledge about the economic history of Europe from antiquity to the present

Research Literature

Students will understand the way evidence is used to construct historical arguments.

Analytical Writing

Students will pose historical questions and support them with appropriate evidence

Collaboration Techniques

Students will gain experience collaborating with each other in formulating and carrying out a research project using historical research skills.

Top

The History of Film, Radio, and Television

International history of (and through) the major mass media of the 20th Century.

HIST 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Reading primary and secondary sources

Critically read primary and secondary sources and analyze these sources in course assessments.

Historical understanding of events in film, radio, and television history

Demonstrate a deeper historical understanding of the most important events in film, radio, and television history.

Analysis of media products from a historical and contextual perspective

Analyze media products from a historical and contextual perspective.

Effective historical writing

Craft a well-written, coherent research paper drawing upon a variety of sources and containing a clear thesis statement.

Top

History of Ideas

Interrelationship of influential ideas and historical events from the end of the eighteenth century to the present.

HIST 312

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Recognize Historical Periodization

Recognize the usefulness, but also the problematic nature of historical periodization.

Trace Influence of Ideas

Relate and trace how ideas continue to influence societies and their institutions

Develop Interdsciplinary Thinking Skills

Develop interdisciplinary, synthetic, thinking skills, particularly in being able to see history in cultural artifacts and then identify and place these into discursive contexts.

Historical Knowledge of Approaches to Intellectual History

Identify broadly how different approaches to intellectual history operate, e.g. Lovejoy, Cambridge School (Skinner), Berlin, Koselleck, Strauss, etc.

Recognize the Development of Modern Thought

Awaken in you the realization of how certain modes of modern thought that you might have taken for granted as having existed "forever" can be seen as developments in response to specific historical circumstances.

Conflict Resolution

Explain how ideas, when extended to their logical conclusions, may challenge your personal world view and consider, as well as articulate, how to resolve such conflicts.

Analytical Writing

Write an intellectual history research paper.

Strategy in Peace and War

The modern evolution and contemporary development of grand strategies in peace and war, connecting success or failure with unintended consequences. Historical case studies extend from the Thirty Years' War to the Global War on Terrorism.

HIST 313

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hist 200, 201, 202.
Taught	Winter odd years

Course Outcomes

Historical knowledge of theories of diplomacy and warfare

Students will understand and be able to explain and analyze the forms, politics, theories, and legacy of diplomacy and warfare.

Analysis of primary and secondary source texts

Students will understand how to use and will be able to analyze and interpret primary source documents and secondary historiographical works.

Historical value

Students will be able to analyze, interpret, and devate with their peers in a classroom setting the meanings and historical value of theory, primary source texts, agency, and historical context.

Historiography

Students will be able to analyze historical questions and place them in a historiographical context.

European Fascisms, 1914 to Present

Political, cultural, and social bases of fascist movements, especially in Italy, Germany, and Spain. Rise to power, family policies, warfare, propaganda, racism, genocide, neofascisms.

HIST 314

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of European Fascisms

Students will understand and be able to explain and analyze the origins, impacts, foreign policy, theories, and legacy of Fascism, Nazism, and other competing political ideologies

Research Literature

Students will understand how to use and will be able to analyze and interpret primary source documents and secondary historiographical works.

Critical Interpretation

Students will understand how to research and write.

Effective Communication

Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

European Jews and the Holocaust

Attempted genocide of European Jews by Hitler's Third Reich; motives, methods, and implications.

HIST 315

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Research Literature

Analyze key issues that informed the Holocaust, the context and processees related to it, and to engage with the debates ignited by its legacy. Further develop proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources.

Historical Knowledge of Genocide of European Jews

Study the genocide of European Jews by Hitler's Third Reich and to explore the motives, methods, and implications of this, as well as the fundamental questions thrown into relief by it.

Critical Analysis

Foster specific skills of critical thinking, argumentative and narrative writing, as well as careful reading. Analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.

Analytical Writing

Skillfully integrate data into coherent arguments expressed through a clear, well-written style in exams, papers, and class discussion.

Top

The Family and the Law in American History

The interaction of families with law and government as illustrated in original American sources; individual family histories reconstructed in the broader perspective of history.

HIST 317

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall, Winter

Course Outcomes

Research Methodology

Students will be able to identify and solve basic historical and genealogical problems in the United States through primary and secondary source research, using library, archival and technological resources

Effective Communication

Students will be able to produce genealogical research reports and narrative family histories and compiled lineages that are clear, precise and well-written;

Incorporate Historical Background

Students will be able to recognize and incorporate the historical background of the time and place in their genealogical research

Evidentiary Analysis

Students will be able to utilize a significant range of skills and abilities in critical genealogical evidentiary analysis and be able to distinguish that from historical analysis

Knowledge of Sources

Students will be able to demonstrate content knowledge of primary historical sources for the United States

Apply Research Skills

Students will be able to apply research skills learned to the search for their own ancestors and to assist others in their searches in the United States;

Using Genealogical Technology

Students will be able to explain the roles of New.FamilySearch.org and other FamilySearch.org programs, integrating in the process the academic knowledge from this course with a testimony of the current direction of family history in the LDS Church.

European Women's History

European women and gender from 1400 to the present.

HIST 318

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hist 200.
Taught	Winter even years

Course Outcomes

Research Historiography

Students will be able to analyze and synthesize historiographyof women's history, gender history, and feminism

Historical Knowledge of European Women since 1400

Students will be able to understand and explain major trends in European women's experiences and history since 1400

Effective Research and Analysis

Students will read, analyze, and write about primary and secondary sources and explain their connections to one another

Critical Interpretation

Students will interpret important shifts or trends in the experience of women and attitudes about gender. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends

Critical Analysis

Working in tandem with each other students will have opportunities to question, investigate, and interrogate contemporary attitudes to women and men's history and gender and how these affect interpretations of the past.

The Family in Europe

Nature and development of marriage and family life and structure from the ancient to modern era.

HIST 319

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Independent Study also.
Taught	Fall even years

Course Outcomes

Historical Knowledge of European Family Life

Students will be able to understand and explain major trends in European family life, relationships, and law between 1100 and the present

Research Historiography

Students will be able to analyze and synthesize historiography of family history

Effective Research

Students will read, analyze, and write about primary and secondary sources and explain their connections to one another.

Critical Interpretation

Students will interpret important shifts or trends in the experience of family functions and relationships and their connections with the law. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends.

Critical Analysis

Working in tandem with each other students will have opportunities to question, investigate, and interrogate historical experiences and historiographic interpretations

Society in Europe

Common life in Europe from 1500 to the present: family problems, social customs, marriage, superstition, death, diet, work, hardships, migration, and childhood.

HIST 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Historical Knowledge of Early and Modern European Society

Students will be able to explain and analyze themes and trends in European social history in both the early modern and modern periods.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Critical Analysis and Interpretation

Students will be able to analyze and interpret secondary source documents

Critical Debate

Students will be able to interpret and debate the meanings and historical value of primary and secondary source texts with their peers.

Pre-Modern Britain

Political, economic, social, and religious developments in pre-modern Britain.

HIST 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge

Students will be able to explain and analyze the major political, economic, social, and religious developments in Britain up to the early modern period.

Research Literature

Students will be able to analyze and interpret primary source documents dealing with pre-modern Britain.

Critical Communication

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Modern Britain

Political, economic, social, and religious developments in England, Scotland, and Wales during the modern era, focusing on Atlantic connections and British imperialism

HIST 323

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge

Students will be able to explain and analyze the major political, economic, social, and religious developments in Modern Britain.

Research Literature

Students will be able to analyze and interpret primary source documents dealing with Modern Britain.

Critical Communication

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

France

French history from Roman times to the present, emphasizing the French Revolution, Napoleon, and subsequent developments.

HIST 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Critical Interpretation

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

Research Literature

Students will be able to analyze and interpret primary source documents.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Historical Knowledge of France 700-1950

Students will be able to explain and analyze the major political, economic, social, and religious developments in French history between approximately 700 and 1950.

Spain

Political, social, and economic factors in Spanish history from Roman times to present. Emphasis on Reconquest, Golden Age, and Civil War.

HIST 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Critical Analysis

Students will analyze historical questions and place them in historiographical context.

Research Literature

Students will be able to analyze and interpret primary source documents.

Effective Communication

Students will gain experience in historical research and improve writing skills.

Historical Knowledge of Spain

Students will be able to explain and analyze the major political, economic, social, intellectual, and cultural developments in Spain from Roman times to the late twentieth century

The History of Mexico

The historical evolution of Mexico including pre-Colombian civilizations, the Spanish conquest, the colonial era, national formation, and the modern Mexican state. The impact of foreign relations on Mexican society.

HIST 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Historical Knowledge of Mexico (Pre-Colombian-National Era)

Students will gain an understanding of the challenges Mexico faced during the transitions from pre-Colomiban empires to the colonial period, as well as from the colonial period to the national era.

Research Literature

By way of supplementary readings and writing assignments, students will gain a stronger understanding of the social andcultural issues in Mexican history that have been shaped by the nation's unique political and economic conditions.

Historical Knowledge of Mexico (20th century)

Students will gain an understanding of the principle factors that created and transformed modern Mexican society, principally the Porfiriato, the Mexican Revolution, and the modern Mexican state structure (twentieth century).

Analytical Writing

Students will explore the scholarship and sources for a single issue in Mexican history, producing a research paper based on primary and secondary sources

Critical Debates

Students will develop oral proficiency in debating controversialhistorical and contemporary issues during class discussion, including debates on decisive factors in the Spanish conquest, immigration, and bi-national solutions to drug trafficking.

Top

Italy in the Modern World Since 1848

Political, social, economic, and cultural history of Italians and the Italian peninsula in Europe and the world, including nationalism, church and state, migration, Mafia, fascism, and European union.

HIST 327

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Research Literature

Students will understand and will be able to analyze and interpret primary source documents and secondary historiographical works.

Historical Knowledge of Italy since 1848

Students will understand and be able to explain and analyze contemporary Italian history, including themes of economic development, state formation, fascism, internationalism, and church/state relations.

Critical Interpretation

Students will understand how to research and write.

Effective Communication

Students will be able to analyze, interpret, and debate with their peers in a classroom setting the meanings and historical value of theory, art, media, and primary source texts.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Presentations

Students will be able to present a topic and argument in class with multimedia and discussion

Top

Modern Germany

Political, military, economic and cultural development of Germany during the nineteenth and twentieth centuries.

HIST 328

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Critical Analysis

Alert you to how historians construct their narratives.

Historical Knowledge of Modern Germany

Understand how historians interpret the German past.

Research Literature

Read and dismantle primary and secondary sources.

Research Interdisciplinary Sources

Synthesize material from interdisciplinary sources.

Analytical Writing

Show essay skills by writing timed essays on a set of primary and secondary sources.

Critical Interpretation

Demonstrate your ability to use primary sources in a research project.

Top

Tsarist Russia

Political, economic, social, and cultural trends and events in Russian history to 1917.

HIST 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Please contact the individual department for outcome information.

Soviet Union and Post-Soviet Russia

History of the Soviet Union and post-Soviet developments in Russia and other successor states; governing structures and ideology and the relationship between state and society.

HIST 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Historical Knowledge of Asia

Students will be able to explain and analyze the major political, economic, and social developments in the history of China, Korea, and Japan from antiquity to the present

1-

Students will become familiar witht he major political, social, cultural, and economic aspects of the Soviet Union and the post-Soviet successor states.

2-

Students will learn how to apply their knowledge of history to the world around them.

3-

Students will improve their analytical skills and their ability to construct arguments based on primary sources.

4-

Students will become familiar with interrogating secondary sources for bias and overall reliability while engaging in one of the main writing genres of the historical trade.

Top

Scandinavian History

Political, social, religious, cultural, and economic factors in Denmark, Finland, Iceland, Norway, and Sweden from Viking era to present highly developed society.

HIST 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Historical Knowledge of Scandinavia throgh early 1700s

Students will be able to learn about Scandinavian history from prehistoric times through to the Viking Age, Middle Ages/Renaissance to the Era of Swedish Great Power Politics and Great Northern War, in the 1600s and early 1700s.

Historical Knowledge of Scandinavia since Napoleonic Wars

Students will be able to learn about the big picture of Scandinavian history from the period of the Napoleonic Wars (esp. Napoleon's erstwhile general, Bernadotte, later King of Sweden-Norway), Industrialization of the North, nationalistic movements and periods of Swedish-Norwegian and russo-Finnish union, through the World Wars and establishment of the Modern Welfare state (since the 1920s)

Top

History of Ancient Iraq

Examining the social and economic aspects of the rise of cities, inter-regional trade, political exchange, and imperialism in ancient Mesopotamia using primary and secondary sources. Topics include agriculture in Babylon, cities in Mesopotamia, royal courts, Assyrian trade and markets, family and kin.

HIST 334

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Critical Analysis

Develop an ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions.

Historical Knowledge of Ancient Iraq

Gain a historical consciousness of social and economic institutions and developments in ancient Iraq.

Research Literature

Develop use of the historical method of research effectively by skillfully and honestly using primary and secondary sources.

Effective Communication

Skillfully integrate evidence into a coherent argument or narrative expressed through a clear, well-written style and through oral communication.

Crusades

Age of Holy Wars in the eastern Mediterranean and Near East, 1050-1300. Focus on both Europe and Near East.

HIST 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Research Methods

Students will be able to analyze and interpret translations of primary source documents from the age of the Crusades.

Historical Knowledge of Crusades

Students will be able to explain and analyze the major political, economic, social, cultural and religious developments during the crusades, c. AD 1050-1300

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Top

South African Liberation Movements

Reading and discussion on the history of the struggle for human rights in South Africa, particularly during the time of apartheid (1948-1990).

HIST 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Historical knowledge of South African liberation movements

Students will gain a greater knowledge of major events, key participants, and developments in the history of South African liberation movement history and modern South African history through course lectures and readings.

Understanding of major questions and themes

Students will improve their understanding of major questions and themes in the construction of South African liberation movement history through course readings, in-class discussions, and the historiographical aspect of the term paper.

Evaluation of primary sources

Students will develop a greater ability to evaluate primary sources and historical arguments through weekly source analysis assignments, in-class discussions, and the source analysis aspect of the term paper.

Effective historical writing

Students will improve their ability to write clearly and organize evidence to build an argument through weekly analysis papers and the final term paper.

Self-examination through studies of race and resistance

Students will consider the way they interact with people within their own society and throughout the world by dealing with questions about race, domination, identity, and resistance.

Pre-modern Korea

Political, economic, and social history of Korea from antiquity to 1850.

HIST 337

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Critical Analysis

An understanding of Korean history contextualized both within the framework of Korean history and in relationship to other histories and other constructions of history.

Historical Knowledge of Korea

An understanding of the major features of Korean history and culture both in breadth and in depth.

Effective Communication

The ability to think and write about issues in Korean history in a critical and compelling manner.

Modern Korea

Political, economic, and social history of Korea from 1850 to the present.

HIST 338

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Critical Analysis

Students will be able to recognize and analyze change over time in East Asia

Historical Knowledge of Korea 1850 to Present

Students will be able to describe the most significant aspects of the polity, economy, society and ideology of Korea from 1850 to the present.

Research Literature

Students will be able to evaluate and apply primary source texts to broad historical themes

Research Methods

Students will be able to conduct individual research and situate it in the broader historical context

African Social Change

Themes and questions in African social history throughout various periods, including women, youth, religion, health, and cross-cultural interactions.

HIST 339

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Evaluation of historical arguments

Skillfully read and evaluate historical arguments.

Historical writing and argumentation

Improve the ability to write clearly and organize evidence to build an argument.

Historical knowledge of African social history

Understand major developments and questions in African social history.

Historical knowledge of African cultures and peoples

Obtain a historical understanding of African cultures and peoples.

Cultural sensitivity

Display sensitivity to cultural difference and navigate cross-cultural interactions.

Top

Traditional China

From a loose federation of Neolithic societies, Chinese civilization emerges as East Asia's dominant political and cultural force; developments to ca. 1500.

HIST 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Geographical Knowledge of China

Students will demonstrate a basic geographical knowledge of China, including significant geological features and major historical cities Moreover, they will be able to discuss how geographical and environmental realities have impacted historical development.

Research Literature

Students will be able to analyze and interpret primary source documents, both in writing and in class discussions

Critical Analysis

Students ability to identify arguments (assertions, claims, theses) and analyze supporting evidence in secondary scholarship should improve.

China Since 1200

Economic and political foundations of modernity during high Imperial China; challenge of new order from the West; rise of Chinese nationalism, revolution, and development to the present.

HIST 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Knowledge of China, 1200-present

Students will be able to describe the most significant aspects of the polity, economy, society and ideology of China from 1200 to the present.

Critical Analysis

Students will be able to recognize and analyze change over time in China.

Research Literature

Students will be able to evaluate and apply primary source texts to broad historical themes

Research Methods

Students will be able to conduct individual research and situate it in the broader historical context

Early Japan

Political, social, religious, and cultural developments to ca. 1700.

HIST 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Research Literature

Students will be able to analyze and interpret primary source documents.

Historical Knowledge of Japan before 1600

Students will be able to explain and analyze the major political, economic, social, and cultural developments in Japanese history until around 1600.

Critical Interpretation

Students will be able to interpret and discuss the meanings and historical and historiographical value of primary and secondary source texts.

Critical Analysis

Students will be able to analyze historical arguments and place them in a historiographical context.

Modern Japan

Main themes in Japanese history from Tokugawa times to the present.

HIST 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Research Literature

Students will be able to analyze and interpret primary source documents.

Historical Knowledge of Japan from 1600 to present

Students will be able to explain and analyze the major political, economic, social, and cultural developments in Japanese history from approximately 1600 to the present.

Critical Interpretation

Students will be able to interpret and discuss the meanings and historical and historiographical value of primary and secondary source texts.

Critical Analysis

Students will be able to analyze historical arguments and place them in a historiographical context.

Chinese Cultural History

Methods and approaches of the cultural historian; in-depth investigation of a selected topic in Chinese cultural history. Topics may include women, Silk Roads, material culture, etc.

HIST 347

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Chinese Cultural History

Students will be able to explain and understand the methods and approaches of the cultural historian through an investigation of select topics in Chinese cultural history.

Research Literature

Students will be able to analyze and interpret primary source documents, both in writing and in class discussions

Critical Analysis

Students ability to identify arguments (assertions, claims, theses) and analyze supporting evidence in secondary scholarship should improve

Top

Modern South East Asia

Complex history of the varied nations of this vast area: religion, colonialism, nationalism, independence.

HIST 348

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Research Literature

Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions by using the historical method of research effectively by skillfully and honestly using primary and secondary sources.

Historical Knowledge

Gain a historical consciousness by demonstrating a knowledge of major developments in South East Asia and world history and understand key historical terms and theories.

Effective Communication

Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Top

History of Asian Religions and Thought

Major themes in religion, philosophy, and ideas in Asia.

HIST 349

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Research Literature

Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.

Chinese Thought and Religion

Students will be able to understand and analyze key concepts in Chinese thought and religion as well as the logic behind core beliefs and practices

Top

British Family, Local and Social History Research

Records, geographical-historical background, paleography, and methods for reconstruction of individual families and development of demographic and family history studies in England, Scotland, and Wales.

HIST 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall

Course Outcomes

Historical Research

Students will be able to explain and use fundamental genealogical (and some historical) resources and methodologies for English and Welsh research since 1700

Critical Analysis

Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.

Research on Individuals

Students will explain how various pieces of information are combined in order to trace the same individual over various records and across the lifespan

Linking Generations

Students demonstrate how evidence is used to prove the links between generations

Top

Germanic Family, Local, and Social History Research

Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Germanic areas of Europe.

HIST 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Winter odd years

Course Outcomes

Identify Major Family History Sources

Students will be able to describe the key content of major family history sources in German research.

Research Literature

Students will become somewhat proficient at reading German documents.

Research Methods

Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City.

Scandinavian Family, Local, and Social History Research

Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families and development of family history studies in Denmark, Norway, Iceland, Sweden, and/or Finland.

HIST 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research Literature

Students will become somewhat proficient at reading old gothic-script Scandinavian documents from the 1600s on up, and also be able to convert Latin feast dates to modernized calendar dates through use of feast date conversion calendars.

Identify Major Family History Sources

Students will be able to describe the key content of major family history sources in Scandinavian research, viz., census, parish registers, probates, land/property and court records, since the 1600s.

Research Methods

Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City.

Top

Southern European and Latin American Family, Local, and Social History Research

Records, geo-historical background, paleography, and methods for reconstruction of individual families; development of demographic and family history studies which may include Portugal, Spain, France, and Italy and their colonies in the Americas.

HIST 353

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective Communication

Students will be able to produce genealogical research reports and narrative family histories and compiled lineages that are clear, precise and well-written

Incorporate Historical Background

Students will be able to recognize and incorporate the historical background of the time and place in their genealogical research.

Critical Analysis

Students will be able to utilize a significant range of skills and abilities in critical genealogical evidentiary analysis and be able to distinguish that from historical analysis

Genealogical Research

Students will be able to identify and solve basic historical and genealogical problems in Southern Europe, Quebec and Latin America through primary and secondary source research, using library, archival and technological resources

Research Literature

Students will be able to demonstrate content knowledge of primary historical sources for Southern Europe, Quebec and Latin America.

Research Methods

Students will be able to apply research skills learned to the search for their own ancestors and to assist others in their searches in Southern Europe, Quebec and Latin America.

Computer Programs

Students will be able to explain the roles of New.FamilySearch.org and other FamilySearch.org programs, integrating in the process the academic knowledge from this course with a testimony of the current direction of family history in the LDS Church.

Slavic Family, Local, and Social History Research

Records, geographical-historical background, paleography, and methodologies for reconstruction of individual families; development of family history studies in Slavic areas of Europe.

HIST 354

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	

Course Outcomes

Identify Major Family History Sources

Students will be able to describe the key content of major family history sources in Slavic research.

Research Literature

Students will become somewhat proficient at reading old Slavic documents.

Research Methods

Students will become acquainted with actually using family history primary and secondary sources, on film or otherwise available, at the world's largest genealogical repository, the Family History Library in Salt Lake City

Top

History of Argentina

Rise of modern Argentina from colonial times, focusing on the dynamic political, economic, social, and cultural developments since independence.

HIST 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Effective Communication

To be able to discuss and explain those processes through the written and spoken word with clarity, persuasiveness, and proper use of evidence

Historical Knowledge of Argentina

Learn and understand more about the historical processes that have shaped the nation of Argentina from colonial times up to the present.

Effective Writing

To write a well written, organized, and developed term paper using the critical thinking and writing skills of a historian

Research Literature

To be able to read primary sources and discuss their utility in constructing historical arguments.

Brazil

From 1500 to present, emphasizing relationship between colonial patterns and twentieth-century reality and dilatory transformation of Brazil's political and economic culture.

HIST 356

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of Brazil's history since 1500

Students will become academically conversant in the major social, economic, and cultural developments of Brazil's history since 1500.

Historical Analysis

Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.

Historical Research

Students will be able to formulate original historical questions and answer them by careful and systematic research in primary and secondary sources.

Historical Writing

Students will be able to write history that is coherent and persuasive by following discipline's norms for writing and careful documentation.

The Indian in Latin American History

History of Latin American Indians from preconquest days to the present; achievements, contributions, and problems.

HIST 357

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Research Literature

Students will be able to analyze and interpret primary source documents.

Historical Knowledge of Mayas, Aztecs and Incas

Students will be able to explain and analyze the political, economic, social, religious, and cultural structures of the Mayas, Aztecs, and Incas, how they were transformed by the Spanish conquest, and how they developed in reaction to European colonialism.

Analytical Writing

Students will gain experience in historical research and improve writing skills.

Critical Analysis

Students will analyze historical questions and place them in historiographical context.

Gender and History in Latin America

How gender roles have been defined legally, socially, and culturally in Latin America from the colonial period to the present, emphasizing the nineteenth and twentieth centuries.

HIST 358

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Knowledge of Gender Issues in Latin America

To understand how gender relations and gender roles developed in Latin America from colonial times to the present.

Effective Communication

To be able to discuss and explain those developments through the written and spoken word with clarity, persuasiveness, and proper use of evidence.

Effective Writing

To write a well written, organized, and developed term paper using the critical thinking and writing skills of a historian.

Research Literature

To be able to read primary sources and discuss their utility in constructing historical arguments.

Top

Inter-American Relations

Decline of Europe's American empires, legacies bequeathed to the new republics by their European heritage, and how those legacies have affected relations among the various American republics.

HIST 359

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Inter-American Relations

Students will gain an understanding of the major historiographical schools of thought in Inter-American relations

Historical Knowledge of an Individual

Students will gain an in-depth understanding of at least one major figure in Inter-American relations each term the class is taught by way of reading primary sources and writing about the legacy of that individual.

Analytical Writing

Students will write a research paper focusing on one of the thematic approaches presented in class and informed by primary sources, as well as secondary literature, in order to arrive at a stronger understanding of Inter-American relations.

Research Literature

Students will be exposed to a variety of thematic approaches to Inter-American relations, including gender, health and the environment, culture, tourism, film, and literature. It is expected that these alternatives to traditional diplomatic relations will inform their selection of a research topic for the course.

Historical Knowledge of Revolutions

Students will become conversant with the watershed events of the Haitian Revolution, the Latin American Revolutions, the Spanish American War, the Cuban Revolution, and the Washington Consensus,and why they have been critical to the tenor of Inter-American Relations.

Critical Debate

Students will obtain a stronger cross-cultural understanding of Inter-American relations by debating and discussing issues, informed by our class readings, during our weekly discussions. At times students will be asked to embrace perspectives that they may not entirely agree with or

understand.

Top

American West to 1900

The American West as a place of great diversity. Topics include Native American societies, European colonization, explorations, the fur trade, overland migrations, Indian relations, mining, settlement, and the environment.

HIST 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Research Methods

Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations

Historical Knowledge of American West before 1900

Students will be able to explain and interpret major developments and historical terms in the history of the American West before 1900.

Critical Analysis

Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

Top

The American West Since 1900

Pivotal developments in the twentieth-century West, including urbanization, Sun Belt migration, political protest, labor history, Native American history, immigration, water policy, tourism, military-industrial complex, Hollywood.

HIST 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Knowledge of the American West since 1900

Students will be able to explain and interpret major developments and historical terms in the history of the American West since 1900.

Research Literature

Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations.

Critical Evaluation

Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

France and the Atlantic World to 1804

French exploration and colonization; relations with native peoples; colonial societies in the Caribbean, Louisiana, the Mississippi Valley, and Canada; slavery and the Haitian Revolution; persistence of French territories and francophone populations.

HIST 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Research Literature

Students will be able to interpret primary source documents related to the French, African, and Native American actors within French imperial history.

Historical Knowledge of French Empire

Students will be able to explain and assess the major events and processes related to the evolution of the French empire from the medieval period through the early nineteenth century

Historical Knowledge of French Presence in New World

Students will become familiar with the historiographical debates surrounding the French presence in the New World.

The Spanish Frontier in North America

Spanish exploration, occupation, and institutions of northern Mexico, the American southwest, and Florida, 1521-1821; Mexican period to 1848.

HIST 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge of Spanish and Mexican Frontier

Students will be able to explain and analyze the major political, economic, social, and religious developments in the history of the Spanish and Mexican northern frontier in North America between approximately 1492 and 2011

Research Literature

Students will be able to analyze and interpret primary source documents

Critical Interpretation

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

Utah

Contributions of Native Americans, explorers, mountain men, miners, government officials, Mormons, and other groups in the nineteenth century. Impact of national movements, various peoples, politics, economics, and social and cultural change in the twentieth century.

HIST 364

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Historical Knowledge of Utah

Students will be able to explain and interpret major developments and historical terms in Utah history.

Research Literature

Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations.

Critical Evaluation

Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

Integrate Matters of Faith

Students will be able to integrate matters of faith within discussions of major developments in Utah history involving Mormonism.

American South

Political, economic, and cultural history of the southern states from colonial times to the present.

HIST 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge of American South

Students will be able to explain and analyze the major political, economic, social, cultural, religious, and intellectual developments in the history of the American South from European contact to the present

Research Methods

Students will be able to isolate the theses and supporting arguments of secondary sources on the history of the South.

Research Literature

Students will be able to analyze primary sources on the history of the South.

Effective Communication

Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.

Critical Analysis

Students will able to analyze an important historical question in the history of the South.

Top

Slavery and the Slave Trade in Africa and the Atlantic World

Major social, political, economic, and cultural developments in the history of slavery in Africa and the Americas between the 15th and 19th centuries, taking the lands and the people of the Atlantic Ocean region as a geographical unit.

HIST 366

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

1-

Students will be able to explain and analyze the major social, political, economic, and cultural developments in the history of slavery in the Atlantic World between the 15th and 19th centuries.

2-

Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.

3-

History teaching majors will start to apply information and ideas from the course to future teaching.

Slavery in the United States

Historical themes and developments of slavery in the U.S.

HIST 367

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Knowledge of Slavery in North America

Students will be able to explain and analyze the major social, political, economic, and cultural developments in the history of slavery in North America from the 17th century through 1865

Apply Ideas to Future Teaching

History teaching majors will start to apply information and ideas from the course to future teaching.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Analytical Writing

Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.

Sport, Society, and American Culture

Development of sports in American society, emphasizing ethnic and racial groups, social classes, gender, gambling, politics, and social mobility.

HIST 368

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Historical Knowledge of American Sports

Students will be able to explain the major social, cultural, and historical developments in American sport history.

Critical Interpretation

Students will understand the major historiographical debates in American sport history.

Critical Analysis

Students will be able to evaluate the relationship between sports and race, class, and gender issues in American history.

Travel and Tourism in America

The history of travel and tourism in America to the present. Themes include changing technology, consumerism, nationalism, and social identities in constructing the tourist experience.

HIST 369

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Theoretical Approaches

Understand the theoretical approaches in the field, including concepts such as authenticity, tourist gaze, scripted space, leisure and modernity, and social science approaches to the study of tourism.

Historical Developments

Demonstrate knowledge of the major developments in travel and tourism infrastructure and explain the causal forces driving those changes.

Social Identities

Explain how social identities of race, class, gender, and nationality have shaped the tourist experience.

Global Impact

Appreciate global impact of tourism on the environment, international relations, and commerce.

Primary Sources

Assess primary sources for historical analysis of tourism and understand the limits and possibilities of each, including travel narratives, ephemera, still images, guides, memoirs, etc.

Case Study

Demonstrate historical change in tourism by researching and writing about a specific topic or approach to tourism in a paper that follows conventions of historical scholarship, and by presenting findings to the class.

Colonial America

Establishment, growth, and development of the American colonies to 1763.

HIST 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of Colonial America

Students will demonstrate an understanding of the major events and issues in colonial American history and historiography.

Critical Analysis

Students will be able to identify and critically respond to the argument of a historical monograph.

Research Literature

Students will be able to identify, evaluate and locate appropriate primary and secondary sources for colonial American history.

Effective Communication

Students will be able to create and support an argument based on a major issue in colonial American historiography, using primary and secondary sources.

Top

Revolutionary America

Causes and consequences of the American Revolution, the confederation era, and the framing of the Constitution.

HIST 371

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Historical Knowledge of Revolutionary America

Students will be able to explain and analyze the major political, economic, social, and religious developments in Revolutionary America.

Crticial Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Research Literature

Students will be able to analyze and interpret primary source documents.

Critical Communication

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

Top

Civil War Era, 1848-1877

Causes of the war, major military events (leaders, campaigns, soldiers), war on the home fronts, why the South lost, Reconstruction, the legacy of the war.

HIST 373

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of Civil War and Reconstruction

Students will be able to explain and analyze the main themes and developments of the Civil War and Reconstruction, as well as their roots and legacy.

Critical Analysis

Students will be able to analyze and interpret primary source documents, both in writing and in class discussions.

Critical Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Apply information to Future Teaching

History teaching majors will start to apply information and ideas from the course to future teaching.

Top

U.S. History from 1890 to 1945

Political, economic, and social movements and ideas that trace rise of U.S. as a world power in first half of twentieth century.

HIST 374

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 220 & HIST 221
Taught	Winter odd years

Course Outcomes

Historical Knowledge of US 1890-1945

Students will be able to explain and interpret major developments and historical terms in the history of the United States between 1890 and 1945.

Critical Evaluation

Students will hone their ability to skillfully and honestly evaluate historical arguments in secondary sources.

Research Literature

Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations

Joseph Smith in Mormon History and Historiography

Exploring the life and thought of Joseph Smith and crucial moments in Mormon history through primary source documents and subsequent historiography.

HIST 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of Joseph Smith

Students will be able to summarize and assess key aspects of the historiography of Joseph Smith.

Critical Analysis

Using their knowledge of both secondary and primary sources, students will be able to critique competing interpretations of Joseph Smith's life.

Research Literature

Students will be able to contextualize and explain primary source documents relating to Joseph Smith.

Effective Communication

Students will enhance their verbal communication skills through participation in class discussion.

U.S. History from 1945 to 2000

Movements and ideas that shaped society, politics, economy, and diplomacy of the United States from 1945 to 2000.

HIST 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of U.S. History from 1945 to Present

Students will be able to explain and analyze the major political, social, diplomatic, economic, cultural, and constitutional developments in U.S. history from 1945 to the present.

Analytical Writing

Students will be able to produce an original, analytical, and primary source based historical essay examining a key issue, theme, or individual from U.S. history since 1945.

Research Literature

Students will be able to analyze, interpret, and debate the meanings and historical significance of primary source documents.

Top

History of American Families

History of American families from colonial period to the present.

HIST 378

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Historical Knowledge of American Families

Students will be able to explain and analyze the major intellectual, economic, religious, social, cultural, and political developments affecting changes in American families of various races, classes, and regions from 1607 to the present.

Critical Analysis

Students will be able to analyze an important historical question in the history of American families

Research Methods

Students will be able to isolate the theses and supporting arguments of secondary sources on the history of American families.

Effective Communication

Students will be able to research, analyze, and integrate primary and secondary sources into a coherent and well-written argument.

Top

U.S. Religious History to 1860

Religious developments from colonial times to 1860.

HIST 379

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Key events in American religious history

Students will be able to identify and explain the significance of key events, individuals, and ideas in American religious history to 1860

Analysis of primary source documents

Students will be able to contextualize and explain primary source documents relating to U.S. religious history.

Analysis of the historiography of U.S. religious history

Students will become acquainted with, and learn to critically evaluate, historical scholarship dealing with key issues and events in U.S. religious history.

Top

U.S. Religious History Since 1860

Examines religious people, institutions, beliefs, and practices in U.S. history since the Civil War.

HIST 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Historical knowlege of major U.S. religious groups

Identify the historical origins, beliefs, and practices of major religious groups in the modern US.

Historical knowledge of major events in American religious history

Identify major events, trends, and transformations in the history of american religion in the post-1860 period.

Analysis of primary sources

Critically examine historical documents related to the history of American religion.

Analysis of the historiography of American religious history

Offer informed perspectives on the ways scholars have understood the history of modern American religion.

Mormonism in the American Experience

Social, economic, political, intellectual, and religious environment in which Mormonism flourished; contributions of Mormon men and women to American culture and history.

HIST 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Historical Knowledge of Mormonism

Students will be able to summarize and assess key aspects of how Mormonism has been situated in the larger cultural and religious geography of America

Critical Analysis

Students will become acquainted with, and learn to assess the academic conversation concerning Mormonism

Research Literature

Students will learn how particular primary sources provide key building blocks in prominent interpretations of the place of Mormonism in American history

Effective Communication

Students will enhance their verbal communication skills through participation in class discussion.

Top

African-American History, 1865 to Present

Social, economic, intellectual, political factors; struggle for racial equality; race and gender relationships; how changing ideas of race affect American life and politics.

HIST 383

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hist 200, 220, 221.
Taught	Winter odd years

Course Outcomes

Historical Knowledge of African-American History since 1865

Students will be able to identify and analyze major themes in African-American History from emancipation and the rise of Jim Crow to the beginning of the 21st century. They will also be able to recognize the ways that shifting notions of race have shaped (and continue to shape) American life and politics.

Provide Service

Students will be able to use their training in African American history to serve their community.

Research Literature

Students will be able to analyze, interpret, and evaluate primary sources

Critical Debate

Students will be able to interpret and debate the meanings and historical value of primary sources with their peers.

Critical Analysis

Students will be able to analyze and create historical questions and place them in a historiographical context.

Analytical Writing

Students will demonstrate proficiency in using historical methods of research and in integrating data into a coherent argument expressed through a clear, well-written style.

United States Women's History

Survey course of women's experience in American culture and society from the Puritans to the present.

HIST 384

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historical Knowledge of U.S. Women's History

Students will be able to explain and analyze the experiences of women in America from the colonial period to the present, the ways that ideas about gender have shaped American life, and significant issues and debates in U.S. Women's history.

Critical Interpretation

Students will be able to interpret and debate the meanings and historical value of primary sources with their peers.

Critical Analysis

Students will be able to analyze and create historical questions and place them in a historiographical context.

Application to Current Issues and Events

Students will be able to apply their understanding of American women's history to current issues and events.

Analytical Writing

Students will demonstrate proficiency in using historical methods of research and in integrating data into a coherent argument expressed through a clear, well-written style.

Research Literature

Students will be able to analyze, interpret, and evaluate primary sources.

Top

Latinos in the United States

The place of Latin Americans within the context of U.S. history. The growth and development of the largest Latino communities from pre-colonial times to present day and how Latinos may influence future policies within the U.S.

HIST 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Critical Interpretation

Students will learn to interpret the documents and rhetoric of this community which will help them understand the intellectual, cultural and political thought of Latinos over the last 100 years.

Historical Knowledge of Latinos in the U.S.

Students will learn the history of Latinos in this country beginning with the circumstances which brought them to this country, the ways they have integrated or resisted integration, and the efforts they have made to claim their rights as citizens.

Critical Analysis

Students will learn the current state of Latino social and cultural integration in the Utah community.

Analytical Writing

Students will learn to write a major essay on the history of Latinos in order to understand the literature as well as the primary sources available on this community.

Top

Nineteenth-Century American Indian History

History of various Indian tribes, their cultures, and their relationships with European nations and the United States, including military campaigns.

HIST 386

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Historical Knowledge of Native American Issues

Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.

Research Literature

Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations

Critical Analysis

Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

Historical Knowledge of Indian Cultural Traditions

Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture.

Interactions with Indian Communities

Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges

Effective Communication

Learn to communicate effectively both orally and in writing about Native American topics

Top

Twentieth-Century American Indian History

Sociocultural factors that affect twentieth-century native Americans in both urban and reservation settings, including current challenges facing Indian communities.

HIST 387

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Historical Knowledge of Indian History and Cultures

Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.

Historical Knowledge of Cultural Traditions

Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture

Interactions with Indian Communities

Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges.

Critical Analysis

Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

Research Literature

Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations.

Effective Communication

Learn to communicate effectively both orally and in writing about Native American topics.

Top

Indians in Colonial America

North American Indian culture, Indian/European interactions, demographic, social, political factors among Indians prior to contact with Europeans through colonization and the American Revolutionary War.

HIST 388

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Historical Knowledge of Native Americans

Students will demonstrate an understanding of the major issues and events in colonial Native American historiography and their modern-day consequences.

Critical Analysis

Students will be able to use primary sources to support an argument based on a major issue in colonial Native American historiography.

Effective Communication

Students will be able to identify and critically respond to the arguments of historical monographs.

Research Literature

Students will be able to identify, evaluate and locate appropriate primary sources for colonial Native American history

Mormonism Among Christian Theologies: A Comparative History

Comparison of the historical development and varying constructions of key aspects of Mormon and other Christian thought.

HIST 389

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Please contact the individual department for outcome information.

Advanced British Family History Research

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

Advanced Southern European Family History Research

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

Family History Research

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

Family History Research in Ireland

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

Family History Research in the Netherlands

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

Top

Native American Family History Research

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

Top

Special Topics in History

Presented by visiting or regular faculty. Varied topics include oral history, demographics, psychohistory, Christianity in history, family history research, etc.

HIST 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Historical Knowledge

Students will learn the major themes, events, and issues related to a particular historical topic, chosen by the instructor.

Analytical Reading

Students will improve their proficiency in reading primary and secondary sources.

Historical Writing

Students will improve their writing skills.

U.S. in Vietnam, 1945-1975

U.S. involvement in the wars in Vietnam from both a domestic and international perspective, focusing on the conflict independently and in context of the broader Cold War.

HIST 391

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge of Vietnam War

Students will be able to explain and analyze political, social, cultural, diplomatic, and military developments; short- and long-term influences; and ramifications or "lessons" deriving from the U.S. experience during the Vietnam War from 1945 to 1975 from both a domestic and international perspective.

Research Literature

Students will be able to analyze, interpret, and debate the meanings and historical significance of primary source documents.

Analytical Writing

Students will be able to produce an original, analytical, and primary source based historical essay examining a key issue, theme, or individual from the U.S. experience in Vietnam.

Top

U.S. Constitutional History

Constitutional traditions and constitution making, federalism, and constitutional notions of political equity and social justice, from the colonial period to the present.

HIST 392

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of the US Constitution

Students will be able to explain and analyze the major political, economic, social, and religious developments that led to the U.S. Constitution

Crticial Analysis

Students will be able to analyze historical questions and place them in a historiographical context.

Research Literature

Students will be able to analyze and interpret primary source documents.

Critical Communication

Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

Top

U.S. Foreign Relations

U.S. diplomatic history from the American revolution to the present; examines major themes and critical events within both domestic and international contexts.

HIST 393

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of Foreign Relations (1776 to Present)

Students will be able to explain and analyze the major themes and problems in the making, implementation, and evolution of U.S. foreign relations from 1776 to the present.

Research Literature

Students will be able to analyze, interpret, and debate the meanings and historical significance of primary source documents.

Analytical Writing

Students will be able to produce an original, analytical, and primary source based historical essay examining a key issue, theme, or individual from the history of U.S. foreign relations.

Top

Scripture in American History

Scriptural texts in U.S. history across various religious traditions and across time, with attention to questions of authority, translation, interpretation, and reception.

HIST 394

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical knowledge of scriptures in US history

Describe the general content of various traditions' scripture and comment on the place of scripture within the major religious traditions in U.S. history.

Analysis of the role of scripture in American culture and history

Critically assess the role of scripture in American culture generally, and across time.

Contextualize the history of American scripture

Situate historical discussion and reading of scripture in broader intellectual and cultural contexts.

Analysis of the historiography of American scripture

Offer informed perspectives on the ways scholars have understood the significance of scripture in various traditions and in American culture generally.

Top

Technology in America

Benefits and liabilities of technological complexity.

HIST 395

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge of the History of Technology

Students will be able to explain and analyze how machines have shaped American society from the age of exploration to the present.

Critical Analysis

Students will be able to analyze and critique secondary sources in a coherent and well-written argument.

Research Literature

Students will be able to isolate the theses and supporting arguments of secondary sources on the history of technology.

Top

Historical Narrative: A Writing Workshop

Workshop in writing narrative history, emphasizing the problems of writing historical narrative. Theories and examples of narrative history.

HIST 396

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hist 200, 220, 221.
Taught	Winter even years

Course Outcomes

Historical Knowledge of Writing Genres

Students will demonstrate an understanding of the genres of historical writing and their historiography

Critical Analysis

Students will be able to identify and critically respond to arguments of historical monographs, articles, and primary sources

Effective Communication

Students will be able to write historical narratives in several different genres

Research Literature

Students will be able to critically evaluate primary and secondary sources

Top

Historical Literacies in United States History

Historical literacy within the context of U.S. history; preparation of instructional materials and field experiences for elementary and secondary education students.

HIST 397

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

1-

Prospective teachers will identify methods for helping their pupils develop a more sophisticated understanding of the nature of hisotyr as a discipline.

2-

Prospective teachers will identify instructional strategies that help students approach historical inquiry from a more mature epistemic stance.

3-

Prospective teachers will consider the heuristics historians use in engaging in historical inquiry and how students can be taught to use these heuristics.

4-

Prospective teachers will consider the wide variety of textual genres that historians and archeologists use as evidence about the past.

5-

Prospective teachers will consider second order concepts, or metaconcepts, that pupils must understand in order to become historically literate.

6-

Prospective teachers will practice instructional methods that biuild students' ability to make inferences, engage in historical empathy, and engage in perspective taking, and other skills associated with historical literacy.

7-

Prospective teachers will explore instructional strategies that help students use historical evidence to support their independently developed historical interpretations.

8-

Prospective teachers will engage, as students, in model activities designed to build the participants' ability to read, reason, and write with historical texts.

9-

Prospective teachers will create a series of text sets, including primary sources, that they will be able to use to build their students' historical literacies.

10-

Prospective teachers will construct lesson plans and will execute these plans in elementary and/or secondary classrooms.

11-

Prospective teachers will reflect on methods for improving their instructional activities.

12-

Prospective teachers will review through documents and artifacts major themes in US history.

13-

Prospective teachers will explore options for curriculum mapping in developing a scope and sequence for a US history course.

20th-Century American Economic Policy

Examines how economic thought has been translated into economic policy in the United States during the twentieth century.

HIST 398

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Econ 110.
Taught	Winter even years

Course Outcomes

Knowledge of 20th-c. economic theories

Gain knowledge of the most influential economic theories of the twentieth century; learn how those theories shaped policy and history more broadly.

Knowledge of economic institutions

Become familiar with important economic institutions (such as the Federal Reserve, World Bank and IMF, the Treasury Department, etc.) and be able to describe their functions and influence in the economy (past and present).

Historiography of economic policy

Locate current economic policy debates within their historical currents.

Historical writing

Learn to integrate data into coherent arguments expressed in well-written papers and discussion.

Latin Language Handwriting and Documents

Interpretation of handwriting within historical contexts in Latin ecclesiastical and notarial documents useful in family, local, and social history research, including church registers, notarial settlements of estates, probate records, and inventories; medieval to modern periods.

HIST 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Historical Knowledge of Common Scripts

Students will learn the most common Latin scripts

Critical Analysis

Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

Document Translation

Students will read, transcribe, and where necessary, translate documents

Transcription Methodology

Students will demonstrate transcription techniques and methodologies

English Language Handwriting and Documents

Interpretation of handwriting within historical contexts in vernacular scripts in the British Isles, sixteenth through eighteenth centuries, in sources useful in family, local, and social history research.

HIST 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Historical Knowledge of Common Scripts

Students will learn the most common scripts (hands) and documents in use in Britain and its colonies between 1500 and 1850.

Document Translation

Students will read, transcribe, and where necessary, translate documents

Critical Analysis

Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

Transcription Methodologies

Students will demonstrate transcription techniques and methodologies

Germanic Language Handwriting and Documents

Interpretation of handwriting in vernacular scripts in the German kingdoms, sixteenth through eighteenth centuries, in family history sources.

HIST 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

German Language and Handwriting Documents

Students will be able to:
1. Use various types of German reference and research tools
2. Recognize different types of German written and printed documents
3. Understand important historical and cultural aspects of Germany
4. Know the procedures for resolving difficult genealogical and historical research problems

Slavic Language Handwriting and Documents

Interpretation of handwriting in vernacular scripts in the Slavic language areas of Eastern Europe, sixteenth through eighteenth centuries, in family history sources.

HIST 423

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Research

Students will be able to explain and use fundamental genealogical resources and methodologies for Slavic research.

Critical Analysis

Students will evaluate, analyze, and corroborate genealogical information from both original and compiled sources. Students will know and use established citation standards.

Research on individuals

Students will explain how various peices of information are combined in order to trace the same individual over various records and across the lifespan.

Linking generations

Students will demonstrate how evidence is used to prove the links between generations.

Paleography

Students will improve their skills in Slavic paleography.

Romance Language Handwriting and Documents

Interpretation of handwriting in vernacular scripts in the Romance languages of Europe (especially Spanish, French, and Italian), sixteenth through eighteenth centuries, in family history sources.

HIST 424

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Italic Style Handwriting

Students will be able to read with fluency documents in italic style handwriting;

Historical Knowledge of Development of Handwriting

Students will be able to understand basic concepts of paleography and the impacts of language on the historical development of handwriting

Secretary Handwriting

Students will be able to develop familiarity with secretary (cortesana or procesal) handwriting

Research Documents

Students will be able to recognize and use documents and understand the legal, ecclesiastical and civil systems behind them;

Scandinavian Language Handwriting and Documents

Interpretation of old Gothic script handwriting in Scandinavian areas of Europe (including Denmark, Norway, Sweden, Finland, and Iceland), sixteenth through eighteenth centuries, in family history sources.

HIST 425

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Read Old Gothic Script

Students will be able to read at a basic level, old gothic-script Norwegian, Danish, Swedish and Finnish documents, from the 1600s on up.

Date Conversion

Students will be able to use Scandinavian conversion calendars, to convert Latin feast dates to regular Julian calendar dates.

Read Scandinavian Documents

Students will be able to read, at a basic level for content from Scandinavian printed documents. of the 1700s and 1800s.

(Hist-Clscs) Topics in Greek and Roman History

Topics vary (e.g., rise of the Greek city-state, Greek political thought, classical historiography, Rome and the Etruscans, imperial Rome).

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ClCv-Hist 304 and Greek 201 (Greek topics) or ClCv-Hist 307 and Latin 201 (Roman topics).
Taught	

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of Greece or Rome (depending on the special topic chosen for the course), successful students will come to understand the history of Greece and Rome. Topics may fall anywhere within the range of events from Bronze Age Greece to the end of the Roman Empire.

Top

4th Century Greece

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CL CV 304 & GREEK 201; or HIST 247 & GREEK 201
Taught	

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of Greece

Top

Archaic Greece

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CL CV 304 & GREEK 201; or HIST 247 & GREEK 201

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of Roman Politics

Top

Roman Religion

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CL CV 307 & LATIN 201; or HIST 248 & LATIN 201
Taught	

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of Roman Religion

Top

Roman Revolution

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CL CV 307 & LATIN 201; or HIST 248 & LATIN 201
Taught	

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of the Roman Revolution

Top

Rome and Etruscans

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CL CV 307 & LATIN 201; or HIST 248 & LATIN 201
Taught	

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of Rome + Etruscans

Top

World of New Testament

HIST 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the history of the New Testament

Top

Public History

Preparing for public history careers by discussing opportunities and responsibilities outside the academy. Examining areas such as museums, archives, film, government, business, and historic preservation. Developing a product and working on a client-based project.

HIST 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Explore the theories and principles that shape public history.

Explore the theories and principles that shape public history.

Discuss the range of influences on public understandings of the past

Discuss the range of influences on public understandings of the past.

Examine a variety of sites that present history to the public

Examine a variety of sites that present history to the public

Understand the methods required to engage audiences with history

Understand the methods required to engage audiences with history.

Expand understanding of the historical profession.

Expand understanding of the historical profession.

Top

Writing Narrative Biographies

Workshop in writing narrative family, local, and social history, emphasizing the problems of writing biographical narrative.

HIST 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

This course is no longer offered

This course is no longer offered.

Computers in Family Historical Research and Publication

Use of computer programs and the internet in researching family, local, and social history; including programs and techniques for publishing.

HIST 434

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall odd years

Course Outcomes

Current Historical Methods

Students will be able to stay current on newly published historical materials by using RSS feeds and Google Alerts to notify them of changes in websites, podcasts, weblogs, etc.

Computer Communication

Students will be able to communicate the findings of their historical research and demonstrate a high level of analytical skill through the use of a variety of computerized and online resources.

Online Research Material

Students will be able to locate and use primary source material online, as it continues to be made more available.

Relational Databases for Research and Analysis

Students will be able to design and use basic, custom relational databases for historical research and analysis.

Seminar on Professional Family History Research

Practicum in professional client research exploring advanced genealogical methodologies.

HIST 439

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 217
Taught	Fall, Winter

Course Outcomes

Research Methods

Students will learn the key methods of family history research in US sources, to solve difficult research problems from the 1700s and 1800s.

Analyze Sources

Students will learn, on an advanced level, to analyze sources and read between the lines, to reconstitute complete families from records of the 1700s and 1800s in US sources.

Compile Research Reports

Students will be able to write and/or compile a variety of analytical research reports, in preparation for potential clients and employers who will hire them to conduct research on ancestral families.

Top

Student Teaching - Social Science

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

HIST 476

Hours	1.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or departmental approval; requires a total GPA of 3.00; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

History and Social Science Teaching Methods and Instruction

Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

HIST 477

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SC ED 276R; or HIST 276; Fingerprinting and FBI clearance.
Note	Check with Hist 477 instructor for specific prerequisites for the major or minor program.
Taught	Fall, Winter

Course Outcomes

Learning-Centered Classrooms

Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning.

Assessing Students

Students will consider variuos methods of assessing student learning.

Research-supported Teaching Methods

Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.

Teacher Work Sample

Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.

Teaching Resources

Students will consider various types of resources including texts, technology, primary source documents and litertaure that they might use to teach social studies to students with diverse backgrounds and learning styles.

Critical Analysis

Students will coordinate and reflect on clinical experiences.

Top

Practicum in Secondary Education

Implementing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

HIST 478

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	SC ED 276R; or HIST 276; Concurrent enrollment in Hist 477 or comparable major course.
Taught	Fall, Winter

Course Outcomes

Learning-centered Classrooms

Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning

Assessing Students

Students will consider various methods of assessing student learning.

Reearch-supported Teaching Methods

Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.

Teaching Resources

Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.

Teacher Work Sample

They will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.

Critical Analysis Assessment Reflection

The course will provide a forum to coordinate and reflect on the prospective teachers' clinical experiences.

Directed Research in Family History

Student research directed by faculty member on family history topic of mutual interest.

HIST 481R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Genealogical Research

Students will identify and clearly articulate a substantive family history research problem.

Genealogical Analysis and Writing

Students will produce a written report, project or portfolio demonstrating knowledge of the studied material.

Top

Capstone Seminar: Writing and Professional Paths in Family History

Research seminar; evidentiary analysis and writing skills in preparing a compiled lineage and exploring professional alternatives in family history, including professional accreditation or certification.

HIST 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 439
Taught	Winter

Course Outcomes

Genealogy Careers

Students will learn about a variety of professional and occupational paths open to the family historian/genealogist and understand the typical work and work setting(s) for a professional genealogical researcher (i.e.: one doing primarily client research).

Evidentiary Concepts

Students will recognize and be able to apply appropriate evidentiary concepts and standards to your genealogical research.

Ethical Standards

Students will understand and apply to practical situations ethical standards of a professional genealogist

Research Methods

Students will refine their genealogical research and writing skills in the following areas: a. preparing and critiquing research projects, b. identifying and using on-site archives, libraries and historical societies, c. use of Internet resources, and d. writing coherent essays.

Certification

Students will learn the requirements of and evaluate their status for accrediting as an AG or

certifying as a CG

Narrative Family History

Learn to write a narrative family history in compiled lineage format

Top

Topical Readings Seminar

Reading, discussing, and writing about selected historical issues.

HIST 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge

Students will increase their knowledge of the substantive theme of the course, which will rotate (the theme for Fall 2011, for instance, is Changes in Religious Cultures)

Effective Communication

Students will, by learning more deeply how a work of history is put together, be better prepared for writing an original research paper in History 490 and for graduate school in either History or a related discipline

Critical Analysis

Better understand how a work of History is put together, learn how to make a fair and detailed judgment of historical work (the act of criticism), all of which will make you better prepared to create History yourself

Research Literature

Students will learn and practice fundamental analytical tools for analyzing secondary sources more deeply than is possible in most upper-level history courses

Top

Philosophies of History

Fundamental problems and types of historical analysis and interpretation, philosophies of history, and work of outstanding historians.

HIST 487

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge of Historical Writing

Demonstrate an understanding of major developments in the history of historical writing

Identify Terms and Theories

Learn key historical terms and theories associated with the philosophy of history

Critical Analysis

Distinguish between analytical and speculative philosophies of history

Critical Debates

Consider how philosophies of history inform debates in public history and develop oral skills

Historian's Craft and Religious Belief

Understand debates surrounding reconciling the historian's craft and religious belief and develop insights into how universities sponsored by religious institutions can contribute to higher education.

Top

Capstone Research Seminar

Research seminar; critical, analytical, and writing skills in preparation of a senior thesis.

HIST 490

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 200
Note	Required of all history majors.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research Literature

Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources

Historical Analysis

Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid assertions;

Effective Communication

Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Directed Research

Student research directed by faculty member on topic of mutual interest.

HIST 495R

Hours	3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's prior consent.
Note	Research assistants must do additional work for credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Academic Research

Students will identify and clearly articulate a substantive academic research problem.

Compiling a Bibliography

Students will produce a bibliography for reading and research using historical standards.

Historical Knowledge

Students will produce a written report demonstrating knowledge of the studied material.

Academic Internship--Social Science Teaching

Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

HIST 496R

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or departmental approval; requires a major GPA of 3.00; at least a C- in Sc Ed 377; FBI fingerprint and background clearance.
Taught	

Course Outcomes

Student Teaching Internship Experience

Students will put into practice the theories they have learned in content and pedagogy courses including planning lessons, assessing students of all abilities and cultural backgrounds, using a variety of instructional strategies, and collaborating with other teachers and with the community.

Academic Internship: Family, Local, and Social History

Work-study involving family, local, and/or social history at one or more archives, libraries, publishers, data providers, or research organizations on the international, national, state, or local level, under supervision of a professional genealogist, historian, archivist, or librarian.

HIST 496R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship Experience

Students will put into practice the skills in genealogical and historical research that they have learned through their coursework, in an internship experience.

Top

Honors Readings

HIST 497R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Historical Reading

Students will read assigned books and articles critically, thoughtfully, and carefully.

Analytical Writing

Students will write a review of each book and article demonstrating knowledge and analysis of the studied material.

Top

Directed Readings

HIST 498R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Historical Reading

Students will read assigned books and articles critically, thoughtfully, and carefully.

Analytical Writing

Students will write a review of each book and article demonstrating knowledge and analysis of the studied material.

Special Studies in History

HIST 500R

Hours	1.0 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Directed by visiting or resident faculty. Check with department secretary for current topics and instructor.
Taught	

Course Outcomes

Historical knowledge

Students will increase their understanding of events, themes and historical context relating to specific topics determined by the instructor.

Historiography

Students will examine and analyze the historiography of the assigned topic.

Historical research and writing

Students will improve their skills in historical research and writing.

Sources and Problems in Western U.S. History

Lecture, discussion, readings, and student writing on historians' sources and points of view regarding the American West.

HIST 564

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical knowledge

Students will increase their understanding of events, themes, and historical context relating to the history of the American West.

Historiography

Students will examine and analyze the historiography of the American West.

Historical research and writing

Students will improve their skills in historical research and writing.

Sources and Problems in Latter-day Saint History

Lecture, discussion, readings, and student writing on historians' sources and points of view regarding Latter-day Saint history.

HIST 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge

Students will increase their understanding of events, themes, and historical context relating to the history of the LDS Church.

Historiography

Students will examine and analyze the historiography of relevant literature dealing with the history of the LDS Church.

Historical research and writing

Students will improve their skills in historical research and writing.

Top

Sources and Problems in Utah History

Lecture, discussion, readings, and student writing on historians' sources and points of view regarding Utah history.

HIST 566

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge

Students will increase their understanding of events, themes, and historical context relating to the history of Utah.

Historiography

Students will examine and analyze the historiography of relevant literature on the history of Utah.

Historical research and writing

Students will improve their skills in historical research and writing.

Top

Philosophies of History

Fundamental problems and types of historical analysis and interpretation, philosophies of history, and work of outstanding historians.

HIST 587

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge of Historical Writing

Demonstrate an understanding of major developments in the history of historical writing

Identify Terms and Theories

Learn key historical terms and theories associated with the philosophy of history.

Critical Analysis

Distinguish between analytical and speculative philosophies of history

Critical Debates

Consider how philosophies of history inform debates in public history and develop oral skills.

Historian's Craft and Religious Belief

Understand debates surrounding reconciling the historian's craft and religious belief and develop insights into how universities sponsored by religious institutions can contribute to higher education

Special Topics

Western American, religious, family, Asian, Latin American, and Near Eastern history.

HIST 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Historical Knowledge

Students will increase their understanding of events, themes and historical context relating to a specific historical subject determined by the instructor.

Historiography

Students will examine and analyze the historiography of the assigned historical subject.

Historical research and writing

Students will improve their skills in historical research and writing.

Special Readings in History

HIST 598R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Historical Knowledge

Students will increase their understanding of events, themes, and historical context relating to a specific historical subject as outlined in an individualized contract between student and instructor.

Historiography

Students will examine and analyze the historiography of the assigned topic.

Analysis of Secondary Sources

Students will improve their ability to read and analyze secondary sources.

Top

Introduction to Public Health

Introduction to public health professions including exploration of current issues, job opportunities, the essential public health services, and an overview of the public health major.

HLTH 100

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Public Health History

1. Identify key events in the history of public health that have shaped the current state of the profession

Core Values

2. Describe core public health values

Essential Public Health Services

3. Identify the ten essential public health services and describe which aspects of the profession hold the most relevance for employment and personal fulfillment

Determinants of Health

4. Delineate how health is defined and measured as well as recognize the impact of social, environmental, and behavioral determinants of health

Global Health

5. Describe the importance of global health and recognize how actions in the US impact the rest of the world and vice versa

Public Health Disciplines

6. Identify the critical roles and contributions of epidemiology, environmental/occupational health, health promotion, medicine, and allied health within the public health profession

Professional and Education Opportunities in Public Health

7. Determine their interest in the public health degree and identify the types of professional and educational opportunities available to them within public health

Contemporary Issues for Student Athletes

Eligibility issues for intercollegiate student athletes. Skills relating to academic performance and career selection.

HLTH 201

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Orientation

Orient new freshman student-athletes to BYU and the resources available for them in the Student Athlete Academic Center.

Basic life skills

Learn basics life skills that will enhance the BYU experience of each student-athlete and prepare them for life after college.

Sport psychology

Learn the basic principles and skills of sport psychology that will enhance performance.

Sport nutrition

Gain a better understanding of sports nutrition and its impact on performance.

Serving the community

Experience the positive benefits of serving in the community.

Exploration of Teaching

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

HLTH 276R

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	FBI fingerprint and background clearance; major area preadmission requirements.
Taught	Fall, Winter

Course Outcomes

Transition 1 Requirements

Complete the BYU educator preparation admission requirements (Transition 1) including: mandatory orientation, LiveText registration, Student Field Experience Demographics (FED), Technology Skills Assessment (TSA), Professional & Interpersonal Behavior Scale (PIBS), Dispositional Scale: Self-Assessment, and Graduation Plan.

Moral Dimensions and Contextual Factors

Identify the moral dimensions of education and the requirements for the Teacher Work Sample (TWS). Write a Contextual Factors for a school observed.

Frameworks and Standards

Demonstrate familiarity with the Utah State health education core curriculum framework, the National Health Education Standards, the CDC's six categories of risk behavior and principles of effective instruction in the 21st Century.

Effective Health Teachers

Identify, observe, and reflect upon the characteristics, behaviors, skills, routines, and practices of effective health

Dispositions, Strengths and Weaknesses

Evaluate personal and professional dispositions, strengths and weaknesses relevant to teaching health education at the secondary level.

Top

Chronic Diseases: Prevention and Control

Pathogenesis, epidemiology of major chronic diseases, health costs to society, at-risk populations, population-based prevention, and related best-practice interventions.

HLTH 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Chronic Disease Pathophysiology

Describe chronic disease processes and basic changes to the body's normal structure and function that occur in major chronic diseases that are among the leading causes of death and disability.

Chronic Disease Population Patterns

Discuss the distribution of major chronic diseases in the population.

Chronic Disease Causes & Risk Factors

Identify causes and risk factors for major chronic diseases, including biological, behavioral, social, and environmental determinants of individual and population health.

Chronic Disease Consequences

Discuss the physical, emotional, social, and economic effects of major chronic diseases on individuals, families, and society.

Chronic Disease Prevention & Control

Discuss primary, secondary, and tertiary prevention of major chronic diseases, based on an integrated understanding of chronic disease pathophysiology, population patterns, causes & risk factors, and consequences.

Research Analysis

Analyze peer-reviewed scientific articles about major chronic diseases and communicate the public health implications of chronic disease research findings.

Personal Accountability for Chronic Disease Prevention

Analyze one's own personal health behavior and family health history and apply chronic disease prevention measures in one's own life.

Infectious Diseases: Prevention and Control

Human infectious disease risk factors; bacterial, viral, and parasitic agents; pathology, diagnosis, treatment, prevention, and control; communicable, vector-borne, zoonotic, and bioterror diseases of public health.

HLTH 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Biology, Ecology and Transmission of Infectious Disease Agents

Describe transmission, risk factors, symptoms, pathology, treatment, and control and prevention measures for common viral, bacterial, and parasitic infectious diseases of public health importance.

Prevention and Control in Diverse Settings

Understand the various challenges and opportunities in preventing and controlling infectious diseases in diverse population settings (e.g., healthcare settings, mother-child relationships, resource-poor locations, food protection and emergency situations).

Applying Scientific Literature to Public Health Practice

Research, analyze, and organize published infectious disease information for the purpose of utilizing and communicating scientific information for the reduction of infectious disease risks among diverse populations.

Top

Advanced First Aid and Safety

In-depth coverage of first aid procedures for injuries and sudden illness. Leads to first aid and CPR certifications.

HLTH 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

CPR, AED, Bandaging, and Splinting

Demonstrate the skills involving cardiopulmonary rescuitation (CPR), automated external defibrillation (AED), bandaging, and splinting.

Emergency Problems

Recognize specific emergency problems (i.e., heart attack, fracture, open wound, burn insect sting) through their signs and symptoms.

Importance of First Aid

Identify the importance of first aid and emergency care

Emergency Decisions

Identify the decisions involved during an emergency.

First Aid and Emergency Care Procedures

Describe proper first aid and emergency care procedures for specific emergency problems.

Environmental Health

Environmental factors as determinants of human health: ecosystem and population dynamics; biological, chemical, and physical hazards; risk assessment; economic, political, cultural, and genetic factors.

HLTH 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hlth 100.
Taught	Fall, Winter, Spring

Course Outcomes

Perspective

Provide a global perspective of environmental issues impacting human health

Hazards

Describe the various biological, chemical and physical hazards of the ambient, indoor, and work environment that can adversely affect human health

Determinants

Discuss those determinants and factors that affect human health and the health of the environment

Environmental Management

Describe how environmental management practices may contribute to or help control emerging diseases

Assessment

Provide an assessment of those national and international health agencies, programs, and other resources that play critical roles in improving human health relative to environmental factors

Policy

Discuss elements of policy making as they influence environmental health issues

Occupational Health and Safety

In-depth focus on workplace health and safety through a multidisciplinary approach to the anticipation, recognition, evaluation, and prevention and control of workplace-related illnesses and injuries.

HLTH 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Chem 105 and Math 110 or equivalent.
Taught	Fall, Winter

Course Outcomes

OSHA Standards and Violations

Demonstrate competency in using the OSHA standards by identifying specific violations of current standards.

Safety and Health Legislation

Describe the purpose and scope of the Occupational Health and Safety Act as well as other relevant safety and health legislation and consensus standards.

Accident Investigation

Discuss and demonstrate the elements involved in completing an accident investigation.

Safety and Health Program Management

Explain how the functions of management are utilized to assure safe conditions and practices through the development of specific programs as well as an overall safety and health program.

Loss Control Strategies

Identify, evaluate, and develop loss control strategies to address the hazards associated with operating common manufacturing and construction equipment and processes.

Top

Principles and Practices of Health Promotion

Introduction to the health promotion profession, emphasizing current issues, professional preparation and employment, as well as the philosophy and foundations of professional practice in various settings.

HLTH 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hlth 100.
Taught	Fall, Winter, Summer

Course Outcomes

Professional Opportunities

Identify professional opportunities available to health education/health promotion specialists in community, school, worksite, and health care settings.

Health Specialist Roles and Responsibilities

Identify the roles and responsibilities for health education/health promotion specialists and opportunities for certifications and advanced study.

Health Promotion Resources and Organizations

Identify organizations, resources, and professional journals associated with health promotion.

Health Promotion Overview

Provide an overview of theories, models, and initiatives used to guide decision-making in the planning and implementation of health promotion programs and health behavior change.

Diverse Populations Health Promotion

Demonstrate awareness and sensitivity of the diverse and unique needs of various age group populations and cultural groups for health promotion.

Effective Communication

Identify techniques for enhancing communication in interactions with clients in health promotion settings.

Health Promotion Solutions

Propose health promotion solutions to address health problems among various populations.

Top

Technology in Health Promotion

Application of computer software and electronic communication technologies in health promotion.

HLTH 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Health Behavior Change

Understanding health behavior change theories for individuals and populations. Practical application of related models and theories.

HLTH 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hlth 330.
Taught	Fall, Winter, Spring

Course Outcomes

Socio-Behavioral Theories and Models

Evaluate the ability of selected socio-behavioral theories and models for furthering understanding of important public health problems and issues, with particular reference to health promotion and disease prevention.

Prominent Theoretical Features and Constructs

Identify prominineint features and constructs in commonly used theories and models of health behavior change.

Culture and Behavior Change

Identify the important role of culture in the context of behavior change.

Top

Principles of Epidemiology

Applying analytical tools to study acute and chronic disease to facilitate investigation and control of epidemics.

HLTH 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Stat 121.
Taught	Fall, Winter, Spring

Course Outcomes

Theories of Disease Causation

Students will describe the **theories of disease causation** and apply these models to a variety of health conditions.

Study Designs

Students will describe the major epidemiology **study designs,** their strengths and weaknesses and demonstrate understanding of conditions under which each study design is preferred. Students will apply this knowledge to a variety of health conditions.

Measures of Disease Frequency

Students will define "**measures of disease frequency**" and identify common measures in epidemiology (incidence, prevalence & other health indicators). Students will demonstrate when each measure is appropriate, identify the correct equation, calculate and interpret the results

Disease Distribution

Students will use measures of disease frequency to describe the pattern and distribution of disease.

Measures of Association

Students will define "**measures of association**" and describe their purpose. Students will identify the most common measures of association (relative & absolute) in epidemiology, explain when each measure is appropriate, identify their formulas, calculate and interpret the results of each measure.

Threats to Study Validity

Students will identify and define "**Threats to Study Validity**" (random error, bias, confounding, etc.). Students will evaluate epidemiologic research (conceptually and using basic analysis) for possible threats to study validity. Students will describe and perform strategies for testing and controlling for threats to study validity.

School Health for Elementary Teachers

Preparing for the role as a health educator, emphasizing skill-based teaching methods and acquisition of teaching resources.

HLTH 361

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Content Knowledge

1. Students will demonstrate a sound understanding of health education content included in the Utah State Core Curriculum.

Instructional Design

1. Students will integrate the Utah State Core Curriculum for elementary health instruction into their 9-month teaching calendar.

Teaching Methods

1. Students will demonstrate a variety of methods for teaching the Utah State Core Curriculum for elementary health instruction.

Best Practices

1. Students will apply key health education practices and principles.

Top

School Health Education Methods and Curriculum A

Part A of methods and curriculum preparation; effective implementation of instruction related to substance abuse prevention, safety and injury prevention, and reproductive health for secondary students; unit and lesson planning, assessment of learner performance; practice teaching.

HLTH 381

Hours	3.0 Credit, 2.5 Lecture, 0.0 Lab
Prerequisites	HLTH 276R
Taught	Fall

Course Outcomes

Teaching Resources and Standards

Identify and apply teaching resources, national and state standards, and state frameworks for teaching health education.

Classroom Environments

Identify and apply strategies for creating classroom environments conducive to optimal learning and emotional well-being.

Risks, Concerns and Challenges

Identify health risks, concerns, and challenges confronting school-age youth and develop teaching materials for helping strategies.

Instructional Strategies

Identify and experiment with a variety of instructional strategies and teaching methods to enhance health teaching including those that emphasize active learning and skill development.

Best Methods

Evaluate possible teaching methods and select the best method(s) to use when teaching specific health content areas.

Teacher Work Sample Applications

Apply a systematic instructional design process to lesson planning that utilizes Teacher Work Sample steps and provides sufficient detail and clarity for other educators to teach the lesson plan as designed and intended.

Top

School Health Education Methods and Curriculum B

Part B of methods and curriculum preparation; effective implementation of instruction related to mental and emotional health, nutrition and fitness, and disease prevention for secondary students; unit and lesson planning, assessment of learner performance; practice teaching.

HLTH 382

Hours	3.0 Credit, 2.5 Lecture, 0.0 Lab
Prerequisites	HLTH 276R
Taught	Winter

Course Outcomes

Curriculum Planning

Create a semester outline, unit maps, and lesson plans for a secondary school health education course based upon National School Health Education Standards and the Utah State Office of Education Core Curriculum.

Effective Practices

Know and demonstrate effective characteristics of health education.

Professionalism

Demonstrate professionalism in conduct, character, collaboration, and attitude.

Practicum

Qualify for student teaching field experience by completing a practicum and Teacher Work Sample, passing the Praxis exam, and successfully completing a student teaching application.

Mind/Body Health

Theories and research on the effect of emotions and attitudes on health: how negative emotions increase disease susceptibility and positive emotions encourage immune strength, health, and healing. Behavioral medicine and complementary and alternative health practices also presented.

HLTH 383

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Contributing Influences

Identify and evaluate the behavioral, social, and cultural thought processes that contribute to disease.
(Learning activities: lecture, class discussion, research study reviews, exams)

Mental Processes and Disease Development

Identify and understand the connection between mental processes/beliefs and how they contribute to chronic and infectious disease.
(Learning activities: lecture, class discussion, group presentations, videos)

Top

Special Topics

HLTH 403R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Summer

Course Outcomes

Explore Public Health

Reflect a focused analysis of readings and conduct applied projects for a special readings topic important to public health.

Top

Refugee and Migrant Health

Various types of refugees and internally displaced persons (IDPs) evolving from conflict, natural disaster, or trafficking situations. Emphasizing emergency response, along with political, cultural, social, and organizational aspects of health and disease prevention and control, in addition to the challenges and potential solutions of resettlement. Option to work directly with resettled refugees provided.

HLTH 413

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Refugee and Migrant Health

Students will demonstrate knowledge of refugee and migrant health.

Top

Injury and Violence Prevention

Concepts and interventions related to both unintentional injuries and violence.

HLTH 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 100
Taught	Fall, Winter, Spring

Course Outcomes

Injury Impact

Describe the impact of injures on health and on society in terms of mortality, morbidity, disability, and cost.

Injury Prevention

Define the terms used in the injury prevention field.

Injury Analysis and Intervention

Describe the models used to analyze injuries and determine interventions.

Injury Prevention Information Sources

Select valid sources of injury prevention information.

Prevention Intervention Selection and Recommendation

Select and recommend proven and effective injury prevention interventions.

Disaster Response and Emergency Preparedness

Key elements of public health preparedness and response to the variety of natural, technological, and man-made disasters occurring routinely on a global basis.

HLTH 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hlth 311, 420.
Note	Taught only as an evening course.
Taught	Fall, Winter, Spring

Course Outcomes

Hazards

Identify the major types of natural and manmade disasters, and describe how they affect public health, government and non-government roles in disaster situations, and how current laws governing emergency management have evolved in response to disaster events.

Assessment

Be able to use risk assessment tools to identify organizational priorities for public health preparedness, response, and recovery activities.

Management

Describe the emergency management cycle, leadership theories governing emergency management, and the incident command model used in emergency response operations.

Communication

Communicate effectively, both orally and in writing, in the terminology of the emergency management discipline, and demonstrate ability to collaborate in a team setting to solve problems related to public health emergency management and disaster response.

Top

Fundamentals of Toxicology

HLTH 426

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Concurrent with Hlth 424.
Recommended	Chem 106, 107.
Note	Examines basic concepts of toxicology as they apply to environmental toxicology. Discusses toxicokinetics of foreign chemical agents on biological systems. Focuses on understanding and prevention of mortality and morbidity resulting from environmental exposure to toxic substances.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Sampling and Exposure Assessment Lab

Theory and application of environmental and occupational sampling methods used to evaluate chemical, biological, and physical exposures; interpretation of sampling results; identification of appropriate control strategies to prevent hazardous exposures.

HLTH 428

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	HLTH 322 & HLTH 324
Recommended	Chem 105 and Math 110 or equivalent.
Taught	Fall, Winter

Course Outcomes

Sampling and Exposure

Students will improve their ability to solve problems using sampling and exposure assess lab.

Top

Methods in Health Promotion

Health promotion methods, interventions, and strategies that influence behaviors and advance public health practices within communities.

HLTH 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 100 & HLTH 330
Recommended	Hlth 332.
Taught	Fall, Winter, Spring

Course Outcomes

Categories of Methods and Strategies

1. Identify major categories of public health methods and strategies.

Intervention Categories

2. Identify the five major categories of methods for public health interventions. Additionally, distinguish between interventions, methods and strategies.

Selection of Methods and Strategies

3. Explain, justify and apply the principles that guide the selection of and implementation of public health methods and strategies to include key factors such as unique community needs, best practice, evidence and effectiveness, political expediency, and cost.

Promote Awareness using Media Products

4. Create awareness/education messages, including media products, to influence stakeholders, policy makers and their constituents on issues of public health importance.

Mobilize and Engage Communities

5. Design plans to engage community members and key stakeholders to become involved in appropriate mobilization, communication, and/or policy strategies.

Advocate for Policy or Environmental Change

6. Identify appropriate advocacy strategies to influence decision makers, or prompt policy change, at organizational and community levels.

Communication

7. Enhance personal advocacy, communication, oral presentation, leadership and team-building skills appropriate for health promotion practice.

Strategy Comparison

8. Compare best practice and promising approach health promotion strategies that make up public health interventions.

Communication

9. Enhance technical writing, oral presentation, leadership and team-building skills.

Evaluation Methods

Design and carry out an evaluation plan that will measure the impact of public health programs at changing behaviors, knowledge, attitudes, and health status. Quantitative and qualitative methods will be discussed.

HLTH 434

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 100 & HLTH 330
Recommended	Hlth 332, 432.
Note	This course should be completed after taking Hlth 432--Methods in Health Promotion, and prior to taking Health 439--Program Planning.
Taught	Fall, Winter, Spring

Course Outcomes

Data Collection

Collect primary data

Process, Impact and Outcome Evaluations

Know the appropriate use of process evaluations, including quality improvement, impact evaluation, and outcome evaluations

Logic Model

Create a logic model for program evaluation

Performance Indicators

Identify key performance indicators for process, impact, and outcome evaluations

Evaluation Plan

Develop an evaluation plan for a public health program using the CDC evaluation framework

Role of Evaluation

Describe the role of program evaluation within a health promotion program

Communicate Findings

Present evaluation results to stakeholders

Sexuality Education in the Curriculum

Preparing prospective teachers to teach sexuality education related to health curricula. Maturation, family health issues, parenthood, interpersonal skills, and related pedagogy issues.

HLTH 436

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Resolving Concerns

By the end of this course, each student will address and resolve concerns related to sexuality education and the promotion of sexual health in a caring, professional, and competent manner.

Content Knowledge

By the end of this course, each student will demonstrate a mastery of the content knowledge necessary to teach sexuality education in professional settings.

Instructional Regulations

By the end of this course, each student will be familiar with the rules and regulations for sexuality education in Utah's public schools.

Research

By the end of this course, each student will demonstrate an understanding of sexuality education research related to a specific area of their intended professional service.

Professional Preparation

By the end of this course, each student will demonstrate an understanding of sexuality education information related to a specific area of thier intended professional service.

Top

Social Marketing

Social marketing, including formative research, audience analysis, segmentation, marketing mix, strategies, pretesting; application to health promotion and public health.

HLTH 438

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hlth 330, 332, 437.
Taught	Spring

Course Outcomes

Social Marketing Plan

Be able to develop a social marketing plan.

Program Planning

Introduction to needs assessment, program development, implementation, and evaluation in health promotion and public health.

HLTH 439

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 100 & HLTH 330; Concurrent with Hlth 434.
Recommended	Hlth 432.
Taught	Fall, Winter, Spring

Course Outcomes

Community Assessment and Data Analysis

Conduct a community assessment by collecting and analyzing data to determine the health needs of a community

Priority Setting

Implement priority setting methodologies, using needs assessment data and analysis.

Outcome Development

Distinguish between goals and objectives and develop process, impact and outcome objectives.

Intervention Selection and Implementation

- Distinguish between different levels of intervention evidence (emerging, promising, effective, and evidence-based).
- Identify and design appropriate interventions based on root causes of priority issues, theory, and community contextual factors.

Intervention Management

Establish appropriate logic models, program timelines, staffing plans, and budgets.

Program Evaluation

Distinguish between process, impact, and outcome evaluation and apply appropriate strategies.

Top

Computer Applications in Epidemiology

Introduction to the basics of SAS and EXCEL focusing on the set of commands useful for data-reporting, data-management, formatting and graphics, and data-analysis. Topics include tables and regression models for epidemiologists (cumulative-incidence, case-control, and incidence rate data).

HLTH 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 345
Recommended	Stat 121.
Taught	Fall

Course Outcomes

Data Management

Identify the principles of data management.

Presentation of Data

Describe how/when to use tables, charts and graphs for data presentation.

Charts & Graphs

Create tables, graphs and charts in Excel for presenting public health data.

SAS

Use SAS to manipulate datasets provided by sources such as the Centers for Disease Control and Prevention.

SAS Procedures

Use basic SAS procedures to explore, describe and analyze data, including proc contents, proc freq, proc means, proc univariate and proc print.

Data Cleaning & Recoding

Clean and recode data to prepare it for analysis using a variety of data cleaning techniques. Document all cleaning and recoding using comments in the SAS program and external documentation (code books, data dictionaries etc.).

Output

Create clear and documented output using labels, titles, and formats.

Basic Analysis

Conduct basic analyses using SAS including frequencies, proportions, chi-square, relative risk, odds ratio & logistic regression.

Top

Clinical Trials

Introduction to methods used in the design, interim monitoring, and analysis of clinical trials, including the impact of patient exclusions and other causes of incomplete data. Concepts and principles emphasized. Main focus on randomized Phase III (comparative) trials.

HLTH 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 345
Recommended	Stat 121.
Taught	Winter

Course Outcomes

Study Design, Analysis, and Interpretation

Develop the capacity to evaluate the design, analysis, and interpretation of human studies.

Research Opportunities

Practice the skills needed to identify research opportunities and design studies that pursue those opportunities.

Written and Oral Evaluation and Presentation

Develop the capacity for oral and written evaluation of research, as well as oral and written presentation of individual study proposals.

Top

Special Topics in Epidemiology

Topics include environmental epidemiology, statistical methods in epidemiology, social epidemiology, genetic epidemiology, categorical data analysis, applied longitudinal analysis, survival analysis, and life table methods.

HLTH 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Hlth 345, Stat 121.
Taught	Winter

Course Outcomes

Elements of Assessment

Explain the Basic Elements of Research, Exposure and Outcome Assessment

Monitor

Show how Monitoring is accomplished in Environmental Health

Designs and Modeling

Describe Epidemiologic Study Designs and explain Statistical Modeling and Causal Inference

Challenges with Investigation

Explain challenges associated with investigating Disease Clusters

Mapping, GIS, Time Series

Describe Mapping, Geographic Information Systems and Time Series

Air Issues

Give examples of current health issues in Indoor and Ambient Air Quality

Contaminant Issues

Give examples of current health issues in Soil and Food Contaminants

Water Issues

Give examples of current health issues in Water and Radiation

Climate Issues

Describe how Climate Change can affect Health

Top

Field Epidemiology

Applying epidemiologic methods, including outbreak investigation; surveillance systems and methods; and infectious disease epidemiology to unexpected health problems when a rapid on-site investigation is necessary for timely intervention.

HLTH 443

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 345
Recommended	Stat 121.
Taught	Fall

Course Outcomes

Field Investigation

Be familiar with the steps of a field investigation.

Data Collection, Analysis, and Reporting

Be familiar with surveys and sampling, analyzing and interpreting data, describing and communicating the findings, dealing with the public and the media.

Cluster and Cluster Investigation

Define cluster and cluster investigation methods for assessing reported clusters and discuss the process for investigating clusters. Identify the primary challenges in reported clusters.

Top

Introduction to Biostatistics

Introduction to statistical concepts and analytical methods as applied to data encountered in biotechnology and biomedical sciences. Emphasis on the basic concepts of experimental design, quantitative analysis of data, and statistical inferences.

HLTH 447

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HLTH 345
Recommended	Hlth 440 and Stat 121.
Taught	Fall, Winter

Course Outcomes

Concepts

- Epidemiologic research questions can be translated into statistical questions that can be addressed using appropriate data and quantitative data analysis methods.
- Data analysis should be informed by an understanding of the epidemiologic study design and data collection methods that gave rise to the data, and limitations of the data such as missingness, information bias, and selection bias.
- Many epidemiologic research questions involve comparisons across groups, where associations between exposures and outcomes are likely confounded by other variables due to a lack of randomization of exposures in the study design. Standardization and regression are two methods of reducing confounding when estimating associations.
- Biostatistical procedures rely on concepts of probability and probability distributions. Using these concepts, samples are used to estimate unknown population parameters, and precision of estimates is shown with confidence intervals.

Procedures

- Summarize nominal, ordinal, and numerical data in tables and graphs
- Calculate sensitivity, specificity, positive and negative predictive values
- Select a probability sample using random numbers
- Standardize means, proportions, and rates across groups for comparison
- Calculate point estimates, confidence intervals, and P values
- Compare means using *t* tests and linear regression
- Compare proportions using chi-square tests, logistic regression, and binary regression
- Compare rates using Poisson regression
- Calculate life tables and Kaplan-Meier curves for survival data
- Compare survival times using log rank tests and Cox proportional hazards regression
- Combine results from multiple studies using meta-analysis procedures

Modes of Communication

- Communicate research findings to a scientific audience in writing (primary focus)
- Communicate research findings to a scientific audience orally (secondary focus)

Top

Women's Health Issues

Overview of selected health topics affecting women's health status. Primary emphasis on steps to enhance personal health and fulfill divine roles from childhood through adulthood.

HLTH 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Women's Health Issues

Identify and understand the determinants of women's health issues.
(Learning activities: lecture, class discussion, videos, out of class activites, guest lecturers)

Women's Disease Research and Reporting

Identify and report on specific chronic and infectious diseases that affect women.
(Learning activities: lecture, class discussion, book review, guest lecture)

Assessment Sources

Identify ways to improve women's health using a variety of assessment sources.
(Learning activities: lecture, class discussion, review of CDC and other health statistics, interviews, guest lecture)

Top

Substance Abuse and Addictive Behavior

Physiological, psychological, sociological, and legal implications of drug use and addictive behaviors, emphasizing nature, cause, treatment, and prevention.

HLTH 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Social Policies

List and describe specific social policies that reduce alcohol, tobacco, and other drug use.

Substance Use and Abuse

Explain substance use and abuse from a multidisciplinary perspective.

Substance Use Determinants and Predictors

Explain the major social determinants and predictors of substance use in the United States.

Drug Addiction Biology

Explain the biological basis of drug addiction.

Drug Health Problems and Risks

Describe the health problems and risk associated with specific drugs.

Marketing, PR, and Political Activities of Tobacco and Alcohol

Describe the marketing, public relations, and political activities of the tobacco and alcohol industries.

Substance Abuse Epidemiology

Provide the descriptive epidemiology of substance abuse in the United States.

Top

Health and the Aging Process

Public health strategies to promote health and functional independence in the context of the inevitable consequence of aging.

HLTH 466

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Normal Aging Processes

Understand the physiological aspects of the normal aging process.

Aging Pathology

Understand aging as a pathological process and the factors in both the external and internal milieu, this may contribute to premature aging.

Disease Prevention and Health Promotion Among the Aging

Relate knowledge about the organic and infectious diseases, common disorders, and disabilities prevalent among the elderly to disease prevention and health promotion among the aged.

Gerontology Research

Become exposed to professional literature pertaining to the biological, medical, and health aspects of aging including the use of clinical preventive services as noted by gerontology researchers.

Aging Physiology and Experimental Approaches

Understand the physiological aspects of aging and the experimental approaches used in studying the aging process.

Health Programs and Services for the Aged

Identify and distinguish the federal, state, and community health programs and services for the aged, including medical care, hospitalization, extended care, rehabilitation, and health maintenance.

Preventative Lifestyle Behaviors

Promote healthy lifestyle behaviors that help prevent premature aging, promote the health of the elderly, and contribute to the extension of the prime of life.

End-of-Life Decisions and Planning

Understand decision-making related to end-of-life planning.

Secondary Student Teaching

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

HLTH 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of course work or department approval; requires a major GPA of 2.85; at least a C- in Hlth 421.
Taught	Fall, Winter

Course Outcomes

Teacher Work Sample

Successful completion of TWS sections 1-7.

Student Teaching

Successful completion of a year long internship or 14 week student teaching placement.

Clinical Practice Assessment Scale

University Supervisor and Mentor Teacher CPAS scores of 3 or higher on each of the the 10 CPAS principles.

Praxis

Completion of the Praxis exam.

Professionalism

Completion of the PIBS university supervisor assessment.
Completion of the PIBS self-assessment.

Top

International Health

Identifying disease patterns in "developing" countries, exploring the social and cultural context of health, and reviewing behavior change strategies for improving well-being.

HLTH 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Maternal and Child Health Improvement

Idenitfy behaviors that improve maternal and child health and how they may be specific for particular groups.

Global Disease Determinants

Discuss the determinants of global diseases and why inequalities and inequities exist.

Culture and Optimal Health Behaviors

Explain how culture, our own and others, facilitates or hinders practicing optimal health behaviors.

Morbidity and Mortality in Women and Children

Describe the leading causes of morbidity (sickness) and mortablity among women and children in the developing world.

Nutrition and Disease Morbidity and Mortality

Discuss how undernutrition and overnutrition contribute to morbidity and mortality related to infectious and chronic disease.

Morbidity and Mortality in Women and Children: Epidemiology

Using principles of epidemiology, identify the leading causes of morbidity (sickness) and mortablity among women and children in the developing world and compare the burden of disease across different regions of the world.

Health Program Monitoring, Evaluation, and Research

Describe how monitoring, evaluation, and applied research improve health programs.

Health Behavior Strategies

Discuss successful, evidence-based strategies for changing behaviors and improving health.

Top

Applied International Health

Engaging in an applied international health experience.

HLTH 481

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Any Health Science core course.
Taught	Spring, Summer

Course Outcomes

Applied International Health

Students will demonstrate knowledge in applied international health.

Mentored Research

Collaborate with professors on mentoring grants or other public health-related research and initiatives.

HLTH 491R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Conduct applied research

Experience at least one subset of research skills while conducting supervised public health research with a faculty member.

Top

Directed Public Health Readings

Self-paced reading and in-depth studying of public health topics.

HLTH 492R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Public Health Readings

Students will deepen their understanding of public health by reading books and articles related to the subject.

Top

Academic Internship

Senior capstone experience.

HLTH 496R

Hours	0.5 - 9.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	HLTH 439
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Apply professional competencies in Public Health

Obtain experience, as proctored by an approved internship supervisor, to apply professional competencies in public health as assessed through an internship report and internship supervisor rating

Top

Honors Topics

Introductory seminar for incoming honors students.

HONRS 100R

Hours	0.5 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Introduction to the College Classroom

Develop a basic understanding of how one can get the most out of class attendance and participation.

Introduction to University-level study

Become familiar with what it means to productively learn and study at a university level.

Top

Late Summer Honors

One week introductory seminar for incoming freshmen.

HONRS 101

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Term 1

Course Outcomes

Introduction to University-level study

Become familiar with what it means to productively learn and study specialized topics at the university level of rigor and practice.

Introduction to Specialized Study

Be exposed to the knowledge, skills, and disposition required to study the course's specialized topic at a university level.

Introduction to Honors Program Learning Outcomes

Acquire a basic understanding of the Honors Program Learning Outcomes.

Top

Introduction to Honors: Great Questions

Introduction to Honors curriculum, especially the study of big ("Great") questions. The course models different disciplinary approaches to Great Questions (guest lectures), and concludes by briefly exploring interdisciplinary approaches (preparation for UNIV 291, 292, 293).

HONRS 120

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

1.Basic Understanding of 5 Disciplines

Acquire a basic understanding of the philosophy of the university's major disciplines.

2. Great Questions

Develop the ability to recognize and articulate "Great Questions" that undergird and give meaning to the narrower questions we ask in our academic and professional work, and in our actions and relationships in the world.

3. Academic Research Practices

Acquire a beginner's knowledge of appropriate, accepted academic research methodologies, practices, and conventions in the different major disciplines.

4. Disposition of a Life-Long Learner

Begin to develop the disposition of a Life-Long Learner by approaching with wisdom, reverence, and love, the study of ourselves and our world through each major academic discipline.

Top

Honors Seminar

Weekly presentation by faculty and invited guests on various research topics. Students will complete one Great Works response.

HONRS 292R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Introduction to University-level research

Be exposed to faculty research projects in specific academic disciplines.

Introduction to Interdisciplinary Research

Be exposed to faculty research projects that are interdisciplinary in nature.

Top

Advanced Writing

Approaches to advanced writing that differ from departmental offerings.

HONRS 300R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Completion of First-Year Writing requirement.
Taught	

Course Outcomes

This course is no longer taught

This course is no longer taught.

Top

Insight: Honors Program Journal

HONRS 301R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

1. Great Works Experience

Student will complete at least one Great Works experience.

3. Problem-Solving Application

Student will demonstrate an additional depth of reflective rigor through anapplication of course principles to solve real-life problems.

Top

Teaching Writing: Writing Fellows

HONRS 301R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

No Longer Taught

This course is no longer taught in the Honors Program.

Top

Great Questions Tutorial

This capstone to the Honors Program coursework provides group and individual instruction in researching and writing the Great Question Essay, a multi-disciplinary essay on an approved "big question" of the student's choosing.

HONRS 320

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	HONRS 120; or HONRS 292R
Recommended	Wrtg 150.
Taught	Fall, Winter

Course Outcomes

Great Questions

Students will acquire a solid understanding of how the University Core disciplines can work together to help us respond productively to the big, or "Great" questions and problems we face in our world.

Investigate and Analyze a Great Question

Students will be able to identify, respond intelligently to, and conduct research on Great Questions that humanity has posed throughout history and into the present day.

Improve Writing

Students will learn to write well for an educated, non-specialist audience.

Demonstrate Disposition of a Life-Long Learner

Demonstrate and further develop the ability to conduct intellectual inquiry with wisdom, reverence, and love during the process of writing the Great Question Essay and in the Great Question Essay itself.

Top

Honors Experiential Learning

Facilitates substantive experience that augments Honors education through approved BYU international program or internship, Honors peer mentoring, or education-related service. Increases understanding by applying, teaching, expanding, and reflecting on knowledge and skills acquired at BYU.

HONRS 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	HONRS 120
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1.

Apply and increase what is learned at BYU in education-related service and in the world beyond BYU.

2.

Live and work in the world with wisdom, reverence, and love.

Top

Honors Student Advisory Council

Course for students elected to the Honors Student Advisory Council. Credit granted for work organizing honors events. Gives leadership and service experiences.

HONRS 391R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Develop Leadership Skills

Learn how to plan and facilitate social and educational activities for other Honors students.

Develop Collaboration in Education Skills

Learn how to work with other faculty, students, and other stakeholders to use social activities to accomplish program aims.

Special Topics

For upper-level students on approved special topics supervised under the Honors Program. Topics vary.

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Specialized knowledge and skills

Students will develop the particular knowledge, understanding, and skills associated with the specialized focus of the course. Topics vary.

Writing

Students will be able to write on the course topic with appropriate conventions, use of evidence, and level of analysis and argumentation.

Top

Honors Thesis Proposal

Writing the Honors Thesis Proposal in preparation for writing the Honors Thesis. Students find a thesis chair, have initial contact with them, and complete a proposal leading to completing the Honors thesis.

HONRS 398

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Note	This course should be taken preferably during the sophomore or junior year.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Conventions and Practices of Academic Research

Know and be able to demonstrate the ability to conduct original research in your area of specialization within accepted disciplinary practice.

Top

Honors Thesis

HONRS 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Apply Theory to Practice

Student will demonstrate application of his/her Honors Thesis project to his/her personal religious beliefs and to solving real-life problems.

2. Think Critically

Student will incorporate critical thinking skills in analytically approaching a discipline-specific question.

3. Progress to Graduation with Honors

Student will apply course credits towards completion of graduating from BYU with Honors recognition.

4. Research and Write

Student will utilize advanced research and writing skills on an approved Honors Thesis project.

First-Year Hungarian

Basic language skills.

HUNG 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Hungarian

Basic language skills.

HUNG 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	HUNG 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Second-Year Hungarian

Grammar review and conversation.

HUNG 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	HUNG 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

HUNG 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	HUNG 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Cultural History of Hungary

HUNG 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Hung 201 or foreign residence experience.
Note	For returned missionaries and others with extensive Hungarian language experience. Required course for obtaining language credit by examination (Hung 101, 102, 201, 211R). Culminating course for Languages of Learning requirement.
Taught	

Course Outcomes

Communication Skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

Introduction to International Studies

Academic expectations in the major and career orientation; review of campus resources; faculty presentations.

IAS 100

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Disciplinary Knowledge

Students will enhance their knowledge of the discipline(s) of International and Area Studies.

Top

Academic Internship: International

Nonsupervised undergraduate foreign internship.

IAS 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Skill Enhancement

Students will utilize a significant range of skills and abilities in a professional setting

Cultural Survey

Multidisciplinary survey of various countries and regions in preparation for extended experience abroad.

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Performing group or ISP participant status.
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-Africa

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-Asia

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-China

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-Eastern Europe

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-England

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-Europe

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-Middle East

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Course Objectives

1. Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
2. Train students to be safe and to be ambassadors of BYU
3. Help students understand cultural, political and economic history of their host country
4. Provide a forum for directors to plan with their groups

Practical Information

Students will learn the practical information necessary to succeed in the new cultures they will visit.

Cultural Survey-Scandinavia

IAS 201R

Hours	0.5 - 4.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Prepare the students to go on their international experience

· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Top

Introduction to Development Studies

Exploration of international development in non-formal education, micro-enterprises, community organizations; hunger, poverty, and other special problems in developing areas of the world.

IAS 220

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Intro to Development Studies

Upon successfully completing this course, a student will be able to recognize the historical origins of international development and the various agendas that it embodies.
Upon successfully completing this course, a student will be able to recognize and articulate the complexity of international development issues and their interdisciplinary nature.
Upon successfully completing this course, a student will be able to identify major theories and approaches to international development both in general and across different key disciplines.
Upon successfully completing this course, a student will be intellectually ready to embark on an International Development Minor Internship.

Top

Introduction to Africana Studies

Introduction to the discipline of Africana Studies, focusing on (1) themes that emerge in this field, such as communities and cultures, race and gender, or the legacies of slavery and colonialism, and (2) methods relevant to the study of those themes.

IAS 221

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Area Knowledge

Students will enhance their knowledge of various approaches to understanding and analyzing Africa, its people, and culture.

Top

Kennedy Center Lecture Series

Weekly lectures by national and international authorities on world affairs; designed as an introductory class for all David M. Kennedy Center majors.

IAS 301

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Model United Nations Preparation

Preparation for participating in MUN projects, on campus, in public schools, and at the United Nations in New York.

IAS 351R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

MUN Preparation

• Understand the framework for multilateral diplomacy -Students will demonstrate understanding of the process and politics of international organizations
• Explore the rationale for diplomacy - Students will understand how international law informs diplomacy and relates to international organization.
• Improve public speaking ability - Students will improve oratory ability by learning and demonstrating elements of effective public speaking.
• Improve policy writing ability - Students will demonstrate the ability to write policy papers and resolutions with regular feedback and various opportunities individually, in small groups and in large simulations.
• Improve research ability - Students will demonstrate effective research skills while learning about country policies and international topics in greater depth.
• Develop parliamentary procedure skills - Students will learn and effectively use beginning and intermediate parliamentary procedure in group settings.
• Expand leadership capacity - Students will explore the dynamics of leadership, including motivation, decision making, and group dynamics and will begin to demonstrate leadership abilities, especially in simulations/case study/small group activities.

Intercultural Outreach Preparation

Developing abilities to prepare and share international understanding in public and private schools.

IAS 353R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Intercultural Outreach

1. Activelyreflect on your own cultural values, practices, and traditions and develop an articulated sense of respect for them
2. Study, understand, and negotiate the central role cultural values—your own and others'—play in all human interactions
3. Develop a personal framework for effective intercultural participation
4. Probe commonly held views of culture and intercultural competence
5. Develop a pedagogical approach for fostering transformative cultural contact situations and for creating "third zones", as negotiated and productive areas of intercultural work
6. Create written and oral forms of intercultural outreach
7. Become an active agent for intercultural responsibility and competence

Top

Model Arab League Preparation

Understanding Middle Eastern governments and foreign policies. Preparation and attendance at the Model Arab League Conference.

IAS 354R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Area Knowledge

Students will enhance their knowledge of both the assigned country and the larger context in which the Arab League functions.

International Field Study Preparation

Cross-cultural field research and survival with a regional emphasis and application.

IAS 360R

Hours	0.5 - 9.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Note	For students preparing for International Field Studies and Internships or Study Abroad programs.
Taught	Fall Term 2, Winter, Spring

Course Outcomes

Field Studies Preparation

1. Improve your ability to ask analytical and insightful questions as relates to your experience and express yourself more clearly in writing.
2. Develop cross-cultural skills for entering and navigating a new culture and developing new meaningful relationships with people from often very different backgrounds than you.
3. Further develop a working knowledge of field methods and project design, and develop a clearly written and implementable plan for your field study.
4. Develop a basic understanding of research ethics and the IRB process.
5. Collaborate and learn from others in the BYU Field Studies community.
6. Create realistic expectations of yourself and your academic experience abroad.

Post-Fieldwork Analysis and Writing

Writing course designed to help students write a quality research paper

IAS 361

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	IAS 360R
Note	Only for those students who have participated in an International Study Programs Field Study Program.
Taught	Fall, Winter

Course Outcomes

Post Field Analysis and Writing

- Rhetorical Knowledge – Students will demonstrate that they can write clearly, focus on a well-defined purpose in writing, use conventions of format and structure appropriate to their discipline, and adopt a voice, tone, and level of formality suited to multiple purposes and audiences, including audiences both within and outside the discipline in which the course is offered.
- Writing Processes – Students will develop productive and flexible individual and collaborative writing processes, including prewriting, drafting, revising, editing and proofreading. These processes could include the following: collecting data, finding supporting evidence, and creating good arguments; organizing the material for a paper; writing successive drafts of the same paper; group writing; seeking and using peer responses; editing grammar, usage and punctuation; and using conventional formats. These processes will reflect processes of inquiry within the student's discipline.
- Processes of Disciplinary Research – Students will demonstrate the ability to use appropriate research tools and processes of research within their particular discipline, including library research. Students will demonstrate their ability to identify and evaluate sources, retrieve and evaluate data, take notes, and follow conventions of quoting, paraphrasing, and summarizing. They will cite sources properly and demonstrate an understanding of ethical issues related to research, including how to avoid plagiarism.

International Internship Preparation

Orientation on cross-cultural communication, globalization, interfacing with internship providers, culture shock, international safety/health, and BYU policies abroad.

IAS 369R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For students preparing to participate in an internship, field practicum, or experiential learning experience abroad.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Cultural Proofs

Independent research on cultural topics and intercultural communication.

IAS 380R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For students studying abroad.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Factual Knowledge

Gain knowledge from close observation of cultural traditions and practices

Critical Thinking and Effective Writing

Each student will develop in these areas through careful analysis of cultural traditions and practices and the production of field notes and a reflective written summary

Research Skills

Through participation in the cultural proofs exercises, each student will become familiar with basic field study research skills and practices

Icons-Diplom Negot

IAS 397R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Thinking and Effective Writing

The student will develop these skills by producing a well-reasoned and well-written research paper

Research Skills

Develop techniques of advanced research appropriate to the study

Factual Knowledge

Students will gain knowledge through advanced study in focused area of IAS

Icons-Diplom Trans

IAS 397R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Thinking and Effective Writing

The student will develop these skills by producing a well-reasoned and well-written research paper

Research Skills

Develop techniques of advanced research appropriate to the study

Factual Knowledge

Students will gain knowledge through advanced study in focused area of IAS

Top

Topics in International and Area Studies

Study relating to current world problems.

IAS 397R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Factual Knowledge

Students will gain knowledge through advanced study in focused area of IAS

Critical Thinking and Effective Writing

The student will develop these skills by producing a well-reasoned and well-written research paper

Research Skills

Develop techniques of advanced research appropriate to the study

Academic Internship: International

Individualized work or volunteer experience in an international setting.

IAS 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Acceptance into program.
Note	Class must be coordinated through International Study Programs.
Taught	

Course Outcomes

Academic Internship

· Apply skills and material learned in traditional courses to a real-world workplace environment.
· Demonstrate proficiency in the skills required by the internship supervisor.
· Demonstrate an ability to link insights gained from traditional classes and from real-world workplace experiences.

Top

Seminar on Japanese Workplace: Society and Culture

IAS 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Note	Required seminar for interns in the Japan seminar and intern program held only in Japan.
Taught	Fall, Summer

Course Outcomes

Area Knowledge

Students will deepen their understanding of Japanese workplace, society, and culture.

Top

Directed Research for African Studies Minor

Directed research project (library and/or on-site experience) related to African studies or the African diaspora. Must be supervised by faculty with extensive in-field experience in Africa and African Studies.

IAS 491

Hours	3.0 Credit, 2.5 Lecture, 0.0 Lab
Prerequisites	Enrollment in the African Studies minor.
Note	Students may adapt their research project to their individual major requirements with the approval of their major department.
Taught	Fall, Winter

Course Outcomes

Area Knowledge

Student will enhance their knowledge of a specific selected topic in African Studies.

First-Year Icelandic

Basic language skills.

ICLND 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Comprehension

Students will comprehend Icelandic as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Icelandic well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, obtain food and lodging, carry out simple transactions, and talk about a variety of topics of common interest primarily in the present, with limited use of other time frames.)

Writing

Students will be able to write short messages and well-articulated sentences in Icelandic on familiar topics.

Language Learning Strategies

Students will develop comprehension and learning strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Icelandic-speaking countries.

First-Year Icelandic

Basic language skills.

ICLND 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Comprehension

Students will be able to comprehend Icelandic as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Icelandic well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.)

Writing

Students will be able to write short messages and well-articulated sentences in Icelandic on familiar topics.

Language Learning Strategies

Students will develop strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Icelandic-speaking countries.

Top

Second-Year Icelandic

Conversation, vocabulary building, and reading and writing skills, emphasizing writing.

ICLND 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Iclnd 102 or equivalent experience.
Taught	Fall even years

Course Outcomes

Comprehension

Students will be able to comprehend Icelandic as they hear and read authentic language relating to familiar topics with strategies to even derive meaning out of less familiar topics.

Speaking and Writing

Students will be able to speak and write Icelandic well enough to satisfy immediate needs. (Students will learn to communicate in social situations asking and answering questions, carrying out transactions, and talking about a variety of topics of common interest in present, past, and future times.)

Conversation

Students will be able to participate actively in conversations about Icelandic-speaking countries, concrete topics, and current events.

Opinions

Students will be able to begin expressing and supporting opinions about familiar topics.

Top

Second-Year Icelandic

Emphasis on literature and culture with continued writing, grammar, listening, and speaking.

ICLND 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	ICLND 201
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter odd years

Course Outcomes

Literature and Cultural History

Students will be able to identify and define key characteristics of the important moments in Icelandic cultural history and place significant works in a meaningful cultural and historical context using the basic tools of literary analysis.

Comprehension

Students will be able to comprehend Icelandic as they hear and read authentic language relating to familiar and less familiar topics.

Speaking and Writing

Students will improve their reading and writing skills in Icelandic by beginning to communicate in connected and extended discourse, expressing and supporting opinion, and navigating less-familiar topics and situations.

Icelandic Culture

Students will broaden and deepen their perception and appreciation of Icelandic culture.

Top

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

ICLND 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Iclnd 102 or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to speak about autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions, and cope with gaps in knowledge.

Fluency

Students will be able to use an appropriate variety of vocabulary related to autobiographical and concrete topics.

Vocabulary

Students will speak in a way so as to be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Top

Third-Year Conversation

Advanced conversational skills.

ICLND 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Iclnd 211R or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to relate current events, plots of books or movies, and state opinion.

Fluency

Students will be able to initiate and maintain fluent conversations and cope with gaps in knowledge in contexts related to concrete topics.

Vocabulary

Students will be able to speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

Pronunciation

Students will speak in a way so as to be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Top

Academic Internship

On-the-job experience in Icelandic.

ICLND 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department's consent.
Taught	

Course Outcomes

Professional Experience

Improve professional experience and appreciation of cultural practices in an international context.

Old Icelandic Language and Literature

Readings and exercises in Old Icelandic; introduction to Old Icelandic literature and its influence on later Icelandic culture.

ICLND 429

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Iclnd 201 or equivalent experience.
Note	Entry course for returned missionaries or others with equivalent Icelandic language experience. Required course for obtaining language credit by examination (Iclnd 101, 102, 201, 211R). Culminating course for GE Foreign Language requirement.
Taught	Winter odd years

Course Outcomes

Reading and Analytic Skills

Students will develop the capacity to read and understand Old Icelandic texts with considerable facility and develop an appreciation for the richness and variety of Old Icelandic literature through close readings from a variety of sagas and poetry.

Linguistic Skills

Students will build upon their previous knowledge of Icelandic (whether as a missionary or through Icelandic 202) by strengthening their understanding of its complex grammar. Students will also develop a clear understanding of the morphological, phonological, syntactic, and semantic differences between Old and Modern Icelandic.

An Introduction to the Humanities

Study of the arts emphasizing forms and relationships, the development of critical skills, and an awareness of traditional humanistic values.

IHUM 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Artistic Production, Methodologies and Techniques

Demonstrate basic knowledge of methods, techniques, and approaches used in the production of artistic artifacts

European and American cultural history

Demonstrate basic knowledge of European and American cultural history.

Critical Thinking and Writing

Demonstrate ability to analyze a cultural artifact, using terminology appropriate to the art form being studied, and evaluate its effectiveness as an expression of cultural values

European and American cultural history

Demonstrate basic knowledge of European and American cultural history.

Artistic Production, Methodologies and Techniques

Demonstrate basic knowledge of methods, techniques, and approaches used in the production of artistic artifacts

Critical Thinking and Writing

Demonstrate ability to analyze a cultural artifact, using terminology appropriate to the art form being studied, and evaluate its effectiveness as an expression of cultural values

Top

Honors Western Humanities 1: Antiquity to Renaissance

Western civilization from Greek antiquity to Renaissance from perspective of traditional humanistic values reflected in its arts and ideas. Examines fundamental questions about human experience, formative events in history, and value of important literary and artistic texts.

IHUM 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Historical Events

Demonstrate factual knowledge of major Western European historical events from approximately 1200 BCE to the late Renaissance.

Figures and Movements

Demonstrate factual knowledge of major Western European figures and movements in philosophy, science, literature, art, architecture, and music from approximately 1200 BCE to the late Renaissance.

Ideology vs. Artifacts

Explain the connections between dominant Western ideologies and cultural artifacts produced from approximately 1200 BCE to the late Renaissance.

Analysis

Analyze the basic components of a literary work, a painting, or a building through the correct use of appropriate terminology and evaluative models

Communication Skills

Improve communication skills through short writing assignments that require higher order thinking skills to connect cultural values discussed in class with daily experiences and evaluate their relevance to modern life.

Top

Western Humanities 1: Antiquity to Renaissance

Construct cogent, lucid, and persuasive arguments in essays and short papers combining formal

analysis of cultural artifacts with critical evaluation of the Western ideologies that helped produce them.

Introduction to the Humanities of Asia

Major arts of Asian cultures in their historical, religious, and philosophical settings.

IHUM 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Recognition of Masterpieces

Recognize key architectural, artistic, and musical masterpieces from India, China, and Japan based on a study of the Blackboard examples and class participation.

Familiarity with Major Literary Works

Become familiar with some of the major literary works from India, China, and Japan by completing the reading assignments and attending class lectures and discussions.

Understanding Another Culture

Demonstrate basic understanding of at least one culture in addition to North American and European cultures.

Differences in Traditions

Understand some of the basic similarities and differences between LDS beliefs and Hindu, Buddhist, Confucian, Daoist, and Shinto traditions as they are manifested in the humanities studied during the semester.

Top

Introduction to the Humanities of the Islamic World

Major arts of Islamic cultures in their historical, religious, and philosophical settings.

IHUM 242

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Patterns and Parallels in World Religions

To observe patterns and parallels that exist in all world religions in an effort to assess how religious beliefs and practices give meaning to people's lives everywhere

Comparative Religion

To gain a deeper awareness of one's own religious tradition through a comparative (not competitive!) approach to the study of humanities and religion

Analyze Islamic Humanities

Analyze, using appropriate terminology and evaluative models, the key components of Islamic humanities.

Non-Western Cultural Understanding

Demonstrate basic understanding of at least one culture in addition to North American and European cultures

Aesthetic/Intellectual Contributions of the Islamic World

to acquire a basic understanding and appreciation of the history, beliefs, practices, and aesthetic/intellectual contributions of the Islamic world in order to allow students to discuss Islam with accuracy and respect. It should be the aim of the student of comparative religion to explain another religious tradition sympathetically and intelligently so that an adherent of that faith would recognize that explanation as authentic and acceptable

Introduction to Interdisciplinary Humanities

Major literary, artistic, and musical forms and their use in the interdisciplinary study of aesthetics and culture and intellectual history. May include International Cinema.

IHUM 250

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Critical Thinking and Analysis

Sharpen your analytical and critical thinking skills

Vocabulary and Technical Terminology

Master vocabulary and technical terms used in the analysis of a variety of artistic artifacts

Individual Counseling

Receive individualized counseling and direction for your Interdisciplinary Humanities major

Artifact Production Methodologies and Techniques

Broaden and deepen your knowledge of methods, techniques, and approaches used in the production of artistic artifacts

Writing Exercises

Improve your writing skills through directed exercises

Close Reading Skills

Learn and practice close reading skills for various disciplines in the humanities

Humanities of Latin America

Achievements of Latin American culture regarding art, philosophy, literature, and music from the pre-Columbian era to the present.

IHUM 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Critical Thinking and Analysis

Learn to think, speak, and write critically about literature (poetry, essay, short story, novel), painting, film, and music and to provide thoughtful and insightful interpretations of major works

Culture and Latin American Identity

Understand the vital role culture plays in formulating and promoting Latin American identity and autonomy and in probing universal questions about human experience

Latin American Experience in the Arts

Develop an appreciation for the major racial, social, geographical, and historical challenges of Latin American experience as they are reflected thematically and formally in the arts

Cultural Developments in Latin America

Gain a historical understanding of the major cultural developments in modern Latin America and respect for Latin American people and their cultures

Non-Western Culture

Demonstrate basic understanding of at least one culture in addition to North American and European cultures

Top

Honors American Humanities 1: Colonial Era Through 1876

Value systems reflected in the arts and ideas of the United States from the colonial era to 1876.

IHUM 261

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Spring

Course Outcomes

Figures and Works in American Arts: Pre-Columbian to 1876

Develop a broad familiarity with some of the most significant figures and works in the history of the American arts from Pre-Columbian times to 1876

Lifelong Learning and Service

Commit to a lifetime of learning and service to humanity

European and American Cultural History

Demonstrate broad interdisciplinary knowledge of European and American cultural and intellectual history

Figures and Works in American Arts: 1876 to Present

Develop a broad familiarity with some of the most significant figures and works in the history of the American arts from 1876 to the present

Scholarly Discourse and Methodology

Engage with current scholarly discourse within the accepted methodology of the field concerned

Cultural Traditions and Voices: Pre-Columbian to 1876

Develop an appreciation for the rich variety of cultural traditions and voices on display in American history from Pre-Columbian times to 1876

Top

Course Outcomes

Argumentation

Improve the student's ability to develop persuasive arguments in both oral and written forms

Top

Sophomore Seminar: Humanities and the Environment

Focused topics exploring ethical, moral, and epistemological issues in the study of the humanities.

IHUM 280R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Thinking

Expand critical thinking abilities through activities that stretch the student's abilities in reading, writing, and comprehension

Top

Sophomore Seminar: Humanities and the Sacred

Focused topics exploring ethical, moral, and epistemological issues in the study of the humanities.

IHUM 280R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Analytical Writing

Strengthen writing skills through instructor feedback and student response, learning to accept criticism and responding positively to it

Top

Special Studies in the Humanities

IHUM 290R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

This course is not currently offered

This course is not currently offered

Advanced Writing in Comparative Arts and Humanities

Introduction to the language, methods, and purpose of academic argument, oral and written. Core principles behind academic argumentation and its relevance to logical thinking and effective communication.

IHUM 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	First-Year Writing.
Taught	Fall, Winter

Course Outcomes

Critical Thinking, Analysis, and Writing

Demonstrate the skills of humanistic study, i.e. analyze, think critically and write clearly and persuasively.

Scholarly Discourse

Demonstrate in written assignments acquaintance with and understanding of scholarly interpretations of cultural artifacts relevant to the course content.

Research Arguments and Methodologies

Produce original arguments based on sound research methodology

Top

Interpretation of Literature and the Arts

Understanding and writing about literature and at least one of the other arts; critical theory.

IHUM 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 311; or PHIL 300; IHum 201 and 202 and 250. At least three of the remaining historical foundation courses (item 3 under major requirements).
Note	Should be taken junior year.
Taught	Fall, Winter, Spring

Course Outcomes

Literary Interpretation and Theory

Develop the student's basic understanding of theories of interpretation in the humanities that relate to questions of gender, class, and race or ethnicity

Humanities Philosophy

Develop a basic understanding of the kinds of philosophical questions that have been and still are important to the study of the humanities

Meaning and Importance

Develop a mature, sophisticated ability to discern meaning and importance in the works we study in the humanities

Contemporary Issues in the Humanities

Methods and practices of the discipline. Developing and executing research programs. Writing thoughtful, well-informed and sophisticated papers. Introduction to significant and pressing cultural issues such as globalization, media and the arts, memory and history, among others.

IHUM 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IHUM 201 & IHUM 202 & IHUM 250; Engl 311.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Contemporary Critical Theory and Interpretation

Develop understanding of contemporary theories of interpretation in the humanities that relate to questions of gender, class, and race or ethnicity

Analytical Skills

Improve the ability to discern meaning and importance in cultural artifacts through close reading analysis

Research and Argumentation

Improve library research and persuasive argumentation skills through focused writing exercises

Top

Junior Seminar in the Interdisciplinary Humanities: Movements, Periods, and Areas

Topics could cover significant movements, periods, areas, and genres in a cultural history of the arts. Obtaining a deep understanding of the arts and the values articulated within a particular historical era. The use of concepts usch as history, context, area, and genre in the study of the arts.

IHUM 390R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IHUM 250
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Cultural and Intellectual History

Demonstrate deep knowledge of a particular historical period's cultural and intellectual creations in a chosen culture.

Transferable Skills

Demonstrate advanced critical thinking, analytical and writing skills in oral and written assignments.

Argumentation and Research Methodology

Demonstrate refined argumentation skills and mastery of library research techniques in written assignments.

Scholarly Discourse

Demonstrate in written assignments acquaintance with and understanding of scholarly interpretations of cultural artifacts from the chosen historical period.

Academic Internship

Combined study-work experience related to the humanities major (museums, government agencies, publishing firms, etc.).

IHUM 399R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	IHUM 350; 12 hours of historical foundation courses in humanities. Humanities major or minor status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Experiential Learning

Strengthen social, communication and organizational skills essential to competing successfully in the job market through working on-site in a business environment

Cultural Awareness

Expand understanding and knowledge of world cultures through in-country residency and improvement of foreign language skills

Top

Seminar in the Humanities

Interdisciplinary study of problems and major figures in the humanities. Topics vary.

IHUM 490R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IHum 350 or concurrent enrollment.
Recommended	IHum 370.
Taught	Fall, Winter, Spring

Course Outcomes

Critical Thinking, Analysis, and Writing

Demonstrate the skills of humanistic study, i.e. analyze, think critically and write clearly and persuasively.

Subject-Specific Outcomes

Each iteration of this course has more specific outcomes based on the subject matter at hand; those additional objectives are articulated in each instructor's customized syllabus

Research Arguments and Methodologies

Produce original arguments based on sound research methodology

Top

Directed Readings

IHUM 495R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Contract and instructor's consent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Thinking, Analysis and Writing

Demonstrate the skills of humanistic study, i.e. analyze, think critically and write clearly and persuasively, through intensive study of selected texts under the guidance of a faculty mentor.

Argumentation and Research Methodology

Produce original arguments based on sound research methodology, evidenced in a term paper of substantial length submitted to the faculty mentor.

Top

Honors Thesis

IHUM 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Critical Thinking, Analysis, and Writing

Demonstrate the skills of humanistic study, i.e. analyze, think critically and write clearly and persuasively, in a thesis acceptable to the Honors thesis advisor and committee.

Argumentation and Research Methodology

Produce original arguments based on sound research methodology.

Scholarly Discourse

Engage with current scholarly discourse within the accepted methodology of the field concerned.

Top

Directed Readings

IHUM 595R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Graduate coordinator's consent
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Critical Thinking, Analysis, and Writing Skills

Demonstrate the skills of humanistic study, i.e. analyze, think critically and write clearly and persuasively, through intensive study of selected texts under the guidance of a faculty mentor.

Argumentation and Research Methodology

Produce original arguments based on sound research methodology, evidenced in a term paper of substantial length submitted to the faculty mentor.

Scholarly Discourse

Engage with and evaluate scholarly treatments and interpretations of cultural artifacts chosen for intensive study under the guidance of a faculty mentor.

Visual Literacy

Understand basic principles of design aesthetics and their application to two and three dimensional compositions. Develop a design vocabulary used to present, critique, and defend aesthetics.

INDES 130

Hours	1.5 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	InDes 131, 132, 133 concurrent in the same semester.
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Understanding

Students should:

- Understand basic design vocabulary of principles and elements of design
- Understand both 2D and 3D aesthetic principles as they relate to industrial design
- Understand basic visual presentation skills

Application

Students should be able to:
Apply principles of design to create aesthetic 2D and 3D Compositions
Apply basic software skills in Adobe Illustrator and Photoshop
Discuss and critique both 2D and 3D compositions using design terminalogy

Structured Creativity

Basics of how to evaluate, and applying principles of structured creativity to develop new and useful ideas. Understanding of verbal and visual presentations as a tool for communicating new ideas.

INDES 131

Hours	1.5 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	InDes 130, 132, 133 concurrent in the same semester.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Understanding

Students should:

- Understand what is meant by structured creativity.
- Understand the principles for judging/evaluating creative ideas.
- Understand the role of Structured Creativity in industrial design.

Application

Students should:

- Be able to apply creative thinking methods and tools
- Apply evaluation tools to determine the value of their ideas
- Apply principles to create unique and useful product, service, or system solutions.
- Understand principles of presenting compelling and persuasive ideas to others.

Form and Surface Development

Fundamentals of articulating, exploring, and critiquing the application of aesthetic principles related to geometric and organic form. Opportunities to present, critique, and defend aesthetics.

INDES 132

Hours	1.5 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	InDes 130, 131, and 133 concurrent in the same semester.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Understanding

Students should:

- Understand aesthetic principles as they relate to geometric and organic forms
- Analyze formal qualities and articulate formal languages

Application

Students should be able to:

- Generate both rough and finished geometric and organic forms
- Recognize abstract three-dimensional elements in design context

Visualization Methods

Introduction of rapid visualization sketching techniques as a tool to develop, evaluate, and communicate ideas.

INDES 133

Hours	1.5 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	InDes 130, 131, 132 concurrent in the same semester.
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Understanding

Students should:

- Understand sketching as a skill for thinking about and communicating ideas.
- Understand their own level of sketching ability and work to improve their ability to sketch.
- Understand and apply basic sketch presentation techniques.

Application

Students should be able to:

- Present ideas clearly and pursuasively using sketching as a tool.

Top

Intermediate Computer Applications

Computer software programs relative to design disciplines.

INDES 210

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Industrial design core.
Taught	Fall

Course Outcomes

Understanding

Students should:

- Understand and apply principles of good design intent to develop robust modeled geometry.
- Understand both solid and surface modeling principles and how of effectively apply them.

Application

Students should be able to:

- Use Solidworks and Photoview 360 effectively to develop and communicate ideas.
- Apply solid modeling to develop 3D parts with: Machining and rapid prototyping.

Tools, Materials, and Processes for Industrial Design

Manufacturing tools, processes, and materials commonly used in product design.

INDES 214

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Understanding/Recognition

Students should:

- Be able to recognize manufacturing processes used to create products.
- Be able to recognize basic materials used in products.
- Understand limitations and advantages of manufacturing processes.
- Have a basic knowledge of material properties.

Second Year Studio

Industrial design research, analysis, and problem-solving methods.

INDES 230R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Industrial design core.
Taught	Fall, Winter

Course Outcomes

Understanding

Students will understand form principles with additional constraints.
Form + Human Factors
Form + Mechanism
Form + Materials and Processes
Form + User Experience
From + Problem Finding
Form + Branding

Application

Students will be able to apply:
Principles of aesthetics and form
Design skills to a project in a studio based environment
Make things
Presentation methods to communicate ideas clearly

Presentation Methods for Industrial Design 1

Product presentation methods emphasizing perspective, value, scale, accuracy, and color.

INDES 231

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Industrial design core.
Taught	Fall

Course Outcomes

Understanding

Student should:

- Have an increased appreciation regarding the importance of presentation skills.
- Understand how to visually represent product materials, colors, and finishes.
- Understand how to compose a persuasive presentation

Application

Student will be able to:

- Apply basic rendering skills including lighting effects, materials, colors, surface finish to rendering and sketches.
- Explore the difference between analog and digital based rendering techniques

Critique

Benchmarking and critique – looking at the work of others and judging your own work effectively.

Presentation Methods for Industrial Design 2

Continuation of InDes 231.

INDES 233

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	INDES 231
Taught	Winter

Course Outcomes

Understanding

Student will:

- Understand how to represent complex topics simply, clearly, and concisely using principles of information organization and effective presentation.
- Understand principles of a good narrative.
- Understand digital tools for the development of presentations and portfolio.
- Understand the principles of building a strong visual representation of their work in a portfolio and for presentations.

Application

Student will be able to:

- Apply design principles to page layout and composition to create a portfolio.
- Apply verbal skills in developing and communicating a persuasive narrative.
- Apply visual skills in presenting information in a clear, concise, and compelling way.
- Produce effective renderings using vector and raster based computer packages.
- Adjust, manipulate, combine, and retouch images using Raster based computer packages.
- Produce complex presentations for industrial design using both vector and raster based packages in combination.

Top

Third Year Studio

Designer responsibilities, structured and unstructured procedures in problem solving, client relationships, functional relationships, and mechanisms and materials.

INDES 330R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Industrial Design core.
Taught	Fall, Winter

Course Outcomes

Understanding

Students will be introduced to:
Corporate design research methods
Concise and compelling narratives
User Experience and User Interface
Implementation

Application

Students will be able to apply:
Knowledge and skills they have learned to sponsored projects in a studio based environment.
Principles of story telling
Presentation methods

Top

Presentation Methods for Industrial Design 3

Sketching and rendering techniques focused on surface materials and finishes.

INDES 331R

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Acceptance into the BFA program or instructor's consent.
Taught	

Course Outcomes

Communication

Be the end of this course students will have gained additional experience with innovating products and conveying the purpose of their new product to various audiences through communication methods such as displays, oral presentations, computer presentations, and other communication channels.

Top

ID Field Trip Seminar

Field trip to introduce students to professional designers, corporate and consulting design firms.

INDES 338

Hours	0.5 Credit, Arr Lecture, Arr Lab
Prerequisites	Junior level or above in Industrial Design Professional Program.
Taught	Winter

Course Outcomes

Industry Exposure

Students will deepen their understanding of the Industrial Design industry by traveling to various industry venues.

Top

History of Products

Overview of artifacts and products; how they have influenced society from prehistory to present day.

INDES 339

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Industrial design core.
Taught	Fall

Course Outcomes

Understanding

Students should:

- Understand and recognize design styles, movements, thoughts and practice over the last 150 years.
- Know and understand significant historical and contemporary designers and their design work

Application

Student will be able to:

- Be able to engage in meaningful discussions about design
- Apply design languages

Top

Graphics Studies for Industrial Design 1

Introduction to graphic skills such as corporate identity, packaging design, logo design, and web/interface design elements.

INDES 340

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	BFA acceptance.
Taught	Winter

Course Outcomes

Understanding

Students should:

- Understand and apply basic graphic design philosophies, processes, and techniques.
- Understand basic typography, mechanical production and preparation of finished "comps"

Application

Basic principles of graphic design

Top

Professional Practices of the Designer

Business aspects of the design profession.

INDES 388

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance to professional program.
Taught	Fall

Course Outcomes

Understanding

Students should:

- Understand the tools needed for a job search; portfolio and its iterations, resume, and cover letters.
- Understand and apply principles of networking, contacting, interviewing and negotiating with potential employers.
- Understand and apply principles of an effecive and compelling portfolio presentation.
- Understand patents, proposals, contracts, and design briefs.
- Recognize unethical situations that can arise and how to deal with them.

Application

Students should be able to:

- Create and demonstrate effective job hunting skills and materials

Top

Professional Internship

Work experience in professional design studio evaluated by supervisor.

INDES 399R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	School's and faculty advisor's consent.
Taught	

Course Outcomes

Understanding

Student acquires professional experiences in Industrial Design.

Application

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.
Student demonstrates professional communication skills (report).

Top

Thesis Studio

Systems design problems from initial research and analysis to final presentation of working drawings and models, with concern for ergonomics, anthropometries, marketing, user and buyer, production, function, and structure.

INDES 430R

Hours	4.0 Credit, 4.0 Lecture, 2.0 Lab
Prerequisites	INDES 330R
Taught	Fall, Winter

Course Outcomes

Understanding

INDES

Application

At the end of this course, students will be able to:
Write a cogent design project proposal
Work with judicious guidance on self-directed project
Investigate chosen problem using design methods
Demonstrate elevated competence in: design skills, grasp of theory, design methodology

Top

Special Problems in Design

Individual study in area of special interest.

INDES 494R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Innovation

By the end of this course students will have gained additional experience with creative thining, innovation, execution of new ideas.

BFA Final Project

Advanced individual project with minimum guidance, showing high degree of competence within chosen major.

INDES 497R

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	

Course Outcomes

Reseach

Students will define a area of interest

Ability to work on an advance individual project with minimum guidance that focuses skills and knowledge learned on a single complex visualization.

Students should:

- Write a cogent design project proposal
- Work with judicious guidance on self-directed project
- Investigate chosen problem using design methods
- Demonstrate elevated competence in: design skills, grasp of theory, design methodology

Top

Directed Studies

INDES 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will acquire more experince and knowledge if the Industrial Design industry through close mentorship with the INDES faculty.

Top

History of Learning in the Arts, Sciences, and Technology (Part 1)

History of civilization from antiquity to circa A.D. 1500. This course has two primary goals: to study (1) how past civilizations learned and (2) how we as individuals learn.

IP&T 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Key Course Purposes

- Use the lens of learning to understand world civilization and yourself.
- Learn how to learn.

Remember and Understand

- Explain so that a lay person would understand, how the great events, persons, and artifacts of civilization influenced the history of the world and approaches to learning.

Apply

- Apply to your own life concepts and learning from the historical past.

Analyze and Evaluate

- Compare and contrast historical periods and explain so that a lay person would understand, how those periods applied learning.
- Classify and interpret primary and secondary source documents and artifacts, deconstructing the types of learning reflected.
- Assess the influence of historical contexts on primary and secondary source documents.
- Evaluate authorial intent, *checking* for internal consistency and *critiquing* external consistency.
- Evaluate yourself as a learner in light of all you are learning from your study of historical events & ideas

Create and Become

- *Become a better learner by creating a final project that meaningfully demonstrates thoughtful mastery of course content, thinking and writing skills, and how you are integrating your learning with your religious values.*
- Nourish a lifelong appreciation of the great learnings and creations of the ages.
- Become a more skillful, reflective, and aware learner (learning how to learn).
- Skillfully integrate data into a coherent argument through clear writing and oral communication.

Top

History of Learning in the Arts, Sciences, and Technology (Part 2)

History of civilization from circa A.D. 1500 to present. This course has two primary goals: to study (1) how past civilizations learned and (2) how we as individuals learn.

IP&T 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Key Course Purposes

- Use the lens of learning to understand world civilization and yourself.
- Learn how to learn.

Remember and Understand

- Explain so that a lay person would understand, how the great events, persons, and artifacts of civilization influenced the history of the world and approaches to learning.

Apply

- Apply to your own life concepts and learning from the historical past.

Analyze and Evaluate

- Compare and contrast historical periods and explain so that a lay person would understand, how those periods applied learning.

- Classify and interpret primary and secondary source documents and artifacts, deconstructing the types of learning reflected.
- Assess the influence of historical contexts on primary and secondary source documents.
- Evaluate authorial intent, *checking* for internal consistency and *critiquing* external consistency.

- Evaluate yourself as a learner in light of all you are learning from your study of historical events & ideas

Create and Become

- Become a better learner by creating a final project that meaningfully demonstrates thoughtful mastery of course content, thinking and writing skills, and how you are integrating your learning with your religious values.

- Nourish a lifelong appreciation of the great learnings and creations of the ages.
- Become a more skillful, reflective, and aware learner (learning how to learn).
- Skillfully integrate data into a coherent argument through clear writing and oral communication.

Instructional Technology in Teaching

Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

IP&T 286

Hours	1.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understand Technologies

Understand how technologies can enhance teaching, professional work and communication, and personal professional development.

Design

Develop the ability to design technology-enhanced activities and resources.

Identify Resources

Identify resources to assist in learning how to integrate technologies in the future.

Use New Technologies

Be motivated and confident in the ability to learn how to use new technologies in teaching.

Top

Instructional Technology for Early Childhood Education

Using instructional design, visual design, and differentiated staffing principles, along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for early childhood, elementary, and special education settings.

IP&T 287

Hours	2.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

1. TECHNOLOGICAL LITERACY

Students will increase their familiarity with and ability to use a wide range of educational technologies.

2. DISPOSITIONS TOWARD EDUCATIONAL TECHNOLOGY

Students will develop positive dispositions towards using educational technologies that can help improve student learning.

4. TECHNOLOGY INTEGRATION IN EARLY CHILDHOOD SETTINGS

Students will strengthen their knowledge of technologies and teaching methods that can be used effectively with with young children in the K-2 elementary grades.

3. EFFECTIVE CONTENT-SPECIFIC TECHNOLOGY INTEGRATION

Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

5. ETHICAL AND SAFE USE OF TECHNOLOGY

Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Educational Psychology

Basic principles of educational psychology applied to teaching, including learning theory, instructional strategies, assessment of learning outcomes, and classroom inquiry.

IP&T 301

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Teaching Theory

Identify your own theory of teaching and examine the underlying assumptions of teaching and learning theories.

Student Thinking and Behavior

Understand student thinking and behavior.

Assessing Student Learning

Construct sound assessments of student learning.

Teaching Practice

Apply concepts learned in this class to your own teaching.

Integrating Technology in Early Childhood Education

Integrating instructional technology with early childhood education instructional strategies.

IP&T 334

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent with El Ed 333.
Taught	Fall

Course Outcomes

1. TECHNOLOGICAL LITERACY

Students will increase their familiarity with and ability to use a wide range of educational technologies.

2. DISPOSITIONS TOWARD EDUCATIONAL TECHNOLOGY

Students will develop positive dispositions towards using educational technologies that can help improve student learning.

3. EFFECTIVE CONTENT-SPECIFIC TECHNOLOGY INTEGRATION

Student will strengthen their knowledge of ways to use technology in teaching math and literacy that lead to improved effectiveness, engagement, and/or efficiency.

4. TECHNOLOGY INTEGRATION IN REAL-WORLD SETTINGS

Students will practice their technology integration skills in real-world early childhood elementary level settings and learn to evaluate the strengths and weaknesses of their performance.

5. ETHICAL AND SAFE USE OF TECHNOLOGY

Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Integrating Technology in Special Education 1

Integrating instructional technology with special education instructional strategies.

IP&T 387

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent with CPSE 410.
Taught	Fall

Course Outcomes

Technological Literacy

Students will increase their familiarity with and ability to use a wide range of educational technologies.

Positive Disposition Towards Educational Technology

Students will develop positive disposition towards using educational technologies that can help improve student learning.

Effective Content-Specific Technology Integration

Students will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

Technology Integration in Real-World Settings

Students will practice their technology integration skills in real-world special education settings and learn to evaluate the strengths and weaknesses of their performance.

Ethical and Safe Use of Technology

Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Integrating Technology in Elementary Education

Integrating instructional technology into K-6 instructional strategies.

IP&T 444

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent with El Ed 445 and El Ed 446.
Taught	Fall

Course Outcomes

1. TECHNOLOGICAL LITERACY

Students will increase their familiarity with and ability to use a wide range of educational technologies.

2. DISPOSITIONS TOWARD EDUCATIONAL TECHNOLOGY

Students will develop positive dispositions towards using educational technologies that can help improve student learning.

3. EFFECTIVE CONTENT-SPECIFIC TECHNOLOGY INTEGRATION

Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

4. TECHNOLOGY INTEGRATION IN REAL-WORLD SETTINGS

Students will practice their technology integration skills in real-world upper elementary level settings and learn to evaluate the strengths and weaknesses of their performance.

5. ETHICAL AND SAFE USE OF TECHNOLOGY

Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Undergraduate Research Training

Introduction of undergraduate students to the concepts of research and evaluation through practical experience.

IP&T 470R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Forms of Inquiry

To learn some basic issues associated with research, evaluation, and other forms of inquiry

Conducting and Presenting Inquiry Studies

To develop some basic skills in conducting and presenting inquiry studies.

Mentored Experience

To participate in a mentored inquiry experience with a faculty member.

Integrating Technology in Special Education 2

Integrating instructional technology with special education instructional strategies.

IP&T 487

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent with CPSE 430.
Taught	Winter

Course Outcomes

Technological Literacy

Students will increase their familiarity with and ability to use a wide range of educational technologies.

Positive Disposition Towards Educational Technology

Students will develop positive disposition towards using educational technologies that can help improve student learning.

Effective Content-Specific Technology Integration

Students will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

Technology Integration in Real-World Settings

Students will practice their technology integration skills in real-world special education settings and learn to evaluate the strengths and weaknesses of their performance.

Ethical and Safe Use of Technology

Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Scholarly Writing and Argumentation

A prerequisite course designed to help improve students' scholarly writing and argumentation. Students work together to strengthen their skills in these areas by analyzing sources from the scholarly literature, completing writing assignments, offering feedback on other students' work, receiving feedback on their own, and completing a course project.

IP&T 515R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

Scholarly Writing and Argumentation.

Students will work together to strengthen their skills in academic writing and argumentation areas by analyzing sources from the scholarly literature, completing writing assignments, offering feedback on other students' work, receiving feedback on their own, and completing a course project.

Special Topics in Instructional Psychology and Technology

IP&T 515R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Creative Collaboration

- Students will collaborate with a client to meet their needs for interactive instruction.

Authoring Tools

Students will become proficient in using industry-standard authoring tools to create interactive instruction.

Top

Tutoring Children in Reading

IP&T 515R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

This course is being discontinued so no learning outcomes will be listed.

This course is being discontinued so no learning outcomes will be listed.

Top

Foundations of Instructional Technology

Introduction to instructional psychology and technology theory and practice: psychological foundations of human performance technology and learning sciences. Current research issues, professional organization of the field, and ethical issues.

IP&T 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Spring

Course Outcomes

Current Issues

Understand the current issues, discussions, research, and debates in this field as well as comparable sister professions.

History

Understand the history of the field of Instructional Technology, including the various trends, people, and issues that shaped it.

Professional Trajectory

Clarify and define your own professional trajectory into your profession including your personal beliefs; the kind of career you are seeking; and the skills, knowledge, and characteristics you need to develop to be successful.

Writing Skills

Begin to develop skills in literature analysis and scholarly writing.

Online Presence

Create an initial professional web presence that you can develop during your career.

Future Roles

Begin defining for yourself what the future of our field is or may be, and what your role may be in that future.

Instructional Product Development

Designing, programming, and debugging a learning product using a high-level computer language.

IP&T 560

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Develop e-learning

Students will design and develop an e-learning program using a technology of the student's choice.

Personal Learning Environment

Students will build a personal learning environment

Online Community Integration

Students will become part of an online community of learners.

Instructional Design

Identifying instructional problems; specifying objectives, instructional strategies, and media; analyzing learning outcomes; developing instructional materials and assessment instruments; validating instructional systems.

IP&T 564

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

KNOW COMMON INSTRUCTIONAL DESIGN MODELS AND THEORIES

Demonstrate familiarity with core elements of common instructional design models (e.g., ADDIE, SAM, Layers, etc.).

KNOW COMMON ONLINE LEARNING MODELS AND THEORIES

Demonstrate familiarity with core elements of common online learning models and theories that apply to the design of online learning experiences (e.g., Transactional Distance, COI, Educational Interactions, etc.).

APPLY MODELS AND THEORIES TO THE DESIGN OF LEARNING EXPERIENCES

Design online learning experiences that are informed by appropriate models and theories of learning, instructional design, and online learning. Communicate your designs and design decisions for clients through professional design documentation.

COMMUNICATE USING DESIGN LANGUAGE

Know and correctly use terms and concepts commonly used in instructional design and online learning.

WORK EFFECTIVELY ON DESIGN TEAMS

Demonstrate that you can work as an effective member of a collaborative design team.

Academic Internship

IP&T 599R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 18.0 Lab
Prerequisites	Departmental consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship

Practice skills learned and receive evaluative feedback from internship sponsors.

Experience

Demonstrate ability to effectively work on a team to complete an IPT related project.

Top

Directed International Study

Study and research in an international setting.

IR 398R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent; international relations major coordinator's consent.
Taught	

Course Outcomes

Disciplinary Knowledge

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Top

Academic Internship: International

Individualized work or volunteer experience in an international setting.

IR 399R

Hours	0.5 - 12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into program; international relations major coordinator's consent.
Note	Must be coordinated through International Study Programs.
Taught	

Course Outcomes

Integrating Learning

Students will be able to connect and integrate their academic experiences and learning with their work experiences.

Top

Computer Spreadsheet Skills

Basic computer skills, focusing on spreadsheet and database programs. No technical background necessary.

IS 100

Hours	0.5 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

Excel Spreadsheet

Students will be able to construct an Excel Spreadsheet with appropriate formulas, functions, labels, charts, media inserts, hyperlinks, and data base functions – and output the report.

Business Analysis Using Spreadsheets

Basic computer skills focusing on features in MS Excel such as Scenario Manager, Solver, Pivot Tables, and Macros to solve complex business problems.

IS 102

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	IS 100.
Taught	Fall, Winter, Spring

Course Outcomes

Build Spreadsheet Models

Build robust spreadsheet models of business problems to make rational, data-driven managerial recommendations effectively solving those problems.

Manipulate Spreadsheet Models

Manipulate spreadsheet models of business problems to examine the robustness of proposed solutions to those problems.

Automate Spreadsheets

Implement macro programming techniques for automating spreadsheets to create flexible and powerful spreadsheet models of business problems.

Spreadsheet Skills and Business Analysis

Basic spreadsheet skills focusing on features in MS Excel such as basic functions, logic and reference functions, statistical functions, what-if analysis, and charting to solve complex business problems. No technical background is necessary.

IS 110

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Solving business problems with spreadsheet modeling

Build appropriate spreadsheet models of business problems to make rational, data-driven managerial recommendations effectively solving those problems.

Testing proposed solutions

Manipulate spreadsheet models of business problems to examine the robustness of proposed solutions to those solutions.

Top

Academic Internship: Information Systems

Approved on-the-job experience. Applying classroom theory and technology to actual problems; exploring career opportunities; learning role of information systems in business environment.

IS 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Selection of information systems emphasis in Marriott School of Management.
Note	P/F grade.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Introduction to Management Information Systems

Using technology to solve business problems. Hands-on spreadsheet, database, and Internet software in a business context.

IS 201

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	IS 110.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Data Analysis

Manipulate and analyze data to make appropriate recommendations for managerial decision-making.

Building and Querying a data base

Design, build, and query a database to apply correct principles of data storage and extraction.

Internet Search Skills

Develop effective personal computer and Internet search skills.

Introduction to Computer Programming

Object-oriented program design and development. Principles of algorithm formulation and implementation.

IS 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

Programming Concepts

Master essential programming concepts and Java syntax.

Programming Logic

Develop critical thinking skills through using programming logic to solve business processing problems.

Syntax for Java

Written communication: Learn the standard syntax for Java programs.

Systems Analysis

Early phases of systems development life cycle, including project management, planning, investigation, requirements definition, systems specifications, alternative selection. Tools and techniques of object-oriented analysis.

IS 401

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to information systems major, concurrent enrollment in same section of IS 402, 403, and 414.
Taught	Fall

Course Outcomes

Working in Groups

Learn to work in groups and be part of an effective team. Demonstrate your skills by delivering a semester-long systems analysis and design project, followed by a week-long, intensive integrative exercise.

Effective Communication

Learn to communicate effectively, both orally and in writing. Learn the standard symbols and notation for expressing systems as UML diagrams. Learn to make a professional presentation to management regarding the artifacts you produce.

Course Content

Course content: Master the essential subject matter of object-oriented systems analysis and design.

Further Technology Skills

Further your technology skills by learning to use tools that support the fundamental tasks of a systems analyst. This semester we will use a new online collaborative diagramming tool, LucidChart, to create UML diagrams. We will also learn to use Microsoft products such as Visio and Project.

Database Systems

Concepts and techniques of database system development, focusing on object-oriented modeling and its implementation methods.

IS 402

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to information systems major; concurrent enrollment in same section of IS 401, 403, and 414.
Taught	Fall

Course Outcomes

Database Concepts

Master essential database concepts.

Develop Critical Thinking Skills

Develop critical thinking skills through producing conceptual data models and solving relational algebra and SQL query problems.

Written Communication

Learn the standard symbols and notation for data modeling and relational database design. Demonstrate this knowledge in conceptual and relational data models.

Group Work

Learn to work well with one or more partners on a major data modeling assignment. On a larger team, complete a major project in the integrative exercise (INTEX).

Principles of Business Programming

Programming business systems. Algorithms, data structures, programming patterns, and interfaces.

IS 403

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to information systems major; concurrent enrollment in same section of IS 401, 402, and 414.
Taught	Fall

Course Outcomes

Clear and Elegant Programs to Solve IS Problems

Create clear and elegant programs to solve IS problems. As the primary programming class in the Information Systems program, you'll practice your programming skills this semester. We'll focus on efficient, clear, and elegant solutions to the problems currently using the ASP.NET MVC with C# environment

Using Internet Resources

Become proficient in using Internet resources to solve development problems. One of the most important skills in Information Systems is knowing how to find solutions in Internet groups, discussion boards, blogs, tutorials, and other online documentation sources. We'll practice this skill throughout the semester.

Object-oriented Programming Principles

Learn web development model view controller principles, data structures, and libraries. The subject matter of the course is object-oriented development in the ASP.NET MVC using the C# language.

Read and Use Technical Documentation

Understand how to read and effectively use technical documentation. We'll explore the MSDN documentation for the C# libraries.

Data Communications

Principles of data communications, local- and wide-area networks, hardware, software, media, standards, management, and business applications. Lab required.

IS 404

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Admission to information systems major; concurrent enrollment in same section of IS 411, 413, and 415.
Taught	Winter

Course Outcomes

Develop Understanding of Data Communications

Develop an understanding of data communications and network systems in general and specifically be able to:

- Set up and configure basic network components including systems and firewalls.
- Understand basic protocols in TCP/IP network stack.
- Understand and be able to setup and configure basic network services.

Ability to Solve Specific Problems

Ability to solve specific problems using their understanding gained during the course.

Data Communications Competency

Converse competently with IT professionals who specialize in data communications. Understand and debate current data communications issues.

Top

Information Systems Project Management

Principles and skills of project management in an information systems context, including management of risk, schedule, scope, cost, quality control, communications, human resources, and procurement.

IS 405

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 401 & IS 402 & IS 403; admission to IS undergraduate program.
Taught	Winter

Course Outcomes

Project management skills

Establish strong practical skills for managing projects in a fast-paced, often-changing environment.

Systems Design and Implementation

Later phases of systems development life cycle. System architecture, user interfaces, system interface, and application design. Testing and integration. Object-oriented development.

IS 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 401 & IS 402 & IS 403
Taught	Winter

Course Outcomes

System Design Concepts

Master essential system design concepts and patterns.

Producing System Designs

Develop critical thinking skills through producing sound system designs to solve specific business systems processing problems.

Unified Modeling Language Notation

Learn the standard UML symbols and notation for system design.

Group Work for Design of Systems

Learn to work well as a member and leader of a team in developing designs on multiple projects.

Top

Enterprise Application Development

Client- and server-side programming. Internet and Web-based applications. Enterprise systems and architectures.

IS 413

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 401 & IS 402 & IS 403
Taught	Winter

Course Outcomes

Current Events

Read current events and think critically about them as an IS professional. You'll be given a weekly quiz on current events, and we'll routinely discuss them in class.

Develop Information Systems in Group Setting

Learn to develop information systems within group settings. The entire semester is based around INTEX II, an intense, group project. You'll need to develop a complex information system clear through implementation and testing.

Work as Leaders and Group Members in Development Teams

Work as leaders and as group members in development teams. You should have opportunity during the semester to work as leader of your team as well as a regular group member. For each phase of the project, pick a leader who will make sure things happen as they should.

Develop Time Management Expertise

Develop time management expertise within intense development projects. The project this semester will be intense--just like projects are in the real world. The semester will give you a chance to further develop your time management skills.

Learn Enterprise System Development Principles

Learn enterprise system development principles and patterns. We'll use best practices models and methods of enterprise development, such as business objects, data layers, and object-relational mappings to develop the project.

Top

Business Processes and Controls

Enterprise-level systems that support basic business processes, information systems control and security issues, systems integration and deployment.

IS 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Information systems majors status; concurrent enrollment in same section of IS 401, 402, and 403.
Recommended	Acc 210.
Taught	Fall

Course Outcomes

Business Processes and Controls Identification

Analyze a set of business processes and report control deficiencies -- Evaluated through a cycle report, homework, quizzes, and exams.

Business Processes and Controls Evaluation

Evaluate the appropriateness of various controls -- Evaluated through homework, quizzes, and exams.

Communicating Business Processes and Controls

Communicate effectively both in writing and in presentations -- Evaluated through the cycle report.

Information Systems Capstone Project

Applying concepts, principles, and methods of enterprise-level information systems by designing and developing a full-scale system including hardware, database, software, and network.

IS 415

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 401, 402, 403, 404, 411, 413.
Taught	Fall

Course Outcomes

Information Systems Knowledge Proficiency

Define and discuss the concepts and philosophy by which management deals with one-time efforts (projects) that end when specified time, cost, and performance objectives are not met.

Systems Problem Solving Skills

Analyze and explain the specialized behavioral, organizational, and management methods used to deal with unique problems that occur when managing projects.

System Documentation Development

Produce project management and system documentation at technical and management levels.

Group Work in System Development

Learn to work well as a member of a team in developing a functioning business processing system.

Spreadsheets for Business Analysis

Using spreadsheets to support business analysis and decision making. Includes sensitivity analysis, pivot tables, introductions to databases, and macros, charting, and similar topics.

IS 515

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 201 or equivalent.
Taught	Fall, Winter

Course Outcomes

More functionality

Aware of and can you use some features of Excel that you previously were unaware of, or didn't know how to use?

Easier

Use some functions that you knew about before, but perhaps didn't understand fully, or where you were unsure of how to use.

Higher quality

Results of using Excel functions, more complete, better presented, better documented, less error-prone, and more useful than they were before.

Business Programming and Spreadsheet Automation

Programming in Excel Visual Basic; automating common tasks; retrieving data from web servers; building optimization models and user forms.

IS 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 201 or equivalent or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Automate Repetitive Procedures in Excel

Automate repetitive procedures in Excel.

Understand Basic Programming Concepts

Understand basic programming concepts such as variables, arrays, procedures, conditions, and control of flow statements

Retrieve Data from Internet and Database Servers

Retrieve data from internet web servers and corporate database servers.

Apply Programming Technology to Solve Business Problems

Apply programming technology to solve unstructured business problems.

Build Forms for Gathering User Input

Build forms for gathering user input

Enterprise Infrastructure

Principles of IT enterprise infrastructure management, including platform choices, functionality, cost, security, deployment, controls, flexibility, and adaptability.

IS 531

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MISM program; IS 404 or equivalent.
Taught	Fall

Course Outcomes

Need and Value of Data Backup and Recovery

Understand the need for and value of a comprehensive data backup and disaster recovery plan

Implications of Enterprise Scale

Understand the implications of “scale” in the enterprise

Effective Communication

Write effectively for different audiences, including managers, end-users, and key project stakeholders.

Implications of Open Source Software

Understand the implications of Open Source Software

Advanced Data Communications

Design, management, and strategic use of local area networks (LANs), wide area networks (WANs), intranets, and the Internet to solve business problems.

IS 533

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 404 or equivalent.
Taught	Fall

Course Outcomes

Basic Network Hardware

Set up and configure basic network hardware such as; cabling, switches, and routers.

Layer 2 Network Infrastructure

Design, install and configure a secure layer 2 network infrastructure

Layer 3 Network Devices

Install, configure secure and manage layer 3 network devices such as routers and firewalls

Infrastructure Security Applications

Install, configure and secure and manage infrastructure security applications.

Secure Network Protocols

Design and configure secure network protocols.

Data Communications Competency

Converse competently with IT professionals who specialize in data communications. Understand and debate current data communications issues.

Spreadsheet and Database Automation Programming

Automating spreadsheets in Excel, interacting with password-protected web sites, writing code to conduct simulations, solving common database interface problems in Access, etc.

IS 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 202 or C S 142; or equivalent; or instructor's consent.
Taught	Winter

Course Outcomes

Automate Repetitive Procedures in Excel

Automate repetitive procedures in Excel

Understand Basic Programming Concepts

Understand basic programming concepts such as variables, arrays, procedures, conditions, and control of flow statements.

Retrieve data from internet and database servers

Retrieve data from internet web servers and corporate database servers.

Apply Programming Technology to Solve Business Problems

Apply programming technology to solve unstructured business problems.

Build Forms for Gathering User Input

Build forms for gathering user input

Web Development

Web development techniques, including server-side and client-side processing, database integration, and advanced browser techniques.

IS 542

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 403 or equivalent.
Taught	Winter

Course Outcomes

Modern Web Development

Understand modern web application development

Web Security Issues

Understand security issues for web applications

Apply Design and Security Principles

Be able to apply design and security principles to new problems

Analyze and Solve Real World Problems

Analyze and solve real world problems by:
Exploring a web development framework as an implementation example and create dynamically generated web site complete with user accounts, page level security, modular design using css and themes and data driven content.

Exposure to Web Development Technologies

Exposure to myriad web development technologies.

Presentation and Writing Skills

Develop presentation and writing skills

Mobile Platform Development

Principles of mobile platforms. Application development for mobile platforms such as smart phones and tablets. Emphasizing user experience and business analytics for management decisions.

IS 543

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 413 or equivalent.
Taught	Fall

Course Outcomes

1. Know Features and Trends of Mobile Platforms

Know the features and upcoming trends of the common mobile platforms so that you can develop a credible and convincing mobile strategy for your company or user base.

5. Able to Design and Implement Mobile Application

Be able to design and implement a mobile application that uses a web services backend to synchronize and centrally store user data.

4. Able to Develop Robust Application

Be able to develop a robust iOS application.

3. Be Familiar with Development Tools

Be familiar with the tools required for iOS application development.

2. Understand Human Interface Guidelines for Mobile Platform

Understand and be able to discuss/explain human interface guidelines for mobile platforms generally, and the iOS platform specifically.

6. Demonstrate Knowledge of Analytics in Mobile Context

Demonstrate good knowledge of analytics in a mobile context, including implementation of tracking code (both vendor-supplied solutions and custom usage logging), privacy concerns, and implications for business decisions.

MISM Capstone Introduction

Presentations by faculty and professionals to make students aware of latest developments in the field and help them prepare a capstone project proposal.

IS 550

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Final year in MISM.
Taught	Fall, Winter

Course Outcomes

Developing a feasible proposal

Draft and clear and feasible proposal for your capstone project. Describe the business problem you trying to solve as well as the IS tools you will apply to your solution. Include a high-level design of the system you will working on.

Project planning and scheduling

Design a schedule for your capstone project that reflects and understanding of the overall scope of the work, the time required in each of the major phases, and the resources needed to complete the work.

Leading Change in a Technical Environment

Principles and skills of leading information technology-enabled organization change and system implementation. Topics include leadership, change management, ERP/CRM systems implementation, knowledge management, and business process redesign.

IS 551

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to a Marriott School graduate program.
Taught	Fall

Course Outcomes

1. Build the case for IT-enabled organizational change.

Prepare a written report building the strategic case for IT-enabled organizational change.

2. Discuss technical change management with professionals.

Analyze actual change situations drawing on the principles of effective technical change management and leadership through discussions with professionals.

3. Design and implement user interfaces.

Using a team-based, iterative focus, design and build graphical user interfaces for Web applications. Document and present the process, end-result, and lessons learned.

4. Create a toolkit of user-centered design best practices.

Build a set of best practices for developing user interfaces.

5. Develop a personal leadership strategy.

Establish and document your personal leadership strategy for a career in a technical field.

MISM Capstone Project

Development and completion of capstone project integrating information systems knowledge previously gained in the MISM program

IS 552

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MISM.
Taught	Winter, Spring

Course Outcomes

Learn Consulting Tools & Techniques

Learn the tools and techniques used during a consulting engagement, including diagnosis, planning, and problem solving.

Apply Management & IT/IS Knowledge

Apply many of the project management, IT/IS, teamwork, and business knowledge that you have learned in the course of your graduate education.

Apply Management Consulting Skills

Apply management consulting skills to consulting situations.

Contribute to Team

Contribute to your project team through timely communication and assume responsibility for your assigned role.

Demonstrate Effective Oral & Written Communication

Demonstrate through a final written and oral report to the client that you are able to communicate effectively, both orally and in writing.

Top

Data Mining for Business Intelligence

Computation of business intelligence from data resources within modern organizations using data mining.

IS 555

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to a Marriott School graduate program; introductory statistics.
Taught	Winter

Course Outcomes

Know Strengths & Limitations of Data Mining Methods

To gain a working knowledge of the strengths and limitations of modern data mining methods (algorithms).

Identify and Adress Problems with Data Mining Methods

To learn to identify problems that can profitably be addressed via data mining methods.

Learn to Set Up Data for Experiments

To learn how to set up data for data mining experiments.

Identify Appropriate Methods

For a given problem, to be able to identify what methods are appropriate.

Proficiency in Evaluating and Comparing Model Performance

To become proficient in methods of evaluating and comparing model performance.

Information Security Management

How technology, organizations, and people interact to create secure information systems. Topics include data encryption, physical security, information security policies, and security awareness and training.

IS 560

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	I Sys 404 or equivalent.
Taught	Fall

Course Outcomes

Working Knowledge of Methods of Protecting Data

To gain a working knowledge of modern methods of protecting data: encryption, hashing, confidentiality, authentication, integrity, non-repudiation, certificates, and IP security.

Familiarity with Attack Vectors

To become familiar with attack vectors that are commonly executed in attempting to access and compromise or steal data

Learning Methods of Attack Prevention and Detection

To learn modern methods of attack prevention and detection: antivirus, firewalls, intrusion detection, and system hardening

Learn Methods of Threat Modeling

To learn state-of-the-art methods of threat modeling.

Project Management

Principles and skills of project management in an information systems context, including management of risk, schedule, scope, cost, quality control, communications, human resources, and procurement.

IS 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to a Marriott School graduate program.
Taught	Winter

Course Outcomes

Academic Foundation

Establish a strong academic foundation for managing projects in a fast-paced, often-changing environment

Practical Skills

Establish strong practical skills for managing projects in a fast-paced, often-changing environment

Immediate Application

Provide skills to Class Members that will assist them in their academic projects immediately

Spiritual Environment

Provide a spiritual environment in which project management learning and practice can be successful

Digital Forensics for Organizations

Digital forensics from an organizational perspective, covering the three functions of digital forensics performed by businesses: employee abuse investigations, incident response, and electronic discovery.

IS 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	I Sys 404 or equivalent.
Recommended	I Sys 560.
Taught	Winter

Course Outcomes

Aquire Digital Evidence

Acquire digital evidence in a forensically sound manner.

Evaluate Organizational Policies

Evaluate whether organizational policies are sufficient to support forensics investigations, e-discovery, and incident response.

Analyze Forensics Artifacts

Analyze forensics artifacts to determine evidentiary value.

Prepare Forensics Report

Prepare a forensics report for relevant stakeholders and defend your findings.

Top

Introduction to Academic Research in Information Systems

Conducting academic information systems research, including philosophy of science, causality, validity, research proposal development, and research methods.

IS 571

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MISM program; instructor's consent.
Taught	Fall

Course Outcomes

Effective Team Work

Learn to work in groups and be part of an effective team.

Effective Oral and Written Communication

Be able to communicate effectively, both orally and in writing.

Ethics Development

Develop a sense of ethics.

Strategic Management Proficiency

Become proficient in the subject matter of the degree (in this case, Strategic Management of IS).

Top

Structural Equation Modeling

Science and theory; constructs and measurement; surveys and experiments; data screening; human subjects protocols (IRB); factor analysis; model fit; academic writing.

IS 572

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IS 571; Instructor's consent.
Recommended	Stat 121.
Taught	Winter

Course Outcomes

Teach Students Process of Science & Theory-based IS Research

To teach potential IS Ph.D. students about the process of science and theory-based IS research.

Help Students Learn Forms of IS Research

To help potential IS Ph.D. students learn about various forms of Information Systems (IS) research.

Provide Real-life Academic Research Experience

To provide students with real-life academic research experience with a real project.

Expose Students to Leading Theory in IS

To expose students to some of the leading rigorous theory in IS.

Top

ASP.NET Web Development

IS 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring, Summer

Course Outcomes

Knowledge

Students will deepen their understanding of asp.net web development.

Top

Computer Forensics

IS 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of computer forensics.

Top

Network Administration

IS 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of network administration.

Top

Seminar in Information Systems

Special topics by announcement.

IS 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will deepen their understanding of topics in a seminar in information systems.

Top

User-Centered Interface Design

IS 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of user-centered interface design.

Windows.NET Programming

IS 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of windows.net programming.

Academic Internship: Information Systems

Approved on-the-job experience. Applying classroom theory and technology to actual problems; exploring career opportunities; learning role of information systems in business environment.

IS 599R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Admission to Marriott School graduate program; departmental consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Knowledge

Students will use the skill and knowledge they have learning in their program in an academic internship.

Top

Cornerstone: Information Technology

Planning and preparing for a successful career in information technology. Developing skills with computers, problem solving, studying, and time management. Comparing information technology to computer science, computer engineering, and information systems.

IT 101

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Basic Lab Skills

Acquire basic skills in using labs as part of the learning experience.

Reverse Engineering Algorithms

Be able to reverse engineer a simple algorithm.

Terminology

Acquire basic IT terminology.

Beginner - Basic Tools

Be able to use basic IT tools at the beginning level.

Beginner Skills

- Acquire a beginning knowledge of programming.
- Acquire a beginning knowledge of networking.
- Acquire a beginning knowledge of computer hardware.
- Acquire a beginning knowledge of operating systems & servers.
- Acquire a beginning knowledge of database systems.

Foundation

- Acquire a beginning knowledge of web systems.
- Acquire a beginning knowledge of how data is represented in a computer.
- Acquire a beginning knowledge of human-computer interaction.
- Acquire a beginning knowledge of systems engineering and development methodologies to

guide project management.

Integration & Implementation

- Understand the pervasiveness and impacts of IT in our everyday lives locally and globally as well as across organizations and industries.
- Acquire a beginning knowledge of computer security and ethical issues.
- Acquire a beginning knowledge of how IT is organized and governed in organizations and enterprises.

Professional Development

- Acquire basic teamwork skills.
- Begin using oral and written communication in a professional manner.
- Begin using basic design and problem-solving skills.
- Acquire basic knowledge and research skills for continuous learning in IT profession and understand the difference between the four computing majors at BYU (IT, IS, CS, and ECE).
- Get to know the IT Faculty and other IT Professionals.
- Acquire basic knowledge and research skills for continuous learning in IT profession and for finding associated IT employment.

Top

Introduction to Computer Systems

How a computer works, from hardware to high-level programming language. Logic circuits, Boolean algebra, computer instructions, assembly language, binary arithmetic, and C programming.

IT 124

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	C S 142
Taught	Fall, Winter

Course Outcomes

Boolean Logic

Perform computations using Boolean logic

Boolean Circuits

Translate Boolean logic to transistor circuitry

Combinational and Sequential Circuits

Use combinational and sequential circuitry to implement digital components such as adders and counters

Programs

Develop software solutions to meet user needs in high level programming language such as C

Debugging

Analyze and solve program errors using modern software tools

Binary Arithmetic

Demonstrate ability to perform simple arithmetic in binary and two's complement

Computer Operation

Describe the high level organization and operation of a computer, e.g. the von Neumann model

Top

Directed Studies in Information Technology

Introductory course. Special topics in problem solving and technology careers.

IT 198R

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity.

Academic Internship: Information Technology

Work experience evaluated by supervisor and posted on student's transcript.

IT 199R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Consent of both department chair and cooperative education coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experiences

Student acquires professional experiences in the discipline.

Professional Communication

Student demonstrates professional communication skills (report).

Convert Professional Experience into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Top

Fundamentals of Web-Based Information Technology

Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

IT 210A

Hours	2.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	C S 142 & IT 101; or instructor's consent.
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Understand IT core concepts

Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards

Integrate web-based systems

Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.

System Administration

Demonstrate system administration skills necessary to manage web systems using best practices.

Information Assurance and Security

Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.

Use modeling for design

Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.

Life-long learning

Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.

Written Communication

Demostrate skills in technical communication

Top

Fundamentals of Web-Based Information Technology

Web technologies including distributed architecture, networking, database concepts, client and server development, infrastructure management, and web system integration.

IT 210B

Hours	2.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	IT 210A
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Understand IT core concepts

Define and describe fundamental computing platform concepts of operating systems and networking and their relationship to Standards.

Integrate web-based systems

Analyze, create and integrate systems both at the Web Architecture and at the Web System Architecture levels.

System Administration

Demonstrate system administration skills necessary to manage web systems using best practices

Information Assurance and Security

Review and analyze web systems for specific Information Assurance and Security (IAS) issues, including multiple viewpoints of incident response, within the framework of standard IAS models.

Use modeling for design

Analyze and design web systems using professional modeling approaches. This includes systems process development within a larger systems lifecycle model using best practices.

Life-long Learning

Acquire and apply life-long learning skills to find, assess, utilize, and attribute web development resources on the Web.

Written Communication

Demonstrate skills in technical communication

Top

Computer Architecture and Organization

Principles of computer hardware and instruction set architecture. Subjects include: internal CPU organization and implementation, peripheral interconnect and IO systems, and low-level programming and security issues.

IT 252

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 124 & C S 235; or C S 124 & C S 235; or EC EN 224 & C S 235
Taught	Winter, Spring

Course Outcomes

Assembly Language

Demonstrate ability to understand and program with assembly language.

Development Tools

Demonstrate ability to use a C compiler, an assembler, a disassembler, a debugger, and CPU emulators to develop, debug, test, analyze and optimize programs.

Progam Architetcure

Know how to write more reliable, secure, and efficient software with an understanding of how the software is executed on the underlying architecture.

CPU Architecture

Demonstrate ability to modify a CPU design to add instructions and to improve the overall efficiency of execution.

Abstraction

Demonstrate understanding of the various abstractions used to manage complexity in computer systems and support application concurrency. e.g. system calls and virtual memory.

Performance

Know how application performance can be affected in a target system by memory hierarchy design factors such as cache size, bus width, clock rate and memory speed.

Security

Demonstrate how vulnerabilities in software coding can be exploited in computer security attacks (eg. buffer overflow).

Input/Output

Demonstrate understanding of how peripherals are accessed in a computer system, e.g. polling or interrupt driven I/O.

Top

Electronics, Computers, and Manufacturing

Basics of electricity; behavior and manufacture of resistors, inductors, capacitors, transformers; motors; manufacture of transistors, ICs, MCMs, circuit boards. Computers; digital communications; networking.

IT 318

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MATH 112 & PHSCS 121; or PHSCS 105 & PHSCS 107; Phscs 121; or Phscs 105 and 107.
Taught	Winter

Course Outcomes

Electronics

Describe the basic laws governing electronic circuits, both DC and AC.

Safety

Describe the basic safety considerations relevant to electricity.

Electronic components

Describe how resistors, potentiometers, inductors, capacitors, integrated circuits, printed wiring boards (PWBs), assembled PWBs, multi-chip modules, and hybrids are manufactured.

Motors

Describe the basic operating characteristics for the following 6 motor types: 1) DC; 2) Stepper; 3) DC Brushless; 4) Universal; 5) AC Induction; 6) Synchronous.

Electronic measuring equipment

Describe the capabilities and limitations of electronic measuring equipment.

Computers

Describe the basic characteristics of a computer and how they operate.

Networking

Describe how industrial networks operate.

Top

Digital Communications

Ohm's law, power, inductance, capacitance, reactance, impedance, resonance, transformers. Communication systems, wired and wireless. Bandwidth, modulation; Shannon's theorem, telecommunications. Network physical and data link layers (ISO/OSI model). Optics/Coax/Twisted pair; RS-232/Ethernet; Signals/Protocols/Packets; digital communication theory fundamentals.

IT 327

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Phscs 123 or concurrent enrollment.
Taught	Fall, Spring

Course Outcomes

Spectrums

Learn the EM spectrum and spectral analysis.

Communications Links

Understand the limitations of communications links.

Signal Modulation

Learn the main types of signal modulation (amplitude, frequency, phase).

Physical Communication Media

Learn the properties of physical communication media.

Digital Information

Learn about digital information and how it is communicated.

Characterization of Communications Links

Understand how communications links are characterized.

Modern Communication Systems

Learn about modern communication systems, including television, facsimiles, telephone, modems, LANs, WANs, satellite, cell phone and optical systems.

Multiplexing

Understand the main types of multiplexing (time, frequency, spatial, and code division).

Operating Systems

Applying and using computer operating systems. Configuration, file systems, security, administration, network interfacing, multitasking, multiuser, device driver installation. Analyzing operating system performance.

IT 344

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	C S 142 & IT 210B & IT 252; or instructor's consent.
Taught	Fall, Spring

Course Outcomes

OS Architecture

Describe the purposes, types, components, functions and inter-relationships of operating systems (desktop, mobile, and enterprise). Describe how hardware enables and integrates with this functionality.

OS Subsystems

Describe how OS sub-systems work (scheduling, memory management, etc).

OS Practice

Demonstrate an ability to work with Operating Systems by installing, compiling, configuring, and optimizing real and virtual systems. Describe Scalability issues.

Information Assurance and Security

Describe common IAS concepts related to system administration. Describe system administration aspects of IAS, including authentication, directory services and access control models.

OS Distribution and Virtualization

Describe distributed/virtualization computing concepts. Implement some distributed services in an enterprise environment.

Development

Independently create systems that are in developing fields or applications of OS and system administration.

Top

Computer Networks

Computer networks. Local and wide-area networking for enterprises and service providers. Workgroups/routers/hubs/switches; network server administration; Internet protocols and routing; security and privacy.

IT 347

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 210B & STAT 201 & C S 236; (or, for C S 236, concurrent enrollment).
Taught	Fall, Spring

Course Outcomes

Basic Concepts

Understands computer networking concepts and vocabulary.

Concept Implementation

Has received experience with real implementations of the concepts.

Technology Relationships

Has built an intuition of the relationship between standards bodies and technology.

Problem-Solving

Has built confidence through problem solving.

Nodes and Links

Describe the role of a node and a link in an abstract network model.

Technical Terms

Define bandwidth, latency and throughput.

Data Volume Formula

Explain how bandwidth * latency = data volume is related to the concept of traditional “volume.”

Sliding Window Protocol

Describe the operation of a packet based sliding window protocol.

OSI Model vs. Internet Model Layering

List 7 layers of the OSI Model and compare them to the layering used in the Internet model.

Encapsulation

Explain the concept of encapsulation and its relationship to layering in the network models.

IP Packet Transfers

Describe how an IP packet is carried in an Ethernet frame.

Sliding Window Relationships

Explain how TCP's byte-stream sliding window is related to a traditional packet-based sliding window algorithm.

Hardware Terms

Explain the differences between a hub, switch (bridge), and a router.

Specific Hardware Terms

Explain the relationship between an 802.1D bridge and a modern switch.

Learning Bridges

Describe how a learning bridge "learns" what port should be used to forward a packet to a device.

Spanning Tree

Describe how Spanning tree works and explain why it is necessary.

Distance-Vector vs. Link-State Routing

Compare and contrast distance-vector and link-state routing algorithms.

SOHO Router Components

Explain the operation of the components of a SOHO wireless edge router including, DHCP, NAT/PAT, Routing function, Switching function and relationship to wireless access point.

DNS

Describe how DNS works in the global internet including caching and root servers.

Cons of Guaranteed Delivery

Explain why guaranteed delivery is not desirable in certain multimedia protocols.

Access from Devices

Access MIBS from devices using SNMP on a workstation.

Virtual LANs

Describe the operation of and configuration of Virtual LANs on an 802.1Q switchAccess MIBS from devices using SNMP on a workstation.

Troubleshooting Connectivity

Troubleshoot connectivity problems in a host occurring at multiple layers of the OSI model.

Encryption

Describe applications of symmetric encryption, asymmetric encryption and one-way hash to authentication, non-repudiation, integrity and confidentiality.

Database Principles and Applications

Database theory and architecture; data modeling; designing application databases. Query languages, data security, database applications on the Web..

IT 350

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	C S 236 & IT 210B
Taught	Winter

Course Outcomes

Concepts and Terminology of Information Management

Define and apply the concepts and terminology of Information Management.

Conceptual and Data Modeling

Apply conceptual modeling concepts using standard techniques such as Entity Relationship and Universal Modeling Language diagrams and tools.
Use manual and automated techniques for mapping from conceptual to data models (e.g . ER to Relational).

Systems and Administration

Compare and contrast instalation, management, modeling and security features of current database managment systems

Application Development

Use conceptual and data models to design and implement distributed database access applications applying current languages, system technologies and tools.

Database Systems Integration and Test

Integrate, deploy, and demonstrate operational applications on database system infrastructure. Includes use of DDL, DML, programming interfaces and UI implementation.

Human-Computer Interaction

User experience design techniques and best practices including requirements analysis, usability studies, prototyping methods, evaluation techniques, and cognitive, social, and emotional theories.

IT 355

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	IT 210B & TECH 312
Taught	Winter, Spring

Course Outcomes

Empathetic understanding of users

Explain the significance and benefits of an empathetic understanding of users in systems design

Users and environments

Analyze users and their environments for the purpose of designing to meet their needs

Analyze the user experience

Describe and analyze cognitive, affective and cultural aspects of the user experience. Incorporate these into new user interface designs.

HCI best practices in diverse fields

Describe and analyze user interfaces for best-practice user interface approaches, including diverse form factors and accessibility issues.

Design and implement UIs

Design and build user interfaces in an iterative team, project environment.

Professional Communication

Present and document user experience findings and the results of user experience project and analysis using technical writing and presentation standards

Teamwork

Work effectively with a team on a significant project

Junior/Senior Seminar

Required three times during junior/senior years while in professional program. College Lecture and School of Technology Lecture attendance required.

IT 391R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Professional Issues

Awareness of professional issues in IT.

Life-Long Learning

Motivation for life-long learning.

Academic Internship: Information Technology

Experience in industrial environment. Approved job function supervised by employer and electronics and information technology advisor. Formal technical report required.

IT 399R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Consent of both department chair and cooperative education coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experiences

Student acquires professional experiences in the discipline.

Professional Communication

Student demonstrates professional communication skills (report).

Convert Experience into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Top

Advanced Web Technologies

Techniques and best practices for designing, developing, and implementing web applications. Topics include client technologies (e.g., HTML5), web frameworks, adaptive design for mobile, information architecture, load and stress testing, speed optimization, and new developments.

IT 410

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	IT 347 & IT 350 & IT 355; or instructor's consent.
Taught	Winter

Course Outcomes

Web Development

Understand web development roles and processes

Architecture Analysis

Perform information architecture analysis

Load and Stress Testing

Perform load and stress testing

Speed Web App

Optimize web app for speed

Web Framework

Become proficient at developing a web app using a web framework

Customization

Customize web content for multiple devices and form factors

Best Practices

Identify sources and techniques for keeping up on web development best practices

Embedded Computer Systems

Design and development of embedded computer systems interacting with the physical world. Hardware/software interfacing and multiple types of embedded systems. Integrated IT design approach with networking, IAS and human interaction concerns.

IT 441

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 344
Taught	Winter

Course Outcomes

Embedded Systems Characteristics and types

- Describe the characteristics that define embedded systems. Be able to identify embedded systems in various applications.
- Describe multiple types of embedded systems
- Describe the systems incorporating embedded systems. Analyze case studies to demonstrate the multiple interacting systems required for a successful application.
- Describe the impact of embedded systems on current and future IT systems.
- Define real-time computing and its relationship to embedded systems
- Describe communication technologies used in embedded systems

Sensors and Actuators

Describe and analyze sensors and actuators used in embedded systems, including software and hardware requirements

Applications and Environments

- Design and create applications for both OS-based and small, non-OS, embedded systems.
- Set up and use appropriate development environments.

Integration of Embedded Systems

Integrate more than one type of embedded system to enable networking, sensing and actuation in an IT environment

Labs and Projects

Present and document labs and projects

Senior Project / Capstone 1

IT senior project proposal and feasibility studies. Project management, teamwork principles, intellectual property, supplier interactions, identifying and using professional technical literature, oral and written presentations.

IT 446

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ENGL 316; All required 300-level information technology courses.
Taught	Fall

Course Outcomes

System Integration

Participate in creation of concept definition, system definition, system integration and appropriate artifacts for a real system.

Project Management

Define tasks and use tools for the Project Life Cycle and change management

System life cycle

Demonstrate an understanding of System Life Cycle models, analyze and apply these to contexts for Systems Project Management

Teamwork

Demonstrate applications of teamwork principles and skills.

Communication

Demonstrate oral and written communication skills for professional technical communication

Intellectual Property

Describe intellectual property protections and how they apply to IT projects

Creativity and Innovation

Understand and apply principles of creativity and how they apply to design.

Top

Senior Projects/Capstone 2

Senior project design and integration. Second class of two-course sequence. Implementing design. Project management, teamwork, and presentations. Fee.

IT 447

Hours	3.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	IT 446
Taught	Winter

Course Outcomes

Teamwork

Participate as a responsible member of a team in project activities and regular project review meetings with a coach.

Project Management

Manage tasks and use appropriate tools for the Project Life Cycle and change management of your project.

Risk Management

Evaluate risk in projects and plan to manage it.

Life-Long Learning

Describe and practice skills and methods of life-long learning.

System life cycle

Demonstrate an understanding of System Life Cycle models, analyze and apply these to contexts for Systems Project Management

Communication

Demonstrate written, multimedia, and presentation skills for professional technical communication.

System Integration

Participate in the realization of integerated systems, change management, and demonstration of a real system.

Top

Database Administration

The role and responsibilities of database administrators. Database platform, architecture, and configuration; security and account management; backup, restore and disaster recovery; availability, access and performance; data migration. Labs conducted using Oracle's relational database management.

IT 450

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 350
Taught	Fall

Course Outcomes

Organization

Students will create and maintain various databases as methods of information storage.

Current Topics in Information Technology

In-depth analysis of current growth areas in information technology. Detailed discussion and lab experience of a few topics from faculty working in the field.

IT 461R

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Professional Improvement

Through mentored research students will choose a specific topic affecting the current industry and will analyze posible solutions.

Top

Information Assurance and Security

Computer security principles. Incident prevention and management. Information assurance dimensions of availability, integrity, authentication, confidentiality and non-repudiations to ensure transmission, storage, and processing of information.

IT 466

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 344 & IT 347 & IT 350
Taught	Winter

Course Outcomes

History and Context

Explain information assurance and security models, and relate these to historical and current security problems in the context of standards, best practices, policy, planning, usability and continuous education.

Risk Management

Use risk assessment methods to create a security plan that uses both technical and non-technical countermeasures for a management audience.

Incident Response

Develop as a team, incident response, disaster recovery and business continuity plans with an awareness of laws, regulatory standards and best practices.

Practicum

Install and configure various countermeasures such as firewalls, intrusion detection systems, virtual private networks, and encryption systems; and explain the benefits, limitations and usability impact these may have within an organization.

Penetration Testing

Explain how the processes of certification, accreditation and maintenance can mitigate risks, and be able to support these by performing a penetration test using basic hacking techniques.

Security for non-technical personel

Instruct non-technical audiences about the key elements of a good security implementation.

Top

Senior Seminar

Seminar topics for near-graduation seniors. Information technology work experience required.

IT 491R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Resume

Write a great resume

Interview Skills

Ability to interview well

Accepting a Job

Understand the offer and negotiate a contract

Business Etiquette

Understand Business Etiquette and the written and unwritten rules in the workplace

Graduation Requirements

Understand what is required for graduation

Top

Special Problems in Information Technology

Individual study in current topics of information technology.

IT 492R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Outcomes depend on course.

The nature of Information Technology is constant change.
This course allows students to pursue personal interests under the direction of a faculty member.

Special Topics in Information Technology

New topics in information technology for graduate and undergraduate students. Standard lecture and lab format.

IT 515R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Spring

Course Outcomes

Special Topics in IT

Learn and apply IT concepts and/or practices in a specialized area of IT.

Top

Advanced Networking

Analyzing, selecting, configuring, monitoring, and managing of computer network equipment. SNMP-based monitoring and control in process of fault isolation and root cause analysis.

IT 529

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 344, 347; or equivalents.
Taught	Winter

Course Outcomes

History

Understands history and evolution of 802.1D, Spanning tree, VLANs and their relationships.

Experience

Has received experience with real implementation of the concepts.

Bodies and Technology

Has built an intuition of the relationship between standards bodies and technology.

Problem Solving

Has built confidence through problem solving.

Describe Issues

Describe configuration and management issues relative to SNMP MIB.

Monitoring

Perform basic monitoring with SNMP.

Network Management Systems

Describe function and purpose of network management systems such as Zenoss, HP OpenView, Tivoli, OpenNMS.

Monitoring

Perform basic monitoring using some NMS.

VLAN Routers

Explain the interaction of a router and a switch implemented in the same device where the router forwards between VLANs only.

Enterprise Switches

Describe the architecture of a modern enterprise switch-router.

Distance Vector

Explain the details of Distance Vector routing and its advantages and disadvantages relative to Link State routing.

Link State

Explain the details of Link state routing and its advantages and disadvantages relative to Distance Vector Routing.

Describe

Describe the function of and uses of MPLS.

Presentations

Has gained experience and confidence in presenting technical information.

IPv6

Describe IPv6 and its evolution from IPv4.

IPv6 Adopted Slowly

Explain reasons why IPv6 has not been adopted as rapidly as originally predicted.

Read and Evaluate

Is prepared to read technical literature and evaluate quality of the information.

Read and Present

Is prepared to read technical literature and present the information and its context to an audience of peers.

Continuous Learning

Explain the need for continuous learning in the networking field.

Mechatronics

Synergistic application of mechanical devices, electronic controls, and cyber-system principles. Design of integrated systems that interact between the real world and the IT cyber-space environment. Advanced applications of automation and control.

IT 548

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall

Course Outcomes

Mechatronics Disciplines

Explain what disciplines comprise Mechatronics. Explain how the discipline of mechatronics is an integration of ideas and technologies from the contributing disciplines.

Mechatronics and IT

Explain how the fields of Information Technology (IT) and Mechatronics interact

Integrated Systems

Explain design approaches for integrated (multi-disciplinary) systems and how they are applied to Mechatronics (systems design)

Design Mechatronics Modules

Design system modules with heterogenous component technologies including industrial control (PLC/SCADA/other), sensors and actuators, interface electronics and embedded computer components

Application

Design, develop and demonstrate a complete mechatronic project using a variety of mechatronic technologies, including IT design aspects.

Analysis

Analyze and report on design elements from various technologies and their integration for their intended purpose(s) in Mechatronic systems.

Advanced Human-Computer Interaction

Advanced techniques for designing, prototyping, building, and evaluating technology-mediated user experiences. Human-computer interaction research methods including experimental design. Ethics of working with human subjects. HCI theories and best practices.

IT 555

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	IT 355; or instructor's consent.
Taught	Fall

Course Outcomes

HCI Research Methods

Apply quantitative and qualitative HCI research methods (e.g. experimental design, ethnographic observation, survey design)

HCI

Understand the role of theory in HCI

Human Interfacing Techniques

Create, extend, and/or evaluate advanced human interfacing techniques (e.g., augmented reality, gesture-based interfaces)

Research Proposals

Design and write HCI research proposals

Ethics

Apply ethical practices when working with human research participants

Cooperation

Apply prototyping, co-design, and other user-centered design techniques as part of a team

Digital Forensics

Fundamentals of digital forensics, legal issues, evidence, chain of custody, media analysis, incident response, corporate forensics, and network forensics.

IT 566

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 466 or equivalent.
Taught	Winter Contact Department

Course Outcomes

1

Determine the nature and extent of an incident by **applying** the principles of digital forensics, including where appropriate **reconstructing** a cyber-incident.

2

Analyze volatile data, nonvolatile data and files of unknown origin.

3

Compare the priorities of cyber forensics for different communities

4

Evaluate and **integrate** different tools to **create** a personal forensics toolkit.

5

Defend the results of an investigation to various audiences including technical, legal and management.

6

Create and **justify** forensic checklists for both existing and new technologies using established methods.

Top

Cyber Security and Penetration Testing

Advanced computer systems security. Vulnerabilities and exploits. System and network attacks. Ethical hacking and penetration testing. Cyber security, cyber weapons, and advanced persistent threats. Legal and regulatory requirements for security and privacy.

IT 567

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	IT 466 or C S 465 or IS 560; or equivalent content course from another institution; or concurrent enrollment.
Taught	Winter

Course Outcomes

Regulatory and Legal issues

1. Explain the regulatory and legal requirements, and rationale for penetration testing

Ethics

2. Hold an in-depth discussion about the ethics of cyber-security and other associated domains.

Tools

3. Demonstrate the use of various security tools, their application in a penetration test and be able to explain how such tools may be abused.

Documentation

4. Illustrate clearly, by means of a written report and verbal presentation, the results of a penetration test with clear recommendations.

Malware Tracking

5. Explain how exploits and vulnerabilities are discovered and the correct protocols to report these for vendor fixes.

Lifelong Learning

6. Be able to discuss new threat-types such as APT's and Cyber-Weapons and use these to explain why lifelong learning is critical for a security professional.

Top

First-Year Italian, Part 1

Daily development of the four language skills: understanding, speaking, reading, and writing.

ITAL 101

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Grammar Mastery

Become familiar with basic grammatical rules in Italian, including some verb tenses and their conjugations.

Sentence Recognition

Will understand simple sentences on familiar subjects in Italian.

Speaking Competence

Will speak simple sentences on familiar subjects in Italian.

Top

First-Year Italian, Part 2

Continuation of Ital 101.

ITAL 102

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Ital 101 or equivalent.
Taught	Fall, Winter, Summer

Course Outcomes

Grammar Mastery

Become familiar with grammatical rules in Italian, especially the verb tenses and their conjugations.

Sentence recognition

Students will understand simple sentences on familiar topics in Italian.

Speaking Competence

Students will speak simple sentences on familiar topics in Italian.

Intermediate Italian 1

Reading, writing, conversation, vocabulary building, and review of grammar.

ITAL 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Ital 102 or two years of high school Italian or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Grammar Mastery

Students will expand their knowledge of Italian grammar by reviewing and increasing their understanding of rules and structures.

Speaking Competence

Students will learn to handle most uncomplicated communication and social situations in Italian. Sustain a general conversation and understand longer connected discourse on topics dealing with different times and places.

Expected course outcome

Students will develop competence consistent with the "Intermediate" range of the ACTFL Proficiency Guidelines.http://actflproficiencyguidelines2012.org/

Reading Competence

Students will read texts dealing with descriptions and narration.

Top

Intermediate Italian 2

Final course for GE Foreign Language requirement (except for returned missionaries); extensive reading in Italian literature and culture.

ITAL 202

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ITAL 201; or instructor's consent.
Note	Capstone course for GE Language of Learning requirement for students who have not served a mission in Italy.
Taught	Fall, Winter

Course Outcomes

Read and Analyze Italian Literature

Develop a critical approach to Italian literature through a second-year proficiency level in Italian, analyzing a selection of literary works (listed in the syllabus) within their historical and cultural context.

Understand and apply basic literary analysis

Apply the fundamentals of literary interpretation to the texts we discuss.

Communicate effectively in Italian

Improve oral and written skills in Italian, particularly reading and listening comprehension, written production, and oral expression. Linguistic expected outcome for successful students will target approximately the "Intermediate" range on the ACTFL Proficiency scale.

Top

Second-Year Conversation

ITAL 211R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Ital 102 or equivalent.
Note	May be taken concurrently with Ital 201.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Speaking Competence

Students will describe and narrate in present, past and future times in the context of paragraph-level speech, and initiate and maintain conversations about autobiographical and concrete topics by asking and responding to questions and coping with gaps in knowledge.

Vocabulary

Speak using an appropriate variety of vocabulary related to autobiographical and concrete topics.

Top

Third-Year Conversation

ITAL 311R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Ital 211R or instructor's consent.
Note	May be taken concurrently with Ital 321 or 340.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Speaking Competence

Students will describe and narrate in present, past and future time frames in the context of paragraph-level speech about autobiographical and concrete topics, current events, plots of books or movies and state opinion.

Vocabulary

Speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current events and plots of books or movies.

(Fren-Ital) French and Italian Cinema

Background for understanding and appreciating the best of motion picture art in France and Italy. Includes components of critical theory essential for analyzing film. Language of instruction is English; no knowledge of French or Italian required.

ITAL 317

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Major filmmakers and cinematic movements

Identify the major filmmakers and cinematic movements in the history of French and Italian cinema, with particular attention to the socio-historical contexts that shaped their creation.

Film as technical art

Explore the essential aspects of cinema as an artistic medium and master the technical and critical terminology necessary to intelligently discuss the creative process.

Aesthetic Judgment

Develop critical skills for aesthetic judgment in applying acquired techincal knowledge to the films of individual filmmakers from these two traditions.

Expected course outcome

Analyze cinema as an art form and "read" individual films in terms of the specificity of an artistic, authorial message.

Advanced Grammar

Intensive review of grammar; vocabulary building.

ITAL 321

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Ital 202 or equivalent.
Taught	Fall, Winter, Summer

Course Outcomes

Grammar Mastery

Show control of Italian morphology and increase vocabulary knowledge

Speaking Competence

Handle linguistic tasks and social situations in Italian with confidence, and communicate on topics of current public and personal interest.

Reading Competence

Read and comment on short stories in Italian.

Advanced Functionality on the ACTFL Scale

Students will develop functional abilities consistent with the "Advanced" range of the official ACTFL Proficiency Guidelines.http://actflproficiencyguidelines2012.org/

Top

Advanced Composition

Italian syntax and composition.

ITAL 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Ital 321 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Written Expression

Students will write about personal experiences, narrative and descriptions of a factual nature. Students will support points of view in written discourse.

Grammar Mastery

Students will demonstrate control of the morphology and the most frequently used syntactic structures, e.g., common-word order patterns, coordination, subordination. It is expected that some students will make errors in producing complex sentences.

Expected course outcome

Students will develop functional abilities consistent with the Advanced range of the ACTFL Proficiency Guidelines. http://actflproficiencyguidelines2012.org/

Top

Italian Phonetics and Pronunciation

General rules of pronunciation. Introduction to history of Italian language.

ITAL 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 321
Taught	Fall, Winter

Course Outcomes

History of Language

Critically discuss how the Italian language has developed from Latin to modern Italian and distinguish between different language samples, from archaic to the most recent.

Phonetics and Pronunciation

Apply phonetics to improve pronunciation. Transcribe words and paragraphs into the International Phonetic Alphabet.

Introduction to Italian Literature

Basic literary concepts and terms coupled with readings of Italian works from various genres and periods.

ITAL 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Ital 321 and 322.
Note	Capstone course for GE Languages of Learning requirement for returned missionaries.
Taught	Fall, Winter

Course Outcomes

Reading Analytically

Read, understand, and analyze the Italian literary texts in the syllabus

Poetic Devices

Identify the poetic devices included in the "poetry section" of the syllabus and describe their function within the texts discussed in class

Research Skills

Acquire and implement research skills for the study of Italian literature in order to create two original analytical papers

Effective Communication in Italian

Write and speak clearly and effectively in Italian using functions consistent with the Advanced-level range on the ACTFL scale

Academic Internship: Italian Language Field Experience

On-the-job experience in Italian.

ITAL 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Culture

Articulate an analytical knowledge of the foreign culture and of its people, as related specifically to the working field(s) of their chosen internship(s).

Faith

Describe the active role of the LDS Church in Italy, by comparing and contrasting it with other local religious faiths, specifically observing the cultural variations in religious expression(s).

Language Proficiency

Demonstrate achieved improvement in language proficiency, as assessed by pre-departure and post-internship tests.

Top

Fourth-Year Conversation

ITAL 411R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent or Italian 311.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Linguistic Proficiency

Initiate and maintain fluent conversations in Italian, and cope with gaps in knowledge in contexts related to concrete topics and in some professional contexts.

Italian Civilization from the Beginning to 1600

Survey of history, music, architecture, literature, and arts that shaped the Italian culture and civilization from the beginning through the Renaissance.

ITAL 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Ital 340.
Note	Fulfills GE Arts elective.
Taught	Winter

Course Outcomes

Italian culture and history

Students will recognize important cultural, political, and religious figures, events, and movements in Italy from the Etruscan period to the Counter-Reformation by creating a timeline and taking two written exams.

Critical skills and informed aesthetic judgment

Develop critical skills and informed aesthetic judgment by participating in class discussions as we analyze works of art, architecture, artifacts, literature, and music.

Research Skills

Conduct research on an Italian cultural phenomenon of significant impact by locating and evaluating peer-reviewed sources.

Effective communication in Italian

Communicate effectively in Italian both orally and in writing by creating and presenting an imaginary museum exhibit catalog which traces a cultural phenomenon across a span of Italian history.

Italian Civilization from 1600 to the Modern Era

Survey of institutions, fine arts, and great writers that shaped the history of Italy from the Baroque period to the modern era.

ITAL 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Ital 340.
Note	Fulfills GE Arts elective.
Taught	Winter

Course Outcomes

Periods of artistic expression in Italian History

Become familiar with the major intellectual and artistic traditions of Italy from the Baroque Period to modern times by identifying the chronology and main characteristics of each period listed in the syllabus.

Form, Composition, and Meaning in the Arts

Apply critical concepts, theory, and history to the texts, music, artifacts, and works of art listed in the syllabus to discover, interpret, and evaluate their multiple meanings.

Critical and Aesthetic Judgment

Develop critical skills and informed aesthetic judgment to discuss and analyze the music, architecture, and works of art listed in the syllabus, paying particular attention to their historical or social setting and their place in shaping culture.

Research and Effective Communication in Italian

Locate and evaluate resources relevant to course assignments and apply appropriate methods of investigation (e.g., formulate hypotheses, make valid arguments, use evidence, cope with ambiguity, evaluate competing interpretations), and communicate findings coherently both orally and in writing.

Italian Literature of the Late Middle Ages and Renaissance

ITAL 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 340
Taught	

Course Outcomes

Language Ability

Formulate and express both orally and in writing critical arguments about the readings listed in the syllabus. Successful students will place at least at the "Advanced Low" level (ACTFL scale) in speaking, listening, writing, and reading in Italian. For the written expression, successful students will visit the Italian Writing Lab throughout the semester.

Research

Locate and evaluate primary and secondary sources on a specialized topic. Successful students will be able to complete academic research in the library and/or online, and demonstrate knowledge of appropriate bibliographic literary databases, such as the MLA's. Moreover, students will be throughly familiar with MLA conventions (8th ed) for their writing assignments.

Critical Thinking

Articulate and defend their comments in Italian, in research papers. Successful students will be able to critically comment orally and in writing on any of the literary pieces treated during in this course. They will be able to read, understand and analyze all the Italian literary selections listed in this syllabus. Successful students will be prepared to analyze and critique the main literary currents and authors of Italy's late Middle Ages and the Renaissance.

Italian Literature of the Baroque and Enlightenment Periods

ITAL 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 340
Taught	

Course Outcomes

Discuss and analyze Italian literature

Read, understand, and analyze all Italian literature selections listed in the syllabus.

Write a critical and analytical paper in Italian

By the end of the semester, successful students will have written a critical and analytical paper on a topic of their choice, incorporating existing peer-reviewed research and adding their own assessment and original ideas to the discourse.

Communicate effectively in Italian

Formulate and express both orally and in writing critical arguments about the readings listed in the syllabus. Successful students will place at the "Advanced" level in speaking, listening, writing, and reading on the ACTFL Proficiency scale.

Top

Italian Literature of the Romantic Period

ITAL 443

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 340
Taught	Fall

Course Outcomes

Language Ability

Formulate and express both orally and in writing critical arguments about the readings listed in the syllabus. Successful students will place at least at the "Advanced Low" level (ACTFL scale) in speaking, listening, writing, and reading in Italian. For the written expression, successful students will visit the Italian Writing Lab throughout the semester.

Research

Locate and evaluate primary and secondary sources on a specialized topic. Successful students will be able to complete academic research in the library and/or online, and demonstrate knowledge of appropriate bibliographic literary databases, such as the MLA's. Moreover, students will be throughly familiar with MLA conventions (8th ed) for their writing assignments.

Critical Thinking

Articulate and defend their comments in Italian, in research papers. Successful students will be able to critically comment orally and in writing on any of the literary pieces treated during in this course. They will be able to read, understand and analyze all the Italian literary selections listed in this syllabus. They will analyze and critique the three main lines of Italian Romanticism: political, religious, and existential/philosophical.

Top

Italian Literature of the Twentieth Century

ITAL 444

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 340
Taught	Winter

Course Outcomes

Linguistic Ability

Formulate and express both orally and in writing critical arguments about the readings listed in the syllabus. Successful students will place at least at the "Advanced Low" level (ACTFL scale) in speaking, listening, writing, and reading in Italian. For the written expression, successful students will visit the Italian Writing Lab throughout the semester.

Research

Locate and evaluate primary and secondary sources on a specialized topic. Successful students will be able to complete academic research in the library and/or online, demonstrate knowledge of appropriate bibliographic literary databases, such as the MLA's, and properly use the most up-to-date MLA style for writing assignments (8th ed.).

Critical Thinking

Articulate and defend their comments in Italian, in research papers. Successful students will be able to critically comment orally and in writing on any of the literary pieces treated during in this course. They will be able to read, understand and analyze all the Italian literary selections listed in this syllabus. Successful students will be prepared to analyze and critique the main literary currents and authors of Italy's 20th and 21st Centuries.

Top

Dante's Divine Comedy

Intensive examination of Dante's major opus.

ITAL 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 340
Taught	Fall

Course Outcomes

Discuss and analyze Dante's poetry

By the end of this semester, successful students will be able to discuss any of the cantos listed in this syllabus from a linguistic, theological, historical and critical point of view.

Write a critical and analytical paper in Italian

By the end of the semester, successful students will have written a critical and analytical paper, incorporating existing peer-reviewed research on their topic and adding their own assessment and original ideas to the discourse. Their written linguistic ability will place in the "Advanced Low" (ACTFL scale) level, with the help of the Italian Writing Lab tutor.

Master MLA Conventions for Research Papers

Successful students will be fully familiar with MLA conventions (8th ed) for their writing assignments., and with the MLA bibliographical database

Top

Individual Study in Italian

Assignments to fit individual needs of the advanced student.

ITAL 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Note	Not accepted for major or minor.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research

Formulate and express in writing critical arguments on a specialized topic reflecting an understanding of primary and secondary sources.

Senior Oral Proficiency Evaluation and Senior Portfolio

ITAL 491

Hours	0.5 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Should be completed the semester of graduation.
Taught	Fall, Winter

Course Outcomes

Linguistic Proficiency

Establish an oral proficiency rating by taking the Oral Proficiency Interview.

Oral Proficiency

Students will achieve at least an "Advanced" rating on their Oral Proficiency Interview.

Portfolio

Identify and revise your best papers from Italian courses.

Reflection Paper

Write a reflection paper on the experience of graduating in Italian and the future implications on your life and career.

Senior Seminar in Italian

In-depth study of a limited area of literature, culture, or criticism; content varies; requires research and writing.

ITAL 495R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ITAL 340
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Linguistic Ability

Formulate and express both orally and in writing critical arguments about the readings listed in the syllabus.Successful students will place at least at the "Advanced Low" level in Italian speaking, listening, writing, and reading on the ACTFL Proficiency scale

Research

Locate and evaluate primary and secondary sources on a specialized topic.

Critical Thinking

Articulate and defend an analytical research paper.

Top

Honors Thesis

ITAL 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Research

Develop advanced skills in research techniques and academic writing and produce an acceptable Honors thesis.

Top

First-Year Japanese

Writing systems, grammar and vocabulary-building fundamentals, basic conversation and reading.

JAPAN 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer Contact Department

Course Outcomes

Reading and Writing Hiragana and Katakana

Students will be able to read and write hiragana and katakana. A writing sample will be included in the individual student portfolio.

Asking and Giving Directions

Students will be able to ask and give directions

Discussing Schedules and Itineraries

Students will be able to discuss schedules and itineraries

Top

First-Year Japanese

Writing systems, grammar and vocabulary-building fundamentals, basic conversation and reading. Includes introduction to Chinese characters.

JAPAN 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Japan 101, or equivalent.
Taught	Fall, Winter, Summer Contact Department

Course Outcomes

Making Social Introductions

Students will be able to make social introductions covering various levels of formality and honorifics

Reading and Writing Simple Texts

Students will be able to read and write simple texts based on 200 elementary kanji characters. A written sample will be included in the individual student portfolio.

Making Comparisons

Students will be able to make comparisons

Top

Second-Year Japanese

Further practice in conversation; basic reading and writing skills.

JAPAN 201

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Japan 102 or equivalent.
Taught	Fall, Winter

Course Outcomes

Recognizing and Producing Kanji Characters

Students will be able to recognize and produce approximately 400 kanji characters with their readings and meanings. A written sample will be included in the individual student portfolio.

Describing and Modeling Proper Etiquette

Students will be able to describe and model proper etiquette when visiting a home, making hotel reservations, talking about the weather, clothing terms, etc. They will be able to use verbals of giving and receiving; compare activities; use different patterns of reporting information; and employ embedded questions.

Top

Second-Year Japanese

Further practice in conversation, reading, and writing; introducing culture through short stories, articles.

JAPAN 202

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Japan 201 or equivalent.
Note	Not for returned missionaries. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Fall, Winter

Course Outcomes

Increasing kanji recognition and usage

Students will be able to recognize and use an additional 150 kanji characters in context. A written sample will be included in the individual student portfolio.

Using honorific language

Students will interact appropriately in vertical society situations, using proper levels of honorific language.

Second-Year Conversation

JAPAN 211R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Japan 102 or equivalent.
Note	For Japan Study Abroad or Foreign Language Student Residence students only.
Taught	Fall, Winter, Summer

Course Outcomes

Improving pronunciation, accent, and intonation

Students will learn to speak Japanese with more accurate pronunciation, accent, and intonation.

Increasing listening skills

Students will be able to understand spoken native Japanese with greater accuracy.

Using Japanese in daily life situations

Students will acquire facility in discussing daily life situations in their apartments in Japanese.

Top

Japanese Reading and Culture

Reading and writing emphasizing essential characters, vocabulary, grammar, and culture.

JAPAN 301

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Japan 202 or equivalent.
Note	First course for returned missionaries.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department

Course Outcomes

Reading authentic Japanese texts at intermediate level

Students will be able to read intermediate-level stories, articles, and letters.

Writing about personal experiences

Students will be able to describe their personal experiences in letters to friends. A written sample will be included in the individual portfolio.

Speaking in a more native and idiomatic manner

Students will be able to speak Japanese more like native speakers, using a variety of idiomatic expressions.

Readings in Japanese History and Culture

Readings in Japanese history and literature with essential characters, vocabulary, and grammatical principles.

JAPAN 302

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Japan 301 or instructor's consent.
Taught	

Course Outcomes

Read narrative texts at the intermediate high level

Students will be able to read and discuss texts relating to Japanese history, literature, and culture.

Writing on topics in Japanese history and culture

Students will be able to write at the intermediate level on assigned topics relating to Japanese history, literature, and culture.

Speaking on a wide variety of topics

Students will be able to discuss and give oral presentations on key topics in Japanese history, literature, and culture.

Third-Year Conversation

JAPAN 311R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Japan 301 or instructor's consent.
Note	May be repeated for Study Abroad in Japan.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Speaking in public settings

Students will be able to prepare and present speeches in public settings.

Improving pronunciation, accent, and intonation

Students will learn to speak Japanese with more accurate pronunciation, accent, and intonation.

Increasing listening skills

Students will be able to understand spoken native Japanese with greater accuracy.

Reading Modern Documentary Styles

Readings in modern documentary styles, emphasizing reading comprehension, grammar, and vocabulary building.

JAPAN 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 302 or equivalent.
Taught	

Course Outcomes

Common Vocabulary

Students will increase their ability to understand vocabulary commonly used in newspapers

Reading News Articles

Students will be able to read a range of types of news articles (politics, business, human interest, sports, etc.)

Compare and Contrast News Reports

Students will be able to compare and contrast print and television news reports. A written sample will be included in the individual student portfolio. The student portfolio will be formally reviewed at the conclusion of this course.

Top

Reading Modern Short Fiction

Readings in modern short fiction, emphasizing grammar, reading comprehension, vocabulary building, and stylistic analysis.

JAPAN 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 302 or equivalent.
Taught	

Course Outcomes

Dictionary Usage

Students will be able to use a variety of dictionary sources that will enable them to read and comprehend modern Japanese prose

Recognition and Reading of Kanji

Students will be able to recognize a majority of standard-usage kanji and identify various readings for the characters

Analysis and Discussion of Texts

Students will be able to analyze and discuss a variety of modern Japanese literary texts at an intermediate level in the target language. A writing sample will be included in the individual student portfolio.

Top

Japanese Morphology, Syntax, and Semantics

General overview of grammar and its practical application in composition.

JAPAN 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	JAPAN 302
Taught	

Course Outcomes

Displaying knowledge of features of the Japanese language

Students will demonstrate both orally and in writing their knowledge of and ability to use appropriately essential features of the Japanese language, including parts of speech, modification, vector verbs, and honorifics.

Demonstrating ability to communicate in Japanese

Students will demonstrate, through regular writing assignments and oral presentations, their ability to write and speak Japanese with accuracy and to do contrastive analysis of Japanese and English.

Contrastive Analysis of Japanese and English

Contrastive overview of Japanese and English phonology, syntax, semantics, and discourse.

JAPAN 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	JAPAN 302
Taught	

Course Outcomes

Demonstrating understanding of important syntactic patterns

Students will demonstrate, through appropriate usage, their understanding of important syntactic patterns. A writing sample will be included in the individual student portfolio.

Demonstrating understanding of tense and aspect

Students will be able to describe and narrate in different time frames in Japanese.

Top

Traditional Japanese Culture

General survey emphasizing aesthetics, religion, and value systems. All readings in English.

JAPAN 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Spring Contact Department

Course Outcomes

Analyze and discuss salient features of Japanese culture

Students will be able to speak and write about such features of culture as language, literature, thought, religion, aesthetics, art and music. A writing sample will be included in the individual student portfolio.

Japanese Literature in Translation--Eighth Through Sixteenth Centuries

Reading and discussing selected topics in Japanese literature (narrative, lyric, drama) from 700 through 1600 (Nara, Heian, and medieval periods).

JAPAN 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Understanding expressions of human experience in literature

Students will demonstrate their understanding of the human aspects of premodern literature in verbal and written forms. A writing sample will be included in the individual student portfolio.

Understand key works and genres in premodern literature

Students will demonstrate their knowledge and understanding of major works and genres in verbal and written forms.

Japanese Literature in Translation--Seventeenth Through Nineteenth Centuries

Reading and discussing selected topics in Japanese literature (narrative, lyric, drama) from 1600 through 1900 (Edo and Meiji periods).

JAPAN 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Understanding expressions of human experience in literature

Students will demonstrate their understanding of the human aspects of early modern Japanese literature orally and in writing. A writing sample will be included in individual student portfolio.

Understand key works and genres in early modern literature

Students will demonstrate their understanding of key literary works and genres in early modern Japanese literature in verbal and written forms.

Top

Japanese Literature in Translation: The Modern Era

Reading and discussing selected topics in Japanese literature (narrative, lyric, drama) from Meiji period to the present.

JAPAN 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Understand expressions of human experience in literature

Students will demonstrate their understanding of human aspects in works of modern Japanese literature orally and in writing. A writing sample will be included in the individual student portfolio.

Understand key works and genres in modern literature

Students will demonstrate their ability to analyze key works and genres in modern Japanese literature in oral and written form.

Japanese Language Teaching Procedures

Acquiring knowledge and skills specific to teaching of Japanese as a foreign language. Conducted in Japanese and English.

JAPAN 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 302 or instructor's consent.
Taught	

Course Outcomes

Evaluating and creating language teaching materials

Students will evaluate existing language teaching materials, then create and present their own teaching materials. A sample of teaching materials will be included in the individual student portfolio.

Planning and teaching language lessons

Students will plan language lessons and present them in class.

Japanese for Special Purposes

Readings, video materials, discussions, and projects in content areas related specifically to business, science, and technology.

JAPAN 390

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 321 or equivalent.
Taught	Winter

Course Outcomes

Analyze and discuss Japanese business environment

Students will gain proficiency in analyzing and discussing, in Japanese, important aspects of the business environment in Japan as compared to that in America.

Demonstrate knowledge of specialized vocabulary skills

Students will acquire and be able to use specialized vocabulary in Japanese relating to their fields of interest.

Academic Internship

On-the-job cultural and/or language experience.

JAPAN 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	JAPAN 302
Taught	

Course Outcomes

Acquire and use specialized vocabulary in work situations

Students will enhance functional knowledge of vocabulary as it relates to the workplace in Japan.

Increasing understanding of Japanese corporate culture

Students will acquire on-the-job understanding of the corporate culture of the firm where they conduct their internship.

Advanced Japanese Pragmatics

Advanced skills in speaking and writing.

JAPAN 411

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	JAPAN 311R & JAPAN 321 & JAPAN 322
Taught	Fall, Winter

Course Outcomes

Reading advanced texts on current events and issues

Students will read and discuss in a variety of settings advanced texts relating to current events and issues.

Writing response and opinion essays in Japanese

Students will write essays that analyze, respond to, and express personal opinions on current events and issues. A sample essay will be included in the individual student portfolio.

Top

Introduction to Classical Japanese

Reading of premodern texts, emphasizing grammar and syntax, and showing differences from and influences on the modern idiom.

JAPAN 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	JAPAN 321 & JAPAN 322
Taught	Fall, Winter

Course Outcomes

Knowing relationship between classical and modern language

Students will be able to analyze and discuss the influence of the pre-modern language on present-day Japanese.

Understanding and analyzing key premodern literary texts

Students will read and analyze the content and linguistic features of important premodern literary texts. A writing sample will be included in the individual student portfolio.

Top

Advanced Documentary Style

Reading and discussion of modern expository texts; developing advanced listening skills using authentic materials.

JAPAN 443

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 321, 322; or equivalents.
Taught	Fall, Winter

Course Outcomes

Reading and analyzing advanced modern texts

Students will demonstrate the ability to read and analyze advanced documentary-style texts. A writing sample will be included in the individual student portfolio.

Top

Modern Japanese Literature

Fictional texts from major twentieth-century authors. Texts primarily in Japanese.

JAPAN 444

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 321, 322; or equivalents.
Taught	Fall

Course Outcomes

Reading and analyzing advanced modern literary texts

Students will demonstrate their ability to read and interpret modern literary texts with sophistication in both oral and written forms. A writing sample will be included in the individual student portfolio.

Top

Christianity in Japanese Literature

Reading and discussing Japanese literary texts relating to Christianity from late 19th century to present day.

JAPAN 445

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Japan 321, 322; or equivalents.
Taught	Fall Contact Department, Winter

Course Outcomes

Knowledge

Students will deepen their understanding of Christianity in Japanese Literature.

Individual Study in Japanese

Topics vary. Assignments to fit individual needs of the advanced student.

JAPAN 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Consent of advisor and instructor.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Focused acquisition of knowledge and skills

Students will concentrate on a specific topic of study and increase their knowledge of and ability to use language appropriate to that field.

Increased appreciation of aesthetic practices

Students will gain a better appreciation for some of the fine aesthetic and artistic expressions in Japan.

Senior Seminar

Capstone course for the Japanese major.

JAPAN 495

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Department approval.
Note	Required of all majors. To be taken the Fall or Winter semester prior to graduation.
Taught	Fall, Winter

Course Outcomes

Analyze and discuss salient features of culture

Students will be able to analyze and discuss such features of the culture as language, literature, thought, religion, aesthetics, art, and music. The student portfolio will be reviewed at the conclusion of this course.

Analyze and discuss the structure of the Japanese language

Students will demonstrate an ability to analyze and discuss aspects of the language, such as phonology, morphology, syntax, semantics, and pragmatics. The student portfolio will be reviewed at the conclusion of this course.

Top

Academic Internship

On-the-job cultural and/or language experience.

JAPAN 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Japan 302 or equivalent.
Taught	

Course Outcomes

Application

The students will utilize a significant range of skills and abilities in a professional setting.

First-Year Korean 1

Han'gul, the phonetic system, basic grammar and vocabulary, discourse, reading, and culture.

KOREA 101

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Outcomes

Students will be able to;
1. Read (with limited comprehension) and write proficiently.
2. Discuss topics such as family, school, months of the year, hobbies, vacation plans.
3. Interact linguistically on a limited basis using middle and high language.

First-Year Korean 2

Continuation of Korea 101. Phonetic system, basic grammar, vocabulary, discourse, reading, and culture.

KOREA 102

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Korea 101 or equivalent.
Taught	Winter

Course Outcomes

Outcomes

Students will be able to;
1. Comprehend basic reading material
2. Use low language in addition to middle and high language
3. Use expanded grammar and vocabulary in speech ACTFL 1

Top

Second-Year Korean 1

Further practice in discourse and basic reading and writing skills; culture.

KOREA 201

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Korea 102 or equivalent.
Taught	Fall

Course Outcomes

Outcomes

Students will be able to;
1. Speak somewhat comfortably in everyday situations with peers and acquaintances.
2. Read and write basic Korean (with grammatical and spelling mistakes).
3. Translate from basic Korean to English and English to Korean
4. Grasp Korean surface and deep culture

Second-Year Korean 2

Continuation of Korea 201. Conversation, basic reading and writing skills, culture. Introduction to Chinese characters.

KOREA 202

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Korea 201 or equivalent.
Note	Not for returned missionaries. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter

Course Outcomes

Learning outcome 1

1. Speak and understand Korean at an ACTFL 2

Learning outcome 2

2. Read and understand modified or early intermediate level readings

Learning outcome 3

3. Recognize basic hanja

Learning outcome 4

4. Write in Korean without major spelling or grammatical mistakes

Top

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

KOREA 211R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Korea 201 or foreign residence experience.
Taught	

Course Outcomes

Application of conversation

Students will deepen their understanding of Conversation.

Third-Year Korean 1

Vocabulary, grammar, discourse, pronunciation, hanja, and culture.

KOREA 301

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Korea 202 or equivalent.
Note	First course for returned missionaries.
Taught	Fall, Winter, Summer

Course Outcomes

Outcome

Students will be able to;
1. Speak in most social and uncomplicated language situations. ACTFL 3-
2. Listen and understand most informal topics spoken by native speaker. ACTFL 3-
3. Read and understand leisure stories, essays and easy formal topics.
4. Compose one page Korean without major flaws in structure of Korean.

Top

Third-Year Korean 2

Continuation of Korea 301. Vocabulary, grammar, discourse, hanja, composition, pronunciation, and culture.

KOREA 302

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Korea 301 or equivalent.
Taught	Fall, Winter

Course Outcomes

Outcome 1

1. Speak in most social language situations and some complicated language situations with confidence. ACTFL 3

Outcome 2

2. Read and understand some intermediate level of formal topics.

Outcome 3

3. Compose one page Korean using some four-character proverbs and some high level vocabulary without major structural flaws.

Third-Year Conversation

Advanced conversational skills.

KOREA 311R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Korea 301 or foreign residence experience.
Taught	Fall, Winter

Course Outcomes

Conversation

A third-year level course, students should become coversant in a range of common and sophisticated subjects.

Conversational Korean

Students will begin to develop professional speaking abilities to include conversation at a well-educated natives speakers level, ability to make professional presenations, and respond to questions in a formal setting.

Top

Selected Readings of Modern Korean

Mixed script (with hanja) and other readings from modern documentary and literary texts, emphasizing comprehension, grammar, and vocabulary building.

KOREA 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Korea 301 or equivalent.
Taught	Winter

Course Outcomes

readings

students will develop skills in reading advanced level texts in literature and social sciences.

Top

Structure of Korean

Applying phonology, morphology, syntax, and semantics to the problems of learning Korean.

KOREA 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Korea 302.
Taught	Fall

Course Outcomes

Students will be able to

1. Analyze and discuss aspects of the structure of the Korean language, including phonology, morphology, semantics, and pragmatics. (Direct Measure 6)
2. Analyze and discuss aspects of the structure of the Korean language in relation to other languages.
3. Understand and be able to discuss major linguistic theories and theorists.
4. Understand and be able to discuss current issues and topics among linguists.

Top

Korean Literature to 1900

Korean literature from the earliest times to 1900. Emphasis on basic literary concepts.

KOREA 340

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	KOREA 302
Taught	Fall

Course Outcomes

Analysis of literature

Students in this course will gain proficiency in reading and analyzing traditional Korean literature.

pre-modern literature

Students will learn of the wide range of literary genre available in Korea prior to the 20th century.

Basic understanding of Chinese characters

Students will be able to use a Chinese character dictionary to identify the meanings of the characters in various literary contexts.

Basic understanding of premodern Korean script

Students will be able to understand texts written in premodern Korean script aided by glosses in modern Korean and English.

poetry

Students will learn at least five styles of poetry common in Korea from the Silla period to the late Joseon period, including hyangga, Chinese (Tang) poetry, sijo, gasa, and the poetry of the Yongbi-eo cheon'ga.

prose

Fiction, in the form of tales, legends, fables, and uniquely Korean "pansori" novels will become familiar to students in this course.

Romanization

Students will learn how to romanize Korean according to the McCune-Reischauer system and the Revised Romanization of Korean system.

Writing skills

Students will be able to write research papers of varying length on the literature of Korea before 1900. They will be able to locate library sources and use MLA format to compile a bibliography and properly cite sources used in their paper. They will write an organized paper with a well-developed topic.

Presentation skills

Students will be able to present their final paper in a thought-provoking and organized manner. They will learn to keep their presentation to a specified time limit.

Top

Korean Culture

Selected topics in traditional, modern, and contemporary Korean culture. All readings in English.

KOREA 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

In the Korean Culture class students will:

- become familiar with the historical framework of Korea, the major dynasties and historic events.
- become familiar with major religions including shamanism, Buddhism, Confucianism, and Christianity as well as some "new religions".
- learn basic concepts of lineage and family structure, organization and activities, including ancestor veneration ceremonies.
- learn the political structure of South Korea and North Korea

Korean Language Teaching Methods

Understanding diverse language teaching methods, strategies, theories, and issues. Teaching other Korea 377 students. Teaching in a real Korean language classroom. Evaluating teaching. Preparing interactive lesson plans and measures of assessment.

KOREA 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Korea 201.
Taught	Winter

Course Outcomes

Application

Students will demonstrate their understanding of teaching methods for the Korean Language.

Academic Internship

On-the-job cultural and language experience.

KOREA 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Korea 301; instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

In a variety of settings (business, government or education)

Students will have hands-on, practical experience in which they will use the language daily and learn and respect the culture of Korea.

Top

Fourth-Year Korean 1

Advanced language preparation in reading, discourse, writing, and hanja.

KOREA 401

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	KOREA 302
Taught	Fall

Course Outcomes

Fourth-year Korean

Students will expand their vocabularies as the work on reading and writing skills primarily. Speaking and listening skills, while assumed to be strong at this level, will also be improved by listening to authentic language production from news media and dramatic presentations.

Top

Fourth-Year Korean 2

Continuation of Korea 401. Advanced reading, discourse, writing, and hanja.

KOREA 402

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	KOREA 401
Taught	Winter

Course Outcomes

Fourth-year Korean

Students will expand their vocabularies as the work on reading and writing skills primarily. Speaking and listening skills, while assumed to be strong at this level, will also be improved by listening to authentic language production from news media and dramatic presentations.

Top

Classical Korean (Hanmun)

Reading of premodern, documentary Sino-Korean texts, including genealogy records and the Chosŏn Dynasty Annals.

KOREA 441

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	KOREA 321; or CHIN 441
Taught	Fall

Course Outcomes

Advanced reading in Korean (with hanmun)

Students will learn to read academic journals articles, reference works, genealogies, and other primary source documents, all of which contain Sino-Korean vocabulary.
This course will assist students who work for the government or need to take advanced proficiency test to do well and excel on such tests in their future professions.

Top

Korean Literature after 1900

Literary texts from major post-1900 authors, in Korean, emphasizing reading, translating, and criticism.

KOREA 443

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	KOREA 302
Taught	Winter

Course Outcomes

Modern Korean Literature

Students will learn of the poetry, short stories and novels of the 20th and 21st centuries. Major literature from Korea before the division in 1945, and post-division in South Korea (with a little readings of North Korean literature) will be covered.

Top

Individual Study in Korean

Individual assignments appropriate to needs of advanced students.

KOREA 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Senior Seminar

Individual research, with seminar paper the primary objective.

KOREA 495

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required for Korean majors.
Taught	Winter

Course Outcomes

Senior seminar

Students will present their finest research and writing. In some cases they will develop a paper written earlier in their career; in other cases, they will start afresh - but the outcome will be a publishable (or near-publishable) piece of excellence in writing and research.

Top

First-Year Latin (First Semester)

LATIN 101

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Reading Latin

Successful students will be able to read Latin at an elementary level with a high degree of understanding.

Basic Forms, Grammar, and Vocabulary

Successful students will have command of basic forms, grammatical structures, and vocabulary of Classical Latin.

Top

First-Year Latin (Second Semester)

LATIN 102

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	LATIN 101; or departmental approval.
Taught	Winter

Course Outcomes

Basic Forms, Grammar, and Vocabulary

Successful students will have command of all basic forms, grammatical structures, and vocabulary of Classical Latin.

Reading

Successful students will be able to read Classical Latin at an elementary level with a high degree of understanding.

Top

Beginning Latin Accelerated

Equivalent of combined Latin 101, 102.

LATIN 111

Hours	5.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Prepares students for Latin 201.
Taught	Fall, Winter, Spring
Offered	Honors also.

Course Outcomes

Basic Forms, Grammatical Structures, and Vocabulary

Successful students will have command of all basic forms, grammatical structures, and basic vocabulary of Classical Latin.

Reading

Successful students will be able to read Classical Latin at an elementary level with a high degree of understanding.

Honors Beginning Latin Accelerated

Equivalent of combined Latin 101, 102.

LATIN 111

Hours	5.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Prepares students for Latin 201.
Taught	

Course Outcomes

Basic Forms, Grammatical Structures, and Vocabulary

Successful students will have command of all basic forms, grammatical structures, and basic vocabulary of Classical Latin.

Reading

Successful students will be able to read Classical Latin at an elementary level with a high degree of understanding.

Top

Latin for Genealogists

LATIN 121

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Reading Latin

Successful students will develop a reading knowledge of simple Latin prose found in parish, notarial, and other records of interest to genealogists, family historians, and archivists.

Basic Understanding of Records

Successful students will develop a basic understanding of the organization, structure, and content of parish, notarial, and other records of interest to genealogists, family historians, and archivists.

Premedical Latin and Greek

LATIN 123

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For premedical and predental students and students in the physical and natural sciences (usually taught in the evening).
Taught	

Course Outcomes

Basic Texts

Successful students will demonstrate a familiarity with the basic texts of ancient medical writings. Latin 123 is a service course, provided for pre-med students and not a course that contributes to the program-level outcomes of the Classical Studiens majors. No link to program outcomes is provided.

Basic Vocabulary

Successful students will understand the Latin and Greek roots of modern medical terminology and demostrate that undestanding in examinations.
Latin 123 is a service course, provided for pre-med students and not a course that contributes to program-level outcomes of the Classical Studies major. No link to program outcomes is provided.

Intermediate Latin

Readings from Caesar, with a review and continuation of grammar.

LATIN 201

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	LATIN 102; or LATIN 111; or departmental approval.
Taught	Fall, Winter

Course Outcomes

Latin Morphology

Successful students will master Latin morphology. All of the forms introduced in Latin 101/102 or Latin 111 should be mastered in Latin 201. Students should be able to identify fully the forms of nouns, adjectives, verbs (finite and infinitive forms), adverbs, gerunds, gerundives, etc.

Locating Literary Accomplishments

Successful students should be able to locate the literary accomplishments of the chosen author (such as Julius Caesar) in the context of Roman literature generally and of his own literary context specifically.

Grammar and Syntax

Successful students should master Latin grammar and syntax. They should be able to recognize and identify grammatical and syntactical constructions. In other words, students should be able not only to identify the form of a Latin word, but also the function of that word. For example, a student should be able to indentify a verb form as "third person singular present active subjunctive," and then explain why the subjunctive mood is being used.

Translating Classical Latin into English

Successful students should be able to translate a representative Classical Latin text into good English.

Top

Classical Latin Poetry

Selections from Vergil's Aeneid and Ovid's Metamorphoses.

LATIN 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 201
Taught	Winter

Course Outcomes

Grammar, Syntax, and Meter of Classical Latin Poetry

Successful students will acquire a foundation in the grammar and syntax of Classical Latin poetry. They will also acquire a basic knowledge of the principles of scanning Latin verse. Vergil's *Aeneid* and Ovid's *Metamorphoses* are regularly chosen as examples.

Morphology of Classical Latin Poetry

Successful students will master the morphology of Classical Latin poetry. Students should be able to identify fully the forms of nouns, adjectives, verbs (finite and infinitive forms), adverbs, participles, etc.

Translation of Latin Poetic Text

Successful students should be able to translate a Latin poetic text into good English.

Locating Literary Accomplishments

Successful students should be able to locate the literary accomplishments of the chosen author (such as Vergil or Ovid) in the context of Latin literature generally and of his own literary context specifically.

Top

Classical Latin Prose

Readings in Cicero's Catilinarian orations and Sallust's Catiline.

LATIN 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 201
Taught	Fall

Course Outcomes

Latin Morphology

Successful students will refine their mastery of Classical Latin morphology. Students will be able to identify fully the forms of nouns, adjectives, verbs (finite and infinitive forms), adverbs, participles, etc.

Grammar, Syntax, and Rhetoric

Successful students should master Latin grammar and syntax and begin to master Latin rhetoric. While they should be able to recognize and identify grammatical and syntactical constructions--a practice already refined in Latin 201, they should also be able to recognize and identify rhetorical devices employed by the author(s) being read and begin to understand the effect of those devices as employed.

Translation of Complex Latin Prose

Successful students should be able to translate a complex Latin prose text into good English.

Place in Literary History

Successful students should be able to locate the literary accomplishments of the chosen author(s) (such as Cicero and Sallust) in the context of Latin literature generally and of their own literary context specifically.

Secondary Teaching Procedures

Skills mastery, hearing, speaking, reading, writing, and identification of teacher-pupil activities required for conceptual learning. Lectures, demonstrations, and application of linguistic techniques to practical classroom requirements.

LATIN 377

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SC ED 276R & LATIN 301; or SC ED 276R & LATIN 302
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Bibliography

Students in 377 will assemble an annotated bibliography of Latin teaching practises.

Evaluation of Textbooks

Students in 377 will learn how to evaluate different elementary Latin textbooks.

Using Assessment Tools

Students in 377 will learn how to put into practice various types of assessment tools (quizzes, exams, spot-checks, feedback, etc.) to evaluate student learning.

Analyzing Pedagogical Methods

Students in 377 will visit a variety of foreign language classrooms and learn to analyze pedagogical method.

Latin Reading and Composition

Students in 377 will demonstrate at the end of the semester that they can write and read Latin at the level of an advanced undergraduate.

Top

Practicum in Teaching Latin

Applying methods learned in Latin 377 in the classroom.

LATIN 378

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Latin 377 or concurrent enrollment.
Taught	

Course Outcomes

Latin Teaching

By attending, observing, and actively assisting in another teachers' Latin classes, students in 378 will sharpen skills in Latin pedagogy.

Top

Latin Prose Composition

LATIN 401

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 302; or concurrent enrollment.
Taught	Winter Contact Department

Course Outcomes

Reading Comprehension and Stylistic Awareness

Successful students will be able to read Latin prose literature with a high degree of understanding and with stylistic awareness.

Critical Theory

Successful students will understand and apply principles and practice of critical theory, with specific reference to Latin texts.

Classical and Late Latin Literary History

Successful students will understand the literary history of Classical and later Latin prose literature.

Text Evaluation

Successful students will be able to evaluate texts through a close reading in the original language.

Latin Composition, Grammar, and Style

Successful students will be able to compose grammatically correct and stylistically appropriate Latin prose with proficiency.

Latin Vulgate and Early Christian Latin Texts

Topics include Latin Vulgate and selections from other early Christian Latin texts.

LATIN 411R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 302
Taught	

Course Outcomes

Grammar, Syntax, and Vocabulary

Successful students will master the forms, syntax, and substantial vocabulary of the Latin of the Vulgate and/or other contemporary Christian texts.

Reading the Latin Vulgate and other Christian Texts

Successful students will learn techniques for reading the Latin vulgate and other Latin Christian texts with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method, with specific reference to the Latin Vulgate and related texts.

Literary History and Context

Successful students will understand the literary history of Biblical and Classical literature in the larger context of political and cultural history.

Evaluation of Texts

Successful students will evaluate texts through close reading in the original language and express this in examinations and essays.

Livy

Selections from Livy's Ab Urbe Condita.

LATIN 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 302
Taught	

Course Outcomes

Reading Latin

By approaching the text of Livy successful students will learn techniques of reading Latin prose literature with subtlety, precision, and a high degree of understanding.

Critical Method

Successful students will understand and apply principles and practice of critical theory, with specific reference to the texts of Livy.

Literary History

Successful students will understand the place of Livy in the literary history of Classical antiquity, locating him and his work in the larger context of politcal and cultural history.

Close Reading in Original Language

Successful students will intelligently evaluate the text of Livy through close reading in the original langauge and express this in examinations and essays.

Vergil

LATIN 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Reading Latin

By approaching the texts of Vergil, successful students will learn techniques of reading Latin poetic literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of Vergil.

Literary History

Successful students will understand the place of Vergil in the literary history of Classical Literature, locating him in the larger context of political and cultural history.

Close Reading in Original Language

Successful students will intelligently evaluate texts of Vergil through close reading in the original language and express this in examinations and essays.

Ovid

LATIN 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Reading Latin with Understanding

By approaching the texts of Ovid, successful students will learn techniques of reading Latin poetic literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of Ovid.

Literary History

Successful students will understand the place of Ovid in the history of Classical Literature, locating him in the larger context of political and cultural history.

Close Reading in Original Language

Successful students will evaluate texts of Ovid through close reading in the original language and express their understanding in examinations and essays.

Cicero

Selections from the works of Cicero.

LATIN 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 302
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will evaluate texts of Cicero through close reading in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching the texts of Cicero, successful students will learn techniques of reading Latin prose literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of Cicero.

Literary History

Students will understand the place of Cicero in the literary history of Classical antiquity, locating him in the larger context of political and cultural history.

Plautus and Terence

LATIN 434

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will evaluate texts of Plautus and Terence through close reading in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching the texts of Plautus and Terence successful students will learn techniques of reading Latin verse literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of Plautus and Terence.

Literary History

Successful students will understand the place of Plautus and Terence in the literary history of Classical antiquity, locating them in the larger context of political and cultural history.

Catullus

LATIN 435

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Reading Latin

By approaching the texts of Catullus, successful students will learn techniques of reading Latin poetic literature with subtlety and precision

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of Catullus.

Literary History

Successful students will understand the place of Catullus in the literary history of Classical Literature, locating him in the larger context of political and cultural history.

Close Reading in the Original Language

Successful students will intelligently evaluate texts of Catullus through close reading in the original language and express this in examinations and essays.

Tragedy and Epic of the Early Empire

Selections from Seneca, Lucan, and the Flavian epic poets.

LATIN 436

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will evaluate tragedy and epic of the Early Roman Empire through close reading in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching tragedy and epic of the Early Roman Empire, successful students will learn techniques of reading Latin verse literature with subtlety and precision.

Critical Method

Students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the tragedies and epics of the Early Roman Empire.

Literary History

Students will understand the place of tragedy and epic of the Early Roman Empire in the literary history of Classical literature, locating them in the larger context of political and cultural history.

Top

The Latin Epistle

Letters of Cicero, Seneca, Pliny, and the later tradition.

LATIN 437

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 302
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will evaluate letters of Cicero, Seneca, Pliny, and later authors in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching a variety of Latin epistles successful students will learn techniques of reading Latin prose literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the Latin epistolary tradition.

Literary History

Successful students will understand the place of the Latin epistle in the literary history of Classical antiquity, locating it in the larger context of political and cultural history.

Horace

LATIN 438

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will evaluate texts of Horace in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching texts of Horace successful students will learn techniques of reading Latin verse literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of Horace.

Literary History

Successful students will understand the place of Horace in the literary history of Classical antiquity, locating him in the larger context of political and cultural history.

Tacitus

LATIN 439

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 302
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will intelligently evaluate texts of Tacitus in the original language and express their understanding in examinations and essays.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to texts of Tacitus.

Reading Latin with Understanding

By approaching texts of Tacitus successful students will learn techniques of reading Latin prose literature with subtlety and precision.

Literary History

Successful students will understand the place of Tacitus in the literary history of Classical antiquity, locating him in the larger context of political and cultural history.

Top

Roman Satire

Selections from Horace, Petronius, and Juvenal.

LATIN 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will intelligently evaluate selected texts of Horace, Petronius, and Juvenal in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching texts of Horace, Petronius, and Juvenal successful students will learn techniques of reading Latin prose and verse literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to Roman satire.

Literary History

Successful students will understand the place of Roman satire in the literary history of Classical antiquity, locating it in the larger context of political and cultural history.

Medieval Latin

Study of particular periods (e.g., Carolingian renaissance, twelfth-century renaissance) or genres (e.g., historiography, epic, autobiography), or survey of medieval Latin.

LATIN 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LATIN 301 & LATIN 302
Taught	

Course Outcomes

Close Reading in Original Language

Successful students will intelligently evaluate a variety of Medieval Latin texts in the original language and express their understanding in examinations and essays.

Reading Latin with Understanding

By approaching a variety of Medieval Latin texts successful students will learn techniques of reading Latin prose and verse literature with subtlety and precision.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to Medieval Latin texts.

Literary History

Successful students will understand the place of a variety of Medieval Latin authors and texts in the literary history of Classical antiquity and the Middle Ages, locating them in the larger context of political and cultural history.

Topics in Latin Literature

Topics vary.

LATIN 490R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Reading Latin

By approaching the texts of selected Latin authors successful students will learn techniques for reading Latin with subtlety and precision. The author(s) chosen for study will vary according to the preference of the faculty member teaching the course.

Critical Method

Successful students will understand and apply principles and practice of critical method in all its complexity, with specific reference to the texts of selected Latin authors.

Literary History

Successful students will understand the place of selected Latin authors in the literary history of Classical antiquity and locate them in the larger context of political and cultural history.

Close Reading in Original Language

Successful students will intelligently evaluate texts of selected Latin authors through close reading in the original language and express this is examinations and essays.

Top

First-Year Latvian

LATVI 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Foreign residence experience.
Note	Credit by examination only.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Latvian

LATVI 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	LATVI 101
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Latvian

LATVI 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	LATVI 102
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

LATVI 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	LATVI 201
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Cultural History of Latvia

LATVI 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Latvi 201 or foreign residence experience.
Note	Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.
Taught	

Course Outcomes

Communication Skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

Torts

Study of the judicial process in civil actions for damages or equitable relief for physical, appropriational, and defamatory harms to personality, property, and relational interests, with some consideration of alternative reparation systems such as workers' compensation.

LAW 505

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Reading Judicial Opinions

Learn how to read judicial opinions with an eye on the relationship between a case's procedural posture and its substantive outcome.

Rules and Standards

Understand the distinction between bright line "rules" and more general "standards" like reasonableness.

Roles

Have a greater understanding of the relative roles of jury, trial court and appellate court, particularly including the distinction between questions of law and fact and the concept of a standard of review.

Common Legal Arguments

Recognize common legal arguments such as efficiency, fairness, distributional, precedent, slippery slope, problematic incentives, etc.

Differences

Understand the difference between the common law, statutes, and constitutional law.

Counter-arguments

Develop greater ability to offer counter-arguments and dissect claims and assertions regarding a particular law or policy.

Basic Understanding

Gain a basic understanding of the law of torts (personal injury), including the basic elements of, and defenses to, intentional torts, negligence, and strict liability.

Critical Thinking

Be able to think critically about competing approaches to compensating persons who suffer injuries in our society.

Contracts

Examination of the promises enforced by law, and the nature of the protection given. Inquiry made into the formation, performance, and discharge of contracts; their assignment, termination, and modification; and the variety, scope, and limitations on remedies. Attention will be given to Article 2 of the Uniform Commercial Code.

LAW 510

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Enforceable Promise

Students will be able to apply the legal requirements to create an enforceable promise based on:
a. offer, acceptance, consideration, and satisfaction of the statute of frauds,
b. promissory estoppel, or
c. quasi-contract and moral obligation theories.

Contract interpretation

Students will be able to interpret a contract.

Contract Enforcement

Students will be able to determine the steps necessary to enforce a contract.

Breach of Contract

Students will be able to recognize an anticipatory repudiation and a breach of contract.

Equitable Remedy

Students will understand how to obtain an equitable remedy or calculate damages.

Defenses

Students will understand basic defenses to contract formation and enforcement and identify facts that support such defenses.

Top

Civil Procedure

A basic study of the operation of courts, including an introduction to the organization of state and federal courts and relationships between them. Topics studied will include jurisdiction over persons, things, and subject matter; venue; the scope of litigation as to claims, defenses, and parties; pleading, pretrial motions, discovery, and pretrial conferences; trials and the functions of judges, juries, and lawyers; appeals and the role of appellate courts; and the enforcement and finality of judgments and decrees.

LAW 515

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Fundamental Principles

Students will understand the fundamental principles of American Civil Procedure including the rules, principles, and statutes governing the assertion of jurisdiction (subject matter jurisdiction and jurisdiction over the person or thing), the basic elements, principles and requirements of the Federal Rules of Civil Procedure (including pleadings, parties, motions, discovery, etc.), a few variations on or from those rules in state procedural practices, basic American principles of judgment recognition and judgment (primarily claim and issue preclusion rules), and the basic principles of the *Erie* doctrine regarding application of state laws and rules in federal court.

Legal Analysis and Reasoning

Students will develop and in class will practice by class Socratic discussion and case briefing skills of good legal analysis, reasoning, problem solving, and advocacy.

Basic Research

Students will know how to perform basic research regarding issues concerning the Federal Rules of Civil Procedure.

Effective Communication

Students will be able to communicate effectively regarding civil procedure issues orally (in class) and in writing (on the final exam and any possible short-report assignment).

Civil Procedure Issues

Students will be able to recognize and address issues that arise in Civil Procedure that implicate relevant ethical, moral, and religious principles.

Dispute Resolution

Students will understand the value and use of non-adversary alternative dispute resolution procedures and their integration with and use in resolving disputes concerning procedural rules, discovery, etc.

Lifelong Learning

Students will increase their ability and desire to engage in lifelong learning and service in their application, practice and use of the rules of civil procedure.

Top

Property

Inquiry into the nature of "property" and "ownership" of land and structures on land and the ways in which ownership may be established, restricted, transferred, and divided among various persons.

LAW 520

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Foundational Concepts

Students will receive an introduction to the most foundational concepts in property law.

Analytical Skills

Students will develop analytical skills required of law students and lawyers.

Self-directed Learner

Students will become self-directed learners of the law.

Case Interpretation

Learn to interpret cases in a common law system.

Legal Rules

Learn to understand, formulate and question legal rules using public policy analysis.

Prediction

Develop ability to predict arguments and outcomes in scenarios where legal rules are not fully resolved.

Perspectives

Appreciate the significance of property law from various perspectives, including economic efficiency, underprivileged, and feminist perspectives.

Technical Rules

Develop skills for applying technical rules of property transfer.

Criminal Law

Problems in defining what conduct should be subjected to criminal penalties; the limitations of criminal law as a means for prevention and control of undesirable conduct.

LAW 525

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Punishment

Students will be able to understand and apply the various theories of punishment.

Elements of a Crime

Students will understand the elements that make up a crime, including mens rea and actus rea.

Statutory Application

Students will have an ability to read statutory language from the model penal code and apply it to the facts of a given case.

Penal Code & Common Law

Students will be versed in the differences between the model penal code and the common law as they apply to various crimes.

Top

Structures of the Constitution

The Constitution`s distribution of sovereign power between the federal government and the states; its allocation of federal sovereign power among Congress, the president, and the judiciary.

LAW 530

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Allocation of Governmental Authority

Students will have a thorough understanding of the Constitution's allocation of governmental authority and of the powers and limitations of each of the three branches of government.

Theories of Constitutional Interpretation

Students will appreciate the competing theories of constitutional interpretation.

Principles of Federalism

Students will be able to demonstrate knowledge of the principles of federalism and an understanding of the role of the States in our constitutional scheme.

Top

Legislation and Regulation

Introduction to lawmaking in the modern statutory and administrative state. Examining the way Congress and administrative agencies adopt binding rules of law (statues and regulations, respectively) and the way the implementing institutions - courts and administrative agencies - interpret and apply these laws. Considering the theories and justifications behind modern legislative and regulatory behavior, the incentives that influence the behavior of various actors, and the legal rules that help structure the relationships among Congress, the agencies, and the courts.

LAW 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	Winter

Course Outcomes

Lawmaking

Students will gain an understanding of lawmaking in the modern statutory and administrative state.

Statutory Interpretation

Students will be able to confidently identify the strongest arguments for a given interpretation of statutory language and describe the ways in which Congress and administrative agencies adopt binding rules of law and the ways in which implementing instituations interpret and apply these laws.

Critique and Application

Students will be able to critique and apply in practice all of the following: textualist and dynamic methods of interpretation; the major canons of construction; the practice of consulting legislative history; and the rules of judicial deference to agency interpretations.

Top

Introduction to Legal Research and Writing

Introduction to tools and techniques essential to law practice and legal scholarship: legal analysis, research using print sources, and objective writing. Student will write three predictive office memoranda based on library research and complete a series of legal research quizzes and a legal research final exam.

LAW 545

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Research Skills

Identify legal sources in various formats and understand how each contributes to legal research, devise a research strategy, and conduct effective, efficient, and thorough research

Legal Rules

Identify legal rules and principles from a series of cases, synthesize the individual rules or principles into a complete rule, break the synthesized rule down into its component parts, and explain the relationship between them.

Reasoning

Identify and articulate the reasoning behind a rule and its application as explained within a court opinion.

Fact Pattern

Identify legal issues and relevant facts from a fact pattern.

Write a Proof

Write a complete and coherent proof of a conclusion of law that gives the reader the conclusion, states the rules that govern that conclusion, explains and analyzes those rules and shows how they operate, and applies them to the facts of your case.

Communication

Communicate in “plain English” to avoid legalese, unnecessary jargon, and other styles that call

attention to the writing itself or in other ways obscure or detract attention from your meaning.

Citations

Properly cite to a legal authority.

Top

Introduction to Advocacy

Focuses on appellate legal writing and oral advocacy. Student will prepare an appellate brief and orally argue the case. Also includes training for online legal databases and introduction to administrative law and legislative history research.

LAW 546

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	LAW 545; Admission to law school.
Taught	

Course Outcomes

Fundamentals

Students will learn the fundamentals of legal research, writing, and analysis, and will produce high quality legal documents, including an appellate brief, and revise your own and critique classmates' work.

Legal rules

Identify legal rules and principles from a series of cases, synthesize the individual rules or principles into a complete rule, break the synthesized rule down into its component parts, and explain the relationship between them.

Legal Research

Complete effective, efficient, and thorough legal research.

Reasoning

Identify and articulate the reasoning behind a rule and its application as explained within a court opinion.

Conclusion of Law

Write a complete and coherent proof of a conclusion of law that shows your reader the conclusion you predict, states the rules that govern that conclusion, explains and analyzes those rules and shows how they operate, and applies them to the facts of your case.

Analogies & Distinctions

Draw meaningful analogies or make relevant distinctions between the facts of precedent cases and the facts of your client's case.

Results

Apply the reasoning drawn from precedent cases to the facts of your case to show your reader why and how that reasoning should lead to the same or a different result.

Legal Issues

Identify legal issues from a fact pattern, and devise and implement a research strategy to locate authority you need to solve the problem.

Communication

Communicate in “plain English” to avoid legalese, unnecessary jargon, and other styles that call attention to the writing itself or in other ways obscure or detract attention from your meaning.

Citations

Properly cite to a legal authority.

Strengths & Weaknesses

Identify organizational, analytical, and communication strengths and weaknesses within another author’s work.

Fact Statement

Identify determinative, contextual, and coincidental facts from a fact pattern, and arrange the necessary facts into a logical and objective fact statement.

Appellate Brief

For the Appellate Brief thespecific learning outcomes are:

- to formulate a persuasive, critical legal theory limited to the legal and factual issues identified by the Court in its Order
- to identify, understand, and apply the correct standard of appellate review in this case
- to analyze and synthesize the relevant authority in light of the facts of the case
- to criticize and synthesize the legal argument of the opposing side and to develop your argument in response to the opposing side
- to devise and implement a coherent and effective research strategy
- to correctly attribute and cite legal authority
- to demonstrate professional style, grammar, and organization
- to edit another associate's work and receive critique of your own work

Oral Argument

For the Oral Argument the specific learning outcomes are:

- to understand the process and procedure for an appellate oral argument
- to know how to speak publicly so your judicial audience will understand.
- to develop analytical listening and observation skills.
- to be able to construct, organize, and deliver an effective appellate oral argument
- to be able to answer questions from judges about the substance of the argument, underlying legal principles, and application to hypothetical fact scenarios

Professional Seminar

Integrating religious and moral values into a model of legal professionalism; issues regarding legal education, the legal system, the practice of law, and the roles of lawyers.

LAW 549

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	

Course Outcomes

Process

Students will be able to understand and explain the process of legal education

Professionalism

Students will understand the concept of professionalism.

Roles of Lawyers

Students will understand the roles of lawyers in society.

Religious and Moral Values

Students will be able to integrate religious and moral values into legal work.

Top

Professional Development Lecture Series 1

This course is specifically designed to assist law students in determining which career path they want to pursue. Each session features a different practicing attorney who will discuss the nuts and bolts of practicing law in areas such as real estate, law office management, part-time employment options, tax, bankruptcy, international corporate law, alternative dispute resolution, family law, natural resources and environmental law, personal injury, medical malpractice, law school teaching and administration, intellectual property, immigration, and employment law. Different specialties will be featured each semester, so students may register for both the fall and winter lecture series.

LAW 550

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	Fall

Course Outcomes

Career Options

Students will be able to understand and explain the different career options available for JD graduates.

Requirements

Students will be able to understand and explain the requirements and recommended background needed for a specific career choice.

Skills Matching

Students will be able to understand and explain whether their particular skills, talents, or personality traits would match with a particular career.

Career Understanding

Students will be able to understand and explain what a particular career involves in terms of day to day duties, and advantages or disadvantages.

Introduction to Experts

Students will be introduced to experts in their field and provided with the opportunity to interact with them.

Top

Professional Development Lecture Series 2

This course is specifically designed to assist law students in determining which career path they want to pursue. Each session features a different practicing attorney who will discuss the nuts and bolts of practicing law in areas such as real estate, law office management, part-time employment options, tax, bankruptcy, international corporate law, alternative dispute resolution, family law, natural resources and environmental law, personal injury, medical malpractice, law school teaching and administration, intellectual property, immigration, and employment law. Different specialties will be featured each semester, so students may register for both the fall and winter lecture series.

LAW 551

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	Winter

Course Outcomes

Career Options

Students will be able to understand and explain the different career options available for JD graduates.

Career Requirements

Students will be able to understand and explain the requirements and recommended background needed for a specific career choice.

Skills Matching

Students will be able to understand and explain whether their particular skills, talents, or personality traits would match with a particular career.

Career Understanding

Students will be able to understand and explain what a particular career involves in terms of day to day duties, and advantages or disadvantages.

Introduction to Experts

Students will be introduced to experts in their field and provided with the opportunity to interact with them.

Professional Development Skills Training

This course will help students to create resumés, business correspondence, and marketing plans; to understand ways to effectively interview and build a professional network; and to strategically incorporate technology and published resources in the job search.

LAW 552

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Admission to law school.
Taught	Fall

Course Outcomes

Successful Job Search

Students will be able to understand, explain and utilize the tools to implement a successful job search.

Career Path

Students will be able to determine their career path, including self evaluation and career identification.

Job Search Strategy

Students will develop the skills to create and implement a job search strategy, including enhancing interviewing skills and creating professional marketing materials.

Networking

Students will develop networking skills through class instruction and by providing networking opportunities.

Professionalism

Students will be able to understand, explain and utilize the tools that enhance professionalism and develop professional etiquette skills.

Top

Externship

Students are able to earn one credit for each 50 hours of work performed in an approved externship.

LAW 599R

Hours	1.0 - 12.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	First-year law courses.
Taught	

Course Outcomes

Externships

Upon completing a term of uncompensated work in a public agency, court, or other law office, students will have improved their knowledge of law practice and will have enhanced their lawyering skills.

Life Sciences Seminar

Services offered by the Life Sciences Student Services Center; choosing an appropriate major in the college.

LFSCI 101

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Life Sciences Seminar

1. Describe the services offered by the Life Sciences Student Services and when those services might be applied to your circumstances.
2. Describe your understanding of what advising is and how you might benefit from the regular use of it.
3. Design a curriculum plan to meet your career goals in the eight or nine semesters you have to graduate from BYU. Be able to articulate why this is important to you, the university, and other students.
4. Demonstrate the ability to utilize MYMAP by organizing your major and general education courses for next semester.
5. Articulate your personal and educational goals as you understand them this semester.
6. Define proper classroom etiquette, and identify behaviors in your paragraph that show respect for faculty and presenters.
7. Become acquainted with either an academic advisor or a faculty member this semester by visiting them at least three times.
8. Deconstruct or evaluate high school learning strategies.
9. Evaluate at least two majors in the College of Life Sciences that interest you by describing the discipline, the learning outcomes, courses required, and possible careers or post-graduate opportunities. If you have learned that none of our majors fit you, explain why.
10. Describe the various university resources and what services they have for students.
11. Describe BYU's unique campus culture.

College of Life Sciences Student Council

Active involvement on the student council for the College of Life Sciences. Issues facing students in the college explored and solutions suggested.

LFSCI 190R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Application for student council position.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Life Sciences Student Council

1. Actively develop new leadership skills
2. Represent the students of the College of life Sciences
3. Set a personal goal in the area of leadership development

Top

Nonresearch Academic Internship

Academic internship for work experience or job shadowing. Does NOT involve mentored research.

LFSCI 199R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Approval by Life Sciences Student Services.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Nonresearch Academic Internship

1. Gain work experience and/or insight to possible careers by observing qualified providers.
2. Exhibit proficient writing skills by producing a summary paper at the conclusion of the internship.
3. Function as a collaborative team member while participating in the internship experience.

Academic Internship

Approved experiential learning.

LFSCI 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Mentor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Academic Internship

1. Demonstrate critical or analytical thinking skills by analyzing and interpreting experimental data.
2. Exhibit proficient writing skills by producing a portfolio, research paper, scientific journal article, and/or a scientific poster.
3. Critically read scientific literature and evaluate the ability of an argument or evidence to support a conclusion.
4. Function as a collaborative team member by participating in student mentored learning groups or research groups.

Mentored Internship

Approved experiential learning.

LFSCI 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Mentor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentored Internship

1. Demonstrate critical or analytical thinking skills by analyzing and interpreting experimental data.
2. Exhibit proficient writing skills by producing a portfolio, research paper, scientific journal article, and/or a scientific poster.
3. Critically read scientific literature and evaluate the ability of an argument or evidence to support a conclusion.
4. Function as a collaborative team member by participating in student mentored learning groups or research groups.

Top

Senior Library Thesis

Mentored library study that extensively explores relevant questions determined by an approved faculty mentor.

LFSCI 489R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Prospectus approval by Life Sciences Student Services.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Senior Library Thesis

1. Develop a research problem and have the prospectus evaluated by Life Science Student Services.
2. Prepare a thesis following University protocol.

Top

Special Problems

LFSCI 490R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Life Sciences Student Services consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Special Problems

1. The student is expected to have this experience preapproved by Life Science Student Services.
2. Develop a research or problem-solving component which is mutually agreed upon by Life Science Student Services and the student.
3. Develop a portfolio during the experience. This portfolio should discuss topics including but not limited to: an abstract of the project, a description of methods and materials (include tables, graphs, pictures or other visuals as appropriate), results, summary, and significance of the laboratory experience. The portfolio must be a minimum of 5-6 pages in report form.

Mentored Research

LFSCI 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Mentor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentored Research

1. Demonstrate critical or analytical thinking skills by analyzing and interpreting experimental data.
2. Exhibit proficient writing skills by producing a portfolio, research paper, scientific journal article, and/or scientific poster.
3. Critically read scientific literature and evaluate the ability of an argument or evidence to support a conclusion.
4. Function as a collaborative team member by participating in student mentored learning groups or research groups.

Top

Senior Honors Thesis

Topic to be cleared with Honors Program Office and Life Sciences Student Services.

LFSCI 499R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Mentor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Senior Honors Thesis

1. Develop a research problem and have the prospectus evaluated by the Honors Program and Life Science Student Services.
2. Prepare a thesis following the Honors Program protocol.

Top

Introduction to Human Language

Introduces students to the basic principles of language. The course considers language as part of our human, biological heritage, as wel as critical for our social and intellectual development.

LING 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Introduction to Linguistics (Modern)

Basic understanding of linguistic systems. Phonology, morphology, syntax, semantics, and pragmatics.

LING 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Major Subfields of Linguistics

Be familiar with some of the major subfields of linguistics and the main topics of interest within each subfield.

Structure Understanding

Demonstrate understanding of phonological, morphological, and syntactic structure.

Basic Techniques

Master techniques of basic phonological, morphological, syntactic, and historical analysis.

Sounds of Language

Introduction to the description and analysis of speech sounds.

LING 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 201.
Taught	Fall, Winter

Course Outcomes

Phonological Analyses

Complete basic phonological analyses using knowledge of

1. the phonemic principle
2. the content and organization of phonological features
3. the elements of prosody (syllable, stress, etc)

Transcribe and Describe

Transcribe and give articulatory descriptions for common speech sounds of the world's languages, including those of English

Explain Processes

Explain common phonetic processes.

Top

Structure in Language

Introduction to the analysis of word and sentence structure.

LING 220

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 201.
Taught	Fall, Winter

Course Outcomes

Basic Syntactic Analysis

Complete basic syntactic analyses using knowledge of

1. parts of speech
2. constituent structure
3. grammatical relations

Basic Morphological Analysis

Complete basic morphological analyses using knowledge of

1. basic word formation processes
2. the distinction between inflection and derivation and common inflectional categories
3. properties of the interfaces of morphology with phonology and syntax

Terminology and Formalisms

Describe the results of analyses using appropriate terminology and formalisms.

Meaning in Language

Introduction to the analysis of meaning in words, grammar, and discourse.

LING 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 201.
Taught	Fall, Winter

Course Outcomes

Application of Semantic and Pragmatic Procedures

Conduct semantic and pragmatic analyses and explications of natural human language at the lexical, grammatical, discourse and metaphorical levels applying a variety of semantic and pragmatic analytical procedures

Semantic and Pragmatic Theories

Critique contemporary approaches to semantic and pragmatic analyses by becoming familiar with semantic and pragmatic theories.

Writing about Meaning

Argue for a particular semantic or pragmatic explication through producing papers and project reports.

Linguistic Tools 1

Introduction to quantitative and qualitative research methods in linguistics.

LING 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 201.
Taught	Fall, Winter

Course Outcomes

Hypothesizing

Be able to formulate testable hypotheses concerning language.

Data Collection Techniques

Be able to collect linguistic data using interviews, surveys, experiments, corpora, etc

Application of Tools for Data Analysis

Be able to use appropriate tools to analyze linguistic data.

Description of Results

Be able to describe the results of linguistic research using appropriate terminology and rhetorical strategies (i.e., talk and write like a linguist).

Academic Internship: English Language Teaching

Students with focused training teach specific English skills to speakers of other languages in the U.S. or abroad.

LING 299R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	LING 377R
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Provide service to English language learners

Provide service to English language learners in various, real-world settings

Apply concepts in real situations

Apply linguistic and pedagogical concepts learned in TESOL basic training coursework in real world situations.

Develop confidence and satisfaction

Develop feelings of confidence and satisfaction from experience teaching English as a second language.

Phonetics

General inventory of speech sounds possible in language, from both an acoustic and articulatory point of view.

LING 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 210.
Taught	Fall

Course Outcomes

Producing and Transcribing Sounds

Produce and transcribe approximately 100 of the sounds of the world's languages and describe the articulatory and acoustic properties of these sounds.

Transcribing and Explaining Phonetic Processes

Transcribe and explain the phonetic processes common to languages of the world.

Field Work in Phonetics

Perform field work in phonetics—learning to record and acoustically analyze phonetics data.

Phonetic Systems

Recognize the phonetic systems of several languages and how and why the languages are organized the way they are.

Top

Phonology

Study of natural language sound systems from a variety of theoretical perspectives.

LING 315

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 210.
Taught	Winter

Course Outcomes

Phonological Analysis

Use a theoretical model to complete a phonological analysis at an intermediate level using appropriate methods and techniques.

Communicate Results of Analyses

Present the results of phonological analyses, showing awareness of foundational issues in theories of phonology.

Morphology

Theory and analysis of word structure in human language.

LING 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 220.
Taught	Fall

Course Outcomes

Morphological Analysis

Use a theoretical model to complete a morphological analysis at an intermediate level using appropriate methods and techniques.

Present Results

Present the results of morphological analyses showing awareness of foundational issues in theories of morphology.

Top

Theoretical Syntax

Theoretical comparison and contrast of different sentence types. Methods of argument to develop and critique generative theories of lexical categories, grammatical roles, and syntactic structure.

LING 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 220.
Taught	Winter

Course Outcomes

Recognizing and Classifying Constituents

Recognize and classify different types of constituents, including phrases and sentences.

Theory and Analysis Application

Understand and apply a theoretical framework and analytical techniques to determine and describe constituents.

Argue and Support

In writing and speaking, argue for (or against) particular theory dependent interpretations of structure, and support the argument with empirical evidence.

Application and Relevance

Apply these outcomes to English and investigate their relevance to other languages.

Semantics

Theory and analysis of natural language semantics from a variety of theoretical perspectives.

LING 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 201 & LING 230; or LING 201 & ELANG 326
Taught	Fall

Course Outcomes

Understand and Apply Theoretical Framework and Analytical Techniques

Understand and apply a theoretical framework and analytical techniques to account for meanings of morphemes, words, phrases, clauses and sentences as determined by intrinsic language form and structure.

Complete a Semantic Analysis

Use a theoretical model to complete a semantic analysis at an intermediate level using appropriate methods and techniques.

Present Results of Semantic Analyses

Present the results of semantic analyses, showing awareness of foundational issues in theories of semantics.

Pragmatics

Theory and analysis of pragmatics from a variety of theoretical perspectives.

LING 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 201 & LING 230; or LING 201 & ELANG 326
Taught	Winter

Course Outcomes

Understand and Apply a Theoretical Framework and Analytical Techniques

Understand and apply a theoretical framework and analytical techniques to account for meanings of words and sentences as determined by their active use in a social or practical context.

Complete a Pragmatic Analysis

Use a theoretical model to complete a pragmatic analysis at an intermediate level using appropriate methods and techniques.

Present Results

Present the results of pragmatic analyses, showing awareness of foundational issues in theories of pragmatics.

(Ling-DigHT) Programming for Text Processing and Analysis

Development of computer applications for research in language and literature (text processing, retrieval, and analysis) in one or more programming languages (e.g., Perl, Python, etc.).

LING 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 100 or equivalent experience.
Taught	

Course Outcomes

Understanding of Unicode

Students will have an advanced understanding of Unicode and its advantages over ASCII and other text encoding standards.

Locate Complex Patterns and Make Substitutions

Students will be able to locate complex patterns and make substitutions (e.g., using technologies such as Perl, Python) within texts for the purpose of manipulating and analyzing texts and corpora.

Speech Processing

Analyzing and manipulating speech data. Developing software applications that include speech recognition and/or speech generation.

LING 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 360
Taught	Fall, Winter

Course Outcomes

Java

Write basic programs in Java.

Speech Processing

Understand the basics of phonetic, phonological, and lexical aspects of speech processing.

Java Procedures

Design and implement user interface procedures in Java, in a Unix or Windows environment.

Speech-related Processing

Use common data structures and formats in speech-related processing.

Speech-based Processing Programs

Design and implement speech-based processing programs using widely available speech toolkits.

Top

Basic Training in TESOL

Basic preparation to teach English to speakers of other languages in particular settings.

LING 377R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Planned participation in IAS- or U.S.-based English teaching experience.
Note	Especially for international service volunteers who plan to teach ESL or EFL.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Academic Internship: Linguistics

On-the-job experience and education related to linguistics.

LING 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Apply academic coursework to the world

Students will learn to apply concepts learned in their academic classes to everyday, practical, linguistic situations outside the university.

Enrich classroom concepts through work experience

Interns' real-world work experiences will enhance and enrich their understanding of academic concepts they learned in university classes.

Preparation for Graduate Studies in Linguistics

Introduction to phonology, phonetics, morphology, syntax, semantics, and pragmatics for students not majoring in linguistics, but planning to study linguistics in graduate school.

LING 401

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Complete Basic Analyses

Complete basic phonological, phonetic, morphological, syntactic, semantic, and pragmatic analysiis for English and other languages.

Use Linguistic Methodology

Analyze linguistic data using appropriate (linguistic) methodology. Be able to understand, interpret, analyze, and assess academic linguistic literature.

Phonology and Morphology

Introduction to phonology and morphology in the world's languages emphasizing the analysis of English.

LING 427

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 201; or ELANG 223
Taught	Fall, Winter

Course Outcomes

Phonological Analysis

Be able to complete a phonological analysis at an intermediate level by applying knowledge of:

- the phonemic principle,
- the content and organization of the system of phonological features,
- the elements of the prosodic organization of utterances.

Morphological Analysis

Be able to complete a morphological analysis at an intermediate level by applying knowledge of:

- basic word formation processes,
- the distinction between inflection and derivation and common inflectional categories,
- properties of the interfaces of morphology with phonology and syntax.

Effective Fact Descriptions

Be able to describe facts about phonology and morphology and communicate the results of phonological and morphological analyses using appropriate terminology and formalisms.

Top

Linguistic Tools 2

Linguistic research tools and methods; resources, literature, and synthesis of techniques.

LING 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 240.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Describe and Use Tools

Describe and use state-of-the-art tools developed for linguistic research.

Evaluate and Discuss Research

Evaluate and discuss research literature relating to linguistic tools and methods.

Apply Current Resources and Methods

Apply current resources and methods in a programming, experiment, or annotation project.

Present and Report Linguistic Research

Present and report linguistic research results using appropriate discipline-specific strategies.

Introduction to Historical-Comparative Linguistics

Theory and method of language change via comparison of daughter languages and reconstruction of their ancestral language: phonological, morphological, semantic, and lexical.

LING 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 210 and Ling 220.
Taught	Fall, Winter

Course Outcomes

Comparitive method and Internal Reconstruction

Students will be able to apply the comparative method and internal reconstruction in order to hypothesize earlier states of a language and to examine the relatedness of different languages.

Explanation of Changes

Students will be able to explain how and why linguistic changes occur in phonology, morphology, syntax, semantics, and the lexicon.

Factors that affect Linguistic Change

Students will be able to explain how linguistic change is affected by language contact and psychological, physical, social, and cultural factors.

Using Corpora, Texts, and Lexicons

Students will be able to use corpora, texts, and lexicons in order to obtain data on, and answer questions about, language change.

Top

Introduction to Sociolinguistics

Language in culture and society: development, typology, and description.

LING 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 201; or ELANG 223
Taught	Winter

Course Outcomes

Understand Relationship between Language Use and Society

Understand the relationship between language use and society with respect to regional, social, ethnic and contextual variation.

Conduct Sociolinguistic Research

Conduct research into a wide range of sociolinguistic variation.

Impart Sociolinguistic Knowledge

Impart knowledge of sociolinguistics and related research in presentations and papers.

Psycholinguistics

How the mind interprets, stores, retrieves, and produces language. Anatomical structures and physiological processes of the brain dealing with language.

LING 455

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 201; or ELANG 223
Taught	Fall

Course Outcomes

Discuss Basic Psycholinguistics

Discuss basic terminology, theories, and issues of psycholinguistics.

Know Area-Specific Findings

Know the basic findings in each area of psycholinguistics (including comprehension, production, acquisition, and language disorders).

Respond to Research

Read and critically respond to psycholinguistic research and articles.

Top

Typology

Introduction to the study of language universals and linguistic typology.

LING 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 220.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Identify Universals

Identify different kinds of universals (formal, substantive, implicational, syntactic, lexical, morphological).

Apply Typological Concepts

Apply typological concepts to specific languages.

Understand Arguments

Understand arguments for and against language universals.

Top

Language Teaching Methods: MTC

Instructional methods and strategies for teaching second and foreign languages at the Missionary Training Center (MTC).

LING 478

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Connect methodological theory and practice

Students who are teaching language classes at the Missionary Training Center will connect methodological theory learned in this class with real-world practice.

Problems in Translation

History, theory, and practice of human and machine translation.

LING 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 230 and proficiency in a second language.
Taught	Fall

Course Outcomes

The Future of Translation Technology

Discuss the possible future of translation technology, including future applications of existing technology and future development of new technologies, drawing on class assignments and a personal project.

Specifications for Translation Projects

Define a set of specifications for a translation project based on text type, audience, and purpose.

Bi-text Corpora

Create a bi-text corpus and derive translation memory and terminology from that bi-text corpus.

Translation Project

Use machine translation, translation memory, and terminology in conjunction with a translation environment tool to complete a translation project according to the project's specifications.

Corpus Linguistics

Using large collections of texts for research and teaching; focusing on variation (by dialect, genre, time, author, etc.) in language.

LING 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 273; or LING 240
Taught	Fall, Winter

Course Outcomes

Corpora and Corpus-based Materials

Students will be able to understand how corpora and corpus-based materials can best be used for teaching and learning. They will carry out an in-depth investigation of one particular linguistic phenomenon using the best available corpora and corpus-based tools.

Principles of Corpus Design and Construction

Students will be able to apply the basic principles of corpus design and construction to design a corpus for their area of interest.

Approach Differences

Students will be able to understand the differences between corpus-based/empirical and rationalist/non-empirical approaches to linguistics.

Text Analysis Tools

Students will be able to use text analysis tools to investigate frequency, keywords, and do simple concordancing.

Using Corpora to Conduct Research

Students will be able to use corpora to carry out research in the areas of 1) lexicography 2) genre-based differences in language 3) syntax 4) semantics, and 5) historical change.

Top

Senior Seminar

Reading and discussing major issues in linguistics, writing a senior paper, and reviewing content of core courses.

LING 490

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LING 201; or ELANG 223
Recommended	Ling 420, 427, 430, 450.
Taught	Fall, Winter

Course Outcomes

Current Issues in Linguistics

Discuss intelligently several current big issues in linguistics.

Issue Resolution

Resolve the tension between two sides of a narrow [linguistic] issue.

Senior Thesis

Relate the narrow issue in your senior thesis to at least one major issue in linguistics and to possible career paths.

Top

Senior Capstone

Integrative, culminating experience for linguistics majors; topics vary.

LING 495

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 210 & Ling 220 & Ling 230.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Demonstrate Integration of Knowledge and Communicate Results

Students will demonstrate that they can integrate their knowledge of core and applied areas of linguistics to produce a linguistic artifact (grammar, lexicon, corpus, experiment, survey, etc), and communicate the results in writing or speaking.

Top

Advanced Research and Writing Techniques for Second Language Writers

Non-native English speaking students will develop research and writing techniques necessary for graduate-level writing.

LING 501

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For graduate international ESL students.
Taught	Winter

Course Outcomes

Organize ideas in English writing

Non-native English-speaking students will gain or increase their ability to organize their ideas into a well-constructed written response in English.

Identify audience, purpose, and strategies in English writin

Identify the audience, purpose, and strategies for a given writing assignment in English and write accordingly.

Structures and vocabulary

Express ideas using well-formed structures and vocabulary acceptable in English academic writing.

Field Methods in Linguistics

Documenting an unfamiliar language by interacting with a native speaker.

LING 542

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding

Understand the relationship between language use and society with respect to regional, social, ethnic and contextual variation.

Research

Conduct research into a wide range of sociolinguistic variation.

Knowledge

Impart knowledge of sociolinguistics and related research in presentations and papers.

Psycholinguistics

How the mind interprets, stores, retrieves, and produces language. Anatomical structures and physiological processes of the brain dealing with language.

LING 545

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 201 or ELang 223; or equivalent.
Taught	Fall

Course Outcomes

Psycholinguistics Basics

Discuss basic terminology, theories, and issues of psycholinguistics.

Findings in Each Area

Know the basic findings in each area of psycholinguistics (including comprehension, production, acquisition, and language disorders).

Read/Respond to Research Articles

Read and critically respond to psycholinguistic research and articles.

Experimental Research

Create and participate in psycholinguistic experimental research.

Top

Sociolinguistics

Research and theory on the effect of language on society and society on language use.

LING 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Conduct research into a wide range of sociolingusitic variation

Knowledge

Understand the relationship between language use and society with respect to regional, social, ethnic and contextual variation.

Profess

Impart knowledge of sociolinguistics and related research in presentations and papers

Top

Anthropological Linguistics

Language in culture and society: development, typology, and description.

LING 551

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, Ling 220 and Ling 230; or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Analysis of Linguistic Data in Social Contexts

Upon completion of this course students will be equipped with the conceptual tools to think about and analyze linguistic data in social contexts of use.

Familiarity with Foundational Texts

Student will become conversant with foundational texts which inform our cultural understanding and use of language.

Contextualize Varieties of Language

Through readings, weekly exercises and discussions they will acquire the metalinguistic concepts necessary for contextualizing varieties of language.

Transcription Sessions

In class transcription sessions will address the representation of linguistic data, and how that representation may affect one's assessments of semantic intent.

Historical-Comparative Linguistics

Learning theory and method of language change via comparing daughter languages and reconstructing ancestral languages. Language universals and typology.

LING 558

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Ling 450 or equivalent.
Taught	Fall

Course Outcomes

Application of Typological Concepts

Students will learn how to apply typological concepts to specific languages during in-class and out of class exercises.

Influential Linguistics Typology Concepts

Students will have achieved an understanding of the most influential concepts of Linguistics typology, including the different kinds of universals (formal, substantive, implicational, syntactic, lexical, morphological).

Arguments Against Language Universals

Students will become conversant with the arguments against language universals.

Top

Problems in Linguistics and Applied Linguistics

Advanced research in language acquisition, sociolinguistics, psycholinguistics, linguistics field study, applied linguistics.

LING 580R

Hours	1.0 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Overview

Each section of Ling 580R could have different learning outcomes from other sections and other semesters. Therefore, each instance of Ling 580R must be evaluated separately.

Natural Language Processing

Intensive overview of natural language processing, including computational techniques, hands-on experience with linguistic technologies and corpora, language modeling approaches, and readings from current research.

LING 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Good programming skills in at least one language (preferably LISP, Prolog, C, C++, Perl, or Java) and a knowledge of basic discrete math. Upper-division linguistics/computers and the humanities students with less programming experience may enroll with instructor`s consent.
Taught	Fall

Course Outcomes

NLP Tools

Students will be able to demonstrate by hands-on experience how to use NLP tools in the performance of linguistically interesting tasks.

NLP-related Computation

Students will be able to demonstrate application of a novel, nonontrivial programming approach to solving some aspect of NLP-related computation.

Computational Techniques

Students will be able to recognize and describe how computational techniques are used successfully in various areas of natural language processing.

Current Research Literature and Trends

Students will read, understand, discuss, and assess current research literature and trends in the relevant areas.

Top

Readings in Linguistics

Individual study of current linguistic literature. Occasional discussion sessions with instructor and other class members.

LING 590R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Note	Pass/fail grade only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Study assigned readings

Individual advanced students will study and report on assigned readings under the direction of a professor

Complete individual projects

Advanced students will study and complete individual projects under the direction of a professor

Top

Academic Internship: Linguistics

On-the-job experience under faculty supervision, with department approval.

LING 599R

Hours	1.0 - 9.0 Credit, 9.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Apply academic coursework to the world

Students will learn to apply concepts learned in their academic classes to everyday, practical, linguistic situations outside the university.

Enhance classroom concepts through work experience

Interns' real-world work experiences will enhance and enrich their understanding of academic concepts they learned in university classes.

Linguistic Computing Programming 1

Computer programming for language applications: data types, character representation, flow of control, file input/output, string manipulation.

LINGC 220

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LingC 200 or C S 100 or equivalent experience.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Computing Algorithms

Understand what a computing algorithm is, as opposed to instructions intended for a human who has agency.

Manipulating Digital Information

Be able to manipulate digital information using algorithms written in a programming language. This includes an ability to understand and write assignment statements, loops, conditionals, and functions.

Creating Simple Graphical User Interfaces

Be able to create a simple graphical user interface for a software application.

Top

Linguistic Computing Project

Applying principles from other courses to a substantial research or development project. Students work individually with faculty and technical advisors.

LINGC 489R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Any 300-level linguistic computing course.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Language-related Software Application

Design and implement a language-related software application that satisfies the requirements of a faculty or staff member, drawing on the expertise of a faculty or staff technical advisor.

Top

Current Topics and Issues

Individual or group study of current issues and developments in linguistic computing. Extended readings; research or project required.

LINGC 490R

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Academic Internship: Linguistic Computing

On-the-job experience in publishing production (print or electronic), courseware/software development, museum/collection/textbase management, language/linguistics research, or other application of linguistic computing.

LINGC 496R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	LingC 300-level course or equivalent experience.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Language-related Software Activites

Participate in the language-related software activities of an off-campus organization, satisfying the requirements of the internship supervisor and the BYU faculty member in charge of the internship course.

First-Year Lithuanian

LITHU 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Foreign residency experience.
Note	Credit by examination only.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Lithuanian

LITHU 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	LITHU 101
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Lithuanian

LITHU 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	LITHU 102
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

LITHU 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	LITHU 201; Foreign residence experience.
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Cultural History of Lithuania

LITHU 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Lithu 201 or foreign residence experience.
Note	Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.
Taught	

Course Outcomes

Communication Skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

Introduction to Latin American Studies

History, politics, sociology, geography, and culture of Latin America.

LT AM 211

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Project Work in Latin America

Teaching literacy, health, nutrition, gardening, leadership development, construction, etc., in Latin America.

LT AM 302

Hours	2.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Area Knowledge

Students will demonstrate an ability to design and implement a project in a specialized area.

Top

Senior Seminar in Latin American Studies

Sources, materials, and methods of research and writing; critical analysis of a research project.

LT AM 495

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent for minors.
Note	Required for all Latin American Studies majors their senior year.
Taught	Fall, Winter

Course Outcomes

Critical Thinking/Effective Writing

This a capstone course taylored to individual research and study topics.

Top

Corporate Financial Reporting

Analyzing financial accounting and reporting issues used by prospective managers.

M B A 501

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Financial Statements

Construct and interpret both a balance sheet and an income statement.

Statement of Cash Flows

Construct and interpret a statement of cash flows.

Applying Financial Accounting Rules

Apply the financial accounting rules that exist in the following areas.
a. Revenue recognition
b. Inventory
c. Compensation (including pensions and options)
d. Long-term assets (including impairment)
e. Bonds
f. Leases (including the financial ratio impact of operating leases)
g. Stockholders' equity (including accumulated other comprehensive income)
h. Investment securities (including derivatives)
i. Fair value accounting
j. Foreign currency transactions and translation

Time Value of Money

Employ the time value of money in a financial accounting context.

Using Excel Spreadsheets

Construct and use simple Excel spreadsheets in a financial accounting setting.

Solving Problems in a Group Setting.

Discuss accounting issues and solve accounting problems in a time-constrained group setting.

Online Learning Resources

Be able to use online learning resources.

Ethical Problems

Intelligently discuss the ethical dimensions of a variety of accounting-related business problems.

Financial Accounting Internationalization

Track the ongoing internationalization of financial accounting.

Time Management

Independently manage time and workload for a variety of tasks.

Top

Managerial Accounting 1

Objectives and procedures of cost accounting. Topics include job costing, joint product costing, cost behavior analysis, standard costs, cost allocation problems, and cost data use in management.

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Measures

Identify and tie together organization and performance measures

Data

Identify and organize relavent data that support decision making

Application

Critically evaluate traditional management accounting data to improve communication in support of management processes

Leadership

Develop leadership ability by identifying and building upon existing strengths. Students focus on maintaining positive professional relationships while motivating high performance of individuals, teams, and organizations. Topics include organizational culture and change, leader communication, and character.

Hours	3.0 Credit, 2.5 Lecture, 0.5 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Analyzing and Changing Organizational Culture

Analyze and assess the culture of an organization for the purpose of leading or influencing cultural change.

Fostering Innovation

Foster innovation by generating new ideas and borrowing from other communities of practice.

Developing Professional Relationships

Develop positive professional relationships that help to motivate others and increase their discretionary effort.

Organizational Messages

Introduce and manage organizational messages so that they positively influence people's perceptions and behavior.

Identify Signature Strengths

Identify signature strengths and competencies, and make them the focus of professional development efforts.

Effective Communication

Communicate effectively, both in speaking and writing.

Management and Information Technology

Management and control with information technology. Information flow, database design, and use applied to cost controls and managerial decision making.

MBA 510

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Strategic Planning Using IT

Take part in strategic planning using IT in business contexts where IT plays an important role. Understand the competitive implications of information technology.

Evaluating IT Investments

Set priorities for activities in an IT function. Learn a structured process for evaluating potential systems investments.

Relevance of IT for Business Leaders

Describe the relevance of IT for business leaders.

Analyze IT Outsourcing/Off-shoring

Analyze the pros and cons of IT outsourcing/off-shoring.

Top

Business Finance

Short-term financing of a business operation. Developing techniques for financial planning, such as analysis of ratios, profitability, and liquidity.

M B A 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Paper and Tangible Assets

Value paper assets (stocks and bonds) and tangible assets (capital budgeting) using the tools of time value of money, including NPV and IRR.

Financing

Explain the various sources of financing, their associated costs, and their advantages and disadvantages.

Pro Forma Statements

Calculate and use financial statements and ratios to analyze a business and create and use pro forma statements for planning and decision-making purposes

Global Treasury Management

Prepare students to work as treasurer or CFO by helping them understand banking relations, cash management, short-term investing and borrowing, liquidity management, and receivables and payables management in an era of electronic commerce.

M B A 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	M B A 520; Fin 201.
Taught	Winter

Course Outcomes

Analyzing payment systems

Analyze a company's collection, disbursement, and payment systems and determine the costs/benefits of making changes to the cash inflow/outflow timelines.

Ethical issues in treasury management

Explain how important ethical behavior is to a treasurer/chief financial officer.

Managing liquidity

Determine firm's liquidity needs and how these can be met from various sources.

Managing uncertain cash flows

Evaluate the methods, costs, benefits, and risks of hedging uncertain cash flows using various derivative transactions.

Top

Advanced Corporate Financial Reporting

Areas of financial reporting where managers have considerable discretion, including pensions, leases, equity securities, earnings, dilution, employee stock options, and deferred taxes. Dynamics between auditors, managers, and financial analysts.

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Financial Statement Analysis

Analysis of financial statements and accompanying footnotes. How various accounting methods might affect interpretation and use of financial information.

M B A 527

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Firm Strategy

Assess the firm and its strategy within the context of the industry.

Analyzing Company Performance

Analyze company performance and financial position using ratio analyses and other analytical procedures.

Assessing Quality

Understand the tools and techniques used to assess the "quality" of the firms reported earnings and financial position.

Forecast Financial Performance

Develop the ability to forecast financial performance and to build pro forma financial statements.

The Main Valuation Models

Develop and understand the main valuation models and use these models to estimate intrinsic value implied by forecasts.

Teamwork

Work well in teams.

Communicate Results

Communicate the results of technical analysis verbally and in writing.

Overcome Ambiguity

Practice overcoming "controlled" ambiguity.

Managerial Finance

Elaboration on MBA 520 topics (i.e., capital budgetary, cost of capital, and capital structure). Concepts such as real options, valuation, and mergers introduced.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Assets and Investments

Compute values for different assets and/or investments with discounted cash flow and option pricing techniques

Valuation Techniques

Explain the concepts behind the valuation techniques verbally and in written form.

Strategic Logistics Management

Applying and integrating logistics-related topics, including materials management, physical distribution, inventory management, warehousing, logistics network design, customer service, packaging, and materials handling.

MBA 529

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Strategic management

Students will be able to develop and implement strategic plans based on a firm's logistics capabilities.

Network and Process Analysis

Students will be able to use analytical tools to simulate, analyze, and optimize global, supply chain networks and processes.

International Logistics

Students will be able to plan and lead the execution of international logistics strategies in a global supply chain context.

Managerial Skills

Students will demonstrate excellence in analyzing management problems, developing fact based solutions, communicating recommendations, and implementing plans.

Professionalism

Students will demonstrate appropriate managerial professionalism through responsible behavior, thorough work, and prompt action.

Ethical Behavior

Students will demonstrate the highest possible ethical behavior in completing all work.

Operations Management

Examining issues and tools in production and operations management. Specific tools for forecasting, planning, inventory control, and project management presented and developed.

M B A 530

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Operations and Supply Chain Management

Learn what operations management and supply chain management are and how they can be managed in a scientific manner.

Principles of Production

Learn fundamental principles of production pertaining to capacity, variability, production flow, inventory, and so forth.

Analyze Business Operations

Be able to analyze business operations using basic quantitative analysis techniques.

Apply Operations Principles

Be able to demonstrate the application of operations principles in an actual business situation.

Top

Strategic Sourcing

Upstream supply chain activities of supplier selection, management, and development. Topics will include negotiations, costing, product development, and commodity analysis.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Ethical Behavior

Determine for yourself how to behave in an ethical manner as a purchasing manager.

Purchasing Decisions

Evaluate purchasing decisions based on price and cost analysis.

Supply Management Issues

Develop creative, strategic approaches to solving supply management issues.

Change Management

Theory and practice of change in organizations.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Diagnosing Performance

Diagnose the key characteristics of individuals, organizations, and organizational subunits that influence their performance

Analyzing Performance Gaps

Investigate and identify the root causes of performance gaps at the individual, subunit, and organizational levels

Improving Performance

Design interventions to ameliorate performance gaps and evaluate the likelihood that an intervention will successfully meet its objectives

Evaluating Interventions

Evaluate the effectiveness of an intervention after implementation.

Micro/Macro Organizational Behavior

Foundation for understanding organizations -- behavior, structure, purposes, including models and diagnostic frameworks. How overall environment and societal context shape individuals and organizations.

MBA 542

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Understanding Fundamentals

Understand the fundamentals of organizational culture, structure and environment.

Organizational Phenomena

Explain multi-level nature of organizational phenomena.

Basics of Psychology and Behavior

Summarize basics of individual psychology and behavior, e.g., personality.

Key Debates

Articulate key debates in organization theory (e.g., people-place)

Informal Mechanisms of Influence

Examine informal mechanisms of influence in organizations.

Correlation to the Mission of BYU

Consider how organization behavior relates to the mission of BYU.

Team Management and Consultation

Investigating the dynamics that make teams successful, analyzing pitfalls of working in teams, and exploring recommendations to improve team effectiveness. Identifying and resolving common team challenges, as team members and consultants to an external team.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Concepts associated with design, managing, consulting teams

Discover the fundamental concepts, principles, and theory associated with designing, managing, and consulting teams

Skills to improve team member effectiveness

Achieve practical skills that will improve your effectiveness as a team member and leader

Process facilitation skills to improve team function

Explore process facilitation skills for improving team functioning and performance (both as an internal and external member)

Top

Human Resource Management Skills

Acquiring skills and competencies including selection, compensation, performance evaluation, training evaluation, organizational assessment, and research methodology.

MBA 546

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Discrimination in Employment

Describe the legal restrictions governing discrimination in employment.

Human Resource Plan

Develop a human resource plan.

Recruitment Systems

Design a valid recruitment and selection system.

Performance Evaluation System

Develop and implement a performance evaluation system.

Designing Training Programs

Assess training needs, design a training program, and evaluate it.

Designing Compensation Systems

Design and implement a compensation system that is equitable, legal, motivating, and cost-benefit effective.

Labor Relations

Explain the major labor relations laws and describe unfair labor practices.

Top

Labor Relations and Employment Law

U.S./International labor/industrial relations. History, labor law, union organizing campaigns, contract negotiations, arbitration, union avoidance. Employment discrimination, work policies, and workplace safety and health.

MBA 547

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Mapping the core issues in labor relations

Discuss the most dominant labor issues in the U.S. employment sector and how they affect employers and employees.

Analyzing the legal landscape in employment law

Analyze the impacts of the major legal decisions related to labor relations from the year 2000 to the present.
Describe how they have affected labor practices in the workplace.

Strategic Human Resource Management

HRM from manager's perspective. Employment relationship, recruiting/selection, employment law, performance management, and HRM in emerging companies. Managing human assets within firm's strategy, industry, and stakeholder environment.

MBA 548

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Employment Interview

The students will be able to design and carry out a valid employment interview.

Understanding Compensation Systems

The student will be able to understand the strengths and weaknesses of various compensation systems.

Provide Solutions

The student will be able to know how to analyze and provide critically evaluated solutions to organizational problems using a systematic approach.

Strengths and wekanesses of compensation systems

The student will be able to understand the strengths and weaknesses of various compensation systems.

Systematic approaches for solutions to organizational problems

The student will be able to know how to analyze and provide critically evaluated solutions to organizational problems using a systematic approach.

Top

Professional Seminar in Organizational Behavior

Special topics or problems varying from semester to semester, e.g., conflict resolution, power and influence, intergroup relations, career development and planning, and management skills.

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Academic Scholarship

Understand the distinguishing features of “academic scholarship.”

Role of Theory

Understand the role of theory in different kinds of scholarly investigations.

Understanding Organizations

Perspectives of psychology and sociology on the organization, organizational identity, organizational effectiveness, and organizational change. Critical thinking and application to cases and personal experience.

M B A 549R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Theoretical Contribution

Understand what theory is and isn't and what constitutes a theoretical contribution.

Theoretical Argument Modeling

Model a theoretical argument.

Organizational Behavior Theory and Research

Understand the difference between behavior *in* organizations and behavior *of* organizations and the implications for organizational behavior theory and research.

Work and Family

Research and practical application related to successfully harmonizing one's family and work lives.

M B A 549R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Preparing managers for family/work issues

Prepare future managers to effectively deal with work/family issues in the workplace. Students will understand why work/family is now a business imperative and will learn strategies to deal with these issues in the workplace at both a work group as well as an organizational level

Understanding work/family research

Prepare students to be intelligent consumers of work/family research. We will provide the opportunity to interface with the latest work/family research and distil findings that can benefit the workplace and the home.

Teaching others to deal with work/family issues

Prepare students to effectively teach others to deal with work/family issues in a variety of settings.

Improve writing and speaking skills

Help students improve their writing, speaking, and critical thinking skills in order to be effective advocates for marriage, home and family in the business world as well as at home and at church.

Marketing Management

Development of analytical marketing tools and techniques; their utilization in case analysis and decision making in marketing management.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

The 4 P's of Marketing

Apply the "4Ps" of the marketing mix to address marketing issues.

Appropriate Marketing Actions

Decide on appropriate marketing actions based on an understanding of market segmentation, targeting and positioning.

Marketing Research Methods

Apply basic marketing research methods to uncover consumer perceptions regarding product value and distinctive competencies.

Marketing Strategy

Explain fundamental components of marketing strategy and how each is related to creating and sustaining customer value.

Advanced Marketing Techniques

Explain the theory and application of advanced marketing techniques such as ZMET, Hierarchical Value Mapping, Perceptual Mapping, the Brand Design Schematic, and Conjoint Analysis.

Pricing Strategies

Introduction to frameworks relevant for making pricing decisions. An integrative approach to pricing strategies combining strategic, economic, marketing, and psychological considerations.

M B A 553

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Factor and Cluster Analysis

Use factor analysis and cluster analysis to uncover and understand the segments in a marketplace.

Target Segments and Product Positioning.

Use factor analysis, partial correlation analysis, and means analysis to build quantitative hierarchical value maps to better understand the segment(s) we target and how to position product.

"Play to Strength"

Use hierarchical values maps to specify a “play to strength” marketing strategy.

Conjoint Analysis

Use conjoint analysis to design a new product or service.

Top

Internet Marketing

Marketing strategy for business on the internet: marketing research, sales, and promotional concepts.

M B A 554

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Advertising and Promotion

Key issues facing marketing managers when promoting products and services. Cases, readings, and research on the elements of effective communication strategies and promotional programs.

M B A 556

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Marketing Communications

Develop critical skills to plan, develop, and evaluate marketing communications.

Creative Brief

Develop ability to create and communicate critical components of a creative brief.

Financial Impact

Become proficient in calculating the financial impact of marketing communications and trade promotions on the firm.

Social, Legal, Ethical

Understand the social, legal, and ethical considerations involved in the promotional planning process.

Business Strategy

Introduction to strategic planning; concepts, models, and analysis.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Models of Strategic Management

Understand the concepts and models of strategic management presented in the course.

Analyzing Competitive Situations

Use strategy concepts and models of strategic management presented in class to ***analyze*** the competitive situation facing a firm.

Achieving a Competitive Advantage

Apply the models of strategic management presented in the course to arrive at recommendations that will help organizations achieve and sustain competitive advantage.

Communicating Conclusions

Persuasively ***communicate*** analytical conclusions and recommendations in verbal and written form.

Role of the Business Leader

Appreciate the roles, responsibilities, and potential influence of business leaders in the strategy process.

Top

Introduction to Global Management

Foundations in global management integrating strategy, finance, operations, marketing, and human resource management.

MBA 584

Hours	1.5 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

CAGE Framework

Become facile in leading frameworks of international business context, such as national culture, the CAGE model of distance, a "flat" vs. "spiky" world, as well as taxonomies of emerging/powerful markets such as BRIC, MIST/MINT countries, etc. Recognize and share current events in world business that illustrate this framework (and the content of the rest of the learning outcomes).

Characteristics of a Global Industry

Understand the complexities of expansion, in general, into global markets--that is, the pitfalls and opportunities that companies face as they seek new, foreign customers for their products and services.

Foreign Markets

Deepen and apply global learning to functional areas of business such as finance (e.g. foreign exchange), marketing (e.g. new product development worldwide), supply chain (outsourcing and offshoring) and human resource management (global teams and expatriate assignments). Understand how the concepts of culture, political systems, etc. apply to the various aspects of managing a business.

MNEs

Integrate knowledge from other core courses in the MBA program that span across functional areas (e.g., ethics, strategy, etc.) to learn how global management fits into a "putting it all together" approach to running a cross-national enterprise.

Business Plan competition Management

Directors of the BYU Business Plan Competition learn and apply skills in leadership, governance, financial management, mentoring, and VA/Angel networking. application and faculty approval required.

MBA 590R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

LEARNING OUTCOMES

•Understanding core leadership principles that define great leaders.
•Ability to successfully compare and contrast forms of leadership.
•Evaluate leadership skills through innovation, expansion, and execution.
•Ability to assist in ensuring university-wide success of the Miller NVC Challenge.
•Contrast elements and styles of leadership in contempoary settings.
•Gain practical experience vetting business ideas, advising, and networking with Miller NVC projects.
•Ability to create a compelling presentation, through valid research and thoughtful consideration.
•Enjoy learning practical subject matter in an engaging class; gain insight/wisdom to serve you for a lifetime.

Refine Ideas

Refine ideas into viable business models

Consulting Field Study

Working as a team with faculty and management in strategic consulting projects for local, national, and international business.

M B A 590R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

LEARNING OUTCOMES

•Understanding core leadership principles that define great leaders.
•Ability to successfully compare and contrast forms of leadership.
•Evaluate leadership skills through innovation, expansion, and execution.
•Ability to assist in ensuring university-wide success of the Miller NVC Challenge.
•Contrast elements and styles of leadership in contempoary settings.
•Gain practical experience vetting business ideas, advising, and networking with Miller NVC projects.
•Ability to create a compelling presentation, through valid research and thoughtful consideration.
•Enjoy learning practical subject matter in an engaging class; gain insight/wisdom to serve you for a lifetime.

Refine Ideas

Refine ideas into viable business models

Miller New Venture Competition Leadership

Working as a team with faculty and management in strategic consulting projects for local, national, and international business.

M B A 590R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

LEARNING OUTCOMES

•Understanding core leadership principles that define great leaders.
•Ability to successfully compare and contrast forms of leadership.
•Evaluate leadership skills through innovation, expansion, and execution.
•Ability to assist in ensuring university-wide success of the Miller NVC Challenge.
•Contrast elements and styles of leadership in contempoary settings.
•Gain practical experience vetting business ideas, advising, and networking with Miller NVC projects.
•Ability to create a compelling presentation, through valid research and thoughtful consideration.
•Enjoy learning practical subject matter in an engaging class; gain insight/wisdom to serve you for a lifetime.

Refine Ideas

Refine ideas into viable business models

Integrative Exercise

Integrated applications of case analysis and presentation skills. Group work to analyze cases and formulate recommendations, followed by professional presentations to groups representing management.

MBA 591R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Analyzing cases across business functions

Demonstrate the ability to analyze a business case across core business functions.

Presenting recommendations succinctly and persuasively

Present the recommendations from your case analysis in a succinct and persuasive manner--with the ability to respond effectively to questions from a faculty and practitioner panel.

Management Seminar

Invited guests speak on topics of general management interest ranging from ethics, industry problems and opportunities, and government policies to relevant current events.

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Professional Awareness

Students will have greater awareness of trends and opportunities for careers in their discipline

Career Direction

Students will have better information about the various career paths within their discipline in order to focus their choice of courses and their career search.

Curricular Practical Training

Hands-on practical training for MBA international students to be taken after their first year of the MBA program.

Hours	0.5 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring, Summer

Course Outcomes

Global Experience

International students will learn to work in a U.S. corporate environment.

Managerial Skills

Demonstrate proficiency in analyzing management problems, developing solutions, and implementing recommendations as assigned by the sponsoring organization.

Professionalism

Demonstrate appropriate managerial professionalism through responsible actions, thorough analysis and meeting deadlines.

Ethical Behavior

Demonstrate ethical behavior in completing assigned tasks and responsibilities.

Communication in Organizational Settings

Developing written and oral communications for professional organizations, including composing and designing employment communications. Incorporates oral presentations.

M COM 320

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	GE First-Year Writing requirement. To be taken before senior year. Not for freshmen.
Note	Fulfills GE Advanced Written and Oral Communication requirement.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Writing

Compose business text that is complete, correct, clear, organized, and effective.

Grammar

Comply with generally accepted grammar rules and business writing style.

Graphics

Create effective business graphics and implement effective visual-design principles.

Presenting

Give effective oral reports with appropriate media support.

Honors Communication in Organizational Settings

Developing written and oral communications for professional organizations, including composing and designing employment communications. Incorporates oral presentations.

M COM 320

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	GE First-Year Writing requirement. To be taken before senior year. Not for freshmen.
Note	Fulfills GE Advanced Written and Oral Communication requirement.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Writing

Compose business text that is complete, correct, clear, organized, and effective.

Grammar

Comply with generally accepted grammar rules and business writing style.

Graphics

Create effective business graphics and implement effective visual-design principles.

Presenting

Give effective oral reports with appropriate media support.

Top

Intermediate Algebra

Elementary logic, real number system, equations and inequalities (linear, polynomial, rational, and radical expressions), graphing, function notation, inverse function, exponential functions, systems of equations, variations.

MATH 097

Hours	0.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	High school algebra.
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Elementary logic, real number system, etc.

This course is not offered on BYU campus, but is available only through BYU Independent Study. Elementary logic, real number system, equations and inequalities (linear, polynomial, rational, and radical expressions), graphing, function notation, inverse functions, exponential functions, systems of equations, variations. 56 lessons, 2 assignment submissions, all instructor-graded; 4 proctored midcourse exams, all computer-graded Speedback; proctored computer-graded final exam.
For more detailed information, visit the Math 97 Independent Study website.

Top

Quantitative Reasoning

Practicing and applying quantitative reasoning: personal finance, consumer statistics, etc.

MATH 102

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For students who do not need developmental algebra for subsequent courses.
Taught	Fall, Winter, Spring

Course Outcomes

Practicing and applying quantitative reasoning

For students who do not need developmental algebra for subsequent courses. For more detailed information, visit the Math 102 Wiki page.

Top

College Algebra

Functions, polynomials, theory of equations, exponential and logarithmic functions, matrices, systems of linear equations, permutations, combinations, binomial theorem.

MATH 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 97 or equivalent (see Independent Study).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Functions and their graphs

- Graph functions using horizontal and vertical shifts
- Graph functions using compressions and stretches
- Graph functions using reflections about the x-axis or y-axis
- Form composite functions and find the domain
- Determine the inverse of a function and graph an inverse function from the graph of a function

Functions, polynomials, theory of equations, etc.

This course prepares students to take courses in calculus, statistics, mathematics for elementary education majors, and other areas where algebra skills are required. Fluent skills in algebra are necessary for success in any area that uses mathematical analysis. The mastery of college algebra requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. College Algebra develops the concepts of graphing functions, polynomial and rational functions, exponential and logarithmic functions, conic sections, solving systems of equations, the binomial theorem, permutations, combinations, and probability. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information, visit the Math 110 Wiki page.

Polynomial and Rational Functions

- Quadratic functions
- Polynomial functions
- Rational functions
- Polynomial and rational inequalities
- The real zeros of a polynomial function
- Complex zeros and the Fundamental Theorem of Algebra

Exponential and Logarithmic Functions

- Exponential functions
- Logarithmic functions
- Properties of Logarithms

- Logarithmic and exponential equations
- Compound interest
- Exponential growth and decay

Conic Sections

- Graph parabolas, ellipses, and hyperbolas
- Find the equation of parabolas, ellipses, and hyperbolas
- Discuss the equation of conic sections to find vertices, foci, asymptotes, and the directrix
- Work with conic sections that are not centered at the origin

Systems of Equations and Inequalities

- Solve systems of linear equations using substitution and elimination
- Solve systems of non-linear equations using substitution and elimination
- Decompose rational functions using partial fractions

Sequences and Induction

- Find terms in a sequence using a formula and a recursive definition
- Find a formula for terms in an arithmetic sequence and be able to add the terms of a finite arithmetic sequence
- Find a formula for the terms in a geometric sequence and be able to find the sum of finite and infinite geometric series
- Prove statements using mathematical induction

Counting, Probability, and the Binomial Theorem

- Work with operations on sets such as union, intersection and complement and count the number of elements in a set
- Compute permutations and combinations
- Evaluate binomial coefficients and expand binomials using the Binomial Theorem
- Compute probabilities of equally likely outcomes

Top

Trigonometry

Circular functions, triangle relationships, identities, inverse trig functions, trigonometric equations, vectors, complex numbers, DeMoivre's theorem.

MATH 111

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Math 110 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Circular functions, triangle relationships, identities, etc.

Students should gain familiarity and proficiency with the basic theorems of trigonometry. For more detailed information, visit the Math 111 Wiki page.

Calculus 1

Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

MATH 112

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Differential and integral calculus

This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

Honors Calculus 1

Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

MATH 112

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Differential and integral calculus

This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

Calculus 2

Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

MATH 113

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Math 112.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Techniques and applications of integration, etc.

This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

Honors Calculus 2

Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

MATH 113

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	MATH 112
Taught	

Course Outcomes

Techniques and applications of integration, etc.

This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Essentials of Calculus

Review of algebra, graph of line, slope. Limits and derivatives (standard functions, compositions of such functions), derivative for polynomials, exponentials, logarithms. Product, quotient and chain rule. Optimization (extrema), application to business problems. Newton's method.

MATH 116

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Math 110.
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

A brief overview of differential calculus

Students receive a brief overview of differential calculus. Topics covered include limits, derivatives, and applications of differentiation to optimization of functions.For more detailed information visit the Math 116 Wiki page.

Top

Finite Mathematics

Language of set theory, counting and combinations. Probability theory, elementary stochastic processes, conditional probabilities. Repeated experiments, random variables, expectation, variance, linear equations, matrix algebra, application to economics or similar. Linear programming. Markov chains including applications.

MATH 118

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 110.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

The basic elements and applications of finite mathematics

Prepares students for a broad range of applications in business, the life sciences, and the social sciences.For more detailed information visit the Math 118 Wiki page.

Top

Introduction to Calculus

Introduction to plane analytic geometry and calculus.

MATH 119

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	Math 110 and Math 111; or equivalent.
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study only.

Course Outcomes

Introduction to plane analytic geometry and calculus.

This course is designed to provide beginning undergraduate students a first exposure to Calculus concepts, theorems, and techniques. In general, theorems will not be proved. An understanding of the theorems and their applications to solve calculus problems will be taught. Students will be expected to develop effective problem solving skills based on their understanding of the theory and not just memorize a set of routines to solve problems. For a more detailed course description, visit the Math 119 Wiki page.

Top

Seminar in Mathematics 1

Careers, topics, and problems in mathematics.

MATH 191

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Math 113.
Taught	Fall

Course Outcomes

Students should be familiar with the following items:

1. Scholarships, undergraduate research, departmental activities, and summer programs available to BYU mathematics majors.
2. Career options available to mathematics majors;
3. Several current research topics in mathematics; and
4. Aspects of the culture of the mathematics community.

Seminar in Mathematics 2

Careers, topics, and problems in mathematics. Use of Maple, Mathematica, and TeX in mathematics.

MATH 222

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	MATH 191
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Careers, topics, and problems in mathematics.

1. Scholarships, undergraduate research, departmental activities, and summer programs available to BYU mathematics majors.
2. Career options available to mathematics majors;
3. Several current research topics in mathematics; and
4. Aspects of the culture of the mathematics community.

Top

Fundamentals of Mathematics

Achieving maturity in mathematical communication. Introduction to mathematical proof; methods of proof; analysis of proof; induction; logical reasoning.

MATH 290

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 112 or concurrent enrollment with instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Achieving maturity in mathematical communication.

This course is aimed at undergraduate mathematics and mathematics education majors. It is a first course in mathematical thinking. It is intended as an introduction to mathematical proof, and students who finish the course should achieve maturity in mathematical communication. For more detailed information visit the Math 290 Wiki page.

(Math-MthEd) History and Philosophy of Mathematics

Historical development of important mathematical ideas and philosophies; implications for the mathematical curriculum.

MATH 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 113.
Taught	Fall, Winter, Spring

Course Outcomes

Origin and Nature of Mathematics

Students understand and can describe the major approaches—cultural, philosophical, and psychological—to explaining the origin and nature of mathematics and its relation to understanding and modeling the physical world.

Historical Periods and Contributions

Students understand and can describe the major historical periods of development of mathematical thought, as well as the contributions of various cultures and individuals within those periods.

Historical Development of Concepts and Practices

Students understand and can describe the historical development of concepts and practices central to school mathematics, including numeration, arithmetic, algebra, geometry, calculus, and probability.

Complexity of Human Mathematical Activity and Learning

Through understanding the complex relationship between mathematical practices and human experience, students appreciate the complexity of teaching and learning mathematics and the different approaches and experiences adolescents will bring to learning those practices.

Top

Mathematics for Engineering 1

Multivariable calculus, linear algebra, and numerical methods.

MATH 302

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Math 113.
Taught	Fall, Winter

Course Outcomes

Multivariable calculus, linear algebra, numerical methods

This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For more detailed information, please visit the department wiki for this course at Math 302 Wiki.

Top

Mathematics for Engineering 2

ODEs, Laplace transforms, Fourier series, PDEs.

MATH 303

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	MATH 302
Taught	Fall, Winter

Course Outcomes

ODEs, Laplace transforms, Fourier series, PDEs

This course is designed to give students from the College of Engineering and Technology the mathematics background necessary to succeed in their chosen field. For a more detailed course description, visit Math 303 Wiki.

Top

Elementary Linear Algebra

Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

MATH 313

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 112.
Recommended	Math 290.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Linear systems, matrices, vectors and vector spaces, etc.

This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

Top

Honors Elementary Linear Algebra

Linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

MATH 313

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Math 112.
Recommended	Math 290.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Linear systems, matrices, vectors and vector spaces, etc.

This course is aimed at majors in mathematics, the physical sciences, engineering, and other students interested in applications of mathematics to their disciplines. Linear algebra is used more than any other form of advanced mathematics in industry and science. A key idea is the mathematical modeling of a problem via systems of linear equations. For more detailed information visit the Math 313 Wiki page.

Top

Calculus of Several Variables

Partial differentiation, the Jacobian matrix, and integral theorems of vector calculus.

MATH 314

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 113
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Partial differentiation, the Jacobian matrix, etc.

This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

Top

Algorithm Design and Optimization 1

A treatment of algorithms used to solve these problems. Topics include complexity and data, approximation theory, recursive algorithms, linear optimization, unconstrained optimization, constrained optimization, global optimization.

MATH 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 290 & MATH 313 & MATH 314; concurrent enrollment in Math 321, 334, 344.
Taught	Fall

Course Outcomes

Math 320: Computation and Optimization 1

A treatment of algorithms used to solve these problems. Specific topics include Complexity and Data, Approximation Theory, Recursive Algorithms, Linear Optimization, Unconstrained Optimization, Constrained Optimization, Global Optimization. For detailed information about desired learning outcomes visit the Math 320 Wiki page.

Top

Algorithm Design and Optimization 1 Laboratory

Programming algorithms and using functions to implement the optimization algorithms taught in Math 320. Applications presented. Developing models and applying results of computations to the application domain.

MATH 321

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C S 142 or equivalent; concurrent enrollment in Math 320, 345.
Taught	Fall

Course Outcomes

Math 321: Computation and Optimization 1 Lab

Students will be able to model many applications effectively using the concepts covered in Math 320. They will be able to use software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated.

Algorithm Design and Optimization 2

Algorithms used to solve dynamic programming problems and advanced computing problems. Topics include finite-horizon and infinite-horizon dynamic programming, discrete transforms, compressed sensing, heuristics, branch and bound, conditioning and stability.

MATH 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 320; concurrent enrollment in Math 323, 346.
Taught	Winter

Course Outcomes

Math 322: Computation and Optimization 2

Algorithms used to solve dynamic programming problems and advanced computing problems. Topics include finite-horizon and infinite-horizon dynamic programming, discrete transforms, compressed sensing, heuristics, branch and bound, conditioning and stability. For a detailed description of desired learning outcomes visit the Math 322 Wiki page.

Algorithm Design and Optimization 2 Laboratory

Using existing software and writing code for algorithms taught in Math 322. Applications presented. Developing models and applying results to the application domain.

MATH 323

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	MATH 321; concurrent enrollment in Math 322, 347.
Taught	Winter

Course Outcomes

Math 323: Computation and Optimization 2 Lab

Students will be able to model many real-world applications effectively using the concepts covered in Math 322. They will be able to use software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated.

Top

Ordinary Differential Equations

Methods and theory of ordinary differential equations.

MATH 334

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 113 and Math 313.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Methods and theory of ordinary differential equations.

This course is aimed at students majoring in mathematical and physical sciences and mathematical education. The main purpose of the course is to introduce students to the theory and methods of ordinary differential equations. The course content contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information visit the Math 334 Wiki.

Top

Theory of Analysis 1

Rigorous treatment of calculus of a single real variable: topology, order, completeness of real numbers; continuity, differentiability, integrability, and convergence of functions.

MATH 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 113 and Math 290.
Taught	Fall, Winter, Summer

Course Outcomes

Rigorous treatment of calculus of a single real variable.

The main purpose of this course is to provide students with an understanding of the real number system and of real-valued functions of a single real variable, with the focus being on the theoretical and logical foundations of single-variable calculus. A secondary purpose of this course is to reinforce students' prior training in discovering and writing valid mathematical proofs.For more detailed information visit the Math 341 Wiki.

Top

Theory of Analysis 2

Rigorous treatment of calculus of several real variables; metric spaces, geometry and topology of Euclidean space, differentiation implicity function theorem, integration on sets and manifolds.

MATH 342

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 313 & MATH 341
Taught	Fall, Winter

Course Outcomes

Rigorous treatment of calculus of several real variables.

Math 342 is the multivariable sequel to Math 341. It provides a rigorous treatment of multivariable calculus. Unlike the case with Math 341, Math 342 students are not required to have had an introductory course in the subject matter, so Math 342 needs to treat both computation and theory in some depth. For more detailed information visit the Math 342 Wiki entry.

Top

Mathematical Analysis 1

Development of theory of vector spaces, linear maps, inner product spaces, spectral theory, metric space topology, differentiation, contraction mappings and convex analysis.

MATH 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 290 & MATH 313 & MATH 314; concurrent enrollment in Math 334, 345.
Taught	Fall

Course Outcomes

Math 344: Linear and Nonlinear Analysis 1

Development of the theory of vector spaces, linear maps, inner product spaces, spectral theory, metric space topology, differentiation, contraction mappings and convex analysis. For a detailed description of desired learning outcomes visit the Math 344 Wiki page.

Mathematical Analysis 1 Laboratory

Programming algorithms to implement the key mathematical methods taught in Math 344. Applications presented. Developing models and applying results of computations to the application domain.

MATH 345

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C S 142 or equivalent; concurrent enrollment in Math 344.
Taught	Fall

Course Outcomes

Math 345: Linear and Nonlinear Analysis 1 Lab

Students will program algorithms to implement the key mathematical methods taught in Math 344. Applications will be presented, and students will develop models and apply the results of the computations to the application domain.

Top

Mathematical Analysis 2

Theory of Riemann-Darboux integration, calculus on curves and surfaces, complex integration, spectral calculus, generalized inverses of matrices, basic matrix perturbation theory, groups of permutations and matrices. Time permitting, exterior calculus and differential forms.

MATH 346

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 344; concurrent enrollment in Math 347.
Taught	Winter

Course Outcomes

Math 346: Linear and Nonlinear Analysis 2

Theory of Riemann-Darboux integration, calculus on curves and surfaces, complex integration, spectral calculus, generalized inverses of matrices, basic matrix perturbation theory, groups of permutations and matrices. Time permitting, exterior calculus and differential forms. For a detailed description of desired learning outcomes visit the Math 346 Wiki page.

Top

Mathematical Analysis 2 Laboratory

Programming algorithms and using functions to implement the mathematical methods taught in Math 346. Applications presented. Developing models and applying results of computations to the application domain.

MATH 347

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	MATH 345; concurrent enrollment in Math 346.
Taught	Winter

Course Outcomes

Math 347: Linear and Nonlinear Analysis 2 Lab

Students will be able to relate the concepts covered in Math 346 to specific aspects of many applications. They will be able to use software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated.

Top

Introduction to Complex Analysis

Complex algebra, analytic functions, integration in the complex plane, infinite series, theory of residues, conformal mapping.

MATH 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 290; Math 341 or concurrent enrollment.
Taught	Fall, Winter, Summer

Course Outcomes

Complex algebra, analytic functions, infinite series, etc.

This course is aimed at graduates majoring in mathematical and physical sciences and engineering. In addition to being an important branch of mathematics in its own right, complex analysis is an important tool for differential equations (ordinary and partial), algebraic geometry and number theory. Thus it is a core requirement for all mathematics majors. It contributes to all the expected learning outcomes of the Mathematics BS degree.For more detailed information visit the Math 352 Wiki page.

Mastery of Concepts

Students will master complex numbers, limits, analytic functions, elementary functions in the complex plane, contour integrals, Taylor series, Laurent series, isolated singularities, residue theory and applications, and conformal mappings.

Top

Graph Theory

Maps, graphs and digraphs, coloring problems, applications.

MATH 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 313
Taught	Fall

Course Outcomes

Maps, graphs and digraphs, coloring problems, applications.

Graphs, trees, pathes and cycles, connectedness, chromatic number, planarity conditions, genus of a graph, the Five Color Theorem. Students should also be aware of Kuratowsky's Theorem, and the Four Color Theorem. If there is time, it is good to study the proof of Kuratowski's Theorem. For more detailed information visit the Math 355 Wiki page.

(Math-MthEd) Survey of Geometry

Logical and historical development of Euclidean and non-Euclidean geometry, transformations and symmetry; relationships among axiomatic systems; use of software and other geometric models; proofs and Van Hiele levels.

MATH 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 290
Taught	Fall, Winter, Spring

Course Outcomes

Knowing and Learning Geometry

Students understand central objects, concepts, relationships, definitions, and theorems of Euclidean geometry, how adolescents come to understand these, and the canonical examples and alternative approaches germane to teaching secondary school geometry.

Communicating Geometric Ideas and Arguments

Students can communicate geometric ideas effectively using a variety of appropriate representations and can construct valid proofs of geometric theorems within a given axiom system.

Multiple Geometries

Students understand and can describe the relationships among neutral, Euclidean, and non-Euclidean geometries in terms of fundamental geometric concepts, objects, and properties (particularly parallelism), and can use the fundamental properties of axiom systems and models to provide convincing arguments about these relationships.

Top

Abstract Algebra 1

Groups, group homomorphisms, rings, ideals, and polynomials.

MATH 371

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 290 & MATH 313
Taught	Fall, Winter, Spring

Course Outcomes

Groups, group homomorphisms, rings, ideals, and polynomials.

This course is aimed at undergraduate mathematics and mathematics education majors. It is a first course in abstract algebra. In addition to being an important branch of mathematics in its own right, abstract algebra is now an essential tool in number theory, geometry, topology, and, to a lesser extent, analysis. Thus it is a core requirement for all mathematics majors. Outside of mathematics, algebra also has applications in cryptography, coding theory, quantum chemistry, and physics. For more detailed information visit the Math 371 Wiki page.

Top

Abstract Algebra 2

Fields, Galois theory, solvability of polynomials by radicals.

MATH 372

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 371
Taught	Fall

Course Outcomes

Fields, Galois theory, solvability of polynomials by radicals

Students should achieve mastery of the topics listed in the minimal learning outcomes on the Math 372 Wiki page. This means that they should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the below concepts, related to, but not identical to, statements proven by the text or instructor.

Top

Seminar in Mathematics

Topics from classical problems of antiquity, combinatorial mathematics, graph theory, real functions, number theory, functional equations.

MATH 391R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Topics from any area of mathematics.

Specified by the instructor on a case-by-case basis. Topics may be drawn from any area of mathematics. Typical topics include the Putnam Examination, dynamic systems, combinatorial mathematics, graph theory, real functions, number theory, functional equations, etc.

Top

Survey of Advanced Mathematics

A series of lectures designed to give students an overview of active research areas in advanced mathematics.

MATH 393

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Majors only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Survey of Advanced Mathematics

Students should be familiar with the areas of mathematical research described (naturally in a highly schematic way) by the lecturers in the course. The areas of research will be essentially those that are currently being pursued by BYU faculty in the mathematics department. Students will be able to make an informed choice if they wish to begin a program of undergraduate research with one of the faculty. For more information see the course Wiki page.

Top

Academic Internship

On-the-job experience.

MATH 399R

Hours	0.5 - 9.0 Credit, 9.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

On-the-job experience

To be defined by the professor on a case-by-case basis. In general, via the internship the student should obtain additional mathematical knowledge, and/or apply non-trivial mathematical techniques in creative ways.

Top

Modeling with Uncertainty and Data 1

Theory of probability and stochastic processes, emphasizing topics used in applications. Random spaces and variables, probability distributions, limit theorems, martingales, diffusion, Markov, Poisson and queuing processes, renewal theory, and information theory.

MATH 402

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 322 & MATH 346; concurrent enrollment in Math 403.
Taught	Fall

Course Outcomes

Probability and Statistics 1

Theory of probability and stochastic processes, emphasizing topics used in applications. Random spaces and variables, probability distributions, limit theorems, martingales, diffusion, Markov, Poisson and queuing processes, renewal theory, and information theory. For detailed information about the desired learning outcomes visit the Math 402 Wiki page.

Top

Modeling with Uncertainty and Data 1 Laboratory

Using and developing algorithms for the content of Math 402; developing I/O wrappers for numerical libraries. Applications presented. Developing models and applying results of computations.

MATH 403

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C S 142 & MATH 323 & MATH 347; concurrent enrollment in Math 402.
Taught	Fall

Course Outcomes

Math 403: Probability and Statistics 1 Lab

Students will be able to model specific applications using the concepts covered in Math 402, and to critique the models in the context from which the application was taken. They will be able to use software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated.

Top

Modeling with Uncertainty and Data 2

First course in mathematical statistics, focusing on mathematical aspects. Topics include estimation, inference, analysis of variance, regression, multivariate statistics, Bayesian statistics, state estimation, Kalman filtering, time series, GARCH models.

MATH 404

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 402; concurrent enrollment in Math 405.
Taught	Winter

Course Outcomes

Math 404: Probability and Statistics 2

A first course in mathematical statistics, focusing on the mathematical aspects of the subject. Specific topics include estimation, inference, analysis of variance, regression, multivariate statistics, Bayesian statistics, state estimation, Kalman filtering, time series, GARCH models. For a more detailed description of desired learning outcomes visit the Math 404 Wiki page.

Modeling with Uncertainty and Data 2 Laboratory

Using and developing software to implement the content of Math 404 and handle large data sets. Applications presented. Designing and executing statistical tests and applying computations to application domains.

MATH 405

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	MATH 403; concurrent enrollment in Math 404.
Taught	Winter

Course Outcomes

Math 405: Probability and Statistics 2 Lab

Students will be able to apply the models and methods covered in Math 404 to specific real-world settings. They will be able to use software to do the relevant computations, including the handling of large data sets and the interpretation of numerical results. They will be able to devise a specific plan for the use of statistical methods, for an application setting in which the goals are stated in general terms rather than specific statistical terms.

Topics in Mathematics

Topics selected from various aspects of mathematics. Possibilities include, but are not limited to, combinatorial theory, factorization and primality testing, game theory, harmonic analysis, hyperbolic geometry, linear programming, Lie groups, p-adic numbers, set theory and mathematical logic stochastic processes, supply chain management, voting theory.

MATH 406R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Topics in Mathematics

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Topics in Mathematics

Students will demonstrate an advanced level of knowledge in a chosen specialty area.

Topics in Mathematics

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity.

Topics in Mathematics

For more detailed information visit the Math 406R Wiki page

Introduction to Numerical Methods

Root finding, interpolation, curve fitting, numerical differentiation and integration, multiple integrals, direct solvers for linear systems, least squares, rational approximations, Fourier and other orthogonal methods.

MATH 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 314; C S 142 or equivalent.
Taught	Fall even years

Course Outcomes

Root finding, interpolation, curve fitting, etc.

Root finding, interpolation, curve fitting, numerical differentiation and integration, multiple integrals, direct solvers for linear systems, least squares, rational approximations, Fourier and other orthogonal methods. [This official course description appears to differ with current standard practice, in that iterative solvers of linear systems are taught in this course, while "Fourier and other orthogonal methods" are postponed until Math 411.] For more detailed information visit the Math 410 Wiki page.

Numerical Solutions

Students will master numerical solution of equations of one variable, interpolation, numerical differentiation, numerical integration, and numerical solution of linear systems.

Top

Numerical Methods

Iterative solvers for linear systems, eigenvalue, eigenvector approximations, numerical solutions to nonlinear systems, numerical techniques for initial and boundary value problems, elementary solvers for PDEs.

MATH 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 334
Taught	Winter odd years

Course Outcomes

Knowledge of Numerical Methods

Students should be able to describe, derive, and implement the numerical methods listed on the Math 411 Wiki page. They should be able to explain the advantages and disadvantages of each method. They should understand error analysis and be able to make practical decisions based on the outcomes of that analysis.

Mathematical Biology

Using tools in mathematics to help biologists. Motivating new mathematics with questions in biology.

MATH 425

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 334
Taught	Winter even years

Course Outcomes

Mathematical Biology

Students should gain a familiarity with how the disciplines of mathematics and biology can complement each other. Increasingly, mathematics is used to understand complex biological systems. Without some familiarity with the mathematical techniques, it is difficult to know how to interpret the results. In this class a variety of applications to medicine and biology will be studied, highlighting the different mathematical techniques. The objective of the class is not only to introduce the students to various applications and methods but also to help determine the strengths and weaknesses of different methods. For more detailed information visit the Math 425 Wiki page.

(Math - EC En 370) Probability Theory

Axiomatic probability theory, conditional probability, discrete / continuous random variables, expectation, conditional expectation, moments, functions of random variables, multivariate distributions, laws of large numbers, central limit theorem.

MATH 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 313
Taught	Fall odd years

Course Outcomes

Reasoning

The ability to use probabilistic reasoning and the foundations of probability theory to describe probabilistic engineering experiments in terms of sample spaces, event algebras, classical probability, and Kolmogorov's axioms.

Probability

The ability to use and simulate random variables, distribution functions, probability mass functions, and probability density functions, through calculus and functional transformations, to answer quantitative questions about the outcomes of probabilistic systems.

Variables

The ability to use and simulate multivariate distributions, independence, conditioning, and functions of random variables, including the ability to compute expectations, moments, and correlation functions, to describe relationships between different experimental conditions.

Statistical Inference

The ability to use statistics from measurements and acquired data to make reasonable quantitative inferences about engineering systems.

Mathematical Finance

The binomial asset pricing model (discrete probability). Martingales, pricing of derivative securities, random walk in financial models, random interest rates.

MATH 435

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 431; or STAT 370
Taught	Winter odd years

Course Outcomes

The binomial asset pricing model (discrete probability)

The minimal expectation for this course is that students learn about mathematical finance*in the context of discrete time and finite state-spaces.*It is therefore not required that students be taught about Brownian motion, the Black-Scholes model, etc. For more detailed information visit the Math 435 Wiki page.

Top

Modeling with Dynamics and Control 1

Theory and applicatiions of dynamic systems and partial differential equations. Topics include dynamic systems; bifurcation theory; control theory; hyperbolic, parabolic, and elliptic partial differential equations; commonly-used algorithms.

MATH 436

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 322 & MATH 341 & MATH 346; concurrent enrollment in Math 437.
Taught	Fall

Course Outcomes

Math 436: Differential and Integral Equations 1

Theory and applicatiions of dynamic systems and partial differential equations. Topics include dynamic systems; bifurcation theory; control theory; hyperbolic, parabolic, and elliptic partial differential equations; commonly-used algorithms. For detailed information about desired learning outcomes visit the Math 436 Wiki page.

Top

Modeling with Dynamics and Control 1 Laboratory

Using and developing software to implement the content of Math 436. Developing models and applying results of computations to several application domains. Introduction to parallel computation.

MATH 437

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C S 142 & MATH 323 & MATH 347; concurrent enrollment in Math 436.
Taught	Fall

Course Outcomes

Math 437: Differential and Integral Equations 1 Lab

Students will be able to model many real-world applications effectively using the concepts covered in Math 436. They will be able to use commercial software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated.

Modeling with Dynamics and Control 2

Introduction to integral equations, calculus of variations, stochastic differential equatons, optimal stochastic control; common algorithms used for these systems.

MATH 438

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 402 & MATH 436; concurrent enrollment in Math 404, 439.
Taught	Winter

Course Outcomes

Math 438: Differential and Integral Equations 2

An introduction to the theory of integral equations, of the calculus of variations, of stochastic differential equations and of optimal stochastic control. An introduction to the algorithms that are commonly used to study these systems. For detailed information about the desired learning outcomes visit the Math 438 Wiki page.

Top

Modeling with Dynamics and Control 2 Laboratory

Using and developing software for problems in the calculus of variations, stochastic differential equations, and stochastic optimal control. Developing models and applying the results of computations to several application domains.

MATH 439

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	MATH 437; concurrent enrollment in Math 405, 438.
Taught	Winter

Course Outcomes

Math 439: Differential and Integral Equations 2 Lab

Students will be able to model many real-world applications effectively using the concepts covered in Math 438. They will be able to use commercial software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated, including the handling of large datasets.

Introduction to Partial Differential Equations

Boundary value problems; transform methods; Fourier series; Bessel functions; Legendre polynomials.

MATH 447

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 303; or MATH 314 & MATH 334
Taught	Fall even years

Course Outcomes

Boundary value problems; transform methods; etc.

The main purpose of this course is to teach students how to solve the canonical linear second-order partial differential equations on simple domains. Secondarily, students should be introduced to the theory concerning the validity of such solutions.For more detailed information visit the Math 447 Wiki page.

Top

Combinatorics

Permutations, combinations, recurrence relations, applications.

MATH 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 371
Taught	Summer

Course Outcomes

Basics of combinatorics and its relation to other math areas

Permutations and combinations basics, including the Pigeonhole Principle, binomial coefficients and the Binomial Theorem, Stirling's Approximation, Inclusion/exclusion, Generating functions and recurrence relations (rational functions), Groups, permutations and counting problems -- Polya's Theorem. For more detailed information visit the Math 450 Wiki page.

Top

Introduction to Topology

Developing topological concepts, beginning from a linear setting. Developing proofs or counterexamples from axioms to a structured sequence of topological propositions using only notes provided.

MATH 451

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 341
Taught	Winter even years

Course Outcomes

Develop topological concepts

Developing topological concepts, beginning from a linear setting. Developing proofs or counterexamples from axioms to a structured sequence of topological propositions using only notes provided. For more detailed information visit the Math 451 Wiki page.

Top

Differential Geometry

Geometry of smooth curves and surfaces. Topics include the first and second fundamental forms, the Gauss map, orientability of surfaces, Gaussian and mean curvature, geodesics, minimal surfaces and the Gauss-Bonnet Theorem.

MATH 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 314; Math 341 or equivalent.
Recommended	Math 342 or equivalent.
Taught	Fall odd years

Course Outcomes

Geometry of smooth curves and surfaces.

The main purpose of this course is to provide students with an understanding of the geometry of curves and surfaces, with the focus being on the theoretical and logical foundations of differential geometry. For more detailed information visit the Math 465 Wiki page.

Top

Group Representation Theory

FG-modules; Maschke's theorem; Schur's lemma; characters of groups; orthogonality relations of characters; induced, lifted and restricted characters; construction of character tables; Burnside's theorem.

MATH 473

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 371
Taught	Winter

Course Outcomes

A second course in abstract algebra; representation theory

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the below concepts, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 473 Wiki page.

Top

Mathematical Cryptography

A mathematical introduction to some of the high points of modern cryptography.

MATH 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 313
Recommended	Math 371.
Taught	Fall

Course Outcomes

A mathematical introduction to modern cryptography

Students should know the definitions, being familiar with standard examples, and being able to solve mathematical and algorithmic problems by directly using the material taught in the course. This includes appropriate use of Maple, Mathematica, or another appropriate computing language. For more detailed information visit the Math 485 Wiki page.

Top

Number Theory

Foundations; congruences; quadratic reciprocity; unique factorization, prime distribution or Diophantine equations.

MATH 487

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 371
Taught	Fall, Summer

Course Outcomes

A first course in number theory

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the below concepts, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 487 Wiki page.

Top

Readings in Mathematics

Directed readings beyond the scope of usual undergraduate courses.

MATH 495R

Hours	0.5 - 2.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Increase in Mathematical Expertise

To be defined by the professor on a case-by-case basis. In general, a significant, coherent set of readings will be defined, and the student's base of mathematical knowledge and expertise will increase in notable, measurable ways.

Top

Senior Thesis

MATH 499R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

The student will complete a strong Senior Thesis which is compatible with the policies of the Honors Program and meets the standards set by the student's thesis advisor.

Top

(Math-Chem-C S-Geol-MthEd-Phscs-Stat) Business Career Essentials in Science and Math

Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

MATH 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Numerical Methods for Linear Algebra

Numerical matrix algebra, orthogonalization and least squares methods, unsymmetric and symmetric eigenvalue problems, iterative methods, advanced solvers for partial differential equations.

MATH 510

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 410 or equivalent.
Taught	Fall

Course Outcomes

Learning Outcomes

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 510 Wiki page.

Overview

This course is designed to prepare students to solve linear algebra problems arising from many applications such as mathematical models of physical or engineering processes. Students are introduced to modern concepts and methodologies in numerical linear algebra, with particular emphasis on the methods that can be used to solve very large scale problems. In depth discussion of theoretical aspects such as stability and convergence will be used to enhance student understanding of the numerical methods. Students will also be required to perform some programming and computation so as to gain experience in implementing and observing the numerical performance of the various numerical methods.

Numerical Methods for Partial Differential Equations

Finite difference and finite volume methods for partial differential equations. Stability, consistency, and convergence theory.

MATH 511

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 303 or 447; 410; or equivalents.
Taught	Winter

Course Outcomes

Learning Outcomes

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 511 Wiki page.

Overview

This course is designed to prepare students to solve mathematical models represented by initial or boundary value problems involving partial differential equations that cannot be solved directly using standard mathematical techniques but are amenable to a computational approach. Numerical solution of partial differential equations has important applications in many application areas. Students are introduced to the discretization methodologies, with particular emphasis on the finite difference method, that allows the construction of accurate and stable numerical schemes. In depth discussion of theoretical aspects such as stability analysis and convergence will be used to enhance the students' understanding of the numerical methods. Students will also be required to perform some programming and computation so as to gain experience in implementing the schemes and to be able to observe the numerical performance of the various numerical methods.

Advanced Topics in Applied Mathematics

MATH 513R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcomes

Students should gain a familiarity with a particular area of applied mathematics selected by the instructor. In general, a significant, coherent set of readings will be defined, and the student's base of mathematical knowledge and expertise will increase in notable, measurable ways. The students is expected to demonstrate mastery of the material in a manner that is acceptable to the professor. Further information can be found on the Math 513R Wiki Page

Methods of Applied Mathematics 1

Possible topics include variational, integral, and partial differential equations; spectral and transform methods; nonlinear waves; Green's functions; scaling and asymptotic analysis; perturbation theory; continuum mechanics.

MATH 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 334 or equivalent.
Recommended	Math 352.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Objectives

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 521 Wiki Page.

Overview

The object of this course is to familiarize students with classical techniques in applied mathematics and demonstrate their application to specific problems. Possible topics include variational, integral, and partial differential equations; spectral and transform methods; nonlinear waves; Green's functions; scaling and asymptotic analysis; perturbation theory; continuum mechanics.

Methods of Applied Mathematics 2

Possible topics include variational, integral, and partial differential equations; spectral and transform methods; nonlinear waves; Green's functions; scaling and asymptotic analysis; perturbation theory; continuum mechanics.

MATH 522

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 521 or equivalent.
Recommended	Math 352.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Objectives

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 522 Wiki Page.

Overview

The object of this course is to familiarize students with classical techniques in applied mathematics and demonstrate their application to specific problems. Possible topics include variational, integral, and partial differential equations; spectral and transform methods; nonlinear waves; Green's functions; scaling and asymptotic analysis; perturbation theory; continuum mechanics. For more detailed information visit the Math 522 Wiki page.

Complex Analysis

Introduction to theory of complex analysis at beginning graduate level. Topics: Cauchy integral equations, Riemann surfaces, Picard's theorem, etc.

MATH 532

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 352 or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Objectives

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 532 Math Wiki page.

Overview

Essential results: Power series, integration along curves, Goursat theorem, Cauchy's theorem in a disc, Taylor series, Morera's theorem, singularities, residue calculus, Laurent series, argument principle, harmonic functions, maximum modulus principle.
Entire functions: Jensen's formula, functions of finite order, Weierstrass infinite products, Hadamard factorization theorem.
The gamma and zeta functions: Analytic continuation of gamma function, further properties of Γ, functional equation and analytic continuation of zeta function.
Conformal mappings: Conformal equivalence, Schwarz lemma, Montel's theorem, Riemann mapping theorem.
Elliptic Functions: Liouville's Theorems, Poles and zeros of elliptic functions, Weierstrass elliptic functions.

Introduction to Dynamical Systems 1

Discrete dynamical systems; iterations of maps on the line and the plane; bifurcation theory; chaos, Julia sets, and fractals. Computational experimentation.

MATH 534

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 334, 341; or equivalents.
Recommended	Math 352.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Learning Outcomes

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 534 Wiki Page.

Overview

Discrete dynamical systems; iterations of maps on the line and the plane; bifurcation theory; chaos, Julia sets, and fractals. Computational experimentation.

Linear Analysis

Normed vector spaces and linear maps between them.

MATH 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Math 342 or equivalent; Math 352.
Taught	Winter

Course Outcomes

Learning Outcomes

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 540 Wiki page.

Overview

Normed spaces: Basics, Banach spaces, Special linear operators, Duality, Adjoints of bounded linear operators, Second duals, Weak and weak-star topologies, Banach-Alaoglu theorem, Finite-dimensional spaces, Baire category theorem, Hahn-Banach extension theorem, Banach-Steinhaus theorem, Open mapping theorem, Closed graph theorem, Bounded inverse theorem
Inner product spaces: Basics, Structure, and important theorems.
Spectral theory:Banach algebras, Bounded operators on Banach spaces, Compact operators on Banach spaces.

Top

Real Analysis

Rigorous treatment of differentiation and integration theory; Lebesgue measure; Banach spaces.

MATH 541

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 341; 314 or 342; or equivalents.
Recommended	Math 352.
Taught	Fall

Course Outcomes

Learning Outcomes

Students should understand the topics outlined in the minimal learning outcomes on the Math 541 Wiki page. As evidence of that understanding, students should be able to demonstrate mastery of all relevant vocabulary, familiarity with common examples and counterexamples, knowledge of the content of the major theorems, understanding of the ideas in their proofs, and ability to make direct application of those results to related problems.

Overview

Lebesgue measure on **R**n
Lebesgue integration on **R**n
Fubini's Theorem for **R**n
L1, L2, and L∞
Fourier transform on **R**n

Advanced Probability 1

Foundations of the modern theory of probability with applications. Probability spaces, random variables, independence, conditioning, expectation, generating functions, and Markov chains.

MATH 543

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 314 and Math 341; and Math 431 or Stat 370; or equivalents.
Taught	Fall

Course Outcomes

Learning Objectives

Students should understand the topics listed in the minimal learning outcomes on the Math 543 Wiki page. As evidence of that understanding, students should be able to demonstrate mastery of all relevant vocabulary, familiarity with common examples and counterexamples, knowledge of the content of the major theorems, understanding of the ideas in their proofs, and ability to make direct application of those results to related problems.

Overview

Probability spaces
Random variables
Independence
Expectation
Conditioning
Probability measures on product spaces
Generating functions
Discrete Markov chains

Top

Advanced Probability 2

Advanced concepts in modern probability. Convergence theorems and laws of large numbers. Stationary processes and ergodic theorems. Martingales. Diffusion processes and stochastic integration.

MATH 544

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 543
Recommended	Math 341, 342, 431; or equivalents.
Taught	Winter

Course Outcomes

Learning Outcomes

Students should understand the topics outlined in the minimal learning outcomes on the Math 544 Wiki page. As evidence of that understanding, students should be able to demonstrate mastery of all relevant vocabulary, familiarity with common examples and counterexamples, knowledge of the content of the major theorems, understanding of the ideas in their proofs, and ability to make direct application of those results to related problems.

Overview

Convergence of random variables
Laws of Large Numbers
Stochastic processes
Ergodic theory
Martingales
Brownian motion
Itô integral

Top

Partial Differential Equations 1

Methods of analysis for hyperbolic, elliptic, and parabolic equations, including characteristic manifolds, distributions, Green's functions, maximum principles and Fourier analysis.

MATH 547

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 334, 342; or equivalents.
Recommended	Math 352.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Objectives

Students should understand the topics listed in the minimal learning outcomes on the Math 547 Wiki page. As evidence of that understanding, students should be able to demonstrate mastery of all relevant vocabulary, familiarity with common examples and counterexamples, knowledge of the content of the major theorems, and ability to make direct application of those results to related problems, including calculations.

Overview

General Cauchy problem
Method of characteristics for first-order equations
Quasilinear systems of conservation laws on a line
Classification of general second-order equations
Canonical forms for semilinear second-order equations
Hyperbolic equations
Elliptic equations
Parabolic equations

Top

Foundations of Topology 1

Naive set theory, topological spaces, product spaces, subspaces, continuous functions, connectedness, compactness, countability, separation axioms, metrization, complete metric spaces, function spaces, and Baire spaces.

MATH 553

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 341 or equivalent.
Taught	Fall

Course Outcomes

Learning Objectives

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 553 Wiki page.

Overview

1. Set Theory
2. Topological Spaces
3. Continuous Functions
4. Connectedness
5. Compactness
6. Tychonoff Theorem
7. Countability and Separation Axioms
8. Countable basis
9. Countable dense subsets
10. Normal spaces
11. Urysohn Lemma
12. Tietze Extension Theorem
13. Metrization
14. Complete Metric Spaces

Foundations of Topology 2

Fundamental group, retractions and fixed points, homotopy types, separation theorems, classification of surfaces, Seifert-van Kampen Theorem, classification of covering spaces, and applications to group theory.

MATH 554

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 553 or instructor's consent.
Taught	Winter

Course Outcomes

Learning Objectives

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 554 Wiki page.

Overview

1. The Fundamenatal Group
2. The topology of the plane
3. Jordan Curve Theorem
4. Seifert-van Kampen Theorem
5. Classification of Surfaces
6. Classification of Covering Spaces
7. Group Theory
8. Free groups
9. Free abelian groups
10. Presentations of groups
11. Subgroups of free groups

Top

Introduction to Algebraic Geometry 1

Basic definitions and theorems on affine, projective, and quasi-projective varieties.

MATH 561

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 571 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcomes

Students should achieve mastery of the topics listed in the minimal learning outcomes on the Math 561 Wiki page. This means they should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor.

Overview

1. Algebraic plane curves
2. Rational curves
3. Relation with field theory
4. Rational maps
5. Singular and nonsingular points
6. Projective spaces
7. Affine varieties
8. Affine space and the Zariski topology
9. Regular functions
10. Regular maps
11. The Zariski topology on projective space
12. Products and maps of quasi-projective space
13. Properness of projective maps
14. Dimension.

Introduction to Algebraic Geometry 2

Local properties of quasi-projective varieties. Divisors and differential forms.

MATH 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 561
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcomes

Students should achieve mastery of the topics listed in the minimal learning outcomes section of the Math 562 Wiki page. This means they should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor.

Overview

1. Local properties of algebraic varieties
2. Power series expansions
3. Properties of nonsingular points
4. Birational maps
5. Normal varieties and normalization
6. Divisors
7. Differential forms

Differential Geometry

A rigorous treatment of the theory of differential geometry.

MATH 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 342 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcomes

Students should achieve mastery of the topics listed in the minimal learning outcomes section of the Math 565 Wiki page. This means that they should know all relevant definitions, full statements of the major theorems, and examples of the various concepts. Further, students should be able to solve non-trivial problems related to these concepts, and prove theorems in analogy to proofs given by the instructor.

Overview

1. Differential topology
2. Riemannian metrics
3. Geodesics
4. Curvature
5. Integration on manifolds

Matrix Analysis

Special classes of matrices, canonical forms, matrix and vector norms, localization of eigenvalues, matrix functions, applications.

MATH 570

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 302 or 313 or equivalent.
Taught	

Course Outcomes

Learning Outcomes

The minimal learning outcomes section of the Math 570 Wiki page outlines material which all students in Math 570 should understand. As evidence of that understanding, students should be able to demonstrate mastery of relevant vocabulary, familiarity with common examples and counterexamples, knowledge of the major theorems, understanding of the ideas in their proofs, and ability to make direct application of those results to related problems.

Overview

Matrix arithmetic and Linear transformations, The theory of determinants , Rank of a matrix and elementary matrices, Spectral theory, Shur's theorem, Quadratic forms and second derivative test, Gerschgorin's theorem, Abstract vector spaces and general fields, Axioms, Subspaces and bases, Matrix of a linear transformation, Rotations, Eigenvalues and eigenvectors of linear transformations, Jordan Cannonical form and applications, Cayley Hamilton theorem, Markov chains, Regular Markov matrices, Inner product spaces, Gramm Schmidt process, Tensor product of vectors, Least squares, Fredholm alternative, Determinants and volume, Self adjoint operators, Simultaneous diagonalization, Spectral theory, Singular value decomposition, The Frobenius norm, Least squares and the Moore Penrose inverse, Norms for finite dimensional vector spaces, The p norms,

Top

Algebra 1

Group theory, ring theory.

MATH 571

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 372 or equivalent.
Taught	Fall

Course Outcomes

Learning Outcomes

Students should achieve an advanced mastery of the topics listed in the minimal learning outcomes section of the Math 571 Wiki page. This means that they should know all relevant definitions, correct statements and proofs of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving difficult problems related to thes content, and by proving theorems about these important concepts, even if the theorems go beyond the material in the text.

Overview

1. Group Theory
2. Ring Theory
3. Module Theory

Algebra 2

Modules, vector spaces, field theory, Galois theory.

MATH 572

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 571
Taught	Winter

Course Outcomes

Learning Outcomes

Students should achieve an advanced mastery of the topics listed in the minimal learning outcomes section of the Math 572 Wiki page. This means that they should know all relevant definitions, correct statements and proofs of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts The students should be able to demonstrate their mastery by solving difficult problems related to these concepts, and by proving theorems about the below concepts, even if the theorems go beyond the material in the text.

Overview

1. Linear Algebra
2. Modules over PID's
3. Galois Theory

Introduction to Algebraic Number Theory

Algebraic integers; different and discriminant; decomposition of primes; class group; Dirichlet unit theorem; Dedekind zeta function; cyclotomic fields; valuations; completions.

MATH 586

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 372 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcomes

Students should achieve an advanced mastery of the topics listed on the 586 Math Wiki page. This means that they should know all relevant definitions, correct statements and proofs of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving difficult problems related to these concepts, and by proving theorems about the below concepts, even if the theorems go beyond the material in the text.

Overview

1. Number Fields
2. Prime decomposition in rings of integers
3. Ideal Class Group
4. Dirichlet's unit theorem
5. Cebotarev Density Theorem (Statement)
6. Dedekind zeta function

Introduction to Analytic Number Theory

Arithmetical functions; distribution of primes; Dirichlet characters; Dirichlet's theorem; Gauss sums; primitive roots; Dirichlet L-functions; Riemann zeta-function; prime number theorem; partitions.

MATH 587

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 352 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learning Outcomes

Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 587 Wiki page.

Overview

1. Arithmetic functions
2. Elementary theorems on distribution of prime numbers
3. Finite abelian groups and their characters
4. Dirichlet series and Euler product
5. The zeta function and the Dirichlet L-functions
6. Partitions

Top

Static Systems in Mechanical Engineering

Analysis and design of static systems; real world problem solving; forces, moments, and vectors, equilibrium; external and internal forces; centroids and inertia; mechanical engineering fundamentals.

ME EN 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 121 & MATH 112
Taught	Fall, Winter, Spring

Course Outcomes

Forces and Moments

1. An understanding of forces and moments and an ability to perform mathematical manipulation of them using vector analysis.

Free Body Diagrams

2. An ability to construct free-body diagrams and to calculate the reactions necessary to ensure static equilibrium for particles and rigid bodies.

Systems of Forces and Moments

3. An understanding of the analysis of systems of forces and moments and distributed loads and an ability to determine internal forces and moments in members.

Computing

4. An ability to apply basic computing techniques to conduct parametric evaluation of elementary static systems.

Calculating Centroids and Moments of Inertia

5. An ability to calculate centroids and moments of inertia of 2-D and 3-D objects.

Friction

6. An understanding of friction and how to model it in static systems.

Design Process

7. An understanding of the basic design process and an ability to apply it to design, build, and test a static structure to meet competing constraints.

Real World Applications

8. An ability to transform real world engineering scenarios into analyzable statics problems.

Communicating Analysis Results

9. An ability to effectively communicate the assumptions, intermediate steps, and results of an engineering analysis to others.

Mechancial Engineering Career Development

10. An understanding of Mechanical Engineering as a discipline and how statics principles relate to core ME EN topics and to becoming an influential engineer.

Top

New Student Seminar

Topics of special interest to new mechanical engineering majors.

ME EN 191

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required of all first-semester freshman and transfer students.
Taught	Fall, Winter

Course Outcomes

Basic Outcomes

1. Students are aware of the 12 basic outcomes of the mechanical engineering program at BYU.

Career Opportunities

2. Gain a perspective of the many career opportunities and specialties in mechanical engineering.

Independent Learning

3. Explain what it means to be responsible for one's own education and to be an independent learner, including familiarity with the aims of a BYU education.

Design Process

4. Students are aware that there are design processes that engineers follow to meet needs.

Product Production

5. Students can explain that mechanical engineers are involved with fabricating and manufacturing products.

Communication Skills

6. Learn the importance of developing good communication skills.

Team Work

7. Become aware that working effectively in teams is a vital skill for an engineer.

Internship and Job Planning

8. Discuss the role of an internship in developing engineering skills and career goals, including how to search for a job using a number of resources.

Societal Demands

9. Students are aware that mechanical engineering takes place within the context of society and is driven by factors such as market demands, economics, safety, and societal needs.

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

ME EN 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Consent of both department chair and cooperative education coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experiences

Student acquires professional experiences in the discipline.

Professional Communication

Student demonstrates professional communication skills (report).

Converting Thought into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Science of Engineering Materials

Principles and properties of solid materials and their behavior as applied to engineering.

ME EN 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 105
Taught	Fall, Winter, Spring

Course Outcomes

Functional Behaviors of Materials

1. Describe the functional behaviors of the primary classes of materials (metals, ceramics, polymers, composites).

Material Properties

2. Predict material properties based on atomic structure and defects.

Lever Rule

3. Apply the lever rule to binary phase diagrams.

Stress-strain Diagram

4. Model the stress-strain diagram and describe the mechanisms for altering it for the various classes of materials.

Diffusion, Nucleation and Growth

5. Describe the kinetics of diffusion and the process of nucleation and growth as they affect transformation products.

Degradation Processes

6. Describe common degradation and failure processes for each basic class of materials.

Material Selection

7. Identify functional requirements for real world scenarios and select an appropriate material based on those requirements.

Top

Engineering Graphics--Principles and Applications

Comprehensive applications of CAD-based national (ANSI) and international (ISO) graphics standards, including coordinate and geometric dimensioning and tolerancing practices, manufacturing, and product verification procedures.

ME EN 272

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Me En professional program for Me En students; or non-Me En major in Engineering and Technology.
Taught	Fall, Winter, Spring

Course Outcomes

Modeling Techniques

1. Understand both surface and solid modeling techniques found in a modern commercial CAD package.

CAD Modeling - Basic Components

2. Create a CAD model of basic machine components and assemblies.

CAD Modeling - Average to Complex Components

3. Design and create CAD models of average to complex mechanical components.

Engineering Drawings - Standard

4. Create, read and understand engineering drawings composed of multiple views with standard dimensioning and tolerancing nomenclature.

Engineering Drawings - Geometric

5. Create, read and understand engineering drawings that contain geometric dimensioning, tolerancing symbology and mating parts fit.

Top-Down and Bottom-Up Design

6. Understand the approaches and processes used in component and assembly modeling, i.e. top-down and bottom-up design.

Collaboration

7. Collaborate with teammates to learn how to apply CAD tools to the modeling projects.

Globalization

8. Learn about design and engineering processes in a global context.

Top

Introduction to Scientific Computing and Computer-Aided Engineering

Computer programming for engineers taught in context of solving physical systems using numerical methods. Student will program solutions using the C++ language, spreadsheets, symbolic solvers, etc.

ME EN 273

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MATH 113; Math 302 or 314 or concurrent.
Taught	Fall, Winter, Spring

Course Outcomes

Role of Numerical Solutions

1. Understand the role of numerical solutions in the engineering process of design and analysis. Understand how integers and real numbers are stored inside the computer. Understand the limitations associated with numerical solutions, including accuracy due to approximations and round-off error.

Modern Numerical Methods

2. Find roots of equations using various modern numerical methods.

Linear Systems of Equations

3. Solve linear systems of equations using Gauss elimination, LU decomposition and/or matrix inversion. Understand the concept of matrix condition number.

Basic Curve Fitting Algorithms

4. Be able to implement basic curve fitting algorithms, including least-squares regression.

Methods for Approximating Derivatives

5. Implement forward and central difference methods for approximating derivatives and the trapezoidal and Simpson's 1/3 rule for numerical integration; estimate round-off and truncation error.

Ordinary Differential Equations

6. Solve simple ordinary differential equations (initial value and boundary value problems) using basic numerical techniques.

C Programming

7. Using C , write programs which use control statements and looping constructs, employ 1D and 2D arrays, call functions, and read and write to data files. Understand classes and pointers at a basic level.

Fundamentals of Software Packages

8. Use commercially available software packages, including Excel and MATLAB, to perform basic numerical tasks (calculate equations, graph data, perform curve-fitting, solve linear systems of equations, and manipulate matrices).

Real World Applications

9. Transform real-world engineering scenarios into problems that can be solved by numerical methods and computer programs.

Written Communication

10. Effectively communicate the procedures and results of scientific computing through technical reports.

Top

Fluid Mechanics

Physics and modeling of fluid flow; fluid statics, dimensional analysis, momentum, internal and external viscous flow, and fluid machinery.

ME EN 312

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ME EN 321; concurrent enrollment in Me En 362.
Taught	Fall, Winter, Summer

Course Outcomes

Fluid Properties

1. Understand viscosity as a fluid property and be able to compute shear stress involving Newtonian fluids. Understand the different types of fluids and the phenomena of surface tension and cavitation.

Pressure in Fluids

2. Understand the variation in pressure, and determine pressure at a point in a static gas or liquid. Be able to compute hydrostatic forces on fully and partially submerged surfaces, and be able to determine the location of the center of pressure.

Flowing Fluids

3. Understand field variables and be able to evaluate the local, convective, and total acceleration in flowing fluids. Recognize Lagrangian and Eulerian frames of reference. Understand pressure distributions normal to, and parallel to, streamlines in flowing fluids. Be able to appropriately apply Bernoulli's principle to fluid dynamic situations and recognize the limitations of this principle.

Conservation of Mass

4. Be able to derive the integral form of the conservation of mass principle from the Reynolds Transport Theorem and appropriately apply it to steady and unsteady flow situations with uniform or two-dimensional velocity distributions. Recognize and be able to utilize the differential form of conservation of mass.

Global Force/Momentum Balances

5. Be able to derive the integral form of the linear momentum principle from the Reynolds Transport Theorem and apply global force/momentum balances for stationary and constant velocity frames of reference with uniform or two-dimensional velocity distributions. Recognize the Navier-Stokes equations and solve them for simplified viscous flows.

Dimensional Analysis

6. Be able to determine appropriate dimensionless variables for a given dynamical situation. Understand the usefulness in presenting experimental data using dimensional analysis. Predict prototype analysis based on similitude and understand the pitfalls of modeling.

Mechanical Energy Equation

7. Understand the mechanical energy equation and be able to apply it to laminar and turbulent flow with minor and major losses through pipe networks.

Velocity Distributions

8. Understand and predict velocity distributions and boundary layer growth for flat plate boundary layers with laminar or turbulent flow. Understand flow separation, be able to predict skin friction and pressure drag for laminar and turbulent flows, and describe methods of drag reduction. Be able to determine Lift and explain how it is generated.

Form Drag and Flow Seperation

9. Be able to utilize the principles of fluid dynamics to analyze and solve real world flow phenomena.

Investigate Phenomena and Communicate Results

10. Be able to investigate elementary fluid dynamical phenomena experimentally, present experimental results graphically in terms of appropriate dimensionless variables, and effectively communicate results.

Top

Thermodynamics

Fundamentals of thermal energy and work; principle of state, conservation of mass, conservation of energy, increase of entropy principle; application to thermal and mechanical processes.

ME EN 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 123 & CHEM 105
Taught	Fall, Winter, Spring

Course Outcomes

1. Problem Solving

Each student can identify issues related to thermodynamics in real world problems, use basic concepts and fundamental laws to construct thermodynamic models, apply mathematical principles to solve these models, draw conclusions based on these solutions, formulate sound recommendations based on these conclusions, clearly document their analysis and clearly and persuasively present their conclusions and recommendations.

2. Thermodynamic Systems

Each student can select an appropriate system and model the interactions between the system and its surroundings.

3. Thermodynamic Properties and State

Each student can use the state postulate to fix the state of a thermodynamic system. Each student can distinguish between point functions (thermodynamic properties) and path functions (heat, work, mass transfer and entropy generation). Each student can use process diagrams to illustrate isobaric, isometric, isothermal, isentropic, isenthalpic processes.

4. Obtaining Thermodynamic Property Values

Each student can properly characterize a thermodynamic system as either an ideal gas, an incompressible substance, a superheated vapor or a saturated liquid-vapor mixture in order to identify appropriate property relationships. Each student can use equations of state, charts, tables or software to obtain thermodynamic property values.

5. Conservation of Mass and Energy

Each student can use conservation of mass and conservation of energy principles to build models of open and closed thermodynamic systems undergoing transient and steady processes.

6. Principle of Increasing Entropy

Each student can identify irreversibilities and determine whether a process may be approximated

as reversible, internally reversible or externally reversible. Each student can explain the increase of entropy principle, and can use the entropy balance equation to model open and closed systems undergoing transient and steady processes.

7. Analysis of Engineering Devices and Processes

Each student can describe the hardware, the operation, the purpose, and the approximations typically used to model common engineering devices and processes.

8. Cycles

Each student can list the devices and describe the processes needed to execute power and refrigeration cycles. Each student can build thermodynamic models in order to analyze and evaluate these cycles and to draw conclusions regarding the performance of these cycles.

Top

Design of Mechatronic Systems

Microcontroller-based mechatronic systems comprised of mechanical, electrical, and software subsystems. Electronics, printed circuit board design, microcontroller programming and interfacing, and mechanical prototyping.

ME EN 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC EN 301 & ME EN 273; concurrent enrollment in Me En 335.
Taught	Fall, Winter, Spring

Course Outcomes

Microcontroller Architectures, Memory, and Peripherals

1. Students should have an understanding of microcontroller architectures, memory, and peripherals, including timers, counters, interrupts, and analog-to-digital converters.

Programming Microcontrollers

2. Students should be able to program microcontrollers using a high-level programming language and event-driven programming techniques.

Integrating Circuits and Sensors

3. Students should know how to interface digital and analog circuits and sensors with a microcontroller.

Analog-to-Digital and Digital-to-Analog

4. Students should understand analog-to-digital and digital-to-analog conversion.

Serial and Parallel Communication Options

5. Students should understand basic serial and parallel communication options for microcontrollers.

Electromechanical Actuators

6. Students should gain familiarity with various electromechanical actuators, including DC motors, stepper motors, solenoids, and servomotors. Students should understand how DC motors function, their performance characteristics (torque/speed curves), and how to select a motor for a specific application.

Driving Motors

7. Students should be able to interface motors with a microcontroller and implement motor driver circuits.

Pulse-Width Modulation

8.Students should understand and be able to implement pulse-width modulation as a method for controlling motors.

Real World Design and Prototyping Tools

9. Students should have experience using real-world design and prototyping tools, including printed circuit board design software, breadboards, soldering, and mechanical prototyping tools.

Data Sheets

10. Students should be able to read data sheets and select electronic components to meet design requirements.

Design and Implement a Mechatronic System

11. Students should be able to design and implement a complete mechatronic system that integrates micro-controllers, electronic components, and mechanical components.

Top

Dynamic System Modeling and Analysis

Formulating mathematical models for mechanical, electrical, fluid, and combined systems; numerical solution of motion equations; first- and second-order systems, frequency response, and transfer functions.

ME EN 335

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MATH 303 & ME EN 273 & CE EN 204; or MATH 334 & ME EN 273 & CE EN 204; concurrent enrollment in Me En 330.
Taught	Fall, Winter, Spring

Course Outcomes

Mechanical Systems

1. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic mechanical systems, including inertia, compliance, dissipation, and power sources, and obtain equations of motion for linear motion and fixed-axis rotation.

Electrical Systems

2. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic electrical systems, including inductance, capacitance, resistance, power sources and amplifiers.

Basic Fluid Systems

3. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic fluid systems, including inertance, capacitance, resistance, and pumps.

Multi-domain Modeling

4. Students should have a knowledge of fundamental concepts of multi-domain modeling of electromechanical and fluid/mechanical systems and be able to develop lumped element models of these mixed systems.

Simulation Software

5. Students should know how to place equations of motion into state variable form, and to develop a simulation for basic non-linear and linear systems using MATLAB or some other simulation software.

Transfer Functions and Poles

6. Students should know how to manipulate a system of linear differential equations to obtain transfer functions and poles (eigenvalues).

Interpret Poles

7. Students should understand first and second-order systems and know how to interpret poles (eigenvalues) to define natural frequencies, damping ratios, time constants, and the natural response, step response, and impulse response of a system.

Frequency Response

8. Students should understand the concept of frequency response. They should understand the relationship between transfer functions and frequency response, and should be able to obtain frequency response plots for their system models using MATLAB.

Real World Application

9. Students should transform a real world dynamic system into an appropriate lumped element model and communicate the analysis results to others.

Top

Heat Transfer

Fundamentals of heat transfer; basics of conduction, convection, and radiation; mass transfer by analogy; heat exchangers; computer applications to practical design and analysis problems.

ME EN 340

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ME EN 312
Taught	Fall, Winter, Spring

Course Outcomes

1. Conservation Principles

Each student can apply conservation of mass and energy to a control volume or a control surface in order to build models of heat transfer processes and systems.

2. Fundamentals of Conduction

Each student can describe the phenomenological origin of Fourier's law and can use it in conjunction with the principle of conservation of energy to develop the heat diffusion equation. Each student can solve one-dimensional, steady-state problems using the heat diffusion equation and appropriate boundary conditions.

3. Extended Surfaces

Each student can analyze extended surfaces using the fundamentals of conduction. Each student can use fin efficiency and fin effectiveness to evaluate the performance of a fin or an array of fins.

4. Two-Dimensional Conduction

Each student can describe the analytical and numerical methods commonly used to analyze two-dimensional, steady state heat conduction. Each student can use finite difference methods to solve two-dimensional, steady state conduction heat transfer problems.

5. Transient Conduction

Each student can implement the lumped capacitance method, one-dimensional analytical solutions and transient finite difference methods to analyze transient conduction heat transfer problems.

6. Fundamentals of Convection

Each student can describe the physical phenomena associated with convection and use non-dimensional parameters to analyze convection heat transfer. Each student can calculate local and global convective heat fluxes using Newton's law of cooling.

7. Methodology for a Convection Analysis

Each student can use empirical correlations to analyze external and internal, forced and free convection problems.

8. Fundamentals of Radiation

Each student can describe the physical mechanisms involved in radiation heat transfer. Each student can model radiative heat transfer processes and include radiative processes when analyzing heat transfer at a surface.

9. Radiative Surface Exchange

Each student can calculate total, hemispherical radiative properties of real surfaces from their spectral, directional counterparts and evaluate the radiative heat exchange between surfaces and in diffuse, gray enclosures.

10. Problem Solving

Each student can identify heat transfer phenomena in various engineering applications, use fundamental principles to model these phenomena, solve the models using mathematical techniques, and document their analysis to convey their conclusions.

Top

Engineering Measurements

Fundamental concepts of measurement systems, characteristics of sensor signals, data acquisition, sensors, uncertainty analysis.

ME EN 362

Hours	2.0 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	ME EN 335 & STAT 201; Engl 316 or concurrent enrollment; concurrent enrollment in Me En 312.
Taught	Fall, Winter, Summer

Course Outcomes

Measurement Concepts and Calibration

1. Students should be familiar with concepts of measurement such as accuracy, precision, bias error, random error, and static sensitivity. Students should be able to calibrate a measurement system.

Spectral Analysis

2. Students should understand the basics of spectral analysis and how to interpret the frequency content of a signal.

Time and Frequency Response

3. Students should understand how the concepts of time and frequency response apply to measurement systems.

Data Acquisition and Signal Conditioning

4. Students should gain experience with data acquisition and signal conditioning. Students should understand the sampling process, how aliasing can occur, and how it can be prevented.

Experience with Sensors

5. Through laboratory exercises and projects, students should gain hands-on experience with a variety of sensors, such as strain gages, thermocouples, pressure transducers, and optical sensors.

Uncertainty Analysis

6. Students should be able to perform a basic uncertainty analysis for a measurement system.

Documenting and Reporting Experimental Results

7. Students should gain experience in documenting experimental work. Students should learn how to write a memo report and a full formal report.

Real World Application

8. Students will apply measurement procedures to real world problems.

Top

Mechanical System Design Fundamentals

Static and dynamic stress and failure analysis for mechanical systems.

ME EN 372

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 203 & ME EN 250
Recommended	Me En 273.
Taught	Fall, Winter, Spring

Course Outcomes

Machine Design Models

1. Create appropriate machine design models that represent real structures and components.

Free Body Diagrams

2. Draw a free body diagram of a structure of machine component. Show the loads and calculate the reactions. Draw shear moment diagrams.

Stress from Combined Loadings

3. Calculate stress in machine components due to combined loadings.

Deflection Estimates

4. Estimate the deflection of structural members under combined loading.

Application of Static Failure Theories

5. Select an appropriate static failure theory for a brittle or ductile material and apply it to predict failure loads and safety factors for various geometries and loading conditions.

Stress Analysis

6. Analyze the stresses in pressure vessels, press fits, curved beams, bolts, and bolted joints.

Buckling Prediction

7. Calculate buckling predictions for statically loaded compression members.

Cyclically Loaded Members

8. Construct S-N and Goodman diagrams for cyclically loaded members, calculate mean and alternating stresses and predict safety factors for infinite or finite life.

Design to Prevent Failure

9. Design machine members to prevent static, dynamic or fatigue failure. Integrate several components in a system to meet design requirements.

FEA Software

10. Gain experience using commercial FEA software to create models of simple structures and machine components. Solve these models to determine deflections and stresses, and understand how to interpret the results for engineering application.

Top

Manufacturing Processes

Common manufacturing processes, including technological limitations and economic considerations. Influence of product design on process selection and manufacturing efficiency.

ME EN 382

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	ME EN 250 & ME EN 272
Taught	Fall, Winter, Summer

Course Outcomes

Impact on Society

1. Demonstrate an understanding of the impact of manufacturing capability on society.

Manufacturing Processes

2. Recognize and develop a familiarity with a variety of manufacturing processes and how they are classified. Demonstrate understanding of the physical phenomena involved in how various families of manufacturing processes work.

Selection of Manufacturing Processes

3. Identify characteristics and capabilities of various manufacturing processes so that recommendations for process selection plans can be made. Recommend process parameters for various manufacturing processes. Identify materials and/or their properties that would be appropriate for successful use with various manufacturing processes.

Cause and Effect Relationships

4. Identify cause and effect relationships for various manufacturing process parameters so that inferences from process data can be made to obtain desired process results.

Practical Design

5. Make practical design recommendations to improve the manufacturability of component parts based on manufacturing process knowledge.

Capability and Development of Processes

6. Perform various manufacturing processes with real process equipment in order to begin to develop good engineering, judgment about the capability of various processes, and the development of process plans.

Team Projects

7. Work successfully in teams to modify the design, build, and test a practical product designed in Me En 272.

Writing & Presentation of Engineering Reports

8. Write and present professional quality engineering reports on manufacturing processes and projects. Communicate professional quality responses to open-ended manufacturing process questions.

Professional Skills in Mechanical Engineering

Preparation for future education and career; professionalism, time management and goal setting skills; translation of engineering models to application

ME EN 393

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ENG T 231
Taught	Fall, Winter

Course Outcomes

Engineering Skills

By the end of this course students will have concentrated their efforts on developing engineering skills that will help them in the engineering profession.

Future Education and Career Planning

Students will develop and execute a plan to prepare for their future education and career, including being aware of and evaluating various educational and employment opportunities.

Applications and Limitations of Engineering Models

Students will be able to translate problems encountered in practice into engineering models and will understand the associated limitations.

Lifelong Service and Professional Contributions

Students will develop the professionalism and skills to efficiently exploit their abilities, education, and experiences (personal and educational) for lifelong service and meaningful contributions.

Professional and Spiritual Interconnectedness

Students will understand the interconnectedness of their spiritual and professional lives.

Applications of Fluid Dynamics

One-dimensional compressible flow, shocks, expansions, nozzles; turbomachinery design and performance; pumps, compressors, fans, and turbines; introduction to CFD with applications.

ME EN 412

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 312
Taught	Fall

Course Outcomes

Governing Equations

Understand and be able to apply conservation of mass, momentum, and energy in differential and integral form to fluid dynamics problems.

External Flow

Be able to predict lift and drag for bodies in external flow fields using computational and empirical methods. Understand important viscous behavior like boundary layer growth, transition, separation, and wake development and their implications for performance and design.

Compressible Flow

Be able to solve quasi-one-dimensional compressible flow problems including the effects of area change and Mach number. Understand the behavior of shocks and expansion fans

Turbomachines

Be able to predict performance and understand fundamental design principles for various turbomachinery applications (e.g, jet engines, wind turbines, propellers, compressors).

Computational Fluid Dynamics

Become familiar with the basic terminology and methods of CFD including equation discretization, mesh generation, boundary conditions, convergence behavior, and post-processing. Be able to use CFD software to simulate basic fluid flow applications.

Applied Aerodynamics and Flight Mechanics

Modern applied aerodynamics, including performance, stability, and control of aerospace vehicles.

ME EN 415

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 312
Taught	Spring

Course Outcomes

Aerodynamic Design

Aerodynamic design of an airplane.

Performance Requirement Design

Designing an airplane with specific performance requirements.

Stable and Controlled Flight Design

Designing an airplane for stable and controlled flight.

Propulsion System Design

Designing an airplane propulsion system.

Structural Design

Airplane structural design.

Top

Applied Thermodynamics

Applied engineering thermodynamics including air and steam power cycles, thermodynamic relations, and introduction to combustion and equilibrium chemical reactions.

ME EN 422

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ME EN 321
Taught	Winter, Spring

Course Outcomes

Problem Solving

Each student can identify issues related to thermodynamics in real world problems, use basic concepts and fundamental laws to construct thermodynamic models, apply mathematical principles to solve these models, draw conclusions based on these solutions and formulate sound recommendations based on these conclusions.

Concepts and Laws of Thermodynamics

Each student can select a system, identify the heat, work, exergy and mass flow interactions occurring between the system and its surroundings and build models of steady-flow devices and transient thermodynamic systems.

Thermodynamic Property Relationships

Each student can describe the sensors and methods commonly used to measure temperature, pressure, specific volume and specific heats. Each student can use thermodynamic concepts and laws to develop relationships between observable thermodynamic properties and thermodynamic properties that cannot be directly measured.

Gas Power Cycles

Each student can use the basic concepts and fundamental laws of thermodynamics to model the performance of various gas power cycles. Each student can evaluate the impact of modifications such as reheat, regeneration and intercooling on the efficiency and net power produced by a gas power cycle and draw conclusions regarding the implementation of these modifications.

Jet Propulsion Cycles

Each student can use the basic concepts and fundamental laws of thermodynamics to analyze, evaluate and draw conclusions regarding the performance of jet propulsion cycles.

Vapor Power Cycles

Each student can use the basic concepts and fundamental laws of thermodynamics to analyze,

evaluate and draw conclusions regarding the performance of Rankine cycles, geothermal power cycles, and combined cycles.

Refrigeration Cycles

Each student can use the basic concepts and fundamental laws of thermodynamics to analyze, evaluate and draw conclusions regarding the performance of vapor-compression refrigeration cycles, absorption refrigeration cycles, multistage refrigeration cycles and cascade refrigeration cycles.

Alternative Energy Systems

Each student can use the concepts and laws of thermodynamics to analyze and evaluate renewable energy systems and to draw conclusions regarding the performance of these systems.

Psychometrics

Each student can calculate the properties of mixtures of air and water vapor to analyze, evaluate and draw conclusions regarding the performance of evaporative cooling systems, cooling towers, humidifiers and dehumidifiers.

Internal Combustion Engines

Fundamental operating characteristics of internal combustion engines, spark and compression ignition. Thermodynamic cycle analysis, performance and emissions characterization, and dynamometer testing on CFR and production engines.

ME EN 425

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	ME EN 321
Taught	Fall

Course Outcomes

Engine Parts and Functionality

A knowledge of internal combustion engine parts and their functionality.

Performance Metrics

The ability to calculate industrial standard internal combustion engine performance metrics.

Engine Cycle and Thermodynamic Modeling

An understanding of the internal combustion engine cycle and the ability to create and analyze a zero dimensional thermodynamic model.

Fundamentals of Combustion and Engine Performance

Understand the fundamentals of combustion such as flame temperature, flame stoichiometry, and flame speed and how combustion is coupled to engine performance.

Pollutant Formation and Control

Understand how the major pollutants of internal combustion engines are formed and controlled.

Gas Turbine and Jet Engine Design

Design and synthesis of land-based and aircraft gas turbines utilizing fluid flow and thermodynamic fundamentals. Extensive discussion of turbojet, turbofan, and turboprop engines.

ME EN 426

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 312 & ME EN 321
Taught	Winter

Course Outcomes

Fluid Mechanic and Thermodynamic Principles

Apply basic fluid mechanic and thermodynamic principles to understand how gas turbine engines operate.

Cycle Performance

Develop ability to analyze and predict the cycle performance of gas turbine engines.

Components, Purpose and Performance

Learn the components of gas turbine engines and their purpose. Understand how the performance of individual components contributes to the overall performance of the engine.

Analyze and Predict Performance of Individual Components

Learn how to analyze and predict the performance of individual gas turbine engine components

Application of Principles

Develop confidence in knowledge of gas turbine engine principles for application in academia or industry.

Top

(Me En-EC En 483) Design of Control Systems

Classical frequency response and time domain design of control systems. State variable control and computer simulation of control systems.

ME EN 431

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	ME EN 335; or EC EN 380
Taught	Fall even years

Course Outcomes

Simulation Models

The ability to develop (nonlinear) mathematical models of complex dynamic systems.

Final Value Theorem

Ability to use the final value theorem to predict steady state behavior.

Design Models

The ability to simplify those models into linear transfer function and state space representations.

Using Equations and Functions

Ability to model dynamic systems using differential equations, transfer functions, and state space equations.

Design Specifications

The ability to develop design specifications for physical systems with sensing and actuation limits.

Frequency Domain Techniques

Ability to design feedback systems using frequency domain techniques.

Design of PID Control

The ability to design PID controllers for systems described by linear time-invariant models.

State Space Techniques

Ability to design feedback systems using state space techniques.

Design of Loopshaping Control

The ability to use loopshaping techniques to design frequency domain controllers for systems described by linear time-invariant models.

Meeting Specifications

Ability to design feedback control systems to meet desired specifications.

Using Simulink and Matlab

Ability to simulate dynamic systems using Simulink and Matlab.

Design of Observer Based Control

The ability to design observer-based controllers for systems described by linear time-invariant models.

Kinematics

Relative motion of links in mechanisms; velocities and accelerations of machine parts; rolling contact; cams; synthesis of mechanisms. Includes computer-aided engineering techniques.

ME EN 437

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 204
Recommended	Me En 373.
Taught	Fall, Winter, Summer

Course Outcomes

Position

1. Determine the position of mechanisms.

Velocity and Acceleration

2. Analyze the velocity and acceleration of mechanisms.

Dynamics

3. Calculate the dynamics of mechanisms.

Synthesize

4. Synthesize mechanisms to perform specified tasks.

Analyze

5. Analyze the performance of non-linkage mechanisms such as cams and gears.

Intermediate Materials

Mechanical behavior of engineering materials including metals, plastics, ceramics, and composites.

ME EN 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 250 & ME EN 372
Taught	Fall even years

Course Outcomes

Stress-Strain Curves

Extract and interpret key features (e.g., Young's modulus, yield strength, tensile strength, and ductility, true stress, true strain) from engineering stress-strain curves.

Microstructure in Crystalline and Polymeric Materials

Gain a basic understanding of the microstructural basis for properties in crystalline and polymeric materials, and how microstructure may be altered in ways that are advantageous to mechanical design.

Energectic Bases

Acquire knowledge of the energetic basis for interaction of dislocations with other dislocations, point defects and precipitate phases, and its exploitation in strain, grain size, solid solution, and precipitate hardening mechanisms.

Energetic Principles of Failure

Obtain an awareness of the energetic principles of mechanical failure of metals, and its basis in elastic/plastic localization phenomena, and how to protect designs from failure.

Engineering Design Problems

Be able to integrate core competencies 1.-4. to tackle engineering design problems.

Composite Material Design

Macro- and micro-mechanical analysis and design of uni- and multidirectional composite materials.

ME EN 456

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 250
Taught	Winter

Course Outcomes

Micromechanics

Develop an understanding of the role of constituents in overall response of composite lamina (micromechanics).

Macromechanics

Develop an understanding of how a set of laminae with different orientations affect the overall laminate properties and response (macromechanics).

Elastic and Strength Properties

Analyze elastic and strength properties, and elastic response, of orthotropic and anisotropic materials having both continuous and discontinuous reinforcements.

Classical Lamination Theory

Use Classical Lamination Theory to assess the role of ply orientation on overall axial, bending and twisting elastic deformation of laminates under applied loads.

Failure Theories

Use failure theories for multiaxial loading to determine if a laminate composite will fail for known loading and use this knowledge to design failure resistant structures.

Top

Computer-Aided Engineering Applications

Application of computer-aided engineering tools to design; 3-D geometry and solid modeling; applying finite element analysis, kinematic analysis, and other software to engineering analysis.

ME EN 471

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 172 & ME EN 373 & CE EN 204; or ME EN 272 & ME EN 273 & CE EN 204
Taught	Fall

Course Outcomes

Product Lifecycle Management Methods

An understanding of Product Lifecycle Management (PLM) methods and techniques for enabling distributed teams to collaborate on a shared design.

Topology Optimization

An understanding of the underlying mathematics of topology optimization, its CAx methods, and the role topology optimization plays in conceptual, preliminary and detail product design.

Curves, Surfaces, and Solids

An understanding of the mathematics of curves, surfaces and solids, and a mastery of both surface and solid modeling techniques found in a modern commercial CAD package.

CAD Models

The ability to create robust parametric CAD models of mechanical components and assemblies.

Mass Properties, FEA, CFD, Animation, and Motion Analysis

An understanding of the underlying mathematics of Mass Properties, FEA, CFD, animation and motion analysis; their CAx methods, and the role these methods and applications play in preliminary and detail component and assembly design.

Preparing CAD Models for Rapid Prototyping

An understanding of the process for preparing CAD models for Rapid Prototyping.

Team Based Design Engineering

Experience practicing team based design engineering.

Understanding Global Competencies

An understanding of the following global competencies:
a. Experience working in or directing a team of ethnic and cultural diversity.
b. Understand cultural influences on product design, manufacture and use.
c. Understand how cultural differences affect how engineering tasks are performed.

Top

Mechanical Systems Design Applications

Theory, analysis, and design of mechanical systems and components.

ME EN 472

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372
Taught	Winter

Course Outcomes

Failure Prevention

Students will gain an increased understanding of failure prevention.

Analysis Tools

Students will gain an increased understanding of finite element analysis tools.

Basic Machine Components

Students will develop an understanding of basic machine components.

Mechanical Design and Documentation

Students will gain experience in mechanical design, including creating documentation.

Integrated Product and Process Design 1

Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property agreement required.

ME EN 475

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	ME EN 335 & ME EN 372 & ME EN 382; or EC EN 340 & EC EN 370 & EC EN 380; or ENG T 231 & MFG 340 & MFG 355; Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, electrical engineering, computer engineering, or related disciplines with instructor's consent. For Me En majors: Me En 362 or concurrent enrollment; Me En 393 or concurrent enrollment.
Note	MeEn 475 and 476 must be taken in consecutive fall and winter semesters.
Taught	Fall

Course Outcomes

Six Stages of Product Development

1. Understand the six stages of development through which designs evolve.

Design Evolution

2. Understand how the requirements, tests, and design evolve through each stage of development.

Network of Design Activities

3. Understand how a design network is used to cause the product information to evolve, and how the network can be customized for specific development projects.

Design Desirability and Transferability

4. Understand how artifact checks, performance testing, and validation testing are used to ensure the desirability and transferability of the design at each stage of development.

Skills in Product Development, Reporting and Presentation

5. Develop skills in project planning, idea generation, prototyping, developing engineering models, and conveying information both in writing and orally.

Organizational Policies

6. Understand how to work within organizational policies to accomplish important goals.

Project Teamwork

7. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.

Analysis and Communication

8. As a part of a team, develop an appropriate engineering analysis for your project, and effectively communicate the assumptions, intermediate steps, and results of this analysis.

Project Deliverables

9. Apply the understanding and skills from other outcomes while working with a project sponsor in a team setting to produce desirable and transferable product information through design, building, and testing.

Top

Integrated Product and Process Design 2

Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property agreement required.

ME EN 476

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	ME EN 475; For mechanical engineering students: Me En 312 and Me En 393; Me En 340 or concurrent enrollment. Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering technology, industrial design, or related disciplines with instructor's consent.
Note	MeEn 475 and 476 must be taken in consecutive fall and winter semesters.
Taught	Winter

Course Outcomes

Skills in Product Development Economics and Drawing Review

1. Develop skills in product development economics and engineering drawing review and checking.

Crucial Design Skills

2. Develop and demonstrate a deep understanding in at least three of the followings crucial design skill areas: Discovering, Creating, Representing, Modeling, Prototyping, Experimenting, Evaluating, Deciding, Conveying.

Team Synergy

3. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance synergy on a project team.

Analysis and Communication

4. As part of a team, develop an appropriate engineering analysis for your project, and effectively communicate the assumptions, intermediate steps, and results of this analysis.

Project Deliverables

5. Apply the understanding and skills from ME EN 475 and the other outcomes from ME EN 476 while working with a project sponsor in a team setting to produce desirable and transferable designs.

Top

Design for Manufacture and Assembly

Design practice for manufacturing considerations. Surface finish, tolerances, GD&T, and inspection and gaging principles. Application of computer-aided tolerancing and inspection.

ME EN 477

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MeEn 282, 372; or equivalent.
Taught	

Course Outcomes

Machining and Production Processes

Become familiar with common machining and production processes and their capabilities. Specify appropriate dimensional tolerances and surface finish for given applications based on a knowledge of machine capabilities and standard charts.

Feature Control Practice

Gain familiarity with manufacturing feature control practice using geometric dimensioning and tolerancing principles. Application of GD&T to assemblies.

Inspection Equipment/Datums

Experience with electronic and computer-based inspection equipment. Understand how functional gages are designed and used for inspection and part acceptance.
Understand the role of datums in design, production and inspection.

Stackup Model and Assembly Tolerance

Apply statistical tolerancing techniques to model stackup in assemblies. Learn techniques for establishing optimum tolerances for each assembly, based on the processes, geometry and materials.

Process Variations

Learn how to model process variations in 1-D and 2-D assemblies and predict the effect on critical features, product performance, and quality levels.

Assembly Model Variations

Learn how to account for dimensional, GD&T, and kinematic variations in an assembly model, both

statistically and worst case.

Competing Tolerance Requirements

Recognize the competing tolerance requirements between production processes, design performance and overall cost.

Computer Applications

Develop an overall perspective of computer applications in design for manufacturing.

Top

Manufacturing Systems Analysis and Design

Analysis, synthesis, and control of processing and assembly operations; mathematical modeling of manufacturing processes; systems integration; applying conservation principles to processing and assembly operations.

ME EN 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MeEn 250, 282; or equivalents.
Taught	

Course Outcomes

Material Bahavior

Students will apply fundamental mathematical models to understand and estimate material behavior in manufacturing processes.

Part Processing Requirements

Students will be able to estimate the force and power (energy/time) requirements to process conventional parts, using modern tools and machines.

Electronics Manufacturing

Students will understand the importance of and tools used in electronics manufacturing.

Flexible Manufacturing Centers and Systems

Students will understand the control processes used in Flexible Manufacturing Centers and Systems.

Information Synthesis

Students will be able to select and review technical paper(s) relating to a course subject area, digest relevant course information, and correlate the results with the mathematical models discussed in the course, also rendering good judgment as to whether the paper is useful to modern manufacturing methods.

Automation

Determining appropriate levels of manufacturing automation based on economics and productivity. Elements of automation, including sensors, robots, conveyors, and part feeders.

ME EN 486

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Production Processes and Limitations

Students will understand and apply fundamental approaches to the control of automated production processes and be able to understand the limitations of automation in modern factories.

Specifications and Capabilities

Each student will select a topic area in advanced automation and demonstrate current specifications/capabilities knowledge of this area, both to the instructor and to the other class students.

Factory Processes Control

Students will understand automation methodologies and the components and equipment used to control advanced factory processes through advanced on-line labs.

Process Simulation

Students will design and simulate automation processes using a simulation and control system and thus understand the power of simulation in evaluating potential automation solutions to manufacturing problems.

Top

Mentored Learning for Undergraduate Coursework in Mechanical Engineering

Selected topics in mechanical engineering.

ME EN 495R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Mentored Learning for Undergraduate Projects in Mechanical Engineering

Independent learning focused on an engineering project.

ME EN 497R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Problem Solving

By the end of this course students will become more independant with conceptualizing and actualizing solutions to various challanges facing the current industry.

Honors Thesis

ME EN 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research Techniques

Understand and apply techniques for finding technical papers related to a research topic.

Analyze and Evaluate Information

Analyze and evaluate previous research to identify known and unknown information.

Research Plan Creation

In conjunction with a faculty member create a research plan that will generate new information or synthesize existing information in such a way as to make a contribution to the defined topic.

Experimental and/or Investigational Research

Perform experimental or investigational research on the topic including evaluation, analysis, and synthesis of the information collected through experimental or investigational research.

Write, Edit, Revise

Complete a written thesis documenting the learned information including editorial review by faculty and revisions by the student.

Oral Defense

Defend the written thesis to a committee of faculty by oral presentation and examination.

(MeEn-CEEn) Design and Materials Applications

Materials selection in design; effects of materials properties, structure and geometry on performance; process selection and property modification techniques; basics of material failure mechanism.

ME EN 500

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Ce En 321 or Me En 372; Ce En 203; Me En 250; or equivalents.
Recommended	Me En 452.
Taught	Fall

Course Outcomes

Materials Properties and Selection

Understand how materials selection in design can be based on a variety of materials properties.

Structure and Properties Effects on Design

Understand effects of materials structure and properties on design and choices for static, impact, fatigue, elastic, and anelastic behavior.

Property Modification Techniques

Be familiar with important techniques used to modify engineering properties of a broad range of materials, such as metals, polymers, ceramics, composites, and biomaterials.

Analysis Techniques to Design for Failure Mechanisms

Understand the necessary analysis techniques to design for various material failure mechanisms.

Top

(MeEn-CEEn) Stress Analysis and Design of Mechanical Structures

Stress analysis and deflection of structures; general bending and torsion, with computer applications to mechanical and aerospace structure design.

ME EN 501

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372; or CE EN 321
Taught	Spring

Course Outcomes

Multi-Material Beams

1. Calculate the deflections of and stress in multi-material beams under force, moment, or temperature loads.

Three-Dimensional Structures

2. Understand the principles of stress and strain, including principal stress and strain, in general three-dimensional structures.

Torsion Bars

3. Calculate the deflections and stress in torsion bars of arbitrary cross section.

Beams in Unsymmetric Bending

4. Calculate the deflections and stress in beams in unsymmetric bending.

Top

(MeEn-CEEn) Plasticity and Fracture

Tensor algebra; stress and deformation tensors; relationships between dislocation slip, yielding, plastic constitutive behavior, and microstructure development; cracks and linear elastic fracture mechanics.

ME EN 503

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 250 & CE EN 203
Taught	Winter

Course Outcomes

Crystal Structure and Material Defects

Identify and describe the influence of crystal structure and material defects on tensile and fracture properties.

Stress Concentration

Describe the effects of a stress concentration as well as its influence on the fracture and fatigue life of a structural member.

Griffith Crack Criteria

Describe the principles of the Griffith Crack Criteria and its application to brittle materials, and its extension to ductile materials.

Failure Design Philosophy

Describe the Failure Design Philosophy and apply it to materials selection in an engineering application.

Member Life Prediction

Predict the life of a structural member of known material properties given the loading conditions and a known flaw size.

Impact of Microstructure Features

Describe the impact of various microstructure features on tensile, fracture and fatigue properties.

Class Selection

Select an appropriate material class given functional requirements, fatigue and fracture.

Top

(Me En-CE En) Computer Structural Analysis and Optimization

Matrix stiffness method for 1D, 2D, and 3D skeletal structure classes. Implementing the matrix stiffness method as a computer program. Nonlinear second-order structural analysis. Structural optimization techniques including stress-ratio method, gradient-based methods, and genetic algorithms.

ME EN 504

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372 & MATH 302; or ME EN 372 & MATH 313; or CE EN 321 & MATH 313
Taught	Fall

Course Outcomes

Member Stiffness and Force

Construct global and local member stiffness matrices and force vectors for any skeletal class and any distributed loading.

Structure Stiffness and Force

Construct structure matrices and vectors for both force and support displacement loads exploiting symmetry/antisymmetry and deformation assumptions.

Member Results

Construct member displacement vectors and free-body diagrams for any skeletal class.

Analysis Program Organization

Write down the basic organization and calling structure of a structural analysis program, and complete the pseudo-code for structure level routines.

Second Order Analysis

Derive first/second order equilibrium/compatibility equations, buckling loads/displacements, and structure elastic/geometric stiffness matrices for small trusses and single-member frames.

Matrix Vector Operations

Determine the number of FLOPS and perform the calculations for matrix-vector operations including triangularization, backsubstitution, Newton-Raphson iteration, and inverse iteration.

Stress Ratio and Exhaustive Search

Determine the number of FLOPS and perform the calculations for stress ratio optimization and exhaustive search, and construct design space plots if possible.

Optimality Criteria Algorithms

Determine the number of FLOPS and perform the calculations for finite difference / virtual work sensitivity analysis, Kuhn-Tucker condition evaluation, and optimality criteria algorithm.

Genetic Algorithms

Determine the number of FLOPS and perform the calculations for genetic algorithms with penalty/segregation fitness, tournament/roulette selection, point/uniform/blend crossover, dynamic mutation, and ranking/scoring/maximin fitness.

Execute Structural Software

Prepare input for linear analysis, nonlinear pushover analysis, gradient-based size optimization, and genetic-based size/shape/topology optimization programs for plane frames.

Applied Engineering Math

Advanced engineering mathematics that builds a foundation for graduate mechanical engineering courses and research. Topics include tensor analysis, vector calculus, and solution methods for partial differential equations.

ME EN 505

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 303; or MATH 334; or equivalent.
Taught	Fall

Course Outcomes

Notation

Use of index or tensor notation in mathematical analysis of the equations that govern continuum mechanics.

Separation of Variables

Employing separation of variables to the solution of classical (heat, Laplace, and wave equations) PDE's.

Transforms and Series

Applying Fourier transforms and series to the solution of PDE's and analysis of data.

Superposition

Applying the principle of superposition to PDE's with nonhomogeneities.

Cartesian and Cylindrical Coordinates

Solution of PDE's in Cartesian and Cylindrical coordinates.

Top

(Me En-CE En) Linear Finite Element Methods

Linear static finite element analysis of elastic solids; problem formulation, finite element discretization, and equation solving; stability, interpolation theory, and error estimates. Introduction to underlying continuum mechanics principles. Isogeometric analysis as a generalization of classical finite element analysis; basic principles of analysis-suitable computational geometry.

ME EN 507

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372; or CE EN 321
Taught	Fall

Course Outcomes

Linear Finite Element Methods

By the end of this course students will be able to correctly apply linear finite element methods in their engineering profession.

(Me En-CE En) Structural Vibrations

Dynamic analysis of single degree-of-freedom, discrete multi-degree-of-freedom, and continuous systems. Applications include aerospace, civil structures, and mechanical components.

ME EN 508

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321; or ME EN 372; CE En 321 or Me En 372 or equivalent.
Taught	Fall

Course Outcomes

SDOF Systems

Students will be able to determine the response of single degree-of-freedom (SDOF) systems in free and forced vibration, with and without damping.

MDOF Systems

Students will be able to determine the response of multi degree-of-freedom (MDOF) and continuous systems in free and forced vibration, with and without damping.

Application

Students will be able to apply the theory of structural vibrations to problems in civil or mechanical engineering.

Compressible Fluid Flow

One-dimensional analysis of compressible flow with area change, friction, heat transfer, shock waves, and combined effects, including experimental methods.

ME EN 510

Hours	3.0 Credit, 3.0 Lecture, 1.5 Lab
Prerequisites	ME EN 312; Me En 312 or equivalent.
Taught	Fall

Course Outcomes

Governing Equations and Basic Principles for Compressibility

Understand how to start from governing equations and basic principles to solve problems where it is desired to account for compressibility.

Concepts for Solving and Analyzing Compressibility Problems

Learn concepts needed to solve and analyze problems that account for compressibility in both internal and external flow applications.

Characteristics of Various Flows

Understand characteristics of isentropic flow, normal shock waves, oblique shock waves, Prandtl-Meyer flow, Fanno (friction) flow, Rayleigh (heat transfer) flow, and multidimensional flow.

Applications, Problem Solving, and Analyzation of Results

Discover applications where compressibility is important, how to solve problems, and analyze results.

Top

Intermediate Fluid Dynamics

Fluid transport properties, review of integral analysis, Navier-Stokes equations, exact and similarity solutions, boundary layers, vorticity, jets and wakes.

ME EN 512

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 312; or instructor's consent, Me En 505 previous or concurrent enrollment.
Recommended	Me En 505 or equivalent.
Taught	Fall

Course Outcomes

Integral Methods

Advanced ability to employ Integral Methods for modeling fluid flow phenomena.

Navier-Stokes Equations

Be able to derive the Navier-Stokes equations from an advanced understanding of fluid kinematics.

Solutions and Methods for Analyzing

Understand a range of solutions and methods to analyze the Navier-Stokes equations for both simplified and complex flow fields.

Modeling Specific Phenomena

Be able to model specific fluid flow phenomena such as creeping flows, laminar boundary layers, shear layers, jets, and wakes.

Intermediate Thermodynamics

Review of first and second law analysis; exergy; equations of state and other thermodynamic relations; properties of mixtures and multiphase systems; chemical reactions and equilibrium.

ME EN 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 321
Recommended	Me En 422.
Taught	Winter even years

Course Outcomes

Energy Equation

Be able to use the energy equation to analyze and evaluate thermodynamic systems. Be able to creatively use the energy equation in engineering applications.

Exergy Equation

Be able to use the exergy equation to analyze and evaluate thermodynamic systems. Be able to creatively use the exergy equation in engineering applications.

Finding Thermodynamic Properties and Applying Equations of S

Understand how thermodynamic properties are found and be able to apply equations of state to determine properties.

Determining Equilibrium and Applying to Systems

Understand the principles for determining equilibrium and apply those principles in gas phase and two-phase two component systems.

Statistical Thermodynamics

Understand and be aware of principles of statistical thermodynamics.

Combustion

Introduction to first- and second-law ideal gas combustion systems along with elementary models of homogeneous and heterogeneous premixed and/or diffusion flames.

ME EN 522

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 105 & ME EN 340 & ME EN 422; or CH EN 373 & CH EN 376
Taught	Winter odd years

Course Outcomes

Thermodynamic Evaluations

Be able to perform thermodynamic evaluations of combustion processes including heat release, heat of formation, temperature, and equilibrium calculations.

Reaction Mechanisms

Understand reaction mechanisms and apply calculations involving chemical kinetic reactions.

Evaluation of Systems

Evaluate simple combustion systems using conservation of mass, energy, and heat transfer.

Flame Types

Understand the physical phenomena of various flame types and how they can be applied to commercially relevant systems.

(Me En-CE En) Aircraft Structures

Requirements, objectives, loads, materials, and tools for design of airframe structures; static behavior of thin-wall structures; durability and damage tolerance; certification and testing. Airframe component team design project.

ME EN 523

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 304 & CE EN 321; or ME EN 250 & ME EN 372
Taught	Winter

Course Outcomes

Aircraft Design Approaches

Students will understand and be able to apply industry philosophies and critical criteria that drive the design and govern the certification of aircraft structures.

Analysis of Aircraft Structural Elements

Students will be able to analyze the in-plane (compression, shear, stability) and out-of-plane (bending, torsion, transverse shear) behavior (stresses, deflections, margins of safety) of structural elements (beams, columns, thin plates, open and closed sections, etc.) prevalent in aircraft.

Certification of Aircraft Structures

Students will understand important issues required for certification of aircraft structures (regulations, loads, fatigue, damage tolerance).

Dynamics of Mechanical Systems

Hamiltonian and Lagrangian dynamics, generalized coordinates, linear and angular momentum, Euler angles, rigid-body motions, and gyroscopic effects. Theory taught with applications integrated.

ME EN 534

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 335
Taught	Winter

Course Outcomes

Kinematics

Describe two- and three-dimensional kinematics of particles and rigid bodies.

Newton's Laws

Derive equations of motion of particles and systems of particles using Newton's laws.

Lagrangian Method

Derive equations of motion of particles and rigid bodies using the method of Lagrange.

Newtonian-Eulerian Methods

Derive equations of motion of rigid bodies using Newton-Euler methods.

Numerical Solutions

Develop numerical solutions of equations of motion to simulate the motion of particles and rigid bodies.

Top

Mechanical Vibrations

Introduction to energy methods for system modeling, eigenvalues and mode shapes, frequency response, and spectral characterization of vibrations.

ME EN 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 335; or equivalent.
Taught	Fall

Course Outcomes

Analysis and Modeling/Single and Multi-Degree Systems

Students will gain an increased ability to analyze and model free and forced single and multi-degree-of-freedom systems.

Vibration Theory

Students will gain an increased ability to apply vibration theory to the design of structures, engineering systems, and devices.

Analysis and Modeling/Continuous Systems

Students will gain experience in analysis and modeling of continuous systems.

Advanced Mechanisms, Robotics

Kinematics and dynamics of advanced mechanisms, such as robots, with computer simulation of mechanism motion.

ME EN 537

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 437; or equivalent.
Taught	Winter

Course Outcomes

Applications, Terminology, and Limitations

Students will learn most common robot applications, terminology, and limitations.

Design and Motion

Students will be exposed to and be able to exercise basic robot design and motion concepts, both mathematically and in practical labs, such as homogeneous transformation used in forward and inverse kinematics, and robot trajectory generation.

Teach Pendant and Programming

Students will learn how to use a teach pendant and how to program a robot.

Joint Space vs. Cartesian Space

Students will differentiate between joint space and Cartesian space and the mathematical methods used to move from one space to the other.

Mechanism Comparison

Students will compare the kinematics of emerging parallel mechanisms to those of more conventional serial mechanisms.

Work Cells

Students will apply robot simulation to preliminary design of robot-centered work-cells.

Top

Compliant Mechanisms

Design and analysis of compliant mechanisms and compliant structures. Large-deflection analysis/force displacement relationships; mechanisms synthesis.

ME EN 538

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372; Me En 475 or concurrent enrollment; or instructor's consent.
Taught	Fall

Course Outcomes

Fundamentals of Compliant Mechanisms

Understand the fundamentals of compliant mechanisms, including flexibility vs. strength and displacement loads vs. force loads.

Nonlinear Deflections

Analyze the large, nonlinear deflections of flexible members.

Failure

Analyze, predict and prevent failure of compliant mechanisms.

Force-Displacement Relationships

Analyze the force-displacement relationships for compliant mechanisms.

Task-Specific Design

Design compliant mechanisms for specified tasks.

Intermediate Heat and Mass Transfer

Analytical approaches to conduction, convection, and radiation heat transfer. Introduction to mass transfer.

ME EN 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 340; or equivalent; concurrent enrollment in Me En 505.
Taught	Winter

Course Outcomes

Modeling Steady and Transient Conduction Problems

Each student can develop engineering models of multi-dimensional steady and multi-dimensional transient conduction heat transfer problems.

Modeling Convection Problems Using Analytical Approaches

Each student can develop engineering models of convection heat transfer problems using analytical approaches based on boundary layer theory when possible or based on empirical Nusselt number correlations when analytical solutions are not possible.

Modeling Surface Exchange Problems

Each student can develop engineering models of radiation surface exchange problems for both gray and spectrally selective surfaces.

Modeling Mass Transfer

Each student can develop engineering models of mass transfer by analogy with heat transfer.

Mathematical Methods for Solutions to Various Problems

Each student can implement advanced engineering mathematical methods to obtain solutions to models of conduction, convection and radiation heat transfer problems and to mass transfer problems.

Top

Computational Fluid Dynamics and Heat Transfer

Fluid dynamics and heat transfer analysis by numerical methods. Theory and implementation of finite difference and finite volume methods.

ME EN 541

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 312 & ME EN 340; or instructor's consent.
Taught	Winter

Course Outcomes

Numerical Analysis

Understand the fundamental concepts and techniques used in the numerical analysis of fluid flow and heat transfer.

Verification and Validation Practices

Apply computational verification and validation practices for fluid flow and heat transfer codes.

Finite Difference and Control Volume Methods

Solve 1D diffusion and convection-diffusion fluid flow and heat transfer problems using finite difference and control volume methods.

Pressure-Velocity Coupling

Understand concepts of control volume methods for pressure-velocity coupling.

Commercial Codes

Have a necessary foundation for setting up and analyzing fluid flow and heat transfer problems using commercial codes.

Turbulence Closure Problem

Understand the basic concept of the turbulence closure problem and how it leads to turbulence models.

Top

(Me En-EC En) Microelectromechanical Systems (MEMS)

Design, fabrication, and applications of MEMS. Mechanical properties governing their design and reliability and the processing technologies used to fabricate them.

ME EN 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC EN 450; or ME EN 372; or equivalent.
Taught	Fall even years

Course Outcomes

Mechanical Performance

1. Use mechanics principles to analyze the mechanical performance of microsystems.

Tools and Processes

2. Be familiar with the tools and processes used in micromaching of microelectromechanical systems (MEMS).

Analyze and Design

3. Use principles of physics to analyze and design MEMS, including sensors and actuators.

Top

Neuromechanics of Movement

Biomechanics and neural control of human movement. Dynamics of neuromusculoskeletal system; human-machine interaction; movement disorders and assistive/rehabilitative technology; current research techniques.

ME EN 552

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 335; or instructor's consent.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Introduction to Biomechanics

Mechanics of biological systems. A continuum mechanics-based approach to the structure, function, mechanical response, and active remodeling of hard and soft tissues of the body.

ME EN 555

Hours	3.0 Credit, 3.0 Lecture, 0.3 Lab
Prerequisites	ME EN 312 & ME EN 372 & MATH 303; or ME EN 312 & ME EN 372 & MATH 334; or equivalent.
Recommended	Me En-CE En 506.
Taught	Fall

Course Outcomes

Hard and Soft Tissues

Describe the structure, function, mechanical properties, and active remodeling of hard and soft tissues.

Muscles

Describe muscle structure, muscle force sharing, passive and active muscle response.

Skeletal Dynamics and Joint Reaction Forces

Compute skeletal dynamics and joint reaction forces during human locomotion.

Finite Deformation Analysis

Apply finite deformation analysis to compute soft tissue strains based on marker motion.

Physiologic Systems

Utilize mechanical engineering principles to evaluate the mechanics of physiologic systems in the human body.

Ethics

Develop an approach for resolving ethical dilemmas related to biomedical engineering.

Top

Metallurgy

Fundamental principles of physical metallurgy and their application to design.

ME EN 558

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 250; or instructor's consent.
Taught	Fall even years

Course Outcomes

Characterization Techniques

Describe common material characterization techniques and their strengths and limitations.

Point and Line Defects

Describe the interactions of point and line defects and their effects on mechanical properties.

Phase Diagrams

Be able to draw, describe and use phase diagrams associated with commonly used engineering materials.

Evolution of Microstructure

Describe/model the evolution of microstructure under non-steady state conditions.

Diffusion

Model non-steady state diffusion in solid materials and predict the difference as a function of time, temperature and species.

Thermodynamics of Nucleation

Describe the thermodynamics and prevalence of both homogeneous and heterogeneous nucleation.

Isothermal Transformations

Describe the effect of nucleation and growth kinetics on isothermal transformations.

Hardening Mechanisms

Describe the theory behind the different hardening mechanisms of solid materials.

(Me En-Phscs) Fundamentals of Acoustics

Vibrating systems, elastic media, mechanical energy, and radiation. Sound generation, transmission, reflection, and reception.

ME EN 561

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 318; or equivalent; Phscs 461 or concurrent enrollment.
Recommended	Phscs 318, 321; or equivalents.
Taught	Fall

Course Outcomes

Vibration and Sound

Conceptualize and solve problems in fundamental areas of vibroacoustics, including: strings, rods, membranes, beams, plates, plane and spherical waves, reflection and transmission phenomena, and radiation of sources.

Analyze Acoustical Data

Acquire and analyze acoustical data for physical understanding, and document the results in the form of technical laboratory reports.

(Me En-Phscs 660) Acoustic Systems

Analyzing and modeling electro-mechano-acoustic systems. Transducers, calibration, and acoustical measurements. Sound sources, arrays, coupling, radiation, and directivity. Duct acoustics and acoustic filters.

ME EN 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 561; or instructor's consent.
Taught	Winter

Course Outcomes

Electro-Mechano-Acoustic Systems

Model and analyze electro-mechano-acoustic systems using various theoretical, numerical, and experimental tools.

System Modeling and Analysis

Work independently and collaborate with others on problems involving system modeling and analysis, acoustical measurements, analogous circuits, source radiation, source coupling, arrays, the Kirchhoff-Helmholtz integral theorem, self and mutual radiation impedance, transducers, duct acoustics, electro-mechano-acoustic filters, and energy-based acoustics.

Prepare for Research

Develop skills and proficiencies in all of these areas and become aware of key resources for further study.

Prepare for a Career in Acoustics

Become more effective researchers and designers for future work in academics or industry.

(Me En-CE En) Computer-Aided Engineering Software Development

Programming methods for development of engineering software. Data structures, architecture, libraries, and graphical user interfaces, with applications to CAD systems.

ME EN 570

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 373; or ME EN 273; or C programming.
Taught	Fall

Course Outcomes

Complex Algorithms

Ability to develop complex algorithms.

Algorithm Conversion

Ability to convert algorithms into a commonly used computer language.

Scientific Visualizations

Ability to create interactive scientific visualizations of complex data.

Graphical User Interfaces

Ability to create graphical user interfaces that facilitate ease of use.

Product Development Automation

Design automation, network modeling of design systems, mass customization, agent-based methods, transnational design systems. Aerospace, automotive, and consumer product applications.

ME EN 574

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 476; Me En 475; or equivalents.
Taught	

Course Outcomes

Theory and Methods

Understand the theory and methods for managing all of the engineering data, IP, product knowledge, etc. used to conceive, model, analyze, produce, maintain, and retire or recycle engineered products.

Commercial PLM Tools

Understand how to customize commercial PLM tools to either address deficiencies in their current offerings or to incorporate company-proprietary PLM methods and procedures.

Data Mining and Process Improvement

Learn the process of engineering data mining and engineering process improvement through variant product lifecycle analysis.

Top

(Me En-CE En) Optimization Techniques in Engineering

Application of computer optimization techniques to constrained engineering design. Theory and application of unconstrained and constrained nonlinear algorithms. Genetic algorithms. Robust design methods.

ME EN 575

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 302; or MATH 313; C, C++, or similar computer language.
Taught	Winter

Course Outcomes

Define and Use Optimization Terminology and Concepts

Define and use optimization terminology and concepts, and understand how to classify an optimization problem.

Application of Optimization Methods to Engineering Problems

Apply optimization methods to engineering problems, including developing a model, defining an optimization problem, applying optimization methods, exploring the solution, and interpreting results. Students will demonstrate the ability to choose and justify optimization techniques that are appropriate for solving realistic engineering problems.

Unconstrained Optimization Theory for Continuous Problems

Understand and apply unconstrained optimization theory for continuous problems, including the necessary and sufficient optimality conditions and algorithms such as: steepest descent, Newton's method, conjugate gradient, and quasi-Newton methods.

Computing Derivatives for Gradient-based Optimization

Understand and apply methods for computing derivatives such as: finite differencing, symbolic differentiation, complex step, algorithmic differentiation, and analytic methods (direct and adjoint).

Gradient-free and Discrete Optimization Algorithms

Understand and apply gradient-free and discrete optimization algorithms such as: genetic algorithms, particle swarm optimization, branch and bound, exhaustive search, and simulated annealing.

Constrained Optimization Theory for Continuous Problems

Understand and apply constrained optimization theory for continuous problems, including the Karush-Kuhn-Tucker conditions and algorithms such as: generalized reduced gradient, sequential quadratic programming, and interior-point methods.

Determining a Robust Design

Apply optimization techniques to determine a robust design.

Optimization Software

Be able to implement basic optimization algorithms in a computational setting and apply existing optimization software packages to solve engineering problems.

Top

Product Design

Emerging design methodology and design strategies for complex systems, including decomposition methods and sensitivity analysis. Advanced CAD/CAE/CAM technologies applied to design.

ME EN 576

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 475; or instructor's consent.
Taught	Fall

Course Outcomes

Product Development Process

Developing and executing a suitable product development process that meets the specific needs of a product's design or the needs of a specific design environment.

Top

CAD/Cam Applications

Principles and practices involved in parametric surface and solid modeling, associativity, NC tool path generation, etc. Construction of complete CAD models for design, analysis, and manufacture.

ME EN 578

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 471 & ME EN 570
Taught	Winter

Course Outcomes

Programming Proficiency

Proficiency in Visual Basic/C/C programming applied to engineering problems.

Commercial CAD API Toolkits

Master programmatic wireframe, surface and solid modeling techniques through the use of commercial CAD API toolkits, e.g. CATIA or NX.

Analysis Models

Learn and demonstrate programmatic creation and manipulation of analysis models via CAE API toolkits, e.g. HyperMesh, Nastran, ANSYS, Gambit, Fluent, ADAMS, etc

Isight

Use and program Isight to optimize programmatic CAD/CAE applications.

Database Structures

Understand database structures and how to programmatically create, access, control, etc. the data.

Proof-of-Concept

Develop a proof-of-concept for an industry or research sponsored application.

Collaboration

Work in collaboration with fellow teammates to accomplish both the learning of the CAx tools and the executing of the industrial project.

Top

Global Product Development

Preparing students to be leaders in globally-influenced product development organizations. Includes visits to U.S. and overseas companies and universities.

ME EN 579

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 476; Me En 475 or equivalents; senior or graduate status.
Taught	
Offered	Study Abroad only.

Course Outcomes

Global Product Development Issues

Understand issues associated with a global product development including developing product needs in unfamiliar cultures, managing distributed design teams and manufacturing at remote and/or distributed sites. Appreciate first-hand how global companies approach these issues.

Global Design Strategies

Understand design strategies in a global environment.

Global Product Development Challenges

Appreciate the challenges in managing product development across different countries, cultures and languages, and how companies apply appropriate tools and processes to address these challenges.

Outsourcing

Understand why outsourcing is such a big deal with companies.

Effects of Globalization

Understand how globalization affects us.

Design and Manufacturing Capabilities in Other Countries

Understand the design and manufacturing capabilities of other countries and how companies leverage these capabilities (work with, deal with, manage) in a cross cultural team environment.

Integrated Nature of a Global Economy

Appreciate the integrated nature of business, engineering, law and other disciplines in a global economy.

Top

Manufacturing Process Machine Design

Applying machine design principles to manufacturing process machines and tooling; integrating machine elements; precision machine design. Designing and analyzing the effects of loading, combined stresses, and deflections on machine process capability. Sensors applied to process machines.

ME EN 584

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372; or equivalent.
Taught	

Course Outcomes

Improving Performance Capabilities

Independently learn about a process to make recommendations for changes in the design of a process machine in order to improve the machine's performance capabilities.

Specialized Components

Make recommendations for use of specialized components for the design and development of manufacturing equipment based on sound analysis and good engineering judgment.

Cause and Effect Relationships

Identify cause and effect relationships between manufacturing process parameters and the machine capabilities that perform these manufacturing processes.

Machine Selection

Recommend the selection of manufacturing process machines to perform various manufacturing processes.

Research, Learning, and Teaching

Do individual research and learning and synergistically, as part of a team, teach what they have learned to others in a professional manner.

Top

Manufacturing Competitiveness: Quality and Productivity

Production strategies to improve quality, decrease cost, and increase throughput to create market advantage; effective production management systems; applying quality improvement tools to process data; theory of constraints and lean production.

ME EN 585

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 282; or ME EN 382
Taught	Winter odd years

Course Outcomes

Factory Elements

Understand the essential elements for having a productive, profitable factory.

Factory Performance

Understand the metrics used to quantify the performance of a factory, and be able to assess this performance.

Minimizing Variability

Learn how important variability is in reducing quality and productivity, and find ways to minimize variability and its effects.

System Modeling

Learn methods of modeling production systems in order to predict probable performance.

Statistical Techniques

Understand appropriate use of statistical techniques for identifying special cause and common cause variation in order to respond appropriately.

Production System Improvement Project

Communicate the basis and justification of a production system improvement project in oral and written form.

Top

Advanced Dynamics

ME EN 595R

Hours	0.5 - 18.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	

Course Outcomes

Technical Writing

Students will develop technical communication writing skills through writing a report and/or presenting an oral presentation.

Application of Principles

Students will increase their ability to apply engineering principles through design, experimentation, analysis, or other engineering approaches.

Top

Special Topics in Mechanical Engineering

ME EN 595R

Hours	0.5 - 18.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Topic Understanding

Students will develop an understanding of a timely topic in mechanical engineering.

Top

Topics in Materials

ME EN 595R

Hours	0.5 - 18.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	

Course Outcomes

Technical Writing

Students will develop technical communication writing skills through writing a report and/or presenting an oral presentation.

Application of Principles

Students will increase their ability to apply engineering principles through design, experimentation, analysis, or other engineering approaches.

Topics in Mechanical Design

ME EN 595R

Hours	0.5 - 18.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	

Course Outcomes

Application of Principles

Students will increase their ability to apply engineering principles through design, experimentation, analysis, or other engineering approaches.

Technical Writing

Students will develop technical communication writing skills through writing a report and/or presenting an oral presentation.

Top

Introduction to Middle East Studies

Introduction to Middle East from historical, art/literary, and various social science perspectives, including introduction to disciplinary methodologies and major issues of interest.

MESA 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Introduction to the Study of the Middle East

This course identifies major areas of study necessary to understand the culture, context, and areas of current concern in the Middle East and poses questions as to how we may go about learning.

Top

Introduction to the Religion of Islam

Exploring the rise of Islam, the life of Muhammad, basic beliefs and practices, major figures and movements, and contemporary political and social issues.

MESA 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Introduction to Religion of Islam

Study of the sources, history, principles of religion, law, and practice from the founding of Islam until the present period.

Top

Islam in Contemporary Society

Islam in modern society: doctrine, practices, institutions, approaches to the challenges of modern life; the rise of fundamentalism.

MESA 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MESA 250
Taught	Winter

Course Outcomes

MESA 350 Contemporary Islam

Class on issues which face contemporary Muslims throughout world.

Top

Directed Middle East Study

Study and research in the Middle East.

MESA 398R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent; Middle East Studies/Arabic coordinator's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Directed Reading

This course is for students who wish to follow a well-defined, advanced course of study achieved through readings, research and critique supervised by a professor.

Academic Internship

Individualized work or volunteer experience in the Middle East or with an organization dealing with the Middle East. Must be coordinated through International Study Programs or the Washington Seminar and with the consent of the Middle East Studies/Arabic coordinator.

MESA 399R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Middle East Studies/Arabic coordinator's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Professional Knowledge

The students will utilize a significant range of skills and abilities in a professional setting.

Top

The Figure of Muhammad in Islamic Tradition

Introduction to Muslim views regarding Muhammad as found in two significant Islamic textual traditions: The Sira (biography)/Maghazi (battles) and Hadith (acts) of Muhammad.

MESA 451

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARAB 202
Taught	

Course Outcomes

Subject Knowledge

Students will demonstrate knowledge in figure of Muhammad.

Top

Topics in Middle East Studies

Topics vary.

MESA 467R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Topics courses are narrowly-defined classes offered sporadic

Substantative Research Papers
Library/Internet Research

Key Issues In Understanding the Middle East

Topics vary. Guest and BYU professors teach subjects in an intensive format over a limited time period through lectures and readings.

MESA 468R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Library/Internet Research

Course on special topics taught by guest professors at the University.

Top

Capstone Arabic

Readings in Arabic texts supporting research for the MESA capstone seminar.

MESA 494

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ARAB 300 & ARAB 302
Taught	Winter

Course Outcomes

Capstone Arabic

Capstone Arabic provides an advanced course in reading Arabic primary and secondary sources for Capstone Seminar research.

Senior Seminar in Middle East Studies

Capstone course, including major research paper demonstrating ability to integrate cross-disciplinary information and methodology.

MESA 495

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PL SC 200 & ARAB 302; or POLI 200 & ARAB 302
Taught	Fall, Winter

Course Outcomes

Capstone Seminar MESA 495R

The Capstone Seminar is the final course in the major. It combines in-depth research on a narrow topic with a research, analysis and writing of a substantive research paper in multiple drafts utilizing peer reviews at two stages, an oral presentation of findings, and research utilizing Arabic sources.

Modern Manufacturing

Methods and characteristics of successful manufacturing engineers and managers. Introduction to engineering and technology, design, and project management. Lab.

MFG 130

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Systems and Best Practices

Describe the four pillars of manufacturing and their relationship to the manufacturing system.

Leadership, Professionalism and Communication

Help student prepare for productive professional lives including insights into leadership, teamwork and innovation.

Material Removal

Methods and procedures to shape materials using basic machine tools; cutting theory, tool selection, metrology methods, and machine operation. Introduction to computer numerical control.

MFG 220

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Math 111 or equivalent; MFG 130 or concurrent enrollment.
Taught	Fall

Course Outcomes

Safety

Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.

Metal Removal

Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.

Teamwork

Students will learn to work on teams while preparing presentations on new metal removal manufacturing processes, and while developing a manufacturing plan for a proposed production run.

Top

Computer-Aided Manufacturing

Manual and computer-assisted programming of computer numerical controlled (CNC) equipment. Developing CNC programs to manufacture parts for high production.

MFG 230

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MFG 220 & ME EN 172; or MFG 220 & ME EN 272
Taught	Winter

Course Outcomes

Safety

Students will understand and be able to apply correct shop safety principles and precautions while working with or around metal cutting machinery.

Metal Removal

Students will understand and be able to apply the correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools.

CAD/CAM/CNC

Students will understand and be able to apply correct principles related to manual G&M code development, as well as the use of CAD & CAM systems to create G&M code programs.

Design

Students will understand and be able to apply the design process while solving manufacturing related problems.

Manufacturing Leadership

Lectures on personal and professional development emphasizing internship preparation. Field trips observing different types of manufacturing.

MFG 291

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Leadership

Understand that the essence of leadership is to build people through development of individual talents and fostering life-long growth and learning

Responsibility

Accept lifelong professional, ethical, and social responsibilities

Lifelong Learning

Understand how to stay current in technical fields and how to engage in lifelong learning

Global Environment

Comprehend the challenges of global supply chains

Top

Metals Processes

Capabilities and applications of common metal-processing methods, including relationships between part design, material, and process parameters.

MFG 331

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	ME EN 250
Recommended	CE En 203 is strongly recommended.
Taught	Fall

Course Outcomes

Design, Materials, and Manufacturing Processes

Students will learn principles of casting, metal forming, and welding/joining by lecture and by hands-on lab activities. A final project requires students to design and make a part or assembly using the knowledge they gained during the course.

Quality Systems in Manufacturing

Tools and principles of quality in manufacturing systems based on the Six Sigma process. Basic tools, variation, loss function, cost of quality, SPC, DOE, and FMEA. Comprehensive project required.

MFG 340

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	STAT 201; or concurrent enrollment.
Taught	Winter

Course Outcomes

Teamwork

Function effectively as a member or leader of a team

Communication

Understand how to communicate effectively to build relationship and to gain support and commitment of others

Variation

Asses the nature, types and impact of variation

Quality

Understand how to effectively define, measure, analyze, improve and control quality

Regulatory Standards

Understand the reason for, and impact of, national and international regulatory standards and certifications

System Improvement

Understand and implement system improvement concepts (lean, TOC, etc.)

Communication Tools

Use modern tools of communication such as charts, graphs, media, and other visual aids

Plastics Materials and Processing

Understanding plastic materials, properties, and uses. Survey of plastic-manufacturing processes. Designing plastic products and manufacturing systems.

MFG 355

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	ME EN 250; or CH EN 378; or instructor's consent.
Taught	Winter

Course Outcomes

Materials

Understand the behavior and properties of plastic materials and use that knowledge to select appropriate materials for a given application or process (SME Pillar 1).

Design

Understand the design of plastic products and the equipment, tooling, and environment necessary for their manufacture (SME Pillar 2).

Science

Be able to apply knowledge of mathematics, statistics, science and engineering in plastics manufacturing (SME Pillar 1).

Creativity

Be able to identify, formulate, and solve manufacturing-engineering problems related to plastics (SME Pillar 2).

Processes

Understand a variety of manufacturing processes for plastics and be able to select the appropriate process for a given task (SME Pillar 1).

Top

Academic Internship

Working in teams to solve problems encountered in industry. Project management and reporting under guidance of industry supervisor and department faculty.

MFG 399R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Second-semester junior standing and faculty authorization.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experiences

Student acquires professional experiences in Manufacturing.

Professional Communication

Student demonstrates professional communication skills (report).

Convert Professional Experience into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

International Internship

Working in teams to solve problems encountered in international industry. Project management and reporting under guidance of industry supervisor and department faculty.

MFG 399R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Second-semester junior standing and faculty authorization.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Communication

Student demonstrates professional communication skills (report).

Manufacturing Practicum

Working in teams to solve problems encountered in local industry. Project management and reporting under guidance of industry supervisor and department faculty.

MFG 399R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Second-semester junior standing and faculty authorization.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Communication

Student demonstrates professional communication skills (report).

Tool Design

Designing special tooling for manufacturing processes using solids-modeling design systems.

MFG 431

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MFG 230 & MFG 331
Note	As a prerequisite, MFG 331 can be taken concurrently. Contact instructor.
Taught	Fall, Spring Contact Department

Course Outcomes

Design Process

Students will utilize past and additional instruction on the Design Process to solve manufacturing problems related to tooling.

Design of Tooling

Students will understand and be able to apply correct principles when design tooling for a variety of processes, such as gages, fixtures, jigs, punch and die, and injection molds.

Cost Analysis

Students will understand and apply correct principles related to cost analysis and estimation when designing tooling for manufacturing.

Introduction to Manufacturing Automation

Sensors, actuators, robotics, part feeding and assembly, PLCs, pneumatic and hydraulic control, justifying automation.

MFG 434

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	CE EN 203 & MFG 230 & IT 318
Note	IT 318 may be taken concurrently. Contact the instructor.
Taught	Winter

Course Outcomes

Automation System and Process Design

Select appropriate automation processes and equipment

Creativity & Problem Solving, Materials, Science, and Experi

Assess the impact of part variation on production

Best Practices, Science, Competitiveness and Creativity and

Apply Design-for-Assembly principles to manufactured parts

Leadership and Communication

Communicate effectively through technical reports

Innovation and Entrepreneurship

Develop ideas into a business model. Learn product development. Entrepreneurial concepts and practices. Strategic planning and global competitiveness.

MFG 479

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Entrepreneurial Team

Participate effectively on an entrepreneurial founding team

Evaluation

Evaluate business ideas, opportunities, and plans

Financial Planning

Plan a new business financially

Terminology

Understand and apply entrepreneurial terminology to the entrepreneurial and investment ecosystems

Start-up Strategies

Formulate strategies to overcome common start-up business challenges

Business Plan

Prepare effectively a written business plan

Presentation

Make an effective oral business plan presentation

Top

Process Planning and Systems Design

Analyzing product specifications and production requirements for manufacturing. Equipment selection and justification; facility layout and material-handling system design; process-improvement techniques.

MFG 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MFG 340
Taught	Fall, Spring

Course Outcomes

System Metrics

Understand key metrics in manufacturing and how they are influenced

Process Improvement

Know how to apply process-improvement methodologies (Lean, Six Sigma, TOC, etc.) in order to reduce lead times and to improve efficiency and quality

Process Planning

Develop a detailed process plan.

System Design

Design a cell, production line, or a plant layout.

System Elements

Understand the different elements comprising a manufacturing system and how they interact.

Project Planning

Develop a schedule for system implementation and startup.

Production & Inventory Control

Understand the principles and techniques of production and inventory control.

Discrete-Event Simulation

Use discrete event simulation to evaluate a system design.

Resource Planning

Determine resource requirements based on standard operator times and effective machine cycle times.

Economic Analysis

Perform an economic anaysis for justifying a proposed manufacturing solution.

Capstone: Production Management

Production operations: designing a production system, carrying our production functions, and procuring materials from suppliers. Principles of lean operations, project management, and industrial supervision.

MFG 485

Hours	3.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	MFG 340 & MFG 431 & MFG 480
Taught	Winter, Summer

Course Outcomes

Capstone

Students will gain practical experience through mentored sponsorship from the surrounding industry and will apply design principles to create solutions to current industry needs.

Special Problems in Manufacturing Engineering Technology

MFG 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Creativity and Lifelong Learning

Students will learn to work to independently and to take initiative in completing a project while being guided by a faculty member.

Top

Professional Seminar

Lectures on professionalism, leadership, and career and life success.

MFG 491A

Hours	0.5 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	MFG 291; senior standing.
Taught	Fall Term 1

Course Outcomes

Seminar

Students will gain additional knowledge of the manufacturing industry by attending weekly seminars given by invited professionals from the surrounding community.

Top

Professional Seminar

Reviewing and understanding the manufacturing principles to be tested on the SME exam.

MFG 491B

Hours	0.5 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	MFG 291; Senior standing.
Taught	Winter

Course Outcomes

Seminar

Students will gain additional knowledge of the manufacturing industry by attending weekly presentations given by invited industry professionals from the surrounding community.

Top

Advanced Computer-Aided Manufacturing Programming

CAD/CAM programming techniques and requirements for manufacturing components on computer numerical-control machine tools, emphasizing CAM programming, postprocessors, and CAM software evaluation.

MFG 531

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MFG 230 or previous CNC programming experience, or instructor's approval.
Note	Fee.
Taught	Winter odd years

Course Outcomes

CAD/CAM/CNC

Students will understand and be able to apply correct principles in the design of parts, creation of tool path, and machining of the part for advanced surfaces and contours.

Top

Manufacturing Systems

Analyzing lean manufacturing systems. Numerous examples and case studies from industry demonstrating principles of lean production, inventory management, and lean distribution. Project with a local company to gain confidence with these principles in an industrial setting.

MFG 532

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Mfg 480 or instructor's consent.
Taught	Fall

Course Outcomes

Systems, Systems Design, Competitiveness, Contemporary

Students will understand and be able to apply principles of lean manufacturing in a production environment.

Top

Manufacturing Information Systems

Applying and integrating software and information technologies in planning, executing, and monitoring production operations.

MFG 533

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Mfg 480 or instructor's consent.
Taught	Winter

Course Outcomes

Enterprise Architecture

Understand how to design and interpret and enterprise architecture

Computer hardware, software and networking

Understand the basics of computers, languages, architectures and networking

Database Management

Be able to create and use a simple database management system

IT applications in manufacturing

Understand the major IT applications used in a manufacturing enterprise.

IT integration

Understand the issues associated with IT integration

Business Analytics

Be able to manipulate and analyze data using Excel

IT deployment

Understand how to specify, evaluate and implement IT systems in manufacturing

Composite Materials and Processes

Structure, processing, properties, and uses of composite materials, including various manufacturing methods and the relationship between properties and fabrication.

MFG 555

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Graduate standing or instructor's consent.
Taught	

Course Outcomes

Manufacturing Methods

- Lectures on each major resin discussing properties as related to structure
- Lectures on each major resin discussing manufacturing process considerations for that resin
- Lectures on each principal manufacturing method and what properties of a resin are most compatible with that process
- Lectures on each principal manufacturing method and what properties are changed in that process
- Laboratories on manufacturing methods

Design

- Lecture on design of plastic products
- Boeing project on design/implementation of plastics

Chemistry

- Knowledge of chemistry applied in understanding the structure and chemistry relationship to plastics properties
- Knowledge of chemistry applied in understanding the crosslinking reactions in thermosets

Processes

Lectures on processes, especially parts of lectures on troubleshooting

Advanced Tool Design

Advanced design of net-shape products utilizing CAD and CAE methods. Plastic injection mold design and construction. Rapid prototyping and injection molding project.

MFG 574

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MFG 431
Taught	Winter even years

Course Outcomes

Design

Students will understand and be able to apply appropriate design principles in the creation of manufacturing tooling.

Top

Packaging Technologies

Fundamentals of packaging technologies; materials, design and processes. Understanding of the importance and role of packaging in the manufacturing and product environment. Combined instruction and hands-on project application of the various aspects of packaging materials, design, and processes through individual and team assignments, written reports, and oral presentations.

MFG 575

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	IT 318 & MFG 431
Recommended	MFG 220, 230, 355.
Taught	Fall, Spring

Course Outcomes

Packing Technologies

By the end of this course students will be more experienced with the various packing technologies used in the current industry.

Manufacturing Simulation

Design and optimization of manufacturing systems using simulation. Simulation languages and modeling methodology.

MFG 580

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MFG 480
Taught	Fall

Course Outcomes

Mfg Metrics and Drivers

Understand key manufacturing system performance metrics and associated drivers

Simulation project management

Know how to plan and conduct a simulation study

Input Data Analysis

Be able to collect and analyze input data for use in a simulation study

Simulation Modeling

Be able to construct an accurate computer model of a manufacturing system

Simulation experimentation

Be able to design and conduct simulation experiments

Output Analysis

Be able to analyze simulation output and draw appropriate conclusions

Simulation Presentation

Be able to present a simulation study and make a compelling recommendation

Top

Workshop in Marriage, Family, and Human Development

Intensive study in applying principles of specified family sciences, subject matter in early childhood education, child development, family relationships, family resource management, or marriage/family therapy.

MFHD 501R

Hours	1.0 - 2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	8 hours in the School of Family Life or the School's Director's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

MFHD Workshop

Students will participate in a workshop related to topics in Marriage, Family, & Human Development.

Top

Familial Influences on Children's Social Development

Current theories and research on social development, peer relations, and behavior. Familial/parenting effects as moderated by beliefs, genetics, gender, social cognitions, culture, child guidance, interventions.

MFHD 511

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 331 or higher.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Theory Understanding

· Increase your knowledge of normal, age-related behavior of children, particularly with regard to peer relations (i.e. acceptance and friendship).
· Increase your knowledge of multi-cultural environmental differences.
· Increased your perspective of how to create effective parent-child, teacher-child, and teacher-parent environments for promoting social competence in children.

Research Analysis

· Develop a better understanding of research methods specific to this area of research.

Research Analysis

· Develop a theoretical base for integration of discipline techniques and child guidance practices.

Top

Emotional and Moral Development

Research, theories, and educational implications; preschool through adulthood.

MFHD 512

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will deepen their understanding of emotional and moral development.

Top

Applied Statistics in the Social Sciences

This course applies statistical principles to social science problems by utilizing the basics of statistical software in developing and testing research questions as well as conducting univariate and multivariate statistics such as t-tests, ANOVAs, and regression models.

MFHD 513

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 290
Recommended	Upper-division SFL course.
Taught	Fall

Course Outcomes

Theory and Research

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literture for a topic of interest in marriage, family, and human development.

Learning Data Management

Students will learn the basics of entering, cleaning, and manipulating data in SPSS.

Learning Sampling

Students will learn the importance of adequate sampling methods in social science research as well as the common forms of bias that such sampling can create.

Learning Measurement Design

Students will learn the basics of item/scale creation as well as how social scientists create measurement and operationalize constructs.

Learning Applied Statistics

Students will learn how to run, interpret, and write about a variety of basic applied statistical techniques including t-tests, ANOVAs, regression, factor analysis, and cluster analysis.

Learning to Write-up Research

Students will learn how to write research results in APA formatting.

Learning the Reserach Process

Students will continue to develop their understanding of the research process and will understand how scholars go from a research question to a completed and published research article.

Theories of Human Development

Models and concepts in dominant contemporary developmental theories.

MFHD 514

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 331 or higher.
Taught	Fall

Course Outcomes

Course Objectives

1. To increase students' understanding of current theoretical frameworks influencing family scholarship.
2. To sensitize students to the contextual issues that shape current family theory.
3. To increase students' ability to evaluate family theory, including awareness of presuppositions and values underlying family theories and research.
4. To increase students' understanding of the implicit and explicit ways that theory shapes family research.
5. To increase students' ability to use and create family theories.

Top

Work and Family

Introduction to contemporary work/family issues. Framework for helping parents and managers deal effectively with work/family issues at work and home.

MFHD 542

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

MFHD Fundamentals

· Synthesize and understand possible career trajectories for work-family scholars in academia, business and government.
· Make use of expert resources to complete a complicated project.

Research Skills

Critique scholarly work-family research.
Be comfortable using a variety of tools to find work-family research.

Research Analysis and Reporting

Create scholarly work-family products (submission to scholarly conference/journal.
Prepare and present a research-based work and family presentation.

(MFHD-Soc) Contemporary Family Theories

Introduction to basic micro, macro, and processual approaches to study of the family; social and political theory on the family; philosophical issues and assumptions underlying family theory, research, and practice.

MFHD 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 451, Soc 310, 311; or equivalents.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

knowledge

Students will deepen their understanding of contemporary family theories.

Top

Fathering: Scholarship and Intervention

Quality fathering across cultures and in varied family circumstances. Historical changes in fathering; challenges to good fathering; effective interventions with fathers.

MFHD 551

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will read, evaluate, and critique the empirical literature on fathering

Family Life Education in the University

Delivering family life education in university settings. Working with a faculty mentor, making presentations, and preparing basic instructional materials.

MFHD 566

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Family Life Education in the University

This course is currently not being taught and is under evaluation for deletion.

Top

Practicum in Family Life Education

Supervised experience teaching family living courses in a university setting.

MFHD 567R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	MFHD 566 or instructor's consent.
Taught	Fall, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Application

The students will utilize a significant range of skills and abilities in a professional setting

Top

Outreach in Family

MFHD 595R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Marriage and family therapy major status; instructor's consent.
Taught	

Course Outcomes

Theory and Research

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in marriage, family, and human development.

Top

Special Topics in Marriage, Family, and Human Development

Individual study for qualified students.

MFHD 595R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	For marriage, family, and human development major; instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Theory and Research

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in marriage, family, and human development.

Workshop in Marriage and Family Therapy

Training in delivery of and research about psychoeducational programs for couples and families.

MFT 501R

Hours	1.0 - 2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Workshop in Marriage and Family Therapy

Apply and research about psychoeducational programs for couples and families to psychotherapy.

Top

Readings in Marriage and Family Therapy

Discussions and reports of current readings.

MFT 590R

Hours	1.0 - 2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

In Process

This course is not being taught currently and the program/department is evaluating whether or not to delete it from the curriculum.

Special Topics in Marriage and Family Therapy

Individual study for qualified students.

MFT 595R

Hours	1.0 - 2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Marriage and family therapy major status; instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

In Process

This course is not being taught currently and the program/department is evaluating whether or not to delete it from the curriculum.

Top

Leadership and Personal Development

Developing comprehension of Army leadership dimensions, focusing on critical thinking, time management, and fitness. Introduction to the corps of cadets; building courage and self-confidence. Lab included.

MIL S 120

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Proficient at Land Navigation

O1 – Individual Proficiency Proficient at Land Navigation	In-Class Land Navigation Quiz and a practical exercise (graded) during Lab	Cadets must score 80% or higher on the quiz and find at least 75% of the Land Nav points at Lab	Cadets who fail to achieve the standards will be partnered up with more proficient Cadets and be retested during our FTX

Proficient at maintaining self and equipment in the field

O2 – Individual Proficiency Proficient at maintaining self and equipment in the field	Weekly pre-lab inspection of equipment and self, conducted by peers	Deficiencies will be identified and reported up the chain of command	Deficient Cadets will be counselled by peer and faculty

Subordinates self-interest to the needs of the team

O3 – Member of a Team Subordinates self-interest to the needs of the team	Cadets will be put into tactical situations weekly enabling leadership to identify selfless service to others	Cadets displaying selfless service (aka putting needs of others above their own) will be recognized during the AARs	Cadets who are observed showing signs of only caring about themselves will be counselled by faculty

Understand, can explain and takes proper actions on contact

O4 – Member of a	In-class quiz on actions	Cadets must score 80%	Cadets who fail to

Team Understands, can explain and takes proper actions on contact	on contact as well as tactical operations during weekly labs that will require reacting to direct and indirect enemy contact	or higher on the quiz and will need to react properly during tactics lab or risk being “shot” by the enemy	achieve the standards will receive one on one training by their Cadets peers and or their Cadet mentors

Understand the roles and capabilities of a brigade combat te

O5 – Tactical Problem Solver Understands the roles and capabilities of a brigade combat team in combat	In-class quiz on small team organization and proper movement techniques as well as practical app during LAB	Cadets must score 80% or higher and physically demonstrate moving as part of a team during LAB	Cadets who fail to achieve the standard will be counselled and retested at LAB by their peers and Cadet mentors/ evaluators

Communicates plans effectively

O6 – Tactical Problem Solver Communicates plans effectively	Cadets will each get to brief an operational plan/ order in-class and be evaluated by their peers	Cadets must score 80% or higher	Cadets who score below 80% will receive counselling and receive a second chance to brief

Can discuss critically the role of the Army officer as train

O7 – Roles of NCOs Os Can discuss critically the role of the Army officer as trainer and leader	Written book review on an Army officer of their choice, highlighting both good and bad leadership traits	Cadets must score 80% or higher on the book review, which will be read and graded by their instructor	Cadets who fail to achieve the standard will receive their graded book review back and be asked to rewrite it

Accepts sacrifices required as a servant of the nation

O7 – Roles of NCOs Os Can discuss critically the role of the Army officer as trainer and leader	Written book review on an Army officer of their choice, highlighting both good and bad leadership traits	Cadets must score 80% or higher on the book review, which will be read and graded by their instructor	Cadets who fail to achieve the standard will receive their graded book review back and be asked to rewrite it
O8 – Roles of NCOs Os Accepts sacrifices required as a servant to the nation			

Leads by example

O9 – Leadership Leads by example	Cadets will receive leadership opportunities and be observed weekly during tactics Lab and recognized during After Action Reviews	Cadets must demonstrate basic leadership skills while working as a member of a team, squad or platoon	Cadets who fail to lead in positive ways will be counselled by their Cadet evaluators and on-scene faculty members

Judged by subordinates as capable, confident and trustworthy

O10 - Leadership Judged by subordinates	Cadets will conduct written peer evaluations	Cadets must receive an overall peer evaluation	Cadets who fail to reach 70% will be counselled

as capable, confident and trustworthy	on each other as part of their midterm and final exams	rating of 70% or higher	by their MS instructor and plan a course of action for the rest of the semester

Lives the Army Values

O11 – Character Lives the Army Values	Will write a comparative essay on one of their personal heroes and how they demonstrated the Army Values	Cadets must score 80% on their essay, which will be read, marked up and returned to them by their instructor	Cadets who fail to achieve the standard will be asked to rewrite their essay and resubmit it to their instructor

Demonstrate Resilience

O12 – Character Demonstrate Resilience	Cadets will conduct a multi-day Field Training Exercise during which they will asked to conduct graded tactical operations on little or no sleep and in austere mountainous conditions	Cadets must demonstrate the ability to stay positive, work as a member of a team and complete (or at least attempt) each task or mission despite poor eating and sleeping conditions	Cadets who fail to demonstrate resilience during training will be counselled and asked to continue training with a new perspective. If they refuse to complete training they will not get full credit for the FTX

Top

Introduction to Tactical Leadership

Leadership fundamentals; setting direction, problem solving, listening, presentation skills, and providing feedback. Integration into the corps of cadets through tactical field training. Lab included.

MIL S 121

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Demonstrate Effective Leadership

Demonstrate lessons learned in class to basic Team Leader roles in a Lab Environment
As a Team Leader, show working knowledge of Basic Army Leadership traits

Battlefield lifesaving skills

O1 – Individual Proficiency Battlefield lifesaving skills	In-class First Aid quiz and practical exercises during weekly tactics Labs	Cadets must score 80% or higher on quiz & demonstrate proficiency as a member of an Aid & Litter team during Lab	Cadets who fail to achieve the standard will receive retraining and be retested as well as be partnered with others at Lab

Moving tactically under fire

O2 – Individual Proficiency Moving tactically under fire	In-class quiz on individual movement tactics as well as tactical operations practice during weekly labs	Cadets must score 80% or higher on the quiz and will need to react properly during tactics lab or risk being “shot”	Cadets who fail to achieve the standards will receive one on one training by their Cadets peers and or their Cadet mentors

Demonstrates Understanding & Application of Army Values & Et

Demonstrate a working knowledge of the Army's Programs on Equal Opportunity (EO), Prevention of Sexual Harassment (POSH), and Sexual Assault Prevention and Response (SAPR)

Demonstrates Personal Professional Development

Prepare a discussion paper through research of an Army Officer in history who held and displayed values one would like to emulate
Demonstrate a dedication to personal professional development through writing a self-critiquing journal based on one's leadership sucesses and failures

Proficient at entering and clearing a room with a team

O3 – Member of a Team Proficient at entering and clearing a room with a team	Cadets will be instructed on proper techniques at Lab and then be tested with their team	Cadets must demonstrate proficiency during the practical exercise at Lab	Cadets who fail to meet the standard will be retrained at Lab and be retested that same day

Officership

Show working knowledge of Army Customs and Courtesies by correctly wearing the Army battle and dress uniforms, speaking to senior officers and NCOs, and attending the Army Ball adhering to all rules and regulations set forth

Understands, can explain & executes the fundamentals of loca

O4 – Member of a Team Understands, can explain, & executes the fundamentals of local security	Cadets will be instructed at Lab on proper techniques and conduct local security operations weekly	Cadets must show a basic understanding of local security principles and take security seriously	Cadets who repeatedly fail to practice or take security seriously will be counselled and retrained by on-site faculty & CDT mentors

Can analyze a tactical situation and explain its essential p

O5 – Tactical Problem Solver Can analyze a tactical situation and explain its essential points in own words	Cadets will participate in tactics briefings and be asked to answer questions that demonstrate their knowledge	Cadets must be able to properly answer basic check-on-learning questions on the current operation/s at Lab	Cadets demonstrate a lack of understanding will receive one on one as well as group retraining at Lab

Demonstrates Basic Skills in Tactics and Techniques

Show a working knowledge of basic Terrain Analysis and how it applies to battlefield environments
Understand the basic format of the Army's 8 step training model and how they are infused in that process

Knows enough about Army Branches to make informed decision a

O6 – Roles of NCSs Os Knows enough about Army Branches to make informed decision about which to join	Cadets will be asked to select their top 3 branches after in-class instruction & ½ a lab devoted to Army Branch Orientation.	Cadets must hand in a 1 page paper on how and why they chose their top three Army Branches	Cadets who fail to turn in their paper will be counselled. Cadets with additional questions on branches will have the opportunity to meet various branch officers

Understands his oath of office & its basis in the constituti

O7 – Roles of NCOs Os Understands his oath of	After in-class instruction, Cadets will	Cadets must score 80% or higher on the quiz	Cadets who fail to meet the standard will receive

office & its basis in the constitution	take a quiz on the Army Oath of Office and the Constitution.		retraining and be asked to reread the Constitution/ Army Oath of Office.

Exercises initiative within the commander's intent

O8 – Leadership Exercises initiative within the commander's intent	Cadets will be given opportunities & encouraged to show initiative during tactical operations at Labs	Cadets must demonstrate free will and the courage to take initiative as a member of a team	Cadets who consistently do the bare minimum of what they are told will be counselled by on-site faculty and Cadet leadership

Understands & explain impact of losing individuals in the un

O9 - Leadership Understands & can explain impact of losing individuals in the unit due to injury/ death	Cadets will experience first- hand the impact "losing" a Soldier during tactical operations at Lab	Cadets must demonstrate the ability to properly deal with loss during combat and take the proper actions	Cadets do not react properly will be identified and be retrained at lab by on-site faculty and the Cadet leadership

Committed to physical fitness

O10 – Character Committed to physical fitness	Cadets will be asked to sign up for and participate in early morning PT three times each week and receive 2 Army Physical Fitness Tests	Cadets must score a minimum of 70 points in each even on the APFT	Cadets who fail to achieve the standard on the first APFT will be counselled individually and asked to join remedial PT held every Tuesday and Thursday morning

Performs successfully under stress

O11 – Character Performs successfully under stress	Cadets will conduct a multi-day Field Training Exercise during which they will be asked to conduct graded tactical operations on little or no sleep and in austere mountainous conditions	Cadets must demonstrate the ability to stay positive, work as a member of a team and complete (or at least attempt) each task or mission despite poor eating and sleeping conditions	Cadets who fail to demonstrate resilience during training will be counselled and asked to continue training with a new perspective. If they refuse to complete training they will not get full credit for the FTX

Top

Innovative Team Leadership

Creative leadership strategies and styles; team dynamics; leadership theory; the Army leadership framework. Includes basics of land navigation and squad tactics. Lab included.

MIL S 220

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Leadership

Recall and describe the three stages of team development
Illustrate significant traits and behaviors of historical military leaders

Familiar with land navigation

Outcome 1 – Individual Proficiency Familiar with land Navigation	Online interactive program and quiz and a practical exercise (graded) during Lab	Cadets must score 80% or higher on the quiz and find at least 75% of the Land Nav points at Lab	Cadets who fail to achieve the standards will be partnered up with more proficient Cadets and be retested during our FTX

Values and Ethics

Explain the historical basis of Army values
Illustrate the four tenets of the Warrior Ethos

Familiar with moving tactically while under fire

Outcome 2 – Individual Proficiency Familiar with moving tactically while under fire	Cadets will be briefed on tactical movement techniques and be members of small unit teams that execute tactical movements.	CDTs will be able to follow basic instructions from their small unit leaders.	CDTs will receive guidance and additional training turning lab periods.

Personal Development

Deliver a formal information briefing
List the types and elements of interpersonal communication

Physically ready to handle the rigors of combat

Outcome 3 – Individual Proficiency Physically ready to handle the rigors of combat	CDTs will perform physical fitness training three times weekly throughout the semester and participate in a 48 hour field training exercise.	Each CDT will score a minimum of 60 points in each PT event.	Those failing to meet these standards will conduct remedial PT an additional two times per week.

Proficient at maintaining self and equipment in a field envi

Outcome 4 – Individual Proficiency Proficient at maintaining self and equipment in a field environment	Weekly pre-lab inspection of equipment and self, conducted by peers	Deficiencies will be identified and reported up the chain of command	Deficient Cadets will be counselled by peer and faculty

Officership

Distinguish and Describe rank, structure, duties, and traditions
Explain the nine Principles of War

Tactics and Techniques

Practice and demonstrate land navigation techniques
Explain the six problem solving steps
List and know the eight troop leading procedures

Willingly subordinates self-interest to the needs of the tea

Outcome 5 – Member of a Team Willingly subordinates self-interest to the needs of the team.	Cadets will be put into tactical situations weekly enabling leadership to identify selfless service to others	Cadets displaying selfless service (aka putting needs of others above their own) will be recognized during the AARs	Cadets who are observed showing signs of only caring about themselves will be counselled by faculty

Understands, can explain, and executes the fundamentals of p

Outcome 6- Member of a Team Understands, can explain, and executes the fundamentals of a patrolling	CDT will be briefed on patrolling and will be a member of a small unit team that will conduct patrolling during labs.	CDT will effectively conduct patrolling.	Additional training will be provided through the semester during labs.

Understands, can explain and executes the fundamentals of lo

Outcome 7- Member of a Team Understands, can explain, and executes the fundamentals of local security.	CDT will receive briefings on providing local security and will do practical application during labs	CDT will effectively provide local security.	Additional training will be provided through the semester during labs.

Understand the roles of officers and NCOs in the Army

Outcome 9- Understand the roles of officers and NCOs in the Army Can discuss critically the role of the Army officer as trainer and leader.	CDT will receive briefings and shown through multimedia the role of the Army Officer.	CDT will demonstrate through quiz and testing to recognize the role of the Army officer in various scenarios.	Additional training as required.

Communicates effectively

Outcome 10- Leadership Communicates effectively.	CDT will receive briefings and shown through multimedia various means of communicating in a military environment.	CDT will demonstrate proficiency in military writing and briefings through various writing assignments and briefings.	Additional training as required.

Lives the Army Values

Outcome 11-Character Lives the Army Values	CDT will be continually assessed on living his life in accordance with the Army Values which are: Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, and Personal Courage	CDT realizes that Army values are not just what is done while on “Army Time” but a code in which you live your life	Additional counseling as needed. Cadet me be removed from the program for “serious” infractions of these values

Top

Foundations of Tactical Leadership

Challenges of leading tactical teams in contemporary operations environment of the U.S. Army, focusing on Army Orders process, terrain analysis, and adaptive leadership. Lab included.

MIL S 221

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Familiar with land navigation

Outcome 1 – Individual Proficiency Familiar with land Navigation	Online interactive program and quiz and a practical exercise (graded) during Lab	Cadets must score 80% or higher on the quiz and find at least 75% of the Land Nav points at Lab	Cadets who fail to achieve the standards will be partnered up with more proficient Cadets and be retested during our FTX

Leadership

Explain the situational, transformational, and adaptive leadership theories and their relationship to the Army Leadership Requirements Model
Illustrate dimensions of transformational and situational leadership
Describe methods of assessing leadership styles
Explain your personal approach to leadership

Solve tactical problems using principles that underlie doctr

Outcome 2 – Tactical Problem Solver Solve tactical problems using principles that underlie doctrine and war fighting	Quizzes and multiple tactical problems at leadership labs	CDT utilizes proper Army doctrine for several different tactical problems that he/she will face	CDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Values and Ethics

Explain the Army Values and the Army's Consideration of Others (CO2) program
Identify and asses the goals of the Army CO2 program (eight areas)

Analyze the relationship between Army values, leadership, and CO2

Personal Development

Practice effective writing techniques in accordance with the Army standard for effective writing
Explain how to set goals and manage time at the team level
Develop team mission statement and goals
Explain and know ways to establish priorities and avoid distracters

Physically ready to handle the rigors of combat

Outcome 3 – Individual Proficiency Physically ready to handle the rigors of combat	CDTs will perform physical fitness training three times weekly throughout the semester and participate in a 48 hour field training exercise.	Each CDT will score a minimum of 60 points in each PT event.	Those failing to meet these standards will conduct remedial PT an additional two times per week.

Officership

Describe the history of terrorism and the basic US antiterrorism policy
Explain and state the relationship between leadership, values, and officership

Understands, can explain and takes proper actions on contact

O4 – Member of a Team Understands, can explain and takes proper actions on contact	In-class quiz on actions on contact as well as tactical operations during weekly labs that will require reacting to direct and indirect enemy contact	Cadets must score 80% or higher on the quiz and will need to react properly during tactics lab or risk being “shot” by the enemy	Cadets who fail to achieve the standards will receive one on one training by their Cadets peers and or their Cadet mentors

Tactics and Techniques

Distinguish between the different types of Army plans and orders
Demonstrate terrain analysis and route planning skills
Explain and remember the five-paragraph format for an operations order
Describe the characteristics and techniques of defensive operations
Explain how squads and platoons plan for and conduct patrols
List and describe the five aspects of military terrain using (OAKOC)
Interpret and formulate an operation order

Understand the roles and capabilities of a brigade combat te

O5 – Tactical Problem Solver Understands the roles and capabilities of a brigade combat team in combat	In-class quiz on small team organization and proper movement techniques as well as practical app during LAB	Cadets must score 80% or higher and physically demonstrate moving as part of a team during LAB	Cadets who fail to achieve the standard will be counselled and retested at LAB by their peers and Cadet mentors/ evaluators

Communicate plans effectively

O6 – Tactical Problem Solver	Cadets will each get to brief an operational	Cadets must score 80% or higher	Cadets who score below 80% will receive

Communicates plans effectively	plan/ order in-class and be evaluated by their peers		counselling and receive a second chance to brief

Can discuss critically the role of the Army officer as train

O7 – Roles of NCOs Os Can discuss critically the role of the Army officer as trainer and leader	Written book review on an Army officer of their choice, highlighting both good and bad leadership traits	Cadets must score 80% or higher on the book review, which will be read and graded by their instructor	Cadets who fail to achieve the standard will receive their graded book review back and be asked to rewrite it

Accepts sacrifices required as a servant to the nation

O7 – Roles of NCOs Os Can discuss critically the role of the Army officer as trainer and leader	Written book review on an Army officer of their choice, highlighting both good and bad leadership traits	Cadets must score 80% or higher on the book review, which will be read and graded by their instructor	Cadets who fail to achieve the standard will receive their graded book review back and be asked to rewrite it
O8 – Roles of NCOs Os Accepts sacrifices required as a servant to the nation			

Leads by example

O9 – Leadership Leads by example	Cadets will receive leadership opportunities and be observed weekly during tactics Lab and recognized during After Action Reviews	Cadets must demonstrate basic leadership skills while working as a member of a team, squad or platoon	Cadets who fail to lead in positive ways will be counselled by their Cadet evaluators and on-scene faculty members

Judged by subordinates as capable, confident and trustworthy

O10 - Leadership Judged by subordinates as capable, confident and trustworthy	Cadets will conduct written peer evaluations on each other as part of their midterm and final exams	Cadets must receive an overall peer evaluation rating of 70% or higher	Cadets who fail to reach 70% will be counselled by their MS instructor and plan a course of action for the rest of the semester

Lives the Army values

O11 – Character Lives the Army Values	Will write a comparative essay on one of their personal heroes and how they demonstrated the Army Values	Cadets must score 80% on their essay, which will be read, marked up and returned to them by their instructor	Cadets who fail to achieve the standard will be asked to rewrite their essay and resubmit it to their instructor

Demonstrate Resilience

O12 – Character Demonstrate Resilience	Cadets will conduct a multi-day Field Training Exercise during which they will asked to	Cadets must demonstrate the ability to stay positive, work as a member of a team and	Cadets who fail to demonstrate resilience during training will be counselled and asked to

conduct graded tactical operations on little or no sleep and in austere mountainous conditions	complete (or at least attempt) each task or mission despite poor eating and sleeping conditions	continue training with a new perspective. If they refuse to complete training they will not get full credit for the FTX

Top

Adaptive Team Leadership

Adaptive leadership skills; demands of leadership in tactical and garrison situations. Cadets have multiple opportunities to lead one another and receive feedback on leadership abilities. Lab included.

MIL S 320

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Willingly subordinates self-interest to the needs of the tea

Outcome 1 – Member of a Team Willingly subordinates self-interest to the needs of the team	Cadet will have to spend several hours outside of the classroom to ensure that junior Cadets are prepared for leadership labs and various other ROTC functions	CDTs understand that he must put the needs of his Squad/Platoon before the needs of himself/herself to ensure overall mission success	Continued evaluation and feedback during practical exercises in field as well as “garrison operations”

Communicates plans effectively

Outcome 2 – Tactical Problem Solver Communicates plans effectively	Cadet will be given tactical scenarios in which they will have to develop a plan for their team and communicate that plan to their teammates	CDTs will receive real time feedback on if they had a solid plan and how well others understood that plan during leadership labs	This may lead to expanding either the Operations Order Process or further review of tactics based on the CDTs performance

Understands the roles of officers and NCOs in the Army

Outcome 3 – Understands the roles of officers and NCOs in the Army Knows enough about the various branches to make an informed decision when selecting one	Each CDT will choose a branch and research, then present a five minute “Military Information Brief” on what they learned about the branch they chose to the other CDTs in the class	CDTs overall understand most Army branches, particularly those that were of initial interest to them	No change

Leads by example

Outcome 4 – Leadership Leads by example	Will have multiple opportunities to lead junior CDTs as well as peers both during leadership lab and other events	CDT realizes that setting the example in what they do and how they conduct themselves has a larger impact on their ability to lead rather than by simply giving guidance to others	This will be continually reinforced throughout the school year, no change needed

Accepts accountability for self and unit

Outcome 5 – Leadership Accepts accountability for self and unit	CDT will be given multiple leadership opportunities in which they are responsible not only for their success or failures but those of their team as well	Cadets will take ownership of teams actions, will give praise to their team for mission success but will take ownership of team failures and attempt to correct what when wrong	Place a large emphasis on this during end of semester counseling

Ensures subordinates and unit are prepared for the mission

Outcome 6- Leadership Ensures subordinates and unit are prepared for the mission	CDT will receive orders concerning upcoming events from higher level leadership and ensure that order is passed down to other team members	CDT will effectively conduct the orders process and brief his team. He will also conduct back briefs and inspections to ensure his/her team members are prepared	Additional one on one counseling as necessary

Coaches subordinates effectively and provides them with usef

Outcome 7- Leadership Coaches subordinates effectively and provides them with useful feedback	While in leadership roles, CDTs will have multiple opportunities to coach, teach, and mentor junior level CDTs	CDT will conduct after action reviews of leadership labs with team as well as counseling team members on a consistent basis	

Committed to physical fitness

Outcome 8- Character Committed to physical fitness	CDT will take multiple physical fitness tests and conduct other physically demanding events	CDT will understand that physical fitness is more than an event you conduct but a lifestyle change	Additional physical training as necessary

Lives the Army values

Outcome 9- Character Lives the Army Values	CDT will be continually assessed on living his life in accordance with	CDT realizes that Army values are not just what is done while on “Army	Additional counseling as needed. Cadet me be removed from the

	the Army Values which are: Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, and Personal Courage	Time" but a code in which you live your life	program for "serious" infractions of these values

Demonstrates Self Confidence

Outcome 10- Character Demonstrates Self Confidence	CDT will have multiple opportunities during leadership labs and class work in which he/she can project self-confidence	CDTs will demonstrate more confidence as the semester goes on and they have an opportunity to be placed in leadership roles in a myriad of different situations	Additional one on one counseling as necessary

Proficient at land navigation

Outcome 11- Individual Proficiency Proficient at land navigation	CDT will be given multiple opportunities to conduct land navigation at local courses	CDT will demonstrate proficiency at land navigation by the end of the semester in both day and night time conditions	Additional volunteer land navigation courses will be offered that CDTs who are lacking at this skill will be strongly encouraged to attend

Proficient with tactical communications

Outcome 12- Individual Proficiency Proficient with tactical communications	CDT will communicate via radio to higher level leadership with various military reports in a tactical situation	CDT will follow proper formatting of tactical communications and send reports in a timely manner	Additional one on one instruction will be given as needed

Top

Leadership in Changing Environments

Using intense real-world leadership situations to build skills in leading small units, decision-making, persuasion, and motivation when "under fire." Final preparation and evaluation prior to attendance at Leader Development and Assessment Course (LDAC). Lab included.

MIL S 321

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Must be contracted in ROTC program.
Taught	Winter

Course Outcomes

Understands, can explain and takes appropriate actions on co

Outcome 1 – Member of a Team Understands, can explain, and takes appropriate actions on contact	CDT will make “enemy” contact during leadership labs on a weekly basis	CDT acts appropriately given the size of the enemy force, their location, the rules of engagement, and the terrain around them	CDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Solve tactical problems using principles that underlie doctr

Outcome 2 – Tactical Problem Solver Solve tactical problems using principles that underlie doctrine and war fighting	Quizzes and multiple tactical problems at leadership labs	CDT utilizes proper Army doctrine for several different tactical problems that he/she will face	CDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Understands the roles of officers and NCOs in the Army

Outcome 3 – Understands the roles of officers and NCOs in the Army Accepts sacrifices required as a servant to the Nation	CDT will take a quiz on selfless-service and perform local community service during the semester	CDT understands that as a leader you are truly a servant to those you lead as well as to the Nation as a whole	Additional one on one counseling as necessary

Leads by example

Outcome 4 – Leadership Leads by example	Will have multiple opportunities to lead junior CDTs as well as peers both during leadership lab and other events	CDT realizes that setting the example in what they do and how they conduct themselves has a larger impact on their ability to lead rather than by simply giving guidance to others	This will be continually reinforced throughout the school year, no change needed

Cares for and is actively involved in the success of subordi

Outcome 5 – Leadership Cares for and is actively involved in the success of subordinates	CDT will have multiple opportunities to help and assist subordinates in ROTC, academic, and life success	CDT understands that individual achievement truly mean very little if those that work for you are unable to complete necessary tasks in numerous aspects of life	This will be continually reinforced throughout the school year, no change needed

Judged by subordinates as capable, confident, and trustworth

Outcome 6- Leadership Judged by subordinates as capable, confident, and trustworthy	CDT will lead subordinates through multiple tactical and garrison events throughout the semester in which subordinates will react to their leaders ability to lead them successfully	CDT realizes that leadership and management are two very different things and that if you aren't capable, confident, and trustworthy no one will want to follow	Additional one on one counseling as necessary

Allows subordinates latitude in how to accomp. a mission & h

Outcome 7- Leadership Allows subordinates latitude in how to accomplish a mission and holds them accountable	CDT will have multiple teams work for him at a time in which he will have to issue general guidance rather than direct instruction	CDT will understand that micromanagement leads to decreased productivity and does very little to develop subordinates	Additional one on one counseling as necessary

Demonstrates self-discipline

Outcome 8- Character Demonstrates self-discipline	CDT will have multiple opportunities to show self-discipline during physical training, leadership labs, and other ROTC events	CDT will understand that you are not self-disciplined in a few aspects of your life, but rather either you are a self-disciplined individual or you are not	Additional one on one counseling as necessary

Performs successfully under stress

Outcome 9- Character Performs successfully	CDT will be placed in a multitude of	CDT is able to rely on training and a solid	CDT will receive feedback after every

under stress	“controlled” stressful environments during labs and a field training exercise	knowledge base to know what actions must be taken	lab and proper techniques as well as errors will be highlighted

Demonstrates commitment to personal and professional growth

Outcome 10- Character Demonstrates commitment to personal and professional growth	CDTs will talk one on one with instructor at the beginning of the semester to lay out plans on how the CDT plans on growing both personally and professionally throughout the semester	CDT will take the additional out of classroom time necessary to ensure their success with those they lead as well as other academic, physical, and spiritual needs	CDTs will talk one on one with instructor at the end of the semester to asses if plan worked and what still needs to set new goals

Demonstrates the fundamentals of the assault rifle

Outcome 11- Individual Proficiency Demonstrates the fundamentals of the assault rifle	CDT will load, shoot, change magazines, correct malfunctions, disassemble and reassemble an Army type assault rifle in a safe manner	CDT understands the importance in handling firearms in a safe manner and gains confidence in doing so	No Change

Proficient at maintaining self and equipment in a field envi

Outcome 12- Individual Proficiency Proficient at maintaining self and equipment in a field environment	CDT will spend 2-4 days in a “field” environment towards the end of the semester	CDT will perform the necessary steps to take care of themselves in addition to all equipment that they are responsible for in an austere environment	Supervised heavily by instructors, CDTs will receive guidance and “on the spot” corrections as necessary

Top

Staff Organization and Operations

Seminar in Army Staff Operations. Various opportunities for leadership and organiztional experience. Lab included.

MIL S 325R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Must be contracted in ROTC program.
Taught	Fall, Winter

Course Outcomes

Explore military professional ethics and decision making

Outcome 1 – Values and Ethics Explore military professional ethics and ethical decision making facing an Officer in peacetime and wartime	Case studies of wartime scenarios from history with classroom discussion. Students complete monthly professional readings – at least one during the year detailing ethical decision making and dilemmas on the battlefield for leaders	CDTs understand the complexities of military professional ethics when applied to peacetime and wartime and learn they must use wisdom when making decisions. Demonstrated through discussion and paper.	Include a challenging ethical decision making scenario on the final exam that the cadets must describe what they would do if found in the same situation.

Gain practical experience in cadet battalion leadership role

Outcome 2 – Leadership Gain Practical experience in cadet battalion leadership roles	Chain of command and staff positions Leadership Labs and FTX	General understanding is good – however cadets need to learn to plan further in advance and use all 8 steps of the process to include MDMP	Refined weekly cadet training meeting format will facilitate understanding accountability for training and facilitate planning further into advance

Expand and demonstrate skills as a member of an organization

Outcome 3 – Leadership Expand and demonstrate skills as a member of an organizational staff	Chain of command and staff positions MDMP Practical Exercise Staff Position Presentations	MDMP is complicated and challenging for the cadets to understand. Greater focus needs to be shifted to staff roles and understanding of military staff integration	Will assign cadets to study a specific staff function and how it integrates into the greater military method.

Prepare for the transition to a career as an Army officer

Outcome 4 – Values and Ethics Prepare for the transition to a career as an Army Officer	Application to Leadership Lab PEs and FTX	Basic understanding is mastered – need continued examples in PEs	Introduce additional variables to Leadership Labs and FTX to challenge cadets ethical decision making

Top

Developing Adaptive Leaders

Developing proficiency in planning, executing, and assessing operations; functioning on a staff; and providing feedback to subordinates with situational real-world opportunities to assess risk, make decisions, and coach others. Emphasizes leadership ethics. Lab included.

MIL S 420

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Must be contracted in ROTC program.
Taught	Fall

Course Outcomes

Apply Army leadership dimensions and core competencies as ca

Outcome 1 – Leadership Apply Army leadership dimensions and core competencies as cadet battalion leaders	Evaluated CDT assigned positions in the cadet chain of command Leadership Philosophy paper and presentation	CDTs understand the simple definition of each dimension and core competency; however they lack examples of them in everyday leadership	Continued evaluation and feedback during practical exercises in field environment

Assess fellow cadets using the Leadership Development Progra

Outcome 2 – Leadership Assess fellow cadets using the (LDP) Leadership Development Program	Cadets are assigned underclass cadets to assess – feedback is provided verbally and collected via card system	CDTs are readily able to provide feedback; but need to be holistic in their evaluations	Provide LDP class and one of the first lessons and then follow up throughout the semester

Apply military professional ethics in decision making

Outcome 3 – Values and Ethics Apply military professional ethics in decision making	Quiz Demonstrate application during Practical Exercises at Leadership labs and FTX Apply in Leadership Philosophy	CDTs demonstrate good mastery of these outcomes in PEs	No change

Relate the Law of Land Warfare and ROE to Army Operations

Outcome 4 – Values and Ethics	Application to Leadership Lab PEs and	Basic understanding is mastered – need	Introduce additional variables to Leadership

Relate the Law of Land Warfare and rules of engagement (ROE) to Army Operations	FTX Integrate into daily performance assessments	continued examples in PEs	Labs and FTX to challenge cadets ethical decision making

Explain your obligations as a US service member under the co

Outcome 5 – Values and Ethics Explain your obligations as a US service member under the code of conduct	Mid-Term Leadership Philosophy	Cadets generally master this outcome	Need to add emphasis regarding the importance of oaths and codes to ensure they are applied for the rest of their professional careers

Understand role in UCMJ process & explain types of admin dis

Outcome 6 – Values and Ethics Understand your role in the UCMJ process and explain the types of administrative discipline and separations	Quiz	Need constant re-enforcement and additional dedication to master this outcome	Use Army JAG guest speaker to further develop the topic in future courses Integrate into cadet battalion discipline PEs through the Chain of command

Identify resiliency training skills in the Comprehensive Sol

Outcome 7 – Personal Development Identify resiliency training skills in the Comprehensive Soldier Fitness program (CSF)	Leader Challenge Practical Exercise Counseling PE Leadership Philosophy 12 O'Clock High Final Exam	Critical skill which we continue to develop and must consistently be developed throughout a cadet and officer's career	Continue to reinforce resiliency training at every opportunity

Identify methods to reduce and manage stress as a leader

Outcome 8 – Personal Development Identify methods to reduce and manage stress as a leader	Leader Challenge Practical Exercise Counseling PE Leadership Philosophy 12 O'Clock High Final Ex.	Critical skill which we continue to develop and must consistently be developed throughout a cadet and officer's career	Integrate stress reduction, positive visual imagery, and relaxation techniques to future courses

Write and brief effectively

Outcome 9 – Personal Development Write and brief effectively	LDP Evaluations Leadership Philosophy presentations MDMP and Cadet Chain of command responsibilities	Most understand the basic tenants of the Army writing style; however they need to apply it in all written communication. Continue to work verbal communication and briefing skills	Include additional short written requirements as well as briefings to further develop command presence and effective communication skills

Explain profession of arms and offership as it relates to ci

Outcome 10 – Officership Explain the profession of arms and officership as it relates to civilian professions	Quiz Presentation	Generally good mastery	No change

Plan conduct & evaluate training & programs as member of cha

Outcome 11 – Officership Plan, conduct, and evaluate ROTC training and other programs as a member of the chain of command or staff (Army Training Management)	Chain of command and staff positions LDP evaluations Leadership Philosophy Leadership Labs and FTX	General understanding is good – however cadets need to learn to plan further in advance and use all 8 steps of the process to include MDMP	Refined weekly cadet training meeting format will facilitate understanding accountability for training and facilitate planning further into advance

Understand the duties of staff organization roles and repons

Outcome 12 – Officership Understand the duties of staff organization roles and responsibilities	Chain of command and staff positions Mid-term Leadership Philosophy Leadership Labs and FTX	Need to continue working on delegation and task management General understanding of staff roles exists – but need to develop trust that all members will accomplish assigned tasks	Continued empowerment of cadet chain of command to understand scope of responsibilities and then hold cadets accountable for mission accomplishment

Counsel underclass cadets to improve performance

Outcome 13 – Officership Counsel underclass cadets to improve performance	Chain of command and staff positions Cadet mentorship program	Concept of being responsible for others is clear – but cadets need to formalize their mentorship and counseling	Develop leader books and check every 3 weeks to ensure compliance. Additional accountability for development of MS 320/321 cadets

Explain the importance of actively managing your career as a

Outcome 14 – Explain the importance of actively managing your career as an Army officer	Personal Leadership Philosophy Counseling with PMS	CDTs understand what they see on a re-occurring basis; however they need additional exposure to options early in their cadet careers	Integrate this outcome into MS 220 and MS 320 courses

Mentor and evaluate underclass cadets during tactical operat

Outcome 16 – Tactics and Techniques Mentor and evaluate	LDP Cadet Evaluations Cadet mentorship program	MS 420 cadets do a good job coaching and teaching tactics to	Written evaluations with each verbal evaluation

underclass cadets during tactical operations	Chain of command and staff responsibilities	underclassmen – but need to work on providing quality written feedback to go with the verbal feedback	

Apply training management process using the 8 step training

Outcome 17 – Tactics and Techniques Apply training management process using the 8 step training model	Chain of command and staff positions LDP evaluations Leadership Philosophy Leadership Labs and FTX	General understanding is good – however cadets need to learn to plan further in advance and use all 8 steps of the process to include MDMP	Refined weekly cadet training meeting format will facilitate understanding accountability for training and facilitate planning further into advance

Effectively use Troop Leading Procedures and the Military De

Outcome 18 – Tactics and Techniques Effectively use Troop Leading Procedures and the Military Decision Making Procedure (MDMP)	Demonstrate through planning, coordination and execution of 8 step training model Chain of command and staff positions Leadership Labs and FTX	Cadets utilize TLPs effectively; however need additional practice with MDMP to make effective recommendations to the commander	Use MDMP for major staff projects to include the FTX, military ball etc.

Top

Leadership in a Complex World

Dynamics of leading military operations. Subjects include military law, principles of war, operations, training, and logistics. Presented in context of modern battlefield. Culminates with commission as an officer in the U.S. Army. Lab included.

MIL S 421

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Must be contracted in ROTC program.
Taught	Winter

Course Outcomes

Synthesize all aspects of Army Values and Warrior Ethos

1. Character and Accountability. Synthesizes all aspects of Army Values and Warrior Ethos and demonstrates the courage, character, physical and mental toughness and values required to succeed as an Army Officer	Warrior Ethos Quiz Battle Analysis Presentation Battle of Bear River Presentations and Staff Ride Demonstrate personal example while in leadership positions	Students can define, understand and demonstrate the Army values and Warrior ethos in their daily lives. Some struggle to demonstrate commitment as the semester continues as demonstrated by inconsistent meeting of suspenses / attendance	Clearly articulate expectations in writing and verbally during initial counseling to include a commitment resulting in at least cheerful cooperation leading to heartfelt commitment and creative excitement

Demonstrate ability to plan, prepare & execute platoon-level

2. Professional competence. Demonstrates the ability to plan, prepare, and execute platoon-level training strategies including individual and collective tasks to enable mission accomplishment.	Application of 8 step training model during weekly Company training meetings PE – Assistant S3 as Lab OIC Plan and execute Leadership Lab, FTX, MS III FTX, PT	Cadets demonstrate significant improvement in this area during the course of the year	Sustain current method

Analyze ambiguous situations and develop situations

3. Critical Thinking & Problem Solving. Recognizes and	Leader Challenge exercises Professional Reading	Cadets demonstrate critical thinking through analysis of problems,	Increase the use of leader challenges and more detailed battle

analyzes ambiguous situations, and develops solutions to tactical, ethical, and leadership problems facing a newly commissioned officer.	Reflections Battle Analysis Bear River Battlefield Staff Ride PE Plan, coordinate, execute, assess, and provide feedback during tactical training events (FTX, leadership lab, PT)	however lack creativity in their solutions, instead focusing on traditional proven solutions	analysis and analysis of professional reading to expose students to a greater variety of moral / ethical / tactical situations resulting in more creative solutions

Apply adaptive decisions in a complex and ambiguous environm

4. Adaptability & initiative. Able to apply agile and adaptive decisions in a complex and ambiguous environment.	Plan, coordinate, execute, assess, and provide feedback during tactical training events (FTX, leadership lab, PT) Battle Analysis	Over the course of the semester and multiple iterations approx. 75% of Cadets demonstrate adaptability to changing situations and 80% demonstrate initiative within the commanders intent	Start each MON class with a leader challenge designed to have students apply initiative and adaptability in a real world situation and then discuss various ways to accomplish the mission

Demonstrate ability to build and sustain multi-functional te

5. Team Building and Collaboration. Demonstrates the ability to build and sustain multi-functional teams in a complex, uncertain environment and able to accomplish the mission within the commander's intent.	Demonstrate personal example while in leadership positions Group projects: Battle Analysis and present Army training in classroom setting	Generally Cadets demonstrate this outcome by the end of the course.	Sustain

Assess the impacts of cultural differences on military opera

6. Cultural Competence. Assess the impacts of cultural differences on military operations and anticipate the consequences of the Army's interaction with disparate stake holders	Professional Reading reflections Battle Analysis Bear River Battlefield Staff Ride Cultural application to various real world situations (current events discussions) PE at Leadership Lab	Cadets generally recognize the importance of understanding foundational cultural concepts and cross cultural competency.	Continue to use leadership challenges which require application of local cultural concepts Reinforce foreign language and foreign cultural understanding through the order of merit list and CULP integration Require participation in multi-cultural center event

Analyze and synthesize the communication process

7. Communication & Engagement (oral, written, and	Professional Reading reflections Combat Leadership	Cadets in general produce a minimum of 6 Army memorandums, 2-	Sustain current requirements with expanded feedback

negotiation). Analyzes and synthesizes the communication process in order to use effectively as a leader.	Seminar participation and reflections OPORDs and FRAGOs as part of 8 step training model Present Army standard training in class Battlefield Staff Ride presentations Battle Analysis	4 tactical orders in writing and conduct a minimum of 5 oral presentations. The number of products is generally about right to correct bad habits and gain confidence in oral presentation capability. They still lack quality after action reviews (feedback) in writing and orally to assessed Cadets	sessions to produce leaders who are focused on developing others without beating them down. PE on AARs in class followed by weekly exercises after leadership labs and PT class sessions to improve quality of AARs

Apply principles of lifelong learning and continued educatio

8. Lifelong Learning. Applies the principles of lifelong learning and continued education ensuring personal, professional, and organizational improvement.	Professional reading reflections Leadership Seminar participation and reflections NCO and Officer Forums Performance counseling – set goals in all areas of fitness, track progress and assess including incorporating peer feedback	Cadets demonstrate good habits of personal lifelong learning and development through consistent setting and achieving goals in all areas over the course of the AY.	Add alumni follow up assessments on lifelong learning habits carried over from MS 420 and MS 421 into their professional lives as officers in the US Army 1 year after commissioning

Demonstrate leader responsibilities in the Comprehensive Sol

9. Comprehensive Fitness. Demonstrate leader responsibilities in the Comprehensive Soldier Fitness program to reduce and manage stress (spiritual, psychological, physical).	Plan, coordinate, execute, assess and provide feedback for a unit physical fitness program Performance counseling – set goals in all areas of fitness, track progress and assess including incorporating peer feedback	Cadets generally demonstrate consistent improvement in the 5 dimensions of Comprehensive Soldier Fitness, stress management techniques, physical fitness improvement and resiliency	Sustain current programs especially in stress management, spiritual and physical fitness. Continue to focus on resiliency and toughness through regularly challenging Cadets to push themselves to their limits

Top

Tactical Leadership (Ranger Challenge)

Emphasis on fitness and tactical proficiency. Participation on University Ranger Challenge Team. Requires commitment and endurance. Provides insight into advanced Army professional training.

MIL S 425R

Hours	2.0 Credit, 3.0 Lecture, 16.0 Lab
Prerequisites	Current enrollment in AROTC program.
Taught	Fall, Winter

Course Outcomes

Leader Development

Outcome 1: Leader Development	Students are given training guidance, mandatory training/class timeline, and expected outcomes from the instructor (CPT Young). From there it becomes the responsibility of the students to asses their available resources, identify their key training tasks, and build a detailed event timeline with a comprehensive training outline. Classes/training for each block of instruction/skill-set is supervised by class leadership and delegated to other students to become subject mater experts for their respective skill-sets and train the other students in the class.	The students demonstrated solid leadership, good work ethic, and developed quality training. However, their training was not always nested within the initial guidance given by the instructor (CPT Young). This resulted in inefficiencies in lines of effort that were not focused on intended outcomes.	Instructors' (CPT Young) initial guidance needs to be more specific and focused. Execution needs more supervision without crossing the threshold of diminishing an active learning environment.

Showcasing Military Skills and Excellence

Outcome 2: Show-casing Military Skills and Excellence	The Ranger Challenge class (425R) allows students to enhance their military skills and show-case their efforts in high visibility culminating and evaluated events.	Students enrolled in 425R demonstrate a greater understanding of leadership, tactics, and techniques by practical application throughout all classes, training exercises, and events within the BYU ROTC organization.	BYU ROTC public affairs need to synchronize more effectively with campus and local media in order to not only show-case the achievements of the Ranger Challenge team within the ROTC organization, but also extend visibility to other student organizations across campus and the local community.

Building Relationships and Camaraderie

Outcome 3: Building Relationships and Camaraderie	During the class students work through the dynamics of peer leadership, working together as a team, competition with other teams, and professional interaction/coordination with foreign nations.	The BYU Ranger Challenge team organized, synchronized, panned, and executed within the organization with effective conflict management and communication. During the Sandhurst Cup, an International competition at West Point Military Academy, the BYU Ranger Challenge team built lasting relationships with other US military organizations and foreign nations.

Winning

Outcome 4: Winning	The Ranger Challenge Team, selected from the top 11 enrolled in the class, placed 1st overall in the Brigade Ranger Challenge Competition in Colorado. As the winner of the Brigade Competition, the team was selected to participate in the Sandhurst Cup at West Point Military Academy. The BYU Ranger Challenge team placed 14 out of 54	Competition is one of the key drivers for active learning in this tactical leadership class. The students are more focused, they work harder, and they put in more hours in order to achieve higher standards on individual and collective skill-sets for the benefit of the team.

Participating teams
from all over the world
at the Sandhurst Cup.

Top

Introduction to Clinical Laboratory Techniques

Hospital laboratory techniques.

MMBIO 102

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Techniques

Describe and carry out basic clnical laboratory techniques

Careers

List and evaluate careers in clinical laboratory sciences

Top

Extremophiles: Life in Extreme Environments

A field trip-based investigation of microbial life in extreme environments. Field trips to Yellowstone National Park, Great Salt Lake, and to a water treatment plant will investigate thermophiles, halophiles, and methanogens, respectively.

MMBIO 110R

Hours	1.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Life in Extreme Environments

Students will deepen their appreciation of microbial life by investigating extreme environments in which microorganisms have evolved to grow and thrive.

Top

General Biology: Health and Disease

An overview of the living world and how it functions and adapts in the context of human health and disease.

MMBIO 121

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

General biology with a focus on health and disease

Students will develop a solid undertanding of general biological principles in context of relevant topics in health and biology.

Top

Introduction to Microbiology

Principles of prokaryotic biology emphasizing cell structure, function, and metabolism. Introduction to bacterial genetics, microbial diversity, and microbial ecology.

MMBIO 151

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	MMBIO 121; or PDBIO 120; or BIO 130; Chem 105 or concurrent enrollment.
Taught	Fall, Winter, Summer

Course Outcomes

Microbes

Understand what microbes are, what they are composed of, how they are built, and their phylogenetic relationships to the living world. Be able to distinguish between eukaryotes, prokaryotes, and viruses.
*Relates to Program Learning Outcome: "Exhibit mastery of four of the following six principal areas of the discipline" five of which are microbial physiology, microbial genetics, microbial ecology, medical microbiology, and virology

Microbiology Tools and Technique

Become familiar with the tools of microbiology through both lecture and labs and demonstrate basic aseptic technique. Develop proficiency in working with bacteria including streaking for isolation and performing growth experiments.
*Relates to Program Learning Outcome: "Exhibit mastery of four of the following six principal areas of the discipline" three of which are microbial physiology, microbial genetics, microbial ecology

Research Design, Data Collection, and Analysis

Formulate questions, testable hypotheses and implement appropriate experimental protocol. Collect and analyze data and be able to draw appropriate conclusions.
*Relates to Program Learning Outcome: “Devise experiments with appropriate hypotheses and controls.”

Making Informed Judgements

Integrate knowledge to make informed judgments on tests, lab reports, lab presentations and lab write-ups
*Relates to Program Learning Outcome: "Communicate scientific information using both oral and written methods"

Complexity, Diversity and Purposes of Life

Obtain a deeper appreciation for the complexity, diversity and purposes of life.
*Relates to Program Learning Outcome: "Reflect/discuss/explore how faith in the Lord and Christ-

like living are affected by an understanding of fundamental biological principles"

Top

Careers in Biomedical Sciences

Lectures and field trips surveying career choices.

MMBIO 162R

Hours	1.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Career preparation

Students should be able to make informed decisions about career paths in Microbiology

Phage Hunters: Discovery

Phage isolation and characterization.

MMBIO 194A

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	By application only.
Note	For freshmen or sophomore students only. Requires two semester commitment.
Taught	Fall

Course Outcomes

Aseptic Technique

Use proper aseptic techniques for the transfer and handling of microorganisms and instruments.

Media and Test Systems

Use appropriate microbiological media and test systems.

Laboratory Equipment

Use standard microbiology laboratory equipment correctly.

Experimental Protocol and Data Analysis

Follow an experimental protocol, collect and organize data in a systematic fashion, present data in an
appropriate form, assess the validity of the data, and draw appropriate conclusions based on the results.

Top

Phage Hunters: Comparative Genomics

Phage genome annotation. Focus on experimental design and data analysis.

MMBIO 194B

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	MMBIO 194A
Note	For freshmen or sophomore students only. Requires two semester commitment.
Taught	Winter

Course Outcomes

DNA Preparation

Prepare DNA for sequencing

Archiving Samples

Archive phage samples and DNA samples (submit archived phage to HHMI)

Bioinformatic Software

Learn how to use bioinformatics software for the following:

- DNA sequence alignment (Consed)
- Primer design (Primer3)
- Assessing ORFs for gene calls (GBrowse, Glimmer and GeneMark)
- Homology assessment (BLAST and Phamerator)
- Annotation (Apollo)
- Comparative analysis (positional and functional)

GenBank

Analyze, annotate and prepare to submit genome to GenBank (submit if possible)

Research Abstract

Prepare an abstract for a presentation of research data

Research Presentation

Prepare and deliver a research presentation (oral and poster)

Research Reading and Writing

Gain experience in research writing and reading of scientific papers

Top

General Microbiology

Microbial world, emphasizing communicable diseases, their causes and control.

MMBIO 221

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Any biology course.
Recommended	Any chemistry course.
Note	Recommended for students seeking a liberal education in microbiology who do not have the prerequisites to take the more advanced courses.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

0

Explain and discuss the ways by which microbiologists study microorganisms.

Classify Microorganisms

- Differentiate between the types of microorganisms by identifying relevant structure and their function in the biosphere.

Microbiology Techniques

- Explain and discuss the ways by which microbiologists study microorganisms.

4

Discuss the principle infectious diseases that affect mankind, including how they are transmitted, treated, controlled and prevented.

Immunity and Microbiology

- Describe how the human body defends itself against infectious agents.

1

Differentiate between the types of microorganisms by identifying relevant structure and their function in the biosphere.

2

Propose microbial solutions to global problems.

Microbial Solutions

- Propose microbial solutions to global problems.

3

Describe how the human body defends itself against infectious agents.

Top

Honors General Microbiology

Immunity and Microbiology

- Describe how the human body defends itself against infectious agents.

1

Differentiate between the types of microorganisms by identifying relevant structure and their function in the biosphere.

2

Propose microbial solutions to global problems.

Microbial Solutions

- Propose microbial solutions to global problems.

3

Describe how the human body defends itself against infectious agents.

General Microbiology Laboratory

MMBIO 222

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	MMBio 221 or concurrent enrollment.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Microscopy

Use the bright field microscope to view and interpret microbiological specimens

Aseptic Technique

Use proper aseptic techniques int he handling and transfer of microbiological specimens

Media

Use standard microbiological media to culture and identify common microbiological specimens

Equipment

Use standard microbiology laboratory equipment correctly

Experimental procedure

Follow an experimental protocol, collect and organize data, present data in an appropriate form, assess the validity of the data, and draw appropriate comclusions based on the results

Microorganisms in life

Integrate information and skills gained int eh course to make informed judgements about the role of microorganisms in everyday life

Safety

Use accepted safety protocols when handling microbiological specimens and chemicals

Molecular Biology

Fundamentals of protein and nucleic acid structure and their function in the context of the classical experiments that have informed our current models of biology at the molecular level.

MMBIO 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BIO 130 & CHEM 105; or PDBIO 120 & CHEM 105; or MMBIO 121 & CHEM 105
Note	Chem 105 and Chem 111 can also fulfill the prerequisite requirement; contact advisor.
Taught	Fall, Winter, Spring

Course Outcomes

Molecular Functions, Structures, Processes, and Mechanisms

Describe and compare the functions and molecular structures of DNA, RNA, and protein, and explain the processes and regulatory mechanisms governing the synthesis of each.

Molecular Biology Techniques

Explain a variety of molecular biology techniques, and interpret experimental results obtained using the various methods.

Problem Solving

Solve unfamiliar problems by applying the information and principles mastered through Learning Outcomes 1 and 2

Effective Collaboration

Collaborate with other students to solve challenging problems, to clarify ideas and concepts, and to learn from one another in a spirit of cooperation and integrity

Molecular and Cellular Biology Laboratory

Molecular and cellular biology techniques laboratory.

MMBIO 241

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MMBio 240 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Ethics and Integrity

Practice ethics and integrity by working with groups and following lab rules.*Relates to Program Learning Outcome: A commitment to professional integrity and ethical behavior consistent with themission of the university.

Experimental Design

Learn the basics of experimental design, how to formulate a hypothesis, what controls to use, how to interpret experimental data.*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls.

Scientific Communication

Practice scientific communication through written lab questions, exams and oral presentations.*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls.

Laboratory Techniques and Practices

Learn molecular biology laboratory techniques through practical laboratory exercises. Techniques include, spectrophotometry,isolation of DNA and protein, quantification of DNA and protein, techniques used to purify or detect specific proteins, such aschromatography, western blot and ELISA, DNA fingerprinting, polymerase chain reaction and enzyme assays.*Relates to Program Learning Outcome: Knowledge of principles and techniques of molecular and cellular biology.

Infection and Immunity

Principles of infectious organisms (principally bacteria and viruses), the diseases they cause, and the role of host immune responses in health and disease.

MMBIO 261

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Immune System

Understand foundational information about viruses, bacteria and the immune system by studying and reflecting on the topic.
• Relates to Microbiology and Molecular Biology Program Learning Outcome: "Exhibit mastery of four of the following six principal
areas of the discipline" three of which are medical microbiology, virology, and immunology; and to prepare the student for "further
education and/or employment in teaching, basic research, or the health professions."

Scientific Communication

Engage in discussions about virology, immunology, and medical microbiology concepts and research to become confident in discussingthese topics in writing or speech.
• Relates to Microbiology and Molecular Biology Program Learning Outcome: "Communicate scientific information using both oral and written methods."

Immune Defense

Expand the student's understanding microbial invaders and their pathogenic mechanisms and acknowledge the miracle of immunedefense. Develop good study habits through participation in group study sessions.
• Relates to Program Learning Outcome: "Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an
understanding of fundamental biological processes." As well as develop a "commitment to professional integrity and ethical behavior
consistent with the mission of the university and accepted standards of professional conduct."

Microbial Genetics

How DNA governs complex bacterial functions. Classical and modern approaches to gene discovery, including genetic screens, gene mapping, targeted genetic manipulations, and analyzing gene activity.

MMBIO 360

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	MMBIO 240
Taught	Fall

Course Outcomes

Bacterial Genetics

Bacteria are remarkable in their ecological versatility, metabolic power, pathogenic properties, and biotechnological potential. In this course you will come to a deeper understanding of how DNA orchestrates bacterial traits, and you will learn, by direct experience, how to use the "toolkit" of the bacterial geneticist. Your learning outcomes in this course will include the design and execution of experiments, analysis and critique of scientific literature, and both written and oral communication of scientific principles. You will also have opportunities to reflect upon how your faith in God is bolstered by your intellectual pursuits in the life sciences.

Microbial Ecology

Natural history of a microbe; its distribution and abundance. Critical influence of scale and perspective in determining underlying mechanisms.

MMBIO 363

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	BIO 130; or MMBIO 151; or PDBIO 120
Taught	Fall

Course Outcomes

Microbial Ecology

Each student will have a clear understanding and mastery of the discipline of microbial ecology.

Experimental Design

Each student will design and execute original experiments with appropriate hypotheses and controls

Literature Analysis and Critique

Each student will become proficient at the analysis, interpretation, and critique of the scientific literature associated with this discipline

Scientific Communication

Each student will communicate understanding in both written and verbal formats.

Religion, Philosophy, and Microbiology

Each student will have the opportunity to explore the religious, philosophical, and personal aspects of the discipline

Top

Bacterial Pathogenesis

Fundamental principles of bacterial pathogenesis, emphasizing the molecular interactions of medically important bacteria and their hosts.

MMBIO 364

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	MMBIO 261
Taught	Winter

Course Outcomes

Major Bacterial Pathogens

Recognize the diseases caused by major bacterial pathogens and understand the features of pathogenic bacteria that enable them to cause disease

Research Evaluation

Read, understand, and evaluate research published in the area of bacterial pathogenesis.

Research Reporting

Effectively report in writing the results of your own laboratory research

Working with Infectious Bacteria

Work safely and effectively with infectious bacteria.

Molecular Tools and Techniques

Have a basic proficiency in the major current molecular tools and techniques used in bacterial pathogenesis research.

Top

Readings in Molecular Biology

Selected readings in molecular biology.

MMBIO 390R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240
Recommended	PDBio 360.
Taught	Fall, Winter, Spring

Course Outcomes

Current Literature and Techniques

Become familiar with the current literature and techniques in molecular biology

Critical Analysis

Gain experience in critically evaluating the current literature in molecular biology.

Scientific Communication

Gain confidence in scientific presentations and discussions.

Hematology

Normal and abnormal hematology.

MMBIO 392

Hours	2.5 Credit, 2.5 Lecture, 1.0 Lab
Prerequisites	Medical laboratory science program acceptance.
Taught	Winter Term 1

Course Outcomes

Laboratory Tests

Perform the full range of clinical laboratory tests in areas such as hematology and play a role in the development and evaluation of test systems and interpretive algorithms
*Relates to Program Learning Outcome: #1

Clinical Responsibilities

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed
*Relates to Program Learning Outcome: #2

Fundamentals

Possess basic knowledge, skills, and relevant experiences for the following:

- Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
- Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
- Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

*Relates to Program Learning Outcome: #3, 4, 5

Immunohematology and Coagulation Theory

Theory and practice of bloodbanking and coagulation theory.

MMBIO 393

Hours	2.5 Credit, 2.5 Lecture, 1.0 Lab
Prerequisites	Medical laboratory science program acceptance.
Taught	Winter Term 2

Course Outcomes

Clinical Laboratory Tests

Perform the full range of clinical laboratory tests in areas such as coagulation and immunohematology and play a role in the development and evaluation of test systems and interpretive algorithms
*Relates to Program Learning Outcome: #1

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed
*Relates to Program Learning Outcome: #2

Possess basic knowledge, skills, and relevant experiences for the following:

- Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
- Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
- Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

*Relates to Program Learning Outcome: #3, 4, 5

Practical Hematology

Laboratory to accompany MMBio 392; medical laboratory techniques in hematology.

MMBIO 394

Hours	2.0 Credit, 0.0 Lecture, 7.0 Lab
Prerequisites	MMBio 392 or concurrent enrollment.
Taught	Winter Term 1

Course Outcomes

Discuss the techniques of drawing, proper collection, and storage of blood samples for hematology procedures.
*Relates to Program Learning Outcome: #1

Practice safe techniques according to those presented in class and in the textbook throughout your career in student and clinical laboratory experiences.
*Relates to Program Learning Outcome: #2

Demonstrate your ability to properly use the various types of spectrophotometers in the laboratory.
*Relates to Program Learning Outcome: #2

Prepare the reagents required in the procedures throughout the semester where possible.
*Relates to Program Learning Outcome: #2

Select proper reagents, perform procedures, interpret results, and evaluate the significance of the results for all determinations listed on the course outline
*Relates to Program Learning Outcome: #2

Practical Immunohematology and Coagulation Theory

Laboratory to accompany MMBio 393; medical laboratory techniques in immunohematology and coagulation theory.

MMBIO 395

Hours	2.0 Credit, 0.0 Lecture, 7.0 Lab
Prerequisites	MMBio 393 or concurrent enrollment.
Taught	Winter Term 2

Course Outcomes

Perform the full range of clinical laboratory tests in areas such as coagulation and blood banking and play a role in the development and evaluation of test systems and interpretive algorithms
*Relates to Program Learning Outcome: #1

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed
*Relates to Program Learning Outcome: #2

Possess basic knowledge, skills, and relevant experiences for the following:

- Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
- Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
- Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information
  *Relates to Program Learning Outcome: #3, 4, 5

Academic Internship

Approved experiential learning.

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 40.0 Lab
Prerequisites	Mentor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Experimental design and experience

Students will be able to design and perform experiements using the latest techniques.

Experimental analysis

Students will analyze experimental results and draw conclusions.

Effective communication

Students will communicate with supervisors and collegues in an outside the university environment. They will present their scientific research.

Top

Clinical Microbiology

Approaches to laboratory diagnosis of infectious diseases.

MMBIO 407

Hours	4.0 Credit, 2.0 Lecture, 6.0 Lab
Prerequisites	MMBIO 261; Admission to the Medical Laboratory Science program.
Taught	Winter

Course Outcomes

Laboratory tests and diagnostics

Gain familiarity with the medically important bacteria and fungi by performing the full range of clinical laboratory tests in Microbiology (Prepare, examine and interpret gram stained smears of microorganisms, streak appropriate media for isolation of microorganisms, interpret stains, growth patterns, and biochemical reactions to aid in the identification of microbial organisms) and play a role in the development and evaluation of test systems and interpretive algorithms

Test Systems Development and Evaluation

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance. Demonstrate improvement wherever laboratory testing is researched, developed, or performed. Be able to design experiments, with appropriate controls, to test various hypotheses in clinical Microbiology.

Effective Communication

Possess basic knowledge, skills, and relevant experiences for the following:

- Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
- Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
- Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

Laboratory Management and Organization

Possess basic knowledge, skills, and relevant experiences for the following:

- Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
- Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
- Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

Information Processing and Management Systems

Possess basic knowledge, skills, and relevant experiences for the following:

- Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
- Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
- Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

Medical Parasitology

Pathogenesis, diagnosis, and epidemiology of human parasitic diseases. Laboratory included.

MMBIO 417

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MMBIO 261 & MMBIO 240
Note	Fall semester for Medical Laboratory Science students only. Winter semester for students in other majors.
Taught	Fall, Winter

Course Outcomes

Parasites and Pathogenesis

Gain familiarity with the medically important parasites. This includes understanding parasite host range as well as pathology and mechanisms of pathogenesis.
**Relates to Program Learning Outcome: Exhibit mastery of medical microbiology*

Experimental Design

Be able to design experiments, with appropriate controls, to test various hypotheses in parasitology.
**Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.*

Critical Reading and Analysis

Read and critically interpret current scientific literature in the field of parasitology.
**Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.*

Alleviating Suffering

Students should gain an understanding of their role and responsibility in alleviating suffering caused by parasitic diseases.
**Relates to Program Learning Outcome: Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an understanding of fundamental biological principles.*

Top

Pathophysiology and Laboratory Diagnosis in Clinical Chemistry

Laboratory diagnosis of disorders involving the major systems of the human body.

MMBIO 422

Hours	2.5 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Medical laboratory science program acceptance.
Taught	Fall Term 1

Course Outcomes

Techniques

Perform analytical tests of body fluids, cells, and other substances

Analysis

Confirm abnormal results, verify quality control procedures, execute quality control procedures, and develop solutions to problems concerning the generation of laboratory data

Quality control

Make decisions conscerning the results of quality control and quality assurance measures, and institute proper pocedures to maintain accuracy and precision.

Pathophysiology and Lab Diagnosis in Clinical Chemistry and Molecular Diagnostics

Laboratory diagnosis of disorders involving the major systems of the human body and molecular diagnostic applications.

MMBIO 423

Hours	2.5 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Medical laboratory science program acceptance.
Taught	Fall Term 2

Course Outcomes

Laboratory tests

Perform the full range of clinical laboratory tests in areas such as clinical chemistry, urinalysis and molecular dioagnostics and play a role in the development and evaluation of test systems and interpretive algorithms

Analysis

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed.

Communication and procedures

Possess basic knowledge, skills, and relevant experiences for the following
Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
Financial, operations, marketing, and human dresource management of the clinical laboratory to enable cost-effective, hight-quality, value-added laboratorys ervices
Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated informaation

Diagnostic Techniques in Clinical Chemistry

Medical laboratory techniques in clinical chemistry.

MMBIO 424

Hours	2.0 Credit, 0.0 Lecture, 7.0 Lab
Prerequisites	Medical laboratory science program acceptance.
Taught	Fall Term 1

Course Outcomes

Clinical chemistry tests

Perform the full range of clinical laboratory tests in clinical chemistry

- Discuss the techniques of drawing, proper collection, and storage of blood samples for clinical chemistry procedures
- Practice safe techniques according to those presented in class and in the textbook throughout your career in student and clinical laboratory experiences.
- Demonstrate your ability to properly use the various types of spectrophotometers in the laboratory
- Prepare the reagents required in the procedures throughout the semester where possible
- Perform proper procedures, discuss the purpose of reagents, interpret results, evaluate quality assurance factors and solve problems or discrepancies for the assays and tasks performed.

Decision making

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulation, education, and quality assurance performance improvement whenever laboratory testing is researched, developed, or performed.

Diagnostic Techniques in Clinical Chemistry and Molecular Biology

Medical laboratory techniques in clinical chemistry and diagnostic molecular genetics.

MMBIO 425

Hours	2.0 Credit, 0.0 Lecture, 7.0 Lab
Prerequisites	Medical laboratory science program acceptance.
Taught	Fall Term 2

Course Outcomes

Laboratory tests

Perform the full range of clinical laboratory tests in clinical chemistry

- Discuss the techniques of drawing, proper collection, and storatge of blood samples for clinical chemistry procedures
- Practice safe techniques according to those presented in class and in the textbook throughout your career in studen and clinical laboratory experiences.
- Demonstrate your ability to properly use the various types of spectrophotometers in the laboratory
- Prepare the reagents required in the procedures throughout the semester where possible
- Perform proper procedures, discuss the purpose of reagents, interpret results, evaluate quality assurance factors and solve problems or discrepancies for the assays and tasks performed.

Decision making

Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulation, education, and quality assurance performance improvement whenever laboratory testing is researched, developed, or performed.

Advanced Cell Biology

Molecular genetics, cell biology, and developmental biology.

MMBIO 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 360; Bioscience major status.
Taught	Fall

Course Outcomes

Primary Literature

Read primary literature to further their own understanding of the topic
**Relates to Program Learning Outcome: Knowledge of the principles and techniques of molecular, cell, and evolutionary biology and genetics which prepares the students for further education and/or employment in teaching, basic research, or the health professions.*

Cell Biology Processes

Explain the processes of cell biology
**Relates to Program Learning Outcome: Knowledge of the principles and techniques of molecular, cell, and evolutionary biology and genetics which prepares the students for further education and/or employment in teaching, basic research, or the health professions.*

Molecular Processes

Apply knowledge of these molecular processes to broader topics
**Relates to Program Learning Outcome: Proficiency in formulating and carrying out independent and collaborative research projects.*

Experimental Design and Data Analysis

Analyze research data, design experiments and present data in a clear manner
**Relates to Program Learning Outcome: Communication skills in presenting their research findings through effective oral and written presentations.*

Advanced Molecular Biology

Molecular biology of gene structure and expression in prokaryotic and eukaryotic organisms.

MMBIO 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & CHEM 351; or MMBIO 240 & CHEM 285
Taught	Fall, Winter

Course Outcomes

Principles of Molecular Biology

Learn molecular biology principles through study, lecture, and class discussion. An emphasis will be on understanding the experiments used to learn these principles.
*Relates to Program Learning Outcome: Knowledge of principles and techniques of molecular and cellular biology preparing students for further education and/or employment.

Experimental Design and Data Interpretation

Apply the principles learned to design experiments and properly interpret experimental data.
*Relates to Program Learning Outcome: Proficiency in formulating research projects

Current Research Presentation

Present current research from the scientific literature.
*Relates to Program Learning Outcomes: Communicate scientific information using oral methods; interpret, analyze and critique experiments from the primary scientific literature. Presenting research findings through effective oral and written presentations.

Integrity and Ethical Behavior

Demonstrate integrity and ethical behavior during all class work.
*Relates to Program Learning Outcome: Commitment to professional integrity and ethical behavior consistent with the mission of the University.

Advanced Molecular Biology Laboratory

Laboratory to accompany MMBio 441.

MMBIO 442

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	MMBIO 241; MMBio 441 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Laboratory Techniques

Learn molecular biology laboratory techniques through hands-on experience. Techniques will include DNA and RNA isolation, PCR, microRNA isolation, northern blotting, RFLP analysis, site-directed mutagenisis, protein extraction and EMSA.*Relates to Program Learning Outcome: Knowledge of principles and techniques of molecular and cellular biology

Experimental Design

Apply the techniques to design experiments with appropriate hypotheses and controls and properly interpret experimental data*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls

Scientific Communication

Practice scientific communication and record-keeping through the completion of a laboratory notebook and answering written and oral questions and presentations.*Relates to Program Learning Outcome: Demonstrate Communication skills in presenting research findings through effective oral and written presentations.

Independent Experiments

Design and carry out independent experiments*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls

Advanced Bacterial Physiology

Principles of prokaryotic physiology, including cell structure and function, gene regulation, and biochemical processes; focusing on the unique aspects of prokaryotic biology.

MMBIO 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 151; or MMBIO 221
Recommended	MMBio 240.
Taught	Winter

Course Outcomes

Microbial Physiology

Students will demonstrate an advanced understanding of selected topics in microbial physiology (cell structure, growth, biosynthesis, transport, etc.) through their participation in classroom discussions, writing assignments and oral presentations.

Critical Thinking, Research, and Reporting

Students will demonstrate the ability to read, comprehend and communicate current research in microbial physiology by making Powerpoint presentations to the class.

Scientific Review

Students will write a scientific review article on a topic of their choice related to microbial physiology.

Top

Immunology

Advanced concepts of immunological processes.

MMBIO 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & MMBIO 261
Taught	Fall, Winter

Course Outcomes

Advanced Immunology

Understanding advanced concepts of Immunology by studying and reflecting on the subject.
**Relates to Program Learning Outcome: Exhibit mastery of four of the principle areas of the discipline*

Experimental Design and Evaluation

Understands experimental designs used in immunology research and determine the soundness of the immunological data.
*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Research Evaluation

Read and understand current publications in Immunology and be able to discuss and critically evaluate experiments and data
*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Scientific Communication and Presentation

Engage in discussions about concepts in immunology and research. Present a PowerPoint on a particular immunological topic. Engage in a question and answer session on the content. Write an easy on a chosen subject relating to recent immunological advances.
*Relates to Program Learning Outcome: Communicate scientific information using both oral and written methods.

Divine Design of the Immune System

Develop a deep appreciation for our Heavenly Father and his love for each of us by engaging in studying how he designed the immune system to protect his children from disease.
*Relates to Program Learning Outcome: Reflect/ discuss/ explore how faith in the Lord, and Christ like living are affected by an understanding of the fundamental biological processes.

Virology

Basic principles of virology, emphasizing selected molecular aspects of virus life cycles and disease processes.

MMBIO 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & MMBIO 261
Taught	Fall, Winter

Course Outcomes

Virology Fundamentals

Be able to answer basic questions about Virology: Why are viruses organized as they are? How do viruses replicate? How do viruses cause disease? What are the interactions between viruses and the host immune system? How to prevent/treat/cure viral infections? How can viruses be used as tools to study biological processes and for gene transfer? How can an understanding of viruses help you in your future career?
*Relates to Program Learning Outcome: “Exhibit mastery of four of the principal areas of the discipline”, one of which is Virology.

Experimental Tools

Understand experimental tools used to study viruses (these are broadly applicable to molecular biology, cell biology, and microbiology) and be able to develop experiments and interpret data.
*Relates to Program Learning Outcomes: “Devise experiments with appropriate hypotheses and controls” and “Interpret experiments from primary scientific literature”

Scientific Writing

Write about a current, pressing issue in the field of Virology.
*Relates to Program Learning Outcome: “Communicate scientific information”

Alleviating Human Suffering

Understand how research of viruses “by study and also by faith” can lead to alleviation of human disease and suffering.
*Relates to Program Learning Outcome: “Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an understanding of fundamental biological processes”

Virology Laboratory

Laboratory exercises illustrating in vitro behavior of selected viruses. Developing laboratory skills for virus studies.

MMBIO 466

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MMBio 261; or MMBio 465 or concurrent enrollment.
Taught	Winter

Course Outcomes

Viral Cultures

Be able to gain hands-on experience in the ability to characterize various aspects of viral infections based upon cultured eukaryotic cells.

Stock Titrating

Be able to titrate virus stocks.

Serological Tests

Be able to determine if a human has been previously exposed to a specific virus by perform serological tests.

Immunology Lab

Laboratory exercises in advanced concepts of immunological processes.

MMBIO 467

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MMBio 261; or 463 or concurrent enrollment.
Taught	Fall

Course Outcomes

Lab Notebook

Maintain a research lab book with experimental protocol, data, and discussion of results.

Immunology Concepts

Understand advanced laboratory concepts of Immunology by completing protocols and experiments

Experimental Design and Analysis

Understand experimental design used in immunology research and determine the soundness of immunological data according to the design and controls used in the experiment.

Experimental Data

Obtain and interpret experimental data.

Mentoring and Collaboration

Expand the student's understanding of immunology research and acknowledge the miracle of immunological processes.Develop good social skills through participation in laboratory experiments with other students.

Top

(MMBio-Bio-PWS) Genomics

Current analysis of genes and genomes; computational and statistical approaches for analyzing genomic data, including genome sequencing and annotation, gene expression and the transcriptome, proteomics and functional genomics, and genetic variation and SNPs.

MMBIO 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & PWS 340
Taught	Fall, Winter

Course Outcomes

Genomic Experiments

Students will complete a series of exercises with data representing genomic experiments (analysis and interpret).

Genome Sequences

Students will describe how genomes are sequenced.

Genomic Features

Students will understand techniques and concepts to assess genomic features such as methylation, gene expression, etc.

Top

Synthetic Biology

Students are introduced to concepts of synthetic biology and then conceptualize, design, build, and characterize a genetically engineered machine. The class culminates in presentations at the IBE Western regional and IGEM regional conferences in October.

MMBIO 470R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	MMBIO 240; Application and interview.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Molecular Biology Seminar

Critical examination of current literature and research in molecular biology.

MMBIO 490R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	MMBio 441 or concurrent enrollment; senior status.
Taught	Fall, Winter

Course Outcomes

Current research

Describe the current research in the field of molecular biology

Network with current researchers

Network and talk to prominent researchers in the field

Research Analysis

Analyze current research and experimental design.

Concept Applications in Laboratory Medicine

Case presentations of various medical disorders.

MMBIO 491

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into medical laboratory science program.
Taught	Fall

Course Outcomes

Data and Symptom Interpretation

This course is designed to allow the student to interpret, evaluate, and correlate laboratory data and clinical symptoms pertaining to specific disease states. Each week several students will present case study presentations covering current lecture content. For example, week two covers carbohydrate metabolism and related disease processes so the assigned students will present patient data focusing on a specific disease such as diabetes mellitus, including symptoms, laboratory findings and treatment.

Attendance

To receive a passing grade for this course, it is expected that the student will attend all weekly sessions **ON TIME** with no more than one excused absence permitted and present at least one case study during the semester. Class will be held on each Friday of the semester at 9 a.m.

Mentored Research

Mentored research.

MMBIO 494R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Mentor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research Experience

Perform current techniques and carry out experiments in a professional manner. Gather data and evaluate results.

Scientific Communication-Research

Properly notate work and results in a scientific notebook. Participate in the preparation of scientific papers and presentations.

Experimental design

Develop, design and troubleshoot experimental procedures.

Mentoring and collaboration

Form relationships with a research mentor and other students in the lab. Begin networking and professional activities.

Scientific Communication-primary literature

Read, and use primary literature to design experiements and advance a project. Present and evaluate articles from the primary literature

Clinical Experience

Performing the full range of clinical laboratory tests in an affiliated clinical facility. A six-month internship experience.

MMBIO 496R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 392 & MMBIO 422
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Clinical experience

Have a clinical eperience outside of the University. Be familiar with procedures, protocols, and working environment in a working clinical laboratory.

Top

Senior Honors Thesis

MMBIO 499R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Topic to be cleared with Honors Program and Department of Microbiology and Molecular Biology.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Thesis Research

Students will design and carry out experiments to research the topic of their honors thesis

Thesis Writing

Students will prepare a well-written thesis that communicates their research findings.

Top

History of Microbiology and Molecular Biology

Exploring the lives and historical settings of major contributors to the development of the sciences of microbiology and molecular biology emphasizing the importance of their ground-breaking discoveries in both basic and applied science.

MMBIO 510

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Any one 400-level MMBio course.
Taught	Winter even years

Course Outcomes

Historical Perspective

The objective of this course is to examine the lives and accomplishments of a few of our science ancestors creating a clearer perspective of our place in the constellation of our science.

Top

Philosophy of Biology

Epistemological, metaphysical, and ethical issues in the biological sciences. Philosophical questions concerning the theory of evolution, debate between evolution and creationism, fitness, adaptationism, the units of selection, systematics, sociobiology, and evolutionary ethics.

MMBIO 513

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240
Taught	Fall even years

Course Outcomes

Readings in Biology

Students will read and analyze historically relevant scientific primary literature

Philosophy of Biology

Students will explain philisophical concepts underyling biology

Ethical Science

Students will use philisophical principles to discuss and evaluate ethical issues in biology

Top

RNA-Mediated Gene Regulation

Current advances in studies on RNA processing, including RNA splicing and editing, riboswitches, ribozymes, and the role of small RNAs in RNA interference and regulation of gene expression.

MMBIO 515

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240
Taught	Fall odd years

Course Outcomes

Current research

Understand the current approaches and advances in RNA-mediated gene regulation research.

Current literature

Read and comprehend reports in the current scientific literature regarding RNA-mediated gene regulation.

Presentation

Develop skills in making effective scientific presentations using high standards of clarity, relevance, and logic.

Select Pathogens

Current literature in special pathogens.

MMBIO 518

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MMBio 221 or equivalent.
Taught	Fall odd years

Course Outcomes

Biosafety awareness

Understand the procedures, practices, and facilities required for biosafety levels 1-4.

Bioterrorism

Understand the basic parameters of bioterrorism and the current threats

CDC classification

Understand the current CDC classification of select agents.

Select agent biology

Understand the basic biological characteristics of each select agent, their virulence mechanisms, and their interaction with various hosts.

Bioweapons

Understand how select agents have been used and could be used as bioweapons.

Students' choice

_____
(Individual – Please write your own in the space above)

Top

Current Trends in Pathogenesis

Trends from current literature on pathogenesis of infectious diseases.

MMBIO 523

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Pathogenesis Journal Club

Students will become familiar with current literature in microbial pathogenesis by critically evaluating articles and by presenting experimental data and discussing its significance.

Top

Current Topics in Pathogenesis

Readings from current literature on pathogenesis; student presentations and discussion.

MMBIO 528R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	MMBio 151, 221, 261 or equivalent.
Recommended	MMBio 364.
Taught	Fall even years, Winter

Course Outcomes

Trends in Pathogenesis

Students will become familiar with advances in microbial pathogenesis by critically evaluating current literature in the discipline.

Cell Biology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Current Topics in Microbiology and Molecular Biology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Evolution

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Gene Expression

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Immunology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Microbial Ecology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Microbial Genetics

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Basic molecular biology techniques

Learn basic Molecular biology techniques including but not limited to:

- Plasmid construction
- PCR
- Primer design
- Cloning procedures
- DNA transformation procedures
- Basic bacterial growth protocols
- Enzyme assays (B-gal, etc.)
- Maintaining and modifying primer, plasmid and strain databases
- Maintaining a proper notebook

Experimental Research Design

Design and conduct research experiments with appropriate positive and negative controls.

Analyze Scientific Articles

Learn how to read and analyze scientific articles.

Microbial Physiology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Basic molecular biology techniques

Learn basic Molecular biology techniques including but not limited to:

- Plasmid construction
- PCR
- Primer design
- Cloning procedures
- DNA transformation procedures
- Basic bacterial growth protocols
- Enzyme assays (B-gal, etc.)
- Maintaining and modifying primer, plasmid and strain databases
- Maintaining a proper notebook

Experimental Research Design

Design and conduct research experiments with appropriate positive and negative controls.

Analyze Scientific Articles

Learn how to read and analyze scientific articles.

Parasitology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Basic molecular biology techniques

Learn basic Molecular biology techniques including but not limited to:

- Plasmid construction
- PCR
- Primer design
- Cloning procedures
- DNA transformation procedures
- Basic bacterial growth protocols
- Enzyme assays (B-gal, etc.)
- Maintaining and modifying primer, plasmid and strain databases
- Maintaining a proper notebook

Experimental Research Design

Design and conduct research experiments with appropriate positive and negative controls.

Analyze Scientific Articles

Learn how to read and analyze scientific articles.

Pathogenic Microbiology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Current Topics

Students will describe in depth current topics in molecular or microbiology

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Virology

Readings from current literature on a specific topic; student presentations and discussion.

MMBIO 551R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Communication

Students will present finding from the primary literature in a scientific manner, and evaluate the presentations of others.

Current Topics

Students will describe in depth current topics in molecular or microbiology

Primary literature

Students will be able to read, interpret, understand and evaluate current primary literature

Top

Genes and Cancer

Molecular basis of human cancers, emphasizing oncogenes, tumor suppressor genes, chromosomal instability, hereditary cancers, chemical and physical carcinogens, and viral carcinogenesis.

MMBIO 557

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MMBio 441 or equivalent.
Taught	Winter odd years

Course Outcomes

Please contact the individual department for outcome information.

Molecular Virology

Molecular mechanisms of virus architecture, attachment and entry pathways, replication strategies, oncogenesis, evolution, and mechanisms of pathogenesis.

MMBIO 565

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MMBio 465 or equivalent.
Taught	Winter odd years

Course Outcomes

Viral origins and organization

Describe why viruses are organized and classified as they are.

Replication

Describe viral replication on a molecular level for multiple virus types

Viruses and disease

Explain how viruses cause disease, and the interactions between viruses and the host immune system.

Viruses and molecular biology techniques

Describe how can viruses can be used as tools to study biological processes and for gene transfer. Use molecular tools to study viruses

Top

Critical Review of School Mathematics

Strengthen understanding of high-school mathematics; gain awareness as mathematics learners in learning communities; learn how to support collaborative communities as teachers.

MTHED 177

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 113
Taught	Fall, Winter, Summer

Course Outcomes

Mathematics

Students have a deep understanding of select central concepts in middle school mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching these select concepts.

Mathematical Exploration

Students can engage in meaningful mathematical exploration, are willing and able to approach and solve challenging mathematics problems, and can reflect on their own learning to make inferences about how adolescents learn mathematics.

Mathematical Understanding

Students know and can describe what it means to understand mathematics relationally, can demonstrate mathematical understanding by creating and evaluating conceptually-oriented mathematical explanations, and can explain why conceptually-oriented mathematics instruction is essential for supporting adolescents' learning of mathematics.

Mathematics Instruction

Students recognize that mathematics instruction that does not build relational understanding has failed a majority of adolescents, even themselves, and that they have a moral obligation to seek the necessary knowledge and expertise to teach mathematics in ways that enable all adolescents to develop conceptual understanding, procedural fluency, and facility with authentic mathematical practices.

Exploration of Mathematics Teaching

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching mathematics to secondary students.

MTHED 276

Hours	4.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	MATH 290 & MATH 313 & MTHED 117; or MATH 290 & MATH 313 & MTHED 177; FBI fingerprint and background clearance.
Taught	Fall, Winter

Course Outcomes

Mathematical Practices

Students understand authentic mathematical practices and use them to engage in meaningful mathematical exploration and reflect on their own use of these practices to make inferences about how adolescents might engage in mathematical tasks.

Philosophy of Teaching and Learning Mathematics

Students articulate a philosophy of teaching and learning mathematics based on the professional standards for teaching mathematics, the moral dimensions of teaching, and the INTASC standards.

Aligning Curriculum and Instructional Goals

Students can use curriculum guides such as the NCTM content standards or the Common Core State Standards to trace the K-12 development of a select central concept of mathematics as a means for planning instruction appropriate to a particular grade level and topic.

Analyzing Classroom Instruction

Students can analyze and describe the mathematical experiences of adolescents in terms of the tasks, discourse and learning environments they observe in public school classrooms, and can reconcile the theoretical principles of their university experience with the reality of a secondary classroom.

Top

Task Design and Assessment of Student Understanding

Building tasks that elicit important mathematical ideas. Reflecting on and assessing the success of tasks through questioning and other methods of formative assessment.

MTHED 277

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MTHED 177 & MTHED 276; or MTHED 117 & MTHED 276
Taught	Fall, Winter, Spring

Course Outcomes

Mathematics

Students have a deep understanding of select central concepts in high school mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching these concepts.

Identifying Concepts and Procedures

Students can analyze a section in a textbook or curricular unit, a specific mathematical topic, or a task to identify and describe the important mathematical concepts and procedures related to that section, topic, or task.

Task Analysis

Students can use their knowledge of mathematics and how adolescents learn mathematics to analyze a task in order to anticipate the type of mathematics learning it might foster or reveal.

Task Design for Learning

Students understand how mathematical tasks can support adolescents' development of conceptual understanding and procedural fluency, and can use that understanding to design mathematical tasks that allow adolescents to use their prior knowledge and experiences to develop understanding of particular concepts and procedures.

Task Design for Assessment

Students understand how formative and summative assessment can be used to support adolescents' development of conceptual understanding and procedural fluency, and can use that understanding to design assessment tasks that provide evidence of and insight into adolescents' understanding of particular concepts and procedures.

Task Design for Personal Growth and Stewardship

Students recognize and can explain how the thoughtful use of mathematical tasks can enable them to reflect on and improve their instruction, and how such use can nurture and empower adolescents to draw upon their divine potential, intelligence, and capabilities to learn and do mathematics.

(MthEd-Math) History and Philosophy of Mathematics

Historical development of important mathematical ideas and philosophies; implications for the mathematical curriculum.

MTHED 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 113
Taught	Fall, Winter, Spring

Course Outcomes

Origin and Nature of Mathematics

Students understand and can describe the major approaches—cultural, philosophical, and psychological—to explaining the origin and nature of mathematics and its relation to understanding and modeling the physical world.

Historical Periods and Contributions

Students understand and can describe the major historical periods of development of mathematical thought, as well as the contributions of various cultures and individuals within those periods.

Historical Development of Concepts and Practices

Students understand and can describe the historical development of concepts and practices central to school mathematics, including numeration, arithmetic, algebra, geometry, calculus, and probability.

Complexity of Human Mathematical Activity and Learning

Through understanding the complex relationship between mathematical practices and human experience, students appreciate the complexity of teaching and learning mathematics and the different approaches and experiences adolescents will bring to learning those practices.

Top

Teaching Statistics and Probability

Exploration of important conceptual underpinnings, common misconceptions and students' ways of thinking, appropriate use of technology, and instructional practices to support and assess the learning of probability and statistics.

MTHED 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MTHED 177; Stat 121 or a score of 5 on the AP Statistics Exam.
Recommended	MthEd 276.
Taught	Fall, Winter

Course Outcomes

Designing a Study and Sampling

Students understand the advantages and disadvantages of study design and sampling design so that they can design an empirical study to effectively answer research questions.

Summarizing and Representing

Students can evaluate and justify the use of different measures of central tendency, different measures of dispersion and different data representations depending on the nature of the data and purpose of the measure or representation.

Testing Claims and Drawing Conclusions

Students can explain the underlying ideas of various statistical tests, articulate how real-world questions relate to these tests, explain how these tests are used to make claims, predictions, and conclusions, and identify common misconceptions or theoretical issues in interpreting the results of these tests.

Probability

Students can identify probabilistic situations, model probabilistic situations using multiple representations, understand and calculate theoretical and empirical probabilities, identify common misconceptions about probability, and predict and explain the shape of sampling distributions given population distributions.

Student Statistical Thinking

Students are familiar with K-12 students' initial conceptions and misconceptions of probability and statistical concepts and know many instructional principles and strategies to help students overcome misconceptions and to develop robust concepts in these fields.

Basic Concepts of Mathematics

Concept-oriented exploration of number, measurement, and informal geometry in relation to children's learning.

MTHED 305

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Math 110 or equivalent; permission from Teacher Education Department.
Note	Required of prospective elementary school teachers.
Taught	Fall, Winter, Spring

Course Outcomes

Mathematics

Students have a deep understanding of central concepts in elementary school mathematics related to whole numbers and whole number operations, number theory, integers and integer operations, geometry, and measurement; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.

Mathematical Thinking

Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.

Mathematical Activity

Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 305 classroom to make inferences about teaching practices that help children learn mathematics.

Top

Concepts of Mathematics

Concept-oriented exploration of rational numbers and proportional reasoning, probability, and early algebraic reasoning in relation to children's learning.

MTHED 306

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MTHED 305; Permission from Teacher Education Department.
Note	Required of prospective elementary school teachers.
Taught	Fall, Winter, Summer

Course Outcomes

Mathematics

Students have a deep understanding of central concepts in elementary school mathematics related to fractions and fraction operations, probability, and early algebraic reasoning; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.

Mathematical Thinking

Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.

Mathematical Activity

Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 306 classroom to make inferences about teaching practices that help children learn mathematics.

Mathematics Teaching with Technology

Using technology to teach and understand mathematics. Math-specific software and calculators used to investigate Euclidean geometry, non-Euclidean geometry, algorithms, probabilities, etc., research regarding effectiveness.

MTHED 308

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 313 & MATH 362
Taught	Fall, Winter, Spring

Course Outcomes

Mathematics

Students have a deep understanding of select central concepts in secondary mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching these select concepts.

Mathematical Exploration with Technology

Students can use technology to engage in meaningful mathematical exploration and can reflect on their own learning to make inferences about how adolescents learn mathematics with technology.

Mathematical Communication

Students can articulate and represent their mathematical thinking in technological environments in ways that are appropriate for their intended audience.

Instructional Design and Technology

Students understand the affordances and constraints of technology in teaching mathematics and can apply this knowledge to design learning opportunities involving the use of technology to support adolescents' mathematical learning.

Top

(MthEd-Math) Survey of Geometry

Logical and historical development of Euclidean and non-Euclidean geometry, transformations and symmetry; relationships among axiomatic systems; use of software and other geometric models; proofs and Van Hiele levels.

MTHED 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 290
Taught	Fall, Winter, Spring

Course Outcomes

Knowing and Learning Geometry

Students understand central objects, concepts, relationships, definitions, and theorems of Euclidean geometry, how adolescents come to understand these, and the canonical examples and alternative approaches germane to teaching secondary school geometry.

Communicating Geometric Ideas and Arguments

Students can communicate geometric ideas effectively using a variety of appropriate representations and can construct valid proofs of geometric theorems within a given axiom system.

Multiple Geometries

Students understand and can describe the relationships among neutral, Euclidean, and non-Euclidean geometries in terms of fundamental geometric concepts, objects, and properties (particularly parallelism), and can use the fundamental properties of axiom systems and models to provide convincing arguments about these relationships.

Top

Mathematics Teaching in the Public Schools

Mathematics teaching practice in grades 7-12, including lesson/task design, curriculum evaluation, and classroom management in context of practice teaching.

MTHED 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MTHED 277; Departmental consent.
Taught	Fall, Winter

Course Outcomes

Mathematics

Students understand the central concepts, tools of inquiry, and structures of the discipline of mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching secondary school mathematics.

Task Analysis and Design

Students can analyze a task, a section in a textbook or curricular unit, or a specific mathematical topic to identify and describe the related important mathematical concepts and procedures, and can design relevant tasks that foster conceptual understanding, procedural fluency, and authentic mathematical practices.

Developing Lesson Plans

Students understand how to create lesson plans that involve meaningful tasks in the context of a given unit, that anticipate student thinking and how the lesson might build on that thinking, and that articulate how they will orchestrate each phase of the lesson (launch, explore, discuss, unpack).

Orchestrating Lessons

Students can use their lesson plans to engage adolescents in the day's activities (launch), facilitate meaningful exploration of mathematics (explore), orchestrate discussion that builds on and extends adolescents' emerging mathematical conceptions (discuss) and ensure the important mathematical concepts and procedures related to the goals of the lesson are made explicit (unpack).

Assessing Mathematical Learning

Students understand how to design and use formative assessment that monitors the learner's progress, informs instructional decisions, and engages adolescents in assessing their own

mathematical learning.

Professionalism

Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the MthEd 377 classroom setting; improving practice through reflection and by providing, soliciting and incorporating feedback; and contributing to the professional learning community of the classroom.

Top

Practicum in Mathematics Education

Implementing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

MTHED 378

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Concurrent enrollment in MthEd 377.
Taught	Fall, Winter

Course Outcomes

Understanding of Mathematics Learners

Students understand that adolescents develop mathematical knowledge by building on prior knowledge and experience; that adolescents differ cognitively, linguistically, socially, emotionally, and physically; and that adolescents learn best when given regular opportunities to reason about and make sense of mathematics in an environment of high expectations and strong support.

Instructional Design for Mathematics Learning

Students understand how to design learning environments and mathematical experiences that engage all adolescents in the exploration and development of mathematical ideas, as well as how to effectively foster these environments and orchestrate these experiences by promoting conceptual understanding, procedural fluency, and authentic mathematical practices.

Analyzing Classroom Instruction

Students can analyze and describe the mathematical experiences of adolescents in terms of the tasks, discourse and learning environments they observe in public school classrooms, and can reconcile the theoretical principles of their university experience with the reality of a secondary classroom.

Professionalism

Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the school setting, and improve their practice through reflection and by providing, soliciting and incorporating feedback.

Top

Secondary Student Teaching in Mathematics

Capstone, field-based, semester-long experience in teaching mathematics to secondary students; demonstrating proficiency in all program standards. Seminar required.

MTHED 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or departmental approval.
Taught	Fall, Winter

Course Outcomes

Student Teaching

The students will observe, plan, teach, assess, and reflect throughout the course as they participate in a public school setting.

Top

Readings in Mathematics Education

Directed readings beyond scope of usual undergraduate courses.

MTHED 495R

Hours	0.5 - 2.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Knowledge

Students will deepen their understanding of readings math education.

Academic Internship: Secondary Mathematics Education

Capstone, field-based, semester-long experience in teaching mathematics to secondary students; demonstrating proficiency in all program standards. Seminar required.

MTHED 496

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or departmental approval.
Taught	Fall

Course Outcomes

Skills for 7-12 Classroom

Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.

Professionalism

Foster relationships with school colleagues, parents, and the larger community.

Research in Mathematics Education

Undergraduate research experience. Faculty-supervised research. Written and oral presentation of findings required.

MTHED 497R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Recommended	MthEd 117, 218, Sc Ed 276R.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Engaging in Research

Students have a deeper understanding of the nature, design, and methods of research in the field of mathematics education; can make valuable contributions under limited supervision to the data collection and/or data analysis stages of faculty-directed mathematics education research; and can communicate their understanding of research in general, as well as of this specific research, through a scholarly oral or written report.

Applying Understanding from Research

Students have a deeper understanding of a key issue or problem in the field of mathematics education, and can use this new understanding to reevaluate their past and present experiences in mathematics classrooms, make connections to other important issues and problems in mathematics education, function more effectively in their role as an undergraduate research assistant, and/or reimagine their future experiences as a mathematics teacher.

Relating to Research

Students can identify their personal strengths and weaknesses in regards to conducting research in mathematics education, and have a sense for whether or not they would like to pursue more research opportunities through graduate study.

Top

(MthEd-Chem-C S-Geol-Math-Phscs-Stat) Business Practices for Science and Mathematics Majors

(Math-Chem-C S-Geol-MthEd-Phscs-Stat) Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

MTHED 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Top

Problem Solving

Solving and building explanations and presenting solutions to conceptually important problems. Analyzing research on problem solving and its role in teaching and learning mathematics.

MTHED 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Strong background in undergraduate mathematics; instructor's consent.
Taught	

Course Outcomes

Scholarship in Problem Solving

Students understand and can evaluate important issues, current and historical trends, theories, paradigms of research, and research findings in the field of mathematical problem solving, as well as their implications for the teaching and learning of problem solving explicitly and implicitly in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Critical Stance

Students can apply principles of quality research to analyze and critique research on the mathematical process of problem solving, and understand the affordances and constraints of research paradigms and methodologies in this body of research.

Problem Solving as a Process

Students understand general approaches to and a variety of heuristics in the problem solving process and can apply these to solve various problems in mathematics as well as other areas of life.

Teaching Through Problem Solving

Students understand the pitfalls of teaching problem solving as a distinct content area of mathematics and the benefits of using problem solving as a process in the teaching of all mathematics. They understand how to design instruction to teach mathematics through problem solving.

Professionalism

Students recognize the key role that problem solving plays in the field of mathematics as well as in the learning of school mathematics. They see the valuable insights provided by the literature on the teaching and learning of mathematics through problem solving, and feel a desire to continually seek opportunities to improve their ability to teach mathematics through problem solving and promote better instruction in schools by incorporating problem solving as a process for learning mathematics.

Spiritual Stewardship

Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of our trials here on earth as related to the restored gospel of Jesus Christ and principles of mathematical problem solving processes. Graduates use this enriched understanding problem solving as a method for teaching and learning mathematics by giving all students the agency and opportunity to solve mathematical problems on their own.

Top

Euclidean Geometry: Content, Learning, and Teaching

Euclidean geometry, including classical problems, polyhedra, transformations, congruence, similarity, integer geometry, minimization; technology in geometry, Van Hiele levels, role of proof, and high school curriculum.

MTHED 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MthEd 362 or equivalent.
Taught	

Course Outcomes

Scholarship

Students understand and can evaluate the role of proof in geometry and in mathematics in general, the theories of how students progress through the van Hiele levels in learning geometry and how these two topics are related. They can use this knowledge to evaluate current instructional, curricular, and policy recommendations of leaders in mathematics education regrading the teaching of geometry in the public schools.

Critical Stance

Students can apply principles of quality research to analyze and critique research on the teaching and learning of geometry, and understand the affordances and constraints of research paradigms and methodologies in this body of research.

Euclidean Geometry

Students understand the central concepts, conditions, definitions, theorems, assumptions, structure and extensions of high school (Euclidean) geometry. They can use these understandings to prove general cases of geometric theorems and apply these theorems to solve problems in Euclidean geometry.

Teaching

Students can assess the van Hiele level at which their students are operating and design tasks and lessons to move learners to a higher van Hiele level, eventually to the level of deduction and proof. Throughout the instruction at different van Hiele levels, students can continually evaluate the role that proof is playing for the learners and understand how to adjust their instruction to ensure that proof activities are meaningful. Students can use their knowledge of the van Hiele levels, proof, and the NCTM Standards to evaluate geometry curriculum for appropriate sequencing.

Professionalism

Students recognize the key role that geometry should play in school mathematics and the valuable insights provided by the literature on the teaching and learning of geometry, and feel a desire to continually seek opportunities to improve their own teaching of geometry and promote better instruction of geometry in the schools by seeking to adapt the instruction to the van Hiele level of the students.

Spiritual Stewardship

Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of geometry teaching and learning, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Top

Foundational Issues in Learning Mathematics

Introduction to research in mathematics learning; mathematical thinking; cognitive, social, and philosophical approaches to describing mathematics learning.

MTHED 590

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Teaching certificate or completion of student teaching.
Taught	Fall

Course Outcomes

Scholarship

Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Identifying and Situating Research Problems

Students understand the importance of situating research problems and questions in the literature, and can identify important research problems and relate them to appropriate issues, trends, theories, paradigms, and findings in the literature.

Applying Scholarship to Teaching

Students can use their understanding of the important issues, trends, theories, paradigms, and findings in the field of mathematics to evaluate, reflect on, and improve their mathematics instruction.

Becoming a Professional

Students perceive themselves as emerging scholars and leaders in the field, and feel responsibility for and commitment to their own growth and the growth of the field.

Spiritual Stewardship

Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of mathematics teaching and learning, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Top

Scholarly Inquiry in Mathematics Education

Introduction to scholarly inquiry in mathematics education; issues in research methodology.

MTHED 591

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	MTHED 590
Taught	Winter

Course Outcomes

Scholarship

Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Research

Graduates understand research methods in mathematics education and can a) locate an interesting and important problem; b) conduct a literature review to situate the problem; c) develop a conceptual framework; d) establish focused research questions; e) choose and implement appropriate methods for collecting and analyzing data; f) address issues of research quality such as validity, reliability, and significance; and g) effectively communicate their work both orally and in writing.

Critical Stance

Students understand the affordances and constraints of research paradigms and methodologies commonly used in mathematics education research and can analyze and critique research on teaching and learning mathematics according to principles of quality research.

Applying Research to Teaching

Students understand how to meaningfully apply research on teaching and learning mathematics in their teaching and use scholarly inquiry as a lens to reflect on that teaching.

Professionalism

Students have developed knowledge and beliefs that enable and compel them to continually seek opportunities to improve their own practice, keep abreast of advances and developments in the field both locally and nationally, and provide leadership in professional, school, and community

organizations.

Spiritual Stewardship

Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of mathematics teaching and learning studied in this course, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Top

Topics in Mathematics Education

Includes specific research areas and curriculum studies of school mathematics topics (i.e. geometry, algebra, and calculus).

MTHED 598R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Scholarship

Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education related to the particular topic of study, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and/or participation in mathematics education scholarship.

Critical Stance

Students can apply principles of quality research to analyze and critique research on the topic of study, and understand the affordances and constraints of research paradigms and methodologies in this body of research.

Mathematics

Students understand mathematical content that illustrates important issues in the research on the topic of study.

Teaching

Students can use their understanding of the research on the topic of study to evaluate, reflect on, and improve their own teaching.

Professionalism

Students recognize the key role that the topic of study plays in the learning and teaching of mathematics, and feel a desireto continually seek opportunities to improve their own practice, keep abreast of advances and developments in the field both locally and nationally, and/or provide leadership in professional, school, and community organizations.

Spiritual Stewardship

Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and

principles of mathematics teaching and learning studied in this course, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Top

Honors Introduction to Music

Designed to aid nonmusic majors in developing skills needed for listening to music creatively. Emphasis on masterworks of Western music from major style periods.

MUSIC 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Intro to Music

By listening to music, learning about the historical development of music, learning about its composers, participating in in-class discussions, attending concerts, and by acquiring a vocabulary and knowledge of music terms and concepts, students will be capable of identifying practically any piece of classical music by time period and genre. Students will also possess a much greater understanding of musical forms, genres and styles.

Top

Introduction to Music

Designed to aid nonmusic majors in developing skills needed for listening to music creatively. Emphasis on masterworks of Western music from major style periods.

MUSIC 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Intro to Music

By listening to music, learning about the historical development of music, learning about its composers, participating in in-class discussions, attending concerts, and by acquiring a vocabulary and knowledge of music terms and concepts, students will be capable of identifying practically any piece of classical music by time period and genre. Students will also possess a much greater understanding of musical forms, genres and styles.

Basic Vocal Skills

Class instruction in voice for nonmusic majors.

MUSIC 111R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Performance

Students will prepare four songs and perform memorized a minimum of three times throughout the semester.

Vocal Technique

Students will learn to understand the structure and function of the vocal instrument through:

- flexibly aligned posture;
- low, flexible breath management;
- consistent, projected flow phonation;
- freedom of vocal mechanism, including mouth and jaw;
- emerging resonance;
- emerging musicianship -- including dynamics, legato, accuracy;
- text and diction.

Beginning Piano Techniques 1

Class instruction in piano for nonmusic majors.

MUSIC 113

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Music Theory

Students will understand basic concepts of music theory including related terms and symbols, note and key names, key signatures and time signatures, and counting.

Accompaniment Skills

Students will be able to play chords in blocked and broken positions and use them to accompany melodies.

Technique

Students will be able to play technical exercises such as the Five Finger Position, major and minor triads, major and minor sales and major and minor cadences.

Improvisation

Students will be able to improvise simple melodies and play chords with them.

Sight Reading

Students will sight read easier music.

Musicality

Students will play repertoire pieces as assigned with all dynamics and articulations.

Rehearsal parts

Students will be able to play individual part of ensembles.

Top

Beginning Piano Techniques 2

Continuation of Music 113.

MUSIC 114R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 113 or instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

114R

Students will be able to:
Understand concepts of music theory including triads and inversions and the quality of seventh chords, sixteenth notes and other rhythms.

Triads

Be able to play triads, triad inversions and seventh chords in blocked and broken positions and use them to accompany melodies.

Scales and Arpeggios

Be able to play technical exercises such as major and minor scales and arpeggios.

Improvising

Improvise simple melodies and play triads and seventh chords with them.

Sight Reading

Sight read easier music.

Style Characteristics

Understand and be able to discuss the style characteristics of composers and music from the four standard periods of music.

Dynamics and Articulations

Play repertoire pieces as assigned with all dynamics and articulations.

Performance

Play individual parts of ensembles fluently.

Basic Organ Skills

Class instruction in organ for nonmusic majors.

MUSIC 115

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Hymn Playing

Students will be able to prepare and play four-part hymns to a high standard.

Registration

Students will be able to know and apply basic principles of organ registration and construction.

Listen

Students will be able to listen in both practice and performance for perfect legato, precise releases, and independence of line.

Technique

Students will be able to use the standard legato manual and pedal techniques fluently, and to play simple pedal parts in combination with elementary manual parts.

Practice

Students will learn to use efficient practice techniques.

Repertoire

To experience (primarily through listening) a wide range of organ repertoire with three main goals: 1) identify registrational characteristics, 2) identify pieces of interest for future learning, and 3) distinguish between that which might be appropriate for worship and that which is appropriate for concert use.

Top

Organ Techniques and Literature

Continuation of Music 115.

MUSIC 116R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 115 or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Hymn Playing

Understand and be able to employ various advanced hymn playing techniques.

Repertoire

Learn at least two organ pieces this semester. Also, experience a wide range of organ repertoire with four main goals: associate selected organ masterworks with their respective composers, regions, and time periods; identify registrational characteristics; identify pieces of interest for future learning; and distinguish between that which might be appropriate for worship and that which is appropriate for concert use.

Registration

Understand and apply more advanced principles of organ registration.

Expression

Understand basics of touch, phrasing and articulation, and to know how to utilize them to enhance the expressiveness of a piece of music.

Technique

Develop fluency in manual techniques, including finger independence, redistribution, finger crossings, glissando, and substitution; and develop greater fluency in pedal playing.

Accompanying

Develop basic accompanying skills on the organ.

Practice techniques

Cultivate more efficient practice techniques.

Top

Basic Guitar Skills

Class instruction in guitar for nonmusic majors.

MUSIC 117

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Basic Guitar Skills

Students with no prior guitar experience will be able to play basic accompaniment patterns. This ability will serve them, their family and the community at large in the future.

Top

Guitar Techniques and Literature

Continuation of Music 117.

MUSIC 118R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 117 or instructor's consent.
Taught	Fall, Winter

Course Outcomes

118R

Building upon Music 117, students will hone their basic guitar skills to an intermediate level of self-accompaniment.

Top

Basic Conducting

Fundamental concepts and skills for nonmusic majors.

MUSIC 135

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Learning Outcome

Students will demonstrate in their own conducting an understanding of and proficiency with the following techniques: beat patterns, style (legato/marcato), the conducting field, breath releases, melding, the SuperClick, subdivision of beats, fermatas, dynamics, cuing, phrase shaping.

Top

Bassoon

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Bassoon

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Brass and Percussion

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R - Brass + Percussion

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Carillon

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Carillon

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Cello

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Cello

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Clarinet

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Clarinet

By preparing for and attending weekly lessons, students will develop their technique, improve their tonal concepts and strengthen their interpretive skills.

Top

Classical Voice

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R - Classical Voice

By preparing for and attending weekly lessons, students will develop their technique, improve their tonal concepts and strengthen their interpretive skills.

Top

Contemporary Voice

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Performance Instruction

By preparing for and attending weekly lessons, students will develop their technique, improve their tonal concepts and strengthen their interpretive skills.

Top

Euphonium

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Euphonium

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Flute

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Flute

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Guitar

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Guitar Lessons for the non-music major

Students will develop and improve their chosen guitar style during the semester.

Guitar Lessons for the non-music major

Students will learn the value of lesson preparation and correct practice techniques.

Top

Harp

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Harp

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Harpsichord

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Harpsichord

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Horn

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Horn

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Oboe

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Oboe

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Organ

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Organ

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Percussion

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Percussion

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Performance Instruction

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R - Performance Instruction

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Piano

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Piano

At the end of the semester students who give proper and sufficient practice time will become stronger in piano technical foundation and stronger in keyboard harmonic foundation. Students will expand repertoire by at least 1-2 pieces. Students will feel confident in accepting a church musician calling.

Top

Saxophone

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Saxophone

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Songwriting

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Songwriting

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

String Bass

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Bass

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Strings

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R - Strings

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Synthesizer

Private or semiprivate instruction. One to two hours of daily practice.

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Trombone

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Trombone

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Trumpet

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Trumpet

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Tuba

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Tuba

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Viola

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Viola

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Violin

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R Violin

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Woodwinds

Private or semiprivate instruction. One to two hours of daily practice

MUSIC 160R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status. Audition may be required.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

160R-Woodwinds

By preparing for and attending weekly lessons, students will develop their technique and strengthen their interpretive skills.

Top

Voice Technique

Class instruction in voice technique.

MUSIC 161

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Acceptance by audition to the School of Music.
Taught	Fall, Winter

Course Outcomes

Technique

Through the understanding and use of proper vocal technique, students will musically perform traditional and contemporary Musical Theatre, as well as "pop" pieces, implementing many vocal colors and styles.

Vocal Health

By studying the basic anatomy involved in vocal production, Students will differentiate between those mechanical processes, which will build healthy production and those, which will lead to vocal problems.

Text

Students will demonstrate knowledge of vocal technique outlined in the text through taking a series of quizzes.

Repertoire and Performance

Students will memorize and perform repertoire that is representative of the various vocal styles used in Musical Theatre literature.

Sight Reading

Students will expand sight-reading skills by participating in oral drills, enhancing the ability to study and learn musical scores.

Personal Core Values

Through class devotionals, group discussion and personal reflection (journal writing) each student will begin to synthesize his/her growing skills with his/her moral, spiritual and ethical values.

Community

By supporting the growth of each member of the class, each student will develop a sense of community and sharing in the process of magnifying his/her own talent, thus downplaying the

intensely competitive element of the performing business.

Top

Organ Registration

Organ stops and their application to various performance styles.

MUSIC 166

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Concurrent private or group instruction in organ or instructor's consent
Taught	Fall

Course Outcomes

Organ Registration

During this class students learn basic concepts of organ registration and organ design as they pertain to hymn playing and general church service playing. Additionally, they learn the registration practices associated with historic periods and musical styles corresponding to the differing instrument types, musical genres and composers from the Middle Ages through the present.

Top

Careers in Music Education

Examining preschool through college teaching career options in music; seeking a good fit between personal aspirations, attributes, skills, and job requirements.

MUSIC 176

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Open to music majors and nonmajors.
Taught	Winter, Summer

Course Outcomes

Career Options

Students will become acquainted with possible career options in musiceducation, and will examine the joys, demand, benefits, and potential hazards inherent in each option. They will also identify critical personal attributes and skills necessary for success in each option.

Songwriting 1

Songwriting for present-day music publishing industry; basic songwriting theory; form, content, and style.

MUSIC 186

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Basic music reading and keyboard skills.
Taught	Fall, Winter

Course Outcomes

Songwriting

Students study such topics as creativity itself, writing techniques, and the importance of collaboration. By the end of the semester each student will have completed several preparatory assignments in addition to a culminating creative song project. The students will receive an introduction to a working MIDI-technology studio. Parallel to these assignments are readings about the models of the music business: music publishing, record labels, legal concepts, the copyright law, etc. Quizzes and a final exam measure retention of these concepts. Students who master the principles advanced will be able to function creatively and to manage others involved in the creation of commercial songs.

Top

Composition 1

Introduction to principles of recent art music; composition and performance of student works for one to five instruments.

MUSIC 188

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 195 or instructor's consent.
Taught	Winter

Course Outcomes

Composing with Modern and Experimental Vocabularies

Introduction to composing music with modern and and experimental music vocabularies.

Top

Music Fundamentals

Organizational systems of music, their notation and aural patterns.

MUSIC 190

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Nonmusic major status.
Note	Required for music minor.
Taught	Fall, Winter

Course Outcomes

Music Fundamentals

Students will learn the fundamentals of music theory and harmony. This course also helps prepare them for the music major aural skills test.

Top

Dictation 1

Development of aural skills through melodic, rhythmic, and harmonic dictation.

MUSIC 193

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Acceptance as a music major; concurrent enrollment in Music 195.
Taught	Fall, Spring

Course Outcomes

Dictation 1

At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

Dictation 2

Continuation of Music 193.

MUSIC 194

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C- or higher in Music 193; concurrent enrollment in Music 196.
Taught	Winter, Summer

Course Outcomes

Dictation 2

Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

Top

Music Theory 1

Writing and analysis in diatonic harmony.

MUSIC 195

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance as a music major; concurrent enrollment in Music 193.
Taught	Fall, Spring

Course Outcomes

Music Theory I

Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

Music Theory 2

Writing and analysis in diatonic and chromatic harmony.

MUSIC 196

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 195; concurrent enrollment in 194.
Taught	Winter, Summer

Course Outcomes

Music Theory 2

Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. Students will also be able to apply the same techniques to elementary chromatic harmony (secondary dominants and common chord modulations).

Top

Sight Singing 1

Rhythm and pitch-reading skills using two systems of counting and melodic solfeggio singing with hand signs.

MUSIC 197

Hours	0.5 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	Acceptance as a music major.
Taught	Fall, Spring

Course Outcomes

Sight singing semester 1

Students will demonstrate ability to sight-sing, and show mastery of McHose and Gordon counting systems, Curwen hand signs, and solfege moveable do at level 1.

Top

Sight Singing 2

Continuation of Music 197.

MUSIC 198

Hours	0.5 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	C- or higher in Music 197.
Taught	Winter, Summer

Course Outcomes

Sight singing level 2

students will demonstrate ability to sight-sing and mastery of Gordon and McHose counting systems, Curwen hand signs and solfege at level 2 ability.

Civilization: Music 1

History of civilization from Greek antiquity through the seventeenth century, primarily from perspective of musical literature and the arts; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

MUSIC 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Ability to read musical notation.
Taught	Fall, Spring Contact Department, Summer Contact Department
Offered	Honors also

Course Outcomes

Music 201 - Honors

Music 201 surveys music, the visual arts, and literature from ancient history to the beginning of the baroque period, giving emphasis whenever possible to the subject of music. As comprehension of musical scores constitutes an important part of the lectures and the exams, the ability to read music will help you excel in this course. Students who cannot read music will find it more difficult to do well.

Foundational Knowledge

Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the Arts, with a focus on music, from Ancient Greece to ca. 1720.

Communication

Communicate effectively through writing with diverse audiences about music, culture and the arts from Ancient Greece to ca. 1720.

Cultural Awareness

Identify and describe the major cultural ideas and styles from the Western cultural tradition from Ancient Greece to ca. 1720.

Life-long Learning

Demonstrate the skills and abilities needed for a life-long critical and evaluative pursuit of art, literature, music, and philosophy

Top

Honors Civilization: Music 1

Life-long Learning

Demonstrate the skills and abilities needed for a life-long critical and evaluative pursuit of art, literature, music, and philosophy

Honors Civilization: Music 2

History of civilization from the eighteenth century through the present day, primarily from perspective of musical literature and the arts; exploring fundamental questions in human experience, examining formative events in history; understanding value of important texts.

MUSIC 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Ability to read musical notation.
Taught	Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Music 202 - Honors

Music 202 surveys music, the visual arts, and literature from the middle baroque to the present day, giving emphasis whenever possible to the subject of music. As comprehension of musical scores constitutes an important part of the lectures and the exams, the ability to read music will help you excel in this course. Students who cannot read music will find it more difficult to do well.

Foundational Knowledge

Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the Arts, with a focus on music, from ca. 1720 to the present day.

Communication

Communicate effectively through writing with diverse audiences about music, culture and the arts from ca. 1720 to the present day.

Cultural Awareness

Identify and describe the major cultural ideas and styles from the Western cultural tradition from ca. 1720 to the present day.

Life-long Learning

Demonstrate the skills and abilities needed for a life-long critical and evaluative pursuit of art, literature, music, and philosophy

Top

World Music Cultures

Traditional music of selected cultures of Asia, Oceania, Africa, Europe, and the Americas, including both folk and art music traditions.

MUSIC 203

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Non-music major status.
Note	For non-music majors.
Taught	Fall

Course Outcomes

Diversity

Students will recognize the diversity of aesthetic values among the world's cultures.

Cultural Traditions

Students will understand and appreciate cultural traditions outside of their own.

Ethnocentricity

Students will transcend natural tendencies towards ethnocentricity.

Values and Devotion

Students will discover the various ways in which the arts can express values and devotion.

Honors Introduction to Jazz

Fostering an understanding and appreciation of jazz music within the context of American history and culture.

MUSIC 204

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Non-music major status.
Note	For non-music majors.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Honors Intro to Jazz

- Master a basic vocabulary for describing musical events
- Be able to reproduce a chronology of the most important events (including recordings) in the history of jazz
- Be able to recognize important styles, pieces, and soloists, by ear

Top

Introduction to Jazz

Fostering an understanding and appreciation of jazz music within the context of American history and culture.

MUSIC 204

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Non-music major status.
Note	For non-music majors.

Topics in Music

Topics vary.

MUSIC 210R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Special Topics in Music

Specific learning outcomes are explicated at the outset of the course, but vary from syllabus to syllabus; each class explores in depth a subject supported by the particular research experience and expertise of the graduate faculty member who teaches the course.

Top

Functional Piano Skills 1

Provides music majors with basic keyboarding ability in such areas as sight reading, technique, harmonization, and score reading.

MUSIC 221

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Piano skills determined by entrance diagnostic exam; music major status.
Taught	Fall, Spring

Course Outcomes

221 Functional Piano Skill

At the end of this class, students should be able to:
Play major and minor cadences using tonic, sub-dominant and dominant chords in all keys at a tempo of 80, one chord per beat.

Harmonize Melodies

Harmonize melodies using the assigned accompaniment patterns demonstrating an ability to use chords in root and inverted positions.

Melodies by Ear

Play common melodies by ear using assigned chordal accompaniments.

Improvise Melody

Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.

Major and Harmonic Minor Scales

Play the major and harmonic minor scales that begin on the white keys for one octave up and down the keyboard at a tempo of 100 – two notes per beat.

Sight Reading

Be able to sight read given examples with a minimum of mistakes and hesitations.

Perform Assigned Repertoire

Perform assigned repertoire demonstrating an ability to play expressively while observing all terms and symbols, and fingering, at a tempo appropriate for the piece.

Accompaniment to Solos

Perform assigned accompaniments to solos demonstrating an ability to follow the performance of the soloist.

Top

Functional Piano Skills 2

Continuation of Music 221.

MUSIC 222

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 221; music major status.
Taught	Winter

Course Outcomes

222 Functional Piano Skills

Continuing to build upon skills gained from Mus 221, students will also be able to:
Play the assigned progressions in all keys up to four sharps and four flats at a tempo of 88 per half note.

Harmonize Melodies

Harmonize given melodies using the assigned accompaniment pattern and chord symbols demonstrating ease in moving from chord to the next.

Common Melodies by Ear

By ear, play a common melodies with the right hand as assigned. With the left hand, play a chordal accompaniment using the assigned accompaniment pattern.

Improvisation

Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.

Major and Harmonic Minor Scales

Play major and harmonic minor scales that begin on the white keys for two octaves up and down the keyboard at a tempo of 120 – two notes per beat.

Major and Minor Arpeggios

Play major and minor arpeggios that begin on the white keys for two octaves up and down the keyboard at a tempo of 120 – two notes per beat.

Sight reading

Be able to sight read given examples with a minimum of mistakes and hesitations.

Perform Assigned Repetoire

Perform assigned repertoire demonstrating an ability to play expressively while observing all terms and symbols, and fingering, at a tempo appropriate for the piece.

Perform a Hymn

Perform a hymn of your choice from the LDS hymnbook or from a standard hymnbook from another denomination.

Accompaniment to Solos

Perform accompaniments to solos as assigned demonstrating an ability to follow the performance of the soloist.

Score Reading Example

Prepare a score reading example that relates to your major instrument. Play the line of your instrument and one other line of a differing and transposing instrument.

Instrumental Conducting Techniques

Physical techniques and musical understanding required to conduct an instrumental performance ensemble.

MUSIC 235A

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 193 & MUSIC 195 & MUSIC 197
Taught	Fall, Winter, Spring

Course Outcomes

Instrumental Conducting

Students will develop the physical techniques and interpretive skills required to be an instrumental conductor.

Instrumental Conducting Technique

Students will be able to:
--Explain and demonstrate the conductor's correct posture, stance, baton grip, and hand/arm position.
--Explain and demonstrate the conductor's preparatory gesture, ictus, rebound, the conducting patterns.
--Demonstrate expressive and ambidextrous use of both hands as it relates to the musical score.
--Conduct in various articulation styles, legato, staccato, marcato, & tenuto
--Conduct clear beat patterns, mixed meter, subdivision, and cuing technique.
--Define musical terms as useful for a conductor., and understand/explain the transpositions of instruments found within a musical score.
--Convincingly conduct a variety of musical excerpts

Top

Choral Conducting Techniques

Physical techniques and musical understanding required to conduct a choral performance ensemble.

MUSIC 235B

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 193 & MUSIC 195 & MUSIC 197
Taught	Fall, Winter, Spring

Course Outcomes

235B Choral Conducting

Students will demonstrate in their own conducting an understanding of and proficiency with the following techniques: beat patterns, style (legato/marcato), the conducting field, breath releases, melding, the SuperClick, subdivision of beats, fermatas, dynamics, cuing, phrase shaping, irregular meters, and multi metrics.

Top

Fundamentals for Choir Directors

Choral repertoire, score preparation, vocal production, vowels, consonants, intonation, blend, balance, warm-up, rehearsal techniques, and teaching basic music skills.

MUSIC 236

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 135 or 235 with grade of B- or better; concurrent enrollment in Music 135 or 235 with instructor's consent.
Taught	Winter

Course Outcomes

236

Students will demonstrate understanding and application of effective, efficient choral rehearsal techniques. Their rehearsal demonstration will show competency with score analysis; planning and pacing the rehearsal; dealing with note, harmonic, rhythmical issues; vowel unification.

Top

Sophomore Recital

Prerecital hearing required at least three weeks before juried recitals.

MUSIC 249

Hours	0.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment in Music 260R and instructor's consent.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Recital Review and Performance

Preview the entire recital for the organ faculty at least three weeks prior to the performance, and then perform the recital.

Top

Performance Study

Performance study, private instruction, and studio class.

MUSIC 250R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	Music major status (K-12 Choral Emphasis or Elementary Music Specialist Emphasis only).
Note	From one to three hours of daily practice required. Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Music 250 - Performance Study, Voice

In juried exams and other public performances, students will demonstrate mastery of the basic skills.

Top

Performance Study: Bassoon

Performance study, private instruction, and studio class. From one to three hours of daily practice required.

Taught	Fall, Winter, Spring, Summer

Course Outcomes

Music 250 - Performance Study, Voice

In juried exams and other public performances, students will demonstrate mastery of the basic skills required to perform vocal music in the Western tradition, such as language diction in Engish, Italian, German, and French, balanced vocal production, evenness of scale over a compass of an octave and a half, consistent resonance, and the musical values of accurate pitch, rhythm, dynamics, and phrasing.

Top

Performance Study: Woodwinds

Performance study, private instruction, and studio class. From one to three hours of daily practice required.

MUSIC 250R

Hours	0.5 - 1.0 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Music 250 - Performance Study

In juried exams and other public performances, students will demonstrate mastery of the basic skills.

Music Technology 1

Music technology concept, principles, and applications. Foundation course in Commercial Music core.

MUSIC 251

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Commercial Music major status or instructor's consent.
Taught	Fall

Course Outcomes

Technology

Students are introduced to the basics of hardware and software technology used in commerical music production. They will demonstrate a working knowledge of sequencing and notation programs.

Audio Technology

Student will become familiar with basic audio principles, including fundamentals of hearing, psycho-acoustics, microphones, speakers, mixing consoles, patch bays, signal processing, etc.

Practical Hands-On Experience

This course focuses on basic audio principles. Students will begin to use studio technology in labs for this course where they can benefit from hands-on experience.

Music Technology 2

Continuation of Music 251. Music technology concept, principles, and applications.

MUSIC 252

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 251
Taught	Winter

Course Outcomes

Technology

Continuation of Music 251 with more exposure and application of music technology

Audio Technology

Students will become familiar with basic audio signal flow including microphones, mixing consoles, signal routing and processing, patch-bays, digital audio workstations, and monitoring.

Audio Production

Students will achieve a beginning level of proficiency in basic signal flow through the various devices used in common audio production environments.

Practical Hands-On Experience

This course focuses on signal flow in the studio. These concepts are best understood from hands-on demonstration and experience in the studio. More time is devoted to labs in this course where the student will have the opportunity to get signals from various sources through the studio to recording equipment and monitoring systems.

Recording Studio 1

Basic recording theory, operational techniques, and procedures.

MUSIC 256

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 251
Taught	Winter

Course Outcomes

Audio Technology

Student will become familiar with basic audio technology: microphones, monitors, mixers, signal processors, digital audio workstations, audio recorders, etc.

Audio Production

Student will achieve an intermediate-level of proficiency in audio production techniques, workflows, processes, common tasks, etc.

Aesthetics

Student will develop a sense of the aesthetic values commonly applied to music production.

Practical Hands-On Experience

This course focuses on experimentation in the studio. Many audio concepts are best understood and appreciated (and greater learning results are achieved) from hands-on demonstration and operation of the involved technology.

Recording Studio 2

Continuation of Music 256.

MUSIC 257

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 256
Taught	Fall

Course Outcomes

Audio Technology

Student will become familiar with basic audio technology: microphones, monitors, mixers, signal processors, digital audio workstations, audio recorders, etc.

Audio Production

Student will achieve an intermediate-level of proficiency in audio production techniques, workflows, processes, common tasks, etc.

Aesthetics

Student will develop a sense of the aesthetic values commonly applied to music production.

Practical Hands-On Experience

This course focuses on experimentation in the studio. Many audio concepts are best understood and appreciated (and greater learning results are achieved) from hands-on demonstration and operation of the involved technology.

Top

Psychology of Performance

Psychological skills for performers. Topics include audition preparation, conquering stage fright, preventing overuse injury, attention control, creativity. Skills applicable to any performance situation.

MUSIC 259

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Psychology of Performance

Students completing this course will be able to:
1. Have the skills to manage anxiety through the implementation of relaxation training.
2. Use mental visualization to enhance their performance and their performance preparation.
3. Use the 5 stages of the performance process to support future performance.
4. Create an optimal performance mindset.
5. Approach a performance with confidence.
6. Break through what is limiting their self expression.
7. Step up, risk and enjoy performing.

Performance Instruction: Harp

Private instruction and studio class.

MUSIC 260R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Work Ethic

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Harpsichord

Private instruction and studio class.

MUSIC 260R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Work Ethic

Students completing this course will be able to:
1. Have the skills to manage anxiety through the implementation of relaxation training.
2. Use mental visualization to enhance their performance and their performance preparation.
3. Use the 5 stages of the performance process to support future performance.
4. Create an optimal performance mindset.
5. Approach a performance with confidence.
6. Break through what is limiting their self expression.
7. Step up, risk and enjoy performing.

Top

Performance Instruction: Horn

Private instruction and studio class.

MUSIC 260R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Performance Instruction: Oboe

Private instruction and studio class.

MUSIC 260R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Performance Instruction: Organ

Private instruction and studio class.

MUSIC 260R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Work Ethic

Students completing this course will be able to:

7. Step up, risk and enjoy performing.

Top

Contemporary Vocal Techniques

Contemporary vocal styles and techniques, including pop/belt, stage, and studio singing.

MUSIC 261

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Music 161 or instructor's consent.
Taught	Winter

Course Outcomes

Performance

Students will work on, memorize and perform five song excerpts (Two "classical/legit", [one pre 1966 and one, post 1966] pieces from Musical Theatre literature, two mix/belt pieces from Musical Theatre literature and one Mozart aria. Focus will be on technique, musicianship and interpretation.

Audition Preparation

Students will use musical skill to create coherent 16 bar audition cuts for each of the assigned Musical Theatre pieces

Vocal Technique

Students will enlarge and demonstrate knowledge of vocal anatomy and proper singing technique through a series of quizzes based on information in text

Musical Theatre Literature

Students will enlarge knowledge of Musical Theatre literature by creating a literature list to include, but not limited to, all of the music performed in class.

Self Evaluation

Students will evaluate their own, in class performances by observing video recordings and writing evaluations.

Self Discovery

Through class discussion and personal reflection (journal writing,) students will create a vision for their place in the professional Musical Theatre industry and how best to incorporate the aims of a BYU education into that vision.

Peer Evaluation

Students will evaluate in class performances of peers attending to technique, musicality and communication.

Teaching

Students will develop the ability to analyze and explain concepts and principles of voice production through working one on one with peers in teacher/ student assignments.

Values Development

Students will keep a journal designed to focus on the importance of maintaining strong moral, ethical and spiritual values while functioning within the professional world.

Top

Keyboard Foundations 1

Sight-reading, harmonization, improvisation, and technique at the keyboard.

MUSIC 264

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 194 & MUSIC 198 & MUSIC 260R
Taught	Fall

Course Outcomes

Keyboard Foundations - 264

The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student's knowledge of music theory and become the concrete application of that knowledge.
As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol.
Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles.
The outcomes for this course include sight reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.

Top

Keyboard Foundations 2

Continuation of Music 264.

MUSIC 265

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 264
Taught	Winter, Spring

Course Outcomes

Musical Skills Continued

The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world including: Sightreading, Modulation, Open Score Reading, Figured Bass, Transposition and Fakebook Improvisation.

Top

Musicality in the Elementary School

Survey of authentic folk song and art music tonal systems and structures; their use in developing musical intuition through singing, movement, listening, and playing instruments.

MUSIC 271

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Acceptance into the Music Education: Elementary Education Emphasis program.
Taught	

Course Outcomes

Folk Song Analysis

Students will analyze folk songs according to tone sets, scale types, rhythm patterns, and formal structures and create an organized index/retrieval system based on such analysis.

Pitch and Intonation

Students will demonstrate ability to sing children' s songs with accurate pitch and intonation.

Improvisation and Movement

Students will Improvise on piano and drums, patterns to guide young children’ s movement leading to
awareness of rhythms, meters, and formal structures.

Accompanying

Students will demonstrate ability to accompany on autoharp or guitar, children’ s folk and traditional songs, showing an
understanding of keys and chord patterns.

Dictation, Melody, and Rhythm

Students will take from dictation, folk song melodies and rhythms, and sing with accuracy intervals, pentatonic scales, and modes.

Developmentally Appropriate Learning

Students will be able to explain how children learn, and how they learn music, including an understanding of development at
each age, windows of opportunity for learning certain things, and ages and stages of growth.

Teaching Strategies

Students will demontrate different strategies to effectively teach children using the teaching/learning processes explored in class.

Technology in Music Education

Students will demonstrate growth in knowledge of the use of technology in music education. In this class you will be asked to

- a. use finale to input music for flash cards
- b. use the web to investigate music program offerings for young children
- c. use the web to locate businesses that specialize in early childhood music books, instruments,
- and other equipment for music development and exploration
- d. create a song index retrieval system you can use throughout your education career,
- e. review interactive music teaching computer programs available for children

Top

Developing Children's Musicality, Grades K--2

Literature-based curriculum design and planning, grades K--2. Issues of pure intonation and vocal/aural development. Microteaching in a demonstration school.

MUSIC 272

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 271

Percussion Techniques

Accessory and concert percussion instruments and related performance literature.

MUSIC 273A

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Percussion performance major or music education major with percussion emphasis.
Taught	Fall

Course Outcomes

MUS 273A - Percussion Techniques

Introduce basic concepts utilized in concert percussion performance. The focus will be on instruments that would be the part of a percussion section in a concert band, orchestra, or percussion ensemble.
Students will become familiar with basic techniques on snare drum, bass drum, cymbals, timpani, keyboard percussion and percussion accessory instruments. Application of these techniques will be related to literature as well as an understanding of basic maintenance, tuning and care of the instruments. Students will be able to demonstrate their ability to play these instruments in a variety of ensemble performance situations with confidence.

Top

Percussion Techniques

Introduction to world percussion, drum set, and marching percussion techniques.

MUSIC 273B

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Music 273A or instructor's consent.
Taught	Winter

Course Outcomes

MUS 273B - Percussion Techniques

Students will become familiar with basic techniques on instruments from Africa, Brazil, Cuba, the Middle East, Asia, and other parts of the world. Some exposure to these exotic instruments will take place with an emphasis of “hands on” experiences. Application of these techniques will be related to literature and recordings as well as an understanding of basic maintenance, tuning and care of the instruments. Students will be able to demonstrate their ability to play these instruments in a variety of performance situations with confidence.

Exploration of Music Teaching

Teaching experiences and seminars aimed at helping prospective music teachers experience the demands and opportunities associated with teaching secondary music students.

MUSIC 275

Hours	4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	MUSIC 176; FBI fingerprint and background clearance.
Taught	Fall

Course Outcomes

Music Class Observation

Students will complete 12 observations of music classes being taught by different local music teachers as an opportunity for exposure, reflection and gathering materials for future reference.

Mentored Teaching Experiences

Each student will complete at least two mentored formal teaching experiences involving junior high music students, with opportunity for reflection and feedback.

Teacher Work Sample Preparation

Students will complete an individual Teacher Work Sample to demonstrate their ability to understand a teaching situation, and how to plan, implement and reflect on teaching a series of lessons.

Diversity in Class Activities

Students will interact with musics of diverse cultures, styles and contexts in class activities.

Top

Elementary General Music Methods

Methods and materials for teaching general music, K--12. Cognitive development and learning styles as a basis for instructional strategies. Includes Dalcroze, Orff, and Kodaly.

MUSIC 277

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Music 194 and 198 or concurrent enrollment.
Taught	Winter

Course Outcomes

Personal Repertoire Development

Students will increase their personal repertoire of songs for children including songs from other cultures.

Children's Song Pitch, Tone, and Range

Students will sing children' s songs with accurate pitch, quality tone, and in a range appropriate for children' s vocal
development.

Musical and Extra-Musical Ideas

Students will use sounds in creative ways to express musical and extra-musical ideas.

Music Literature Analysis

Students will analyze music literature (songs and recordings) for teaching specific music concepts.

Teaching Strategies

Students will demonstrate an openness to new ways of teaching, embracing appropriate teaching strategies and literature.

Music Education Service

Students will show a sense of commitment to and willingness to serve music education in part by active participation
in the BYU preschool lab, UMEA Conference and MENC student activities.

Personal Philosophy

Students will articulate a personal philosophy of music education for children and for the " general" student. Include in your discussion, a knowledge of child development in music, how learning takes place, and the issue of talent vs. learning.

Music Elements

Students will demonstrate their understanding of the music elements with related concepts, and their significance in the teaching/learningprocess.

National Standards in Music

Students will know the National Standards in Music and why they are important, and be aware of expectations for each
grade level.

Orff, Dalcroze, MMCP, etc. Pedagogies

Students will be conversant in the music pedagogies of Orff, Dalcroze, MMCP, Kodaly, ETM and others as explored in
class.

Child Musical Development

Students will describe musical development from infancy through childhood.

Music and Learner Development

Students will describe how music impacts the social/emotional, intellectual and physical development of the learner.

Learning Activity Sequencing

Students will grow in ability to sequence learning activities consistent with what we know about child development, music concepts, and music literature.

Secondary General Music Methods

Using an experiential approach, exploring ways to provide rich musical experiences for secondary students in general music situations, including mapping, additive approach, and other methods. Effective teaching and classroom management also addressed.

MUSIC 278

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	C- or higher in Music 275.
Taught	Fall

Course Outcomes

Secondary General Methods

Through an experiential appoach, students will become familiar with secondary education methodssuch as mapping, additive approach and other methods. As well, students will receive instruction of effective classroom management.

Top

Jazz Improvisation 1

Beginning improvisation: theory and technique.

MUSIC 284

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	MUSIC 194
Taught	Fall, Winter

Course Outcomes

Beginning Jazz Improvisation

Students will learn the fundamentals of jazz improvisation and how to apply them in a performance environment. Such fundamentals will include blues scales and chord progressions, typical jazz chord progressions, melodic patterns for improvisation and others.

Top

Introduction to the Music Business

The music business and its models. Guided research topics for all musicians.

MUSIC 286

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music major status.
Taught	Winter

Course Outcomes

Music Business

Music 286 is required in the Commercial Music major and is a recommended elective for all music majors. In the vernacular of the day, we teach, "Don't do the music business; be a music business." The course stresses that all musicians need a business plan, and is taught in a manner relevant for all musicians. The semester's work includes exposure to a variety of guest lectures, and creation of personal semester projects, including research, which take the form of a personal business plan. Retention of material is measured with quizzes and a final exam.

Top

Electronic Music Composition

Introduction to composition with digital audio and related media.

MUSIC 287

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Music 188 or instructor's consent.
Taught	Fall

Course Outcomes

Modern and Experimental Vocabularies via Composition

Introduction to modern and experimental music vocabularies via composition in electronic media.

Top

Composition 2

Invention and exploration of sound, control of multivoiced textures and larger forms, and recent art music.

MUSIC 288

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 287
Taught	Winter

Course Outcomes

Composition 2

Intermediate study of composition with modern and experimental music vocabularies.

Music Theory for MDT Majors

Music theory, sight singing, aural dictation, and keyboard harmony.

MUSIC 290

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 113; Music dance theatre (MDT) major status.
Taught	Winter

Course Outcomes

Sight Reading

Students will confidently sight read any new piece of music placed in their hands.

Piano Skills

Students will accompany themselves from the chord symbols in sheet music

Accompanying Skills

Students will 'fill in" at the piano whenever the accompanist is absent.

Accompaniment Styles

Students will create functional, pleasant accompaniments to their vocals using chord symbols.

Self Confidence

Students will discover a new level of confidence based on increased competence.

Class Discussion

Through class discussion students will examine BYU's core values and how they can be applied in future career paths.

Dictation 3

Continuation of Music 194.

MUSIC 293

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C- or higher in Music 194; concurrent enrollment in Music 295.
Taught	Fall, Spring

Course Outcomes

Dictation 3

At the conclusion of this course, you should be able to aurally identify compound intervals. You will also be expected to write out rhythms and melodies up to eight bars in length. Finally, you will be asked to write the four parts of harmonic progressions and identify them by roman and arabic numerals (these harmonies will include chromatic harmonies—secondary dominants, borrowed chords, and augmented sixth chords).

Top

Dictation 4

Continuation of Music 293.

MUSIC 294

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	C- or higher in Music 293; concurrent enrollment in Music 296.
Taught	Winter, Summer

Course Outcomes

Dictation 4

In this concluding course in dictation we practice music dictation of four things:
1. linear tetrachords
2. twelve-tone rows
3. syncopated rhythms (always played in four measures of 3/4)
4. modulating chord progressions

Top

Music Theory 3

Extended chromatic techniques and introduction to twentieth-century concepts.

MUSIC 295

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 196; concurrent enrollment in Music 293.
Taught	Fall, Spring

Course Outcomes

Music Theory 3

Students will be able to part-write and analyze (using means covered in Music Theory 1 and 2) in a full range of chromatic harmony (including Neapolitan and augmented sixth chords, as well as enharmonic and common-tone modulations). Students will also be able to identify and analyze impressionist techniques (including types of planing, tall chords, and alternative scales).

Top

Music Theory 4

Set theory, serialism, and late twentieth-century concepts.

MUSIC 296

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 295; concurrent enrollment in Music 294.
Taught	Winter, Summer

Course Outcomes

Music Theory 4

Students will learn how to use pitch-class set analysis (identifying, labeling, and comparing any groups of pitches) and various serial techniques (including the twelve-tone method), as well as to analyze post-impressionistic techniques (bichordalism, polytonality, quartal and quintal harmony, secundal harmony, and pandiatonicism) and identify (and possibly write with) a variety of rhythmic, indeterminate, minimalist, microtonal and possibly other contemporary techniques.

Top

Sight Singing 3

Continuation of Music 198.

MUSIC 297

Hours	0.5 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	C- or higher in Music 198.
Taught	Fall, Spring

Course Outcomes

Sight singing

Students continue to develop skills in sight singing, as built on the foundations of Sight Singing 1 and 2.

Top

Sight Singing 4

Continuation of Music 297.

MUSIC 298

Hours	0.5 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	C- or higher in Music 297.
Taught	Winter, Summer

Course Outcomes

Sight Singing

Students build on the fundamentals of sight singing 1,2 and 3.

Top

Music Theatre in Contemporary Culture

Analysis of the form, evolution, and influence of music dance theatre in Western culture.

MUSIC 300

Hours	1.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 290; concurrent enrollment in Dance 300 and TMA 300.
Taught	Fall

Course Outcomes

MDT Analysis and Communication

Students will be able to analyze, synthesize and articulate the significant facets of music, dance and theatre within the historical context of the musical theatre genre.

Survey of Music Literature 1

Survey of musical genres, forms, styles, and performance practices from antiquity to the Enlightenment.

MUSIC 301

Hours	2.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.
Taught	Fall, Winter

Course Outcomes

Music History

- Identify simple elements of the major historical art music styles from Antiquity to the Enlightenment.
- Demonstrate familiarity with selected representative musical works from these historical periods
- Use appropriately the terminology associated with the study of these repertories.
- Think, speak, and write clearly and effectively about the music from this time period.

Top

Survey of Music Literature 2

Survey of musical genres, forms, styles, and performance practices in the 18th and 19th centuries.

MUSIC 302

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 and 202, or equivalent.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Music History

- Identify simple elements of the major historical art music styles in the18th and 19th centuries.
- Demonstrate familiarity with selected representative musical works from these historical periods
- Use appropriately the terminology associated with the study of these repertories.
- Think, speak, and write clearly and effectively about the music from this time period.

Top

Survey of Music Literature 3

Survey of music genres, forms, styles, and performance practices from the late Romantic era to the present.

MUSIC 303

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.
Taught	Fall, Winter, Summer Contact Department

Course Outcomes

Music History

- Identify simple elements of the major historical art music styles from the late Romantic era to the present day.
- Demonstrate familiarity with selected representative musical works from these historical periods
- Use appropriately the terminology associated with the study of these repertories.
- Think, speak, and write clearly and effectively about the music from this time period.

Top

World Music

Exploration of music making from a global perspective.

MUSIC 307

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of Non-Western Musical Practices

Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.

They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.

Music, Values, and "Cross-Domain Mapping"

Students will articulate how a culture's values can be embodied and discerned within musical practices.

Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a music *sounds* relates to what that music *means*. Some areas of exploration related to this learning outcome could include:

- musical practices in various cultures that project power and legitimacy within political contexts
- musical practices in various cultures that reinforce social cohesion in a community context
- musical practices in various cultures that convey reverence or worship in a religious context

In discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:

- How does the music *the students themselves* use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?
- How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?

Ethnomusicology as a Path to Cultural Understanding

Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.
Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU's Global and Cultural Awareness Foundation Document.

Music and Global Change

Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.
Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:

- How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.
- How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.
- How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.
- How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.
- How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.
- Etc.

History of Jazz

Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

MUSIC 308

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Aural

Master an assigned repertory of classic jazz recordings.

Written

Be able to describe the main differences between important styles and artists.

Application

Learn to transcribe and analyze jazz solos

Top

Vocal Techniques for Choir Men

Vocal training to prepare student for participation in an advanced choral ensemble. Topics will cover vocal technique, sight singing, and choral musicianship.

MUSIC 309

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Learning Outcome

Men will demonstrate in their singing the ability to sing with proper breathing, phonation, resonation, and articulation. Men will access head tone, showing it to be part of their overall vocal technique.

Top

University Chorale

MUSIC 311R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Note	No audition required.
Taught	Fall, Winter, Spring

Course Outcomes

University Chorale

Students will demonstrate in performance their ability to read, learn, memorize, and polish the choral literature chosen as the choir's repertoire for the semester, together with all the specific technical and musical demands of the chosen music.

Top

Men's Chorus

MUSIC 312R

Hours	1.0 Credit, 0.0 Lecture, 5.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Men's Chorus

Students will learn to:
1. Rehearse selected choral repertoire in disciplined, efficient manner, in order to perform with excellence.
2. Develop a personal understanding of the details that contribute to choral excellence; healthy vocal technique, precision, blend, intonation, artistry.
3. Participate in choral performances that display the ensemble's mastery of the above.

Top

Women's Chorus

MUSIC 313R

Hours	1.0 Credit, 0.0 Lecture, 5.0 Lab
Prerequisites	Audition and director's consent.
Taught	Fall, Winter

Course Outcomes

Women's Chorus

1. Rehearse selected choral repertoire in disciplined, efficient manner, in order to perform with excellence.
2. Develop a personal understanding of the details that contribute to choral excellence; healthy vocal technique, precision, blend, intonation, artistry.
3. Participate in choral performances that display the ensemble's mastery of the above.

Top

Concert Choir

MUSIC 314R

Hours	1.0 Credit, 0.0 Lecture, 5.0 Lab
Prerequisites	Audition and director's consent.
Taught	Fall, Winter

Course Outcomes

Concert Choir

Students will learn to:
1. Rehearse selected choral repertoire in disciplined, efficient manner, in order to perform with excellence.
2. Develop a personal understanding of the details that contribute to choral excellence; healthy vocal technique, precision, blend, intonation, artistry.
3. Participate in choral performances that display the ensemble's mastery of the above.

Top

University Singers

MUSIC 315R

Hours	1.0 Credit, 0.0 Lecture, 5.0 Lab
Prerequisites	Audition and director's consent.
Taught	Fall, Winter

Course Outcomes

University Singers

Students will demonstrate in performance their ability to read, learn, memorize, and polish the choral literature chosen as the choir's repertoire for the semester, together with all the specific technical and musical demands of the chosen music.

Opera Workshop

Training and experience in operatic choral music and stage movement.

MUSIC 316R

Hours	1.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Audition and instructor's consent.
Taught	Fall

Course Outcomes

Operatic Performance Technique

Students will learn the performance techniques required to sing art songs and operatic arias from the western classical vocal traditions.

Class Performance

Students will apply these skills in the performance of songs or arias in the class.

Top

Opera Ensemble

Training and experience in operatic excerpts, chamber opera, and full productions for operatic soloists.

MUSIC 317R

Hours	0.5 - 3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Audition and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Opera Ensemble

Through performance opportunities before an audience, students will demonstrate a more comprehensive understanding of the basic skills taught in the Opera Workshop course (See Learning Outcomes for the respective courses; Mus 316R and 616R).

Top

Music Theatre Ensemble

Auditioned chorus or orchestra for opera or music dance theatre productions.

MUSIC 318R

Hours	1.0 Credit, 0.0 Lecture, 5.0 Lab
Prerequisites	Audition and instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

[Title]

This course is currently not offered.

Top

Young Ambassadors

Participation as soloists, coaches, or directors in music dance theatre performances.

MUSIC 320R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Audition and director's consent.
Taught	Fall, Winter

Course Outcomes

Music Dance Theatre in History

Students will explore the Music Dance Theatre tradition of America as they learn song and dance sequences from the American Songbook.

Increased Proficiency

Students will progress in their level of proficiency in dance and singing through intensive rehearsal and frequent performance opportunities.

Service

Students will serve in the community, in public schools, and with service organizations nationally and internationally to build bridges of understanding between cultures and peoples.

Top

University Orchestra

MUSIC 321R

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No audition required. Does not satisfy large ensemble requirement for majors.
Taught	Fall, Winter

Course Outcomes

321R University String Orchestra

The University Orchestra seeks to further the musical development of its musicians, to increase appreciation and understanding of standard works in orchestra repertoire,and to experience the joy of making music alongside fellow non-music majors.

Top

University String Orchestra

MUSIC 321R

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No audition required. Does not satisfy large ensemble requirement for majors.
Taught	Fall, Winter

Course Outcomes

321R University String Orchestra

The University String Orchestra seeks to further the musical development of its musicians, to increase appreciation and understanding of standard works in string orchestra repertoire,and to experience the joy of making music alongside fellow non-music majors.

Top

University Band

MUSIC 322R

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No audition required. Does not satisfy large ensemble requirement for majors.
Taught	Winter

Course Outcomes

322R University Band

Students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend. Students should be able to demonstrate application of these principles by successfully performing college-level band repertoire in a formal concert at semester's end.

Top

Marching Band

MUSIC 323R

Hours	1.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Audition or director's consent.
Taught	Fall

Course Outcomes

323R Marching Band

As learning outcomes, students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend, and correct marching execution. Students should be able to demonstrate application of these principles by successfully performing college-level marching band repertoire in rehearsal and performances.

Top

Cougar Band

MUSIC 324R

Hours	1.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Audition or director's consent.
Taught	Winter

Course Outcomes

324R Cougar Band

As learning outcomes, students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend. Students should be able to demonstrate application of these principles by successfully performing college-level pep band repertoire in rehearsals and performances.

Symphonic Band

MUSIC 325R

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Performance Proficiency

Students will expand individual confidence and performance proficiency through the medium of a large ensemble.

Critical Listening Skills

Students will develop and demonstrate critical listening skills through the performance of wind band literature.

Aesthetic sensitivity

Students will expand their aesthetic horizons by developing an appreciation and understanding of various peoples and their cultures as expressed through music.

Top

Wind Symphony

MUSIC 326R

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Performance Proficiency

Students will expand individual confidence and performance proficiency through the medium of a large ensemble.

Critical Listening Skills

Students will develop and demonstrate critical listening skills through the performance of band literature.

Script, Movement and Score Analysis

The integration into performance of information gathered from careful research and analysis of movement style, script and score.

MUSIC 328

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TMA 229; Music dance theatre BFA major status; concurrent enrollment in Dance 328 and TMA 328.
Recommended	Concurrent enrollment in Music 300, Dance 300, and TMA 300.
Taught	Fall

Course Outcomes

Landmark Music Theatre Works Record

Students will compile a written record of these 'landmark' musical theatre works as a personal resource guide

Landmark Productions in American Musical Theatre

Students will be familiar with the selected 'landmark' productions of the American musical theatre.

Performance Improvement

Students will learn to implement into their musical theatre performance essential acting, vocal, and movement skills as outlined in the evaluation forms

Performance Ratings

Student performance work will be consistently rated in the 3.5 and above category based on the 5 point evaluation form scale.

Integrating Performance Feedback

Students will be able to integrate into their performance detailed feedback from faculty/peers.

Professional Conduct

Students will approach their work in a competent, courteous and professional manner.

Folk Ensemble

Traditional bluegrass ensemble.

MUSIC 329R

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Director's consent.
Note	Performs with BYU International Folk Dancers.
Taught	Fall, Winter, Spring

Course Outcomes

Folk Music Learning Outcomes

Folk Music students will learn to be team players as ensembles members. All Folk Music students are required to perform at least one time per semester. As students become better team players in their respective ensembles they will also learn management, leadership, and music performance, and music arranging skills. These skills will help them to proliferate music in their future lives and families.

Top

Steel Band

MUSIC 330R

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter

Course Outcomes

MUS 330R - Steel Band

Students should be exposed to music outside the Western European tradition. Most of the music performed in this ensemble includes Calypso and Soca styles from the island nation of Trinidad and Tobago. We will sometimes include a pop or classical number, but most of the time we will focus on "groove" music. This means that having a conductor will be rare and the student is expected to listen and learn how to contribute to that "groove".

Top

Jazz Combos

MUSIC 331R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Jazz Combos

Students will learn how to function in a traditional jazz combo setting, including learning head charts, standard lead sheet tunes, and arrangements. They will also further their knowledge of and experience in improvising in a typical professional performance setting in a variety of jazz styles.

Show Band

Contemporary and traditional show music (Young Ambassadors) and ethnic music (Living Legends).

MUSIC 332R

Hours	1.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Young Ambassador Show Band

The goal of the Young Ambassadors Show Band is that each member will:
· Develop, improve, and hone their technique and skill on their respective instruments
· Expand their talents and abilities as a performing artist
· Broaden their knowledge of, and facility in performing differing styles of popular and jazz music idioms
· Increase their ability to communicate, through performing, their love for and joy of music
· Deepen their awareness of how their efforts, talents and abilities can touch and inspire the lives of those whom they meet, or for whom they perform, and realize more profoundly how such efforts, talents and abilities can assist the Lord in His work.

Top

Show Band

Contemporary and traditional show music (Young Ambassadors) and ethnic music (Living Legends).

MUSIC 332R

Hours	1.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will deepen their understanding of how music and show band are related.

Top

Jazz Ensemble

Includes Jazz Ensemble (big band), Jazz Lab Band (entry-level big band), and Vocal Jazz Ensembles.

MUSIC 333R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter, Spring

Course Outcomes

Jazz Ensemble

Students will learn how to perform in a traditional big band setting. Standard and representative repertoire from the various jazz styles will be taught and explored in this course.

Jazz Lab Band

MUSIC 333R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Jazz Lab Band

Students will learn to perform in the traditional jazz big band idiom. Music will be selected from the standard and contemporary jazz repertiore.

Vocal Jazz Ensemble

MUSIC 333R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Jazz Voices

Students will learn proper vocal techniques in the vocal jazz idiom and will learn how to perform music from the traditional vocal jazz repertiore.

Objectives

- To provide students a high quality vocal jazz experience and instruction.
- To provide an environment of spiritual, academic, musical and emotional growth.
- To provide opportunities to learn about jazz/music; its development, construction and expression.
- To create awareness about vocal jazz history, performance, standards, styles and improvisation.
- To engage artistically at the highest levels of complexity and competence.
- To develop improvisation skills and performance techniques, both as a group and as soloists.
- To rehearse and perfect high quality literature that will represent a wide range of jazz/contemporary/musical periods and styles.

Top

Synthesis

MUSIC 334R

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Synthesis

Students will learn to perform in a traditional big band setting. Music will be selected from the standard and representative repertoire of jazz styles.

Top

Jazz Legacy Band

Traditional ensemble specializing in early jazz. Band occasionally tours off campus.

MUSIC 335R

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Style

Students will perform traditional jazz, improvising within the traditional jazz tutti texture. Each student will demonstrate the roll of his or her instrument within the context of traditional jazz.

Improvisation

Each student will improvise solos in the style of the early jazz masters who play his or her instrument.

Performance Routines

Students will play typical introductions, endings, solo backgrounds, texture routines characteristic of traditional jazz styles

25 Standard "Dixieland" tunes

Students will demonstrate the ability to play 25 "Dixieland Standards." These are among the most commonly performed tunes that are played by professional "Dixieland" bands at casual performance engagements (gigs).
Standard tunes:

1. Avalon
2. Basin Street Blues
3. Big Butter and Egg Man
4. Black and Blue
5. Bourbon Street Parade
6. Do You Know What it Means
7. High Society
8. I Can't Give You Anything But Love
9. I Found A New Baby
10. Indiana (Back Home Again in)

11. Ja Da
12. Just A Closer Walk With Thee
13. Muskrat Ramble
14. Royal Garden Blues
15. St. James Infirmary
16. St. Louis Blues
17. Struttin' With Some Barbecue
18. Sweet Georgia Brown
19. That's A Plenty
20. Tin Roof Blues
21. Twelfth Street Rag
22. Up a Lazy River
23. When the Saints Go Marching In
24. When You're Smiling
25. Won't You Come Home Bill Bailey

Balinese Gamelan

Playing and performing on the Balinese gamelan (percussion) instruments.

MUSIC 336R

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Mental and Technical Skill

Students participating in Gamelan will learn the mental and technical skills required to memorize and perform works from the traditional Balinese gamelan repertoire, including becoming proficient on one or more of the instruments in the ensemble.

Social and Religious Culture

Students will also use music as a window into the relationship between Balinese musical practice and Balinese social and religious culture, and, more broadly, develop a deep appreciation for this music's profound contribution to the life experience.

Interconnected Global Society

In the spirit of BYU's global mission and the breadth of educational experience advocated in BYU's guiding documents, successful students in gamelan will develop a greater understanding of and respect for music and traditions outside of their native experience. This respect will better prepare them to represent BYU and the Church in an increasingly interconnected global society.

Top

Symphony Orchestra

MUSIC 337R

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Performance

Students will enhance their performance proficiency through large ensemble playing.

Top

Philharmonic Orchestra

MUSIC 338R

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

338R Philharmonic Orchestra

The BYU Philharmonic seeks to discover the truth imbedded in the greatest works for symphony orchestra through study, preparation, and performance, both for its own musicians and for audiences who hear them.

Top

Chamber Orchestra

MUSIC 339R

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

339R Chamber Orchestra

The Chamber Orchestra seeks to discover the truth imbedded in the greatest works for chamber orchestra through study, preparation, and performance, both for its own musicians and for audiences who hear them. The orchestra bears the responsibility of representing the School of Music, the University, and the Church through regional, national, and international tours.

Top

Harp Ensemble

MUSIC 340R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter

Course Outcomes

Harp Ensemble

The expected outcomes of this course are improved ensemble playing and arranging skills, and an expanded ensemble repertoire for each student

Top

Brass Chamber Music

MUSIC 341R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Performance

Students will demonstrate the ability to perform standard chamber ensemble music at an appropriate artistic level for their year of study.

Top

Brass Choir

MUSIC 341R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Performance

Students will demonstrate the ability to perform standard brass choir music at an appropriate artistic level for their year of study.

Top

Brass Ensemble

MUSIC 341R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Performance

Students will demonstrate the ability to perform standard brass ensemble music at an appropriate artistic level for their year of study.

Top

Trombone Choir

MUSIC 341R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Performance

Students will demonstrate the ability to perform standard trombone choir music at an appropriate artistic level for their year of study.

Top

Early Music Ensemble

MUSIC 342R

Hours	1.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter

Course Outcomes

Historical Performance Practice

Students will gain practical experience in historical performance practices.

Top

Guitar Ensemble

MUSIC 343R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter

Course Outcomes

Guitar Ensemble

Students will gain ensemble experience with other guitarists, develop better sight-reading skills, and perform in a formal setting during the semester.

Keyboard in Ensemble

Accompanying and ensemble performance.

MUSIC 344R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Music 260R or instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Playing

Skills to Develop in 344r:
1. Understand how to best balance their playing with another instrument and comprehend how that balance evolves to meet the needs of different instruments.
2. Understand how to communicate musical ideas through body language.
3. Develop musical "ESP". This is achieved when a pianist works with the same person over a long period of time, and develops better sensitivity. The pianist and soloist can sense changes in tempi, phrasing, and dynamics through concentrated listening, needing almost no visual contact.
4. Understand the subtext of the score.
5. Develop a genuine appreciation for the art of the accompanist.

Percussion Ensemble

MUSIC 345R

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter

Course Outcomes

MUS 345R - Percussion Ensemble

To expose students to the music written for percussion ensemble, to help students develop technique(s) on a myriad of instruments while contributing musically, and to present musical situations with and without a conductor. The percussion parts in a percussion ensemble differ drastically from those found in traditional orchestral and band percussion scores in that most performers must be not only rhythmically proficient, but melodically, harmonically and texturally expressive.

Top

String Chamber Music

MUSIC 346R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

String Chamber Music

There are four main areas of student outcomes important for this course: the building of repertoire, experience performing, exploring the enormous variety of timbre and color in the chamber music setting, and artistically improving how you communicate musically with your performing colleagues, as well as your audience.

A Cappella Ensemble

For Noteworthy and Vocal Point.

MUSIC 347R

Hours	1.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter

Course Outcomes

Vocal Point

The desired outcome of vocal point is to represent the School of Music and BYU to the World with a high degree of artistry and capturing the personality of our campus, through the medium of male a cappella choral music.

Ensemble Performance

The desired outcome of A Cappella Ensemble is to represent the School of Music and BYU to the World with a high degree of artistry and capturing the personality of our campus, through a cappella ensemble music.

Top

Flute Choir

MUSIC 348R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Performance

Students will demonstrate performance proficiency on their instrument within the context of woodwind chamber music.

Top

Saxophone Ensemble

MUSIC 348R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Performance

--Students will rehearse and perform saxophone ensemble music
--Depending on the music chosen, students will learn varying styles from the woodwind chamber repertory
--Students will demonstrate critical listening skills within the context of a chamber music ensemble.

Top

Woodwind Chamber Music

MUSIC 348R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Woodwind Ensemble

MUSIC 348R

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Director's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Ensemble Performance

--students will rehearse and perform woodwind ensemble music
--depending on the music chosen, students will learn varying styles from the woodwind chamber repertory

Top

Junior Recital

MUSIC 349

Hours	0.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment in Music 360R or 460R and instructor's consent. Prerecital hearing required at least three weeks before juried recitals.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Full Recital

Students will perform a full recital of repertory, artistically appropriate to the year of study.

Audio Applications 1

Advanced concepts in digital sound editing.

MUSIC 351

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 257
Taught	Fall

Course Outcomes

Audio Technology

Students will become familiar with basic audio workstations; particularly the use of ProTools. Basic editing and recording principles using a workstation are taught, including, importing of files, editing, signal processing, and recording.

Practical Hands-On Experience

This course focuses on experimentation in an audio workstation. Each student will have a workstation available to them in the classroom. This hands-on experience allows the students to follow demonstrations and accomplish tasks on their own workstation. They will be given several projects to accomplish on their own as well.

Audio Production

Students will achieve an intermediate-level of proficiency in digital audio editing and recording techniques.

Top

Audio Applications 2

Advanced concepts in digital sound editing.

MUSIC 352

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 257
Taught	Winter

Course Outcomes

Audio Technology

Students will use basic audio workstations; and particularly ProTools to perform advanced editing. Audio workstation are used to import files, edit, and produce recordings.

Practical Hands on Experience

This course focuses on advanced use of an audio workstation. Each student will have a workstation available to them in the classroom. This hands-on experience allows the students to follow demonstrations and accomplish tasks on their own workstation. They will be given several projects to accomplish on their own as well.

Editing

Students will achieve advanced proficiency in digital audio editing and recording techniques.

Top

Digital Projects 1

MUSIC 355R

Hours	1.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	MUSIC 251; or MUSIC 257
Taught	Fall, Winter

Course Outcomes

355R

Music 355R is the final digital projects class before graduation. The assignment is to produce a commercially viable stereo recording utilizing skills acquired from all previous class work, both artistic and technical.

Top

Digital Projects 2

MUSIC 355R

Hours	1.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	MUSIC 251; or MUSIC 257
Taught	Fall, Winter

Course Outcomes

355R

Music 355R is the final digital projects class before graduation. The assignment is to produce a commercially viable stereo recording utilizing skills acquired from all previous class work, both artistic and technical.

Top

Recording Workshop

Studio projects in multitrack recording for records, broadcast, film, and television.

MUSIC 355R

Hours	1.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	MUSIC 257
Taught	Fall, Winter

Course Outcomes

355R

Music 355R is the final recording projects class before graduation. The assignment is to produce a commercially viable stereo recording utilizing skills acquired from all previous class work, both artistic and technical.

System Design Projects

MUSIC 355R

Hours	1.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	MUSIC 251; or MUSIC 257
Taught	Fall, Winter

Course Outcomes

355R

Music 355R is the final system design projects class before graduation. The assignment is to produce a commercially viable stereo recording utilizing skills acquired from all previous class work, both artistic and technical.

Top

Performance Study

Private instruction and studio class requiring from one to four hours of daily practice.

MUSIC 359R

Hours	1.0 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; completion of degree requirements in 260R, 360R, and 460R; instructor's consent.
Note	Fee.
Taught	Fall, Winter, Spring
Offered	For those who have completed private instruction requirements for their degree.

Course Outcomes

Performance Study

By preparing for and attending weekly lessons, students will develop their technique, improve their tonal concepts and strengthen their interpretive skills.

Top

Performance Instruction

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

MUS 360R

Students will learn how to improve their technical facility and artistic expression in their chosen area of musical study.

Top

Performance Instruction: Bassoon

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Brass and Percussion

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Cello

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Performance Instruction: Clarinet

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Conducting

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Contemporary Voice

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Performance Instruction: Euphonium

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Flute

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Guitar

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Harp

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Solo Performance

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Performance Instruction: Harpsichord

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Horn

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Oboe

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Performance Instruction: Organ

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Performance Instruction: Percussion

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Piano

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Performance Instruction: Recorder

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Top

Performance Instruction: Saxophone

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Performance Instruction: Songwriting

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Professional Songwriting

Music 360R is private instruction. Upper division media music students select a semester of professional-level songwriting, or songwriting in a midi-studio environment. Both options mirror professional working situations commonly encountered.

Top

Performance Instruction: String Bass

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Strings

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Top

Performance Instruction: Synthesizer

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Performance Instruction: Trombone

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Trumpet

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Performance Instruction: Tuba

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Viola

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Top

Performance Instruction: Violin

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Performance and Repertoire

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Top

Performance Instruction: Voice

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Woodwinds

Private instruction and studio class.

MUSIC 360R

Hours	0.5 - 2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Music major status; jury approval.
Note	From one to four hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will develop communication skills as they encourage one another in a spirit of love and support.

Solo Performance

Students will perform two solo selections from the advanced (professional) standard repertory in master class, recital, and jury exams each semester

Top

Vocal Pedagogy

Introduction to physiology, acoustics, and pedagogy of singing.

MUSIC 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Junior standing as vocal performance or choral music education major or instructor's consent.
Taught	Fall

Course Outcomes

Human Voice Physiology and Biomechanics

Students will learn the physiology and biomechanics of the human voice.

Acoustical Laws

Students will learn the acoustical laws which govern sound as applied to the human voice.

Pedagogical Approaches

Students will learn pedagocial approaches to teaching voice which conform to physical and acoustical principles.

Top

Keyboard Pedagogy

Basic pedagogical principles as applied to keyboard instruments.

MUSIC 364

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	MUSIC 249; Junior standing and successful completion of Music 249.
Taught	Fall

Course Outcomes

Private Teaching Techniques

The objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.

Professional Preparation

Through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

Piano Pedagogy

Preparation for supervised private or group teaching.

MUSIC 365

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	MUSIC 364
Taught	Winter

Course Outcomes

Private Piano Teaching Skills

As a continuation of Music 364, the objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.

Professional Preparation

As a continuation of Music 364, through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

Organ Pedagogy

Preparation for supervised private or group teaching.

MUSIC 366

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Teaching Techniques

Learn teaching techniques from prominent music teachers (including organ teachers) both in and out of the local area.

Woodwind Pedagogy

MUSIC 367

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Woodwind performance major status or instructor's consent.
Taught	Fall odd years

Course Outcomes

Effective Private Teaching

Students will gain the knowledge and skill necessary to become en effective private teacher on their chosen instrument.

Woodwind Pedagogy

Students will demonstrate a knowledge of woodwind pedagogy, especially as it applies to their chosen instrument.

Brass Pedagogy

MUSIC 368

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Brass performance major status or instructor's consent.
Taught	Fall even years

Course Outcomes

Professional Preparation

Students will demonstrate a knowledge of the necessary background for becoming good private teachers and beginning a career as a professional teacher in their own established studios.

Brass Pedagogy Fundamentals

Students will demonstrate an understanding of the fundamentals of brass pedagogy.

Performance Traditions

Students will demonstrate a working knowledge of brass performance traditions, including recordings, style, and legacy of significant brass performers.

Top

String Pedagogy

MUSIC 369A

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instrumental music major on violin or viola, or instructor's consent.
Taught	Fall even years

Course Outcomes

Undergraduate Upper String Pedagogy

Students will increase their pedagogical knowledge and parctical skills as a teacher on their respective instrument. Students will acquire the skills necessary to run a private studio.

Top

String Pedagogy

MUSIC 369B

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instrumental music major on double bass, or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Bass Pedagogy

At the end of this course, students will understand all the mechanics of the instrument, know more about their history and evolution, and be able to clearly verbalize, teach and communicate such knowledge.

Top

String Pedagogy

MUSIC 369C

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instrumental music major on cello or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Undergraduate Cello Pedagogy

Students will increase their pedagogical knowledge and parctical skills as a teacher on their respective instrument. Students will acquire the skills necessary to run a private studio.

Top

String Pedagogy

MUSIC 369D

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instrumental music major on harp or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Harp Pedagogy

The expected outcomes of this course are an increased knowledge and understanding of methods of pedagogy related to teaching harp in a private setting. Each student should end the class with a better understanding of his/her personal teaching philosophy, as well as lesson plans and tools for setting up a private studio.

Top

String Pedagogy

MUSIC 369E

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instrumental music major on guitar or instructor's consent.
Taught	Fall odd years

Course Outcomes

Guitar Pedagogy

Students will gain experience instructing students at the beginning and intermediate levels, gain a deeper knowledge of classical guitar and jazz guitar techniques, and analyze various guitar methods and approaches.

Elementary Practicum A

Overview and practical application of classroom general music methodologies in the elementary grades, including the relationship of classroom practice to choral and instrumental experiences. Observation and teaching opportunities in the schools.

MUSIC 371A

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	MUSIC 275 & MUSIC 277
Recommended	Music 278.
Taught	Fall

Course Outcomes

Tonal and Formal Systems

Students will continue to explore relationships between the tonal and formal systems of authentic folksong and composed music.

Zion-Oriented Perspective

Students will help each other develop a Zion-oriented, eternal perspective on musical education.

Developmental Music Education

Students will continue to develop a working knowledge of developmental music education in the primary and intermediate grades.

Children's Choral and Instrumental Development

Students will make a special study of children's choral and instrumental development in assigned practice schools.

Pitch and Intonation

Students will improve their ability to determine and find appropriatebeginning pitches for, and refine the intonation of classroom and choral singing by using an A-440 tuning fork.

Elementary Singing Model

Students will demonstrate and/or develop an appropriate elementary specialistsinging model, with attention to proper resonance, intonation, and style; and a knowledge of how to coordinate grade level singing/ solfege curricula and vocal development.

Top

Elementary Practicum B

Expanded exploration of practical applications of classroom general music methodologies and pedagogy for the upper elementary grades. Elaboration of topics drawn from Music 371A. Investigation of children's choir development, including arranging and adapting vocal and instrumental music. Observation and teaching experiences in the schools.

MUSIC 371B

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MUSIC 371A
Taught	Winter

Course Outcomes

Children's Choral and Instrumental Development

Students will make a special study of children's choral and instrumental development.

Folk Song Arrangement

Students will submit a final project of folksong arranged for 2 or 3 part treblechoir.

Woodwind Workshop

Learning to play and to teach woodwind instruments; survey of instructional materials; emphasis on clarinet and saxophone.

MUSIC 372A

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MUSIC 196 & MUSIC 198
Taught	Fall

Course Outcomes

Performance Skills

Students will demonstrate fundamental performance skills and technique on clarinet, flute, saxophone, oboe and bassoon.

Teaching Skills

Students will effectively sequence and demonstrate appropriate strategies for instructing fundamental performance skillsand technique on clarinet, flute, saxophone, oboe and bassoon, and will identify a variety of woodwind teaching resources.

Awareness of Pedagogy

Students willdemonstrate familiarity with selected woodwind pedagogues and their contributions.

Top

Woodwind Workshop

Continuation of Music 372A. Emphasis on flute, oboe, and bassoon.

MUSIC 372B

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MUSIC 196 & MUSIC 198
Taught	Winter

Course Outcomes

Performance Skills

Students will demonstrate fundamental performance skills and technique on clarinet, flute, saxophone, oboe and bassoon.

Teaching Skills

Students will effectively sequence and demonstrate appropriate strategies for instructing fundamental performance skillsand technique on clarinet, flute, saxophone, oboe and bassoon, and will identify a variety of woodwind teaching resources.

Awareness of Pedagogy

Students willdemonstrate familiarity with selected woodwind pedagogues and their contributions.

Brass Workshop

Learning to play and to teach brass instruments; survey of instructional materials.

MUSIC 373

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MUSIC 196 & MUSIC 198
Taught	Fall

Course Outcomes

Performance Skills

Students will demonstrate fundamental performance skills and technique on trumpet, french horn, trombone, euphonium, and tuba including: correct embouchure, proper hand positions and slide manipulation, ability to breath properly without disturbing the mouthpiece position, appropriate tonguing (sustained and detached sound, double and triple tonguing).

Teaching Skills

Students will effectively sequence and demonstrate appropriate strategies for instructing fundamental performance skillsand technique on trumpet, french horn, trombone, euphonium, and tuba.

Instrument/Performance Mechanics

Students will demonstrate understanding of: the simple physics of the overtone series and how it applies to brass instruments; the basics of mouthpiece construction and how it affects performance; three different ways to produce vibrato on brass instruments; various transpositions needed by an orchestral brass player; mutes and what effect they have on performance and intonation.

Awareness of Pedagogy

Students will demonstrate: a basic knowledge of the history of brass instruments; how electronic accompaniments can be used as a teaching tool; an awareness of graded brass literature; recognition of the most commonly played brass solos.

Percussion Workshop

Learning to play and teach percussion instruments; survey of instructional materials.

MUSIC 374

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MUSIC 196 & MUSIC 198
Taught	Fall, Winter

Course Outcomes

MUS 374 - Percussion Workshop: Choral

To prepare you to teach basic percussion skills at the public school level to both instrumental students and choral students as well as to help you reach a high level of performance ability with regards to rhythm, counting, and exposure to a variety of percussion instruments. Additional objectives are to develop your abilities in writing/arranging percussion parts for choral works and becoming more familiar with choral repertory that utilizes percussion. Since this is a one semester course, please try to immerse yourself in percussion related activities by attending recitals and concerts where percussion is utilized.

Performance Skills

Students will demonstrate: an understanding of fundamental performance techniques for musical instruments common to the percussion family; rudimentary technique on many of the instruments labeled percussion, concentrating on those that are most common to today's elementary and high school band and orchestra literature.

Teaching Skills

Students will demonstrate ability to teach beginning percussion students at the elementary or secondary school levels and to continue to provide them with an accepted, organized approach to learning and developing percussion techniques and skills.

Awareness of Pedagogy

Students will demonstrate familiarity with the history of each major instrument found in the percussion family, their acoustical properties and methods of sound production, and the idiosyncrasies of percussion music notation.

Percussion Workshop: Choral

MUSIC 374

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MUSIC 196 & MUSIC 198
Taught	

Course Outcomes

Top

String Workshop

Learning to play and teach string instruments; survey of instructional materials, emphasis on violin and viola.

MUSIC 375A

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Effective Sequencing and Instruction

Students will demonstrate ability to effectively sequence and instruct these fundamental skills.

The Role of String Instruction

Students will be able to articulate the role of string instruction in public school music education curriculum.

String Skills and Techniques

Students will demonstrate ability to identify skills and techniques common to all string instruments.

Pedagogues and Movements in String Education

Students will know selected string pedagogues, and demonstrate ability to identify important movements in string education.

String Instruction

Students will demonstrate enthusiasm for and demonstrate understanding of string instruction as a means of realizing comprehensive music education.

"Object Lessons"

Students will discover ways that playing string instruments can provide‘object lessons’ in learning the gospel.

Diagnosing Technical Problems

Students will demonstrate ability to diagnose technical problems instudents and propose remedial strategies.

Top

String Workshop

Continuation of Music 375A. Emphasis on cello and bass.

MUSIC 375B

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

String Skills and Techniques

Students will demonstrate ability to identify skills and techniques common to all string instruments.

Diagnosing Technical Problems

Students will demonstrate ability to diagnose technical problems in students and propose remedial strategies.

Students will discover ways that playing string instruments can provide‘object lessons’ in learning the gospel.

Top

Choral Practicum

Applied conducting technique, score analysis and preparation, evaluating solo performance, and application of learning theory.

MUSIC 376A

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 235B & MUSIC 296
Taught	Fall

Course Outcomes

Conducting in Various Genres

Students will demonstrate clear and expressive conducting in various genres.

Conducting Techniques

Students will develop and demonstrate mastery of conducting techniques.

Effective Communication through Conducting

Students will demonstrate principles of effective communication through conducting.

Score Analysis

Students will demonstrate ability to analyze scores in terms of form, phrasing, meter, cueing, balance and harmonic analysis and provide score markings for each.

Transposing

Students will demonstrate ability to transpose.

Teaching Strategies

Students will learn and implement diverse teaching strategies.

Lesson Planning

Students will create lesson plans that identify and target specific music elements by predicting and prioritizing rehearsal issues.

Rehearsal Strategies

Students will design and customize rehearsal strateigies as an integral part of lesson planning.

Micro Teaching Modules

Students will conduct and perform for each other in micro teaching modules.

Rehearsal, Performance and Evaluation

Students will rehearse, perform, and evaluate in real time.

Performance Analysis

Students will analyze and assess performance practice in live lab settings.

Self-Reflection

Students will self-reflect on individiual goals, progress and challenges.

Peer Assessment

Students will assess peers in pairs and in groups.

Conducting/Teaching Modules

Students will mini conducting/rehearsal modules will be representative of the skills, knowledge, and techniques required for classroom teaching (rehearsals are filmed).

Professional and Courteous Conduct

Students will show empathy, respect and courtesy towards each other throughout the leanrning process.

Top

Choral Practicum

Curriculum design, score analysis and preparation, choral arranging, rehearsal techniques, survey of literature, and vocal pedagogy, including treble voice and changing voice; computers and computer-assisted instruction.

MUSIC 376B

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 376A
Taught	Winter

Course Outcomes

Professional Preparation

Students will be prepared to function competently in the public schoolclassroom as musical artists, as teachers, and as administrators.

Classroom Strategies and Policies

Students will be prepared to create their own strategies and policies for themusic classroom based on sound principles.

Rehearsal Technique

Students will develop processes, build skills, and share knowledge in rehearsal technique by analyzing scores, forecasting rehearsal issues, planning, creating, and prioritizing strategies, executing the rehearsal with a real lab choir.

Choral Voice Building

Students will develop processes, build skills, and share knowledge in voice building of choral singers by creating an index of vocalises to build technique, modeling for and strategizing to improve the tone of the lab choir over the semester, reading about and discussing group vocal pedagogy.

Choral Repertoire

Students will develop processes, build skills, and share knowledge in discerning quality choral repertoire, collecting and organizing it into personal choral reference libaries.

Repertoire and Program Selection

Students will develop processes, build skills, and share knowledge in selecting repertoire and creating quality concert programs for secondary students.

Creating Course Documents

Students will develop processes, build skills, and share knowledge in creating course documents that outline curriculum goals, classroom management rules and consequences, assessment and grading procedures, budget proposals and purchasing information.

Recruiting and Voice Testing

Students will develop processes, build skills, and share knowledge in recruiting singers, voice testing and discerning stages of the changing voice meeting the range needs of those voices, auditioning.

Top

Instrumental Practicum

Applied conducting technique, score analysis and preparation, evaluating solo performance, and applying learning theory.

MUSIC 377A

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 235A & MUSIC 296
Taught	Fall

Course Outcomes

Score analysis

Students will demonstrate ability to analyze scores in terms of form, phrasing, meter, cueing, balance and harmonic analysis, provide score markings for each. Transposing skills are required.

Rehearsal Planning and Strategies

Students will create lesson plans that identify and target specific music elements by predicting and prioritizing rehearsal issues.
Students will learn and implement diverse teaching strategies
Students will rehearse, perform, and evaluate in real time.
Students will analyze and assess performance practice in live lab settings.

Conducting Skills and Experience

Students will develop and demonstrate mastery of conducting techniques.
Students will demonstrate clear and expressive conducting iand effective communication through conducting.

Students will experience and use a variety of assessment strategies

Formative Assessment
Students will peer-assess in pairs and in groups, mentor each other in lesson presentation, and self-reflect on progress, goals and challenges
Students will be assessed by instructors with written comments, rubrics and live commentary on teaching sessions.
Summative Assessments
Lesson plan preparation
Conducting Final

Professional and Courteous Conduct

Students will show empathy, respect and courtesy towards each other throughout the leanrning process.

Instrumental Practicum

Curriculum design, evaluating ensemble performance, advanced rehearsal techniques, administering secondary instrumental music programs; computers and computer-assisted instruction.

MUSIC 377B

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 377A
Taught	Winter

Course Outcomes

Ensemble Curriculum

Students will understand the place in the curriculum for additional ensembles (i.e. jazz,marching band, musical orchestra, folk groups) and demonstrate understanding of the skills required to direct them.
Students will learn how to appreciate and run alternative performance groups.

Philosophy of Music Education

Students will develop and demonstrate the ability to articulate a personal philosophy for music education which accounts for the place of arts in the public school curriculum.
Students will be able to identify cogent elements in program philosophy that will direct the following kind of choices: Scheduling of a complete music program, musicselection, and travel and performance philosophy.

School Band Management

Students will learn about many of the various tasks that are required to manage a public school band program including: contest/festival adjudication, facilityplanning, recruiting, public relations, fund raising, budgets and purchasing, and repertoire selection.

Rehearsal techniques

Students will demonstrate ability to locate and resolve errors in ensemble performance and to conduct ensemble music with clarity and purpose.
Students will gain experience in the musical skills of intonation/quality, andtransposition/score reading.

Music for the Elementary Classroom Teacher

Establishing a classroom environment for musical development; emphasis on appropriate songs, activities, resources, and teaching strategies.

MUSIC 378

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

MUSIC 378 - Mu Elem Clsrm Tch

Students will acquire personal musicianship skills applied to knowledge of age-appropriate musical activities, materials and delivery techniques for grades K–6.

Top

Pre-Student Teaching

Analyzing education practice and relationship between theories and research on music education and the practice of teaching.

MUSIC 379

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or better in Music 275.
Taught	Fall, Winter

Course Outcomes

Student Teaching Readiness

Students will demonstrate a readiness to assume the responsibilities of student teaching in general, choral, or instrumental music through successfully completing a semester-long, part-time field experience in a suitable public school music classroom setting.

Top

Jazz Improvisation 2

Intermediate improvisation: theory and technique.

MUSIC 384

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Music 284 or director's consent.
Taught	Winter

Course Outcomes

Jazz Improv II

Students will continue their study of improvisation techniques and will learn advanced scales, chord progressions, and stylistic approaches to jazz improvisation.

Songwriting 2

Projects in advanced songwriting.

MUSIC 386R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 186 & MUSIC 256 & MUSIC 295
Taught	Winter

Course Outcomes

Advanced Songwriting

In Music 386R, advanced songwriting, the student is encouraged to think more deeply about the ultimate purpose of songs being written either for personal reasons, or to answer the needs of publishers or producers of movies and television episodes, who are requisitioning specific content or musical style. The course is repeatable to allow the developing student writer multiple chances to hone this important craft. Industry-style collaboration situations are encountered in this class, and the pace of writing, as well as the number of projects expected, reflects a more professional pace of working.

Top

Composition 3

Composition lessons and seminars in principles and techniques of recent art music.

MUSIC 387R

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	C- or higher in Music 288, 296; junior-level screening.
Taught	Fall, Winter

Course Outcomes

Advanced Composition

Advanced composition study that (a) focuses on modern and postmodern musical vocabularies, (b) enhances knowledge of contemporary repertoire, and (c) prepares students for their senior recitals.

Top

Projects in Commercial Music

Introductory projects in scoring for broadcast media, publication, and studio recording.

MUSIC 389

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 186, 222, 256, 296.
Taught	Fall

Course Outcomes

Commercial Music Projects

The projects class will help students understand and prepare for real-world applications of the tools and techniques used in music production. A good working knowledge and understanding of MIDI, music compositional techniques, digital workstations(such as Pro Tools, Logic, Digital Performer), Virtual Instrument plug-ins and other production components are required. The class will review some basic principles and teach more advanced uses of these technologies. Class projects will range from realistic drum sequencing, writing and producing jingles, song clones to scoring for video and film.

Jazz Keyboard

Lead sheets, chord voicings, and other aspects of jazz performance practice.

MUSIC 391

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 196 & MUSIC 222
Taught	Winter, Spring

Course Outcomes

Jazz Keyboarding

Students learn how to read lead sheets and how to appropriately voice chords on the piano.

Play standard tunes in the following ways using a lead sheet

Upon the successful completion of this course a student should be able

- Melody in the right hand and basic chord inversions in the left hand
- Chords only spread between both hands to comp behind a soloist, employing upper structure and altered chord harmony.
- Rootless voicings in the left hand and embellished melody in the right hand while playing with bass and drums.
- Play a solo piano ballad with rich jazz harmonies and moving textural lines.
- Play the blues in four keys, demonstrating standard chord voicings and improvisational techniques.
- Play II-V-I patterns in major and minor, using three voicing systems; 1735-1379, 1357-1793, and rootless voicings. These include harmonic extensions to the 13th and various forms of the altered dominant seventh chords and their substitutions.
- Know and play all of the following modes and scales with correct fingerings: Dorian, Mixolydian, Jazz Minor, Lydian, Locrian, Whole Tone, Diminished (Octatonic) in two forms, Lydian Dominant, Super Locrian (Diminished Whole-Tone).

Top

Jazz Styles and Analysis

In-depth experience in recognizing and differentiating jazz styles, including analyzing and transcribing solo and ensemble jazz materials.

MUSIC 394

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Music major status; instructor's consent.
Taught	Fall even years

Course Outcomes

Jazz Styles and Analysis

In-depth experience in recognizing and differentiating jazz styles, including analyzing and transcribing solo and ensemble jazz materials.

Top

Form and Analysis

Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

MUSIC 395

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 293, 295.
Taught	Fall, Winter, Spring

Course Outcomes

Form and Analysis

This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.
The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

Academic Internship

Internship or externship in creative, performing, producing, or teaching applications of major course work.

MUSIC 399R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Off Campus Performance

Students will participate in an off-campus performance or administrative experience to enhance the student's academic training at the university.

Networking

Students will gain access to professional contacts and create a network beneficial to future career choices.

Skill Application

Students will apply acquired classroom skills in a professional setting.

Vocal Literature

Survey of literature with emphasis on art song. Research in area of concentration.

MUSIC 402A

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into 360R or instructor's consent.
Taught	Fall

Course Outcomes

Classical Vocal Art Song: 1600 to Present

Students will survey the classical vocal art song repertoire in English, Italian, German, and French from the past 400 years.

Seminar Presentations

Students will be able to prepare and present a class on a given composer or group of composers—consisting of lecture, musical examples, live performance, and appropriate handouts.

Style and Development

Students will be able to discuss stylistic elements of song, including melody, harmony, rhythm, accompaniment, text, and form.
Students will be able to discuss the development of song through various composers, languages or eras.

Listening

Students will be able to identify listening examples of specific songs.

Performance

Students will be able to perform at least one song in two other student presentations.

Repertoire Lists

Students will be able to compile a comprehensive personal repertoire list.

Top

Vocal Literature

Continuation of Music 402A with emphasis on opera and oratorio.

MUSIC 402B

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into 360R or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Vocal Literature

Students will further develop skills started in Music 402A.

Top

Piano Literature

Survey of literature. Research in area of concentration.

MUSIC 403A

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
Taught	Fall

Course Outcomes

Advanced Keyboard Performance

This course is designed for the advanced keyboard performer, and consists of projects in keyboard harmony, sight-reading, transposition, modulation, improvisation, playing by ear, and score reading, in pursuit of developing the complete keyboard fluency.

Top

Piano Literature

Continuation of Music 403A.

MUSIC 403B

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
Taught	Winter

Course Outcomes

Piano Literature: Classical to Contemporary

This course will explore piano literature from late Classical, Romantic, Impressionistic, and Contemporary periods of music history including composer surveys, analysis, aural and score recognition, performances and performance practices. The goal of this course is for each student to gain a broad understanding of the subject and develop a love for the rich heritage of the medium. A major purpose of the course is to instill in students a curiosity essential for lifetime discovery. Thorough knowledge and appreciation of the piano repertoire is crucial for a successful career in performance and teaching.

Top

Organ Literature

Survey of literature. Research in area of concentration.

MUSIC 404A

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
Taught	Fall odd years

Course Outcomes

Organ Lit

The course objective is to further an acquaintance and familiarity with the repertory, composers, forms and genres, stylistic features, analytical techniques and general performance practices associated with organ literature from the earliest sources of the fourteenth century through the music of Johann Sebastian Bach.

Top

Organ Literature

Continuation of Music 404A.

MUSIC 404B

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
Taught	Winter even years

Course Outcomes

Organ Lit, 2

A continuation of 404A, with the focus being on organ literature from the mid-eighteenth century to the present.

Top

Chamber Music Literature

Survey of literature, including research in field of concentration.

MUSIC 405

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; concurrent enrollment in 460R, or instructor's consent.
Taught	Winter

Course Outcomes

Chamber History

To understand the important trends in chamber music through its history

Research, Read, and Write

To research, read, and write about the chamber music literature on a topic of your choice.

Write Intelligently

To attend, and write intelligently about, live performances.

Musical Foundation

To acquire a foundation for your continued enjoyment of chamber music as a listener and performer.

Top

String Literature

Survey of literature, including research in field of concentration.

MUSIC 406

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
Taught	Fall odd years

Course Outcomes

String Literature

Be able to discuss, listen to, dance to and perform standard standard repertoire as well as read and write about it. The ultimate purpose is to expand your understanding of the concert and teaching repertoire. This survey will demonstrate the wealth of string literature available and how you can find, understand and play it well.

Top

Symphonic Literature

Survey of literature, including research in field of concentration.

MUSIC 407

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 306; concurrent enrollment in 460R, or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

[Title]

This class is currently not offered.

Advanced Topics in Music

Topics vary.

MUSIC 410R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	C- or higher in Music 306; Music 222, 294, 296, 298, or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

General Special Topics Outcome

Specific learning outcomes are explicated at the outset of the course, but vary from syllabus to syllabus; each class explores in depth a subject supported by the particular research experience and expertise of the graduate faculty member who teaches the course.

Top

Music Dance Theatre: Senior Performance Project

Participation in an MDT performance group culminating in a showcase for agents and directors in New York City during April.

MUSIC 426

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	DANCE 361; Concurrent enrollment in Dance 426, and TMA 426.
Taught	Fall, Winter

Course Outcomes

Professional Feedback

Students will experience an audition/showcase situation in two entertainment markets

Audition/Showcase Experience

Students will audition for and receive feedback from industry professionals in two markets

Auditions Selections

Students will have several performance-ready audition selections prepared

Promotional Materials

Students will have professionally produced personal promotional material on hand

Master Classes

Students will experience Master Classes from working Broadway professionals

Entertainment Industry Type and Market

Students will recognize their 'type' and marketability within the entertainment industry

Professional Contacts

Students will establish professional contacts that will aid them in making the transition from the academic to the professional world of theatre

Top

New Music Ensemble

MUSIC 441R

Hours	1.0 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Modern and Experimental Music Practice

Performance practice in modern and experimental musical vocabularies.

Top

Senior Recital

MUSIC 449

Hours	1.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment in Music 360R, 387R, or 460R, and instructor's consent. Prerecital hearing required at least three weeks before juried recitals.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Full Recital Performance

Students will perform a full recital of repertory, artistically appropriate to the year of study.

Top

Performance Instruction

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Bassoon

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Brass and Percussion

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will perform two solo selections from the advanced (professional) standard repertory in master class, recital, and jury exams each semester.

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Cello

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Applied Cello Instruction

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Clarinet

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Conducting

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Euphonium

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Flute

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Guitar

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Harp

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Harpsichord

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Horn

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Oboe

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Performance Instruction: Organ

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Percussion

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Piano

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Saxophone

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: String Bass

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Strings

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will perform two solo selections from the advanced (professional) standard repertory in master class, recital, and jury exams each semester

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Performance Instruction: Trombone

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Trumpet

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Tuba

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Viola

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Applied Viola Instruction

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Violin

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Applied Violin Instruction

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Solo Performance

Students will demonstrate the ability to perform standard solo repertoire, orchestral excerpts, and etudes/methods at an appropriate artistic level for their year of study.

Top

Performance Instruction: Voice

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Top

Performance Instruction: Woodwinds

Advanced private instruction and studio class.

MUSIC 460R

Hours	1.5 - 3.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Major in performance; jury approval.
Note	From three to five hours of daily practice. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Solo Performance

Students will perform two solo selections from the advanced (professional) standard repertory in master class, recital, and jury exams each semester

Technique and Musicality

Students will acquire the technical and musical skills needed to pursue a career on their respective instruments.

Orchestral Excerpts

Performance instruction in standard orchestral repertoire.

MUSIC 462R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Music 460R or instructor's consent.
Note	For string performance majors.
Taught	Fall

Course Outcomes

Orchestral Repertoire and Excerpts

This course is a skill development class that is designed to help you to become ready to take professional orchestral auditions and help prepare you to reach your potential as an orchestral musician.

- Preparation and performance of standard orchestral excerpts
- Sight-reading of several other standard orchestral excerpts
- Perform for outside adjudicators in "mock audition" setting
- Understand professional audition procedures and processes
- Collect mateials and resources to aid in preparation for future professional auditions

Orchestral Excerpts: Bass

Performance instruction in standard orchestral repertoire.

MUSIC 462R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Music 460R or instructor's consent.
Note	For string performance majors.
Taught

Organ Practicum

Developing various practical skills required of the organist.

MUSIC 466R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Music 166 or organ performance major status. Must be taken in consecutive winter and fall semesters.
Taught	Fall odd years, Winter odd years

Course Outcomes

Choir Accompaniment

To accompany choirs at the organ, interpreting and preparing the score properly, managing the console with mastery, and following the director accurately and musically.

Hymn Playing

To play hymns using a wide variety of techniques and with artistry, encouraging congregational participation and enthusiasm, and to conduct hymns adequately.

Top

String Teaching Practicum

Applying pedagogical principles to teaching.

MUSIC 467

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Completion of required pedagogy class (Music 369A-E).
Taught	Fall, Winter

Course Outcomes

String Studio Teaching Practicum

1- Pedagogy - By the semester's end, each student will have a thorough knowledge of how to apply string pedagogy, its theory, and practice.
2- Teaching - The student will have greatly improved his or her capacity to teach learners of every age and ability level through actual supervised teaching.
3- Private Teaching Studio- Each student will have gained the knowledge and skill necessary to run a successful private teaching studio.

Top

String Teaching Practicum: Bass

Applying pedagogical principles to teaching.

MUSIC 467

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Completion of required pedagogy class (Music 369A-E).

Top

Jazz Pedagogy

Organizing and teaching jazz in the secondary school. Designed for the music educator.

MUSIC 468

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Jazz Pedagogy

Students will learn how to organize and teach jazz in the secondary school. Materials are designed for the music educator.

Top

Theory and Methods of Studio Teaching

Applying learning theory and secondary education methods to studio teaching.

MUSIC 469

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Completion of required pedagogy class or instructor's consent.
Taught	Winter

Course Outcomes

Theory and Methods of Studio Teaching

Students will gain a theoretical base in beginning and maintaining a successful studio.

Top

Keyboard Teaching Practicum

Applying pedagogical principles to teaching.

MUSIC 470R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Completion of required pedagogy class or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will deepen their understanding of how music and practicum are related.

Keyboard Teaching Practicum: Organ

Applying pedagogical principles to teaching.

MUSIC 470R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Completion of required pedagogy class or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Plan, teach, evaluate

Plan, teach, and evaluate effective organ training courses and private lessons.

Apply

Apply concepts introduced in Organ Pedagogy (Music 366, 665) in supervised private and group instruction.

Self-sufficient

Become self-sufficient as an organ teacher.

Keyboard Teaching Practicum: Piano

Applying pedagogical principles to teaching.

MUSIC 470R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Completion of required pedagogy class or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Knowledge

tudents will deepen their understanding of how music and prac: piano are related.

Supervised Teaching in Voice

Lecture, discussion, and practicum in the methodology of studio voice instruction.

MUSIC 472

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	MUSIC 363
Taught	Winter

Course Outcomes

Teaching Experience

Students will apply the information gained in Music 363 to teaching at least 2 students, one male and the other female.

Pedagogical Approaches

Students will develop through study and experience pedagocial approaches to teaching singing.

Repertoire for Beginning Voice

Students will develop a basic list of repertoire appropriate to teaching beginning voice lessons.

Student Public Recital

Students will help their pupils prepare at least one song to a performance level which can be presented in a public recital.

Home Studio Management

Students will learn the organizational and financial structure of a successful home studio.

Secondary Student Teaching

Capstone, field-based, semester-long experience in teaching secondary music students, demonstrating proficiency in all program standards. Seminar required.

MUSIC 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or approval; with a major GPA 2.85.
Taught	Fall, Winter

Course Outcomes

Teacher Work Sample

Students will complete a Teacher Work Sample documenting their ability to understand a teaching situation and their individual students in one specific class, and their ability to plan, teach, reflect on and revise music learning events to teach a learning unit to this class. They will document group and individual progress for the unit.

Effective Planning, Teaching and Revising

Students will demonstrate their ability to effectively plan, teach, reflect and revise music learning events by teaching full-time in a student teaching placement with a mentor teacher. In addition, students will demonstrate their ability to communicate effectively with individual students and groups of students, as well as parents, as well as the ability to work well with their mentor teacher and other school colleagues.

Top

Orchestration

Scoring for standard orchestral instruments.

MUSIC 481

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 293, 295.
Taught	Fall

Course Outcomes

Orchestration

This course is to learn fundamentals and intermediate techniques of orchestration, primarily pre-modern.

Top

Choral Arranging

Study of published choral arrangements, as well as techniques for adapting and arranging for choirs.

MUSIC 482

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 296.
Taught	Winter

Course Outcomes

Choral Arranging

This course will help students learn a broad range of techniques in choral arranging, especially as it applies to adapting existing works for different configurations and creating new arrangements based on preexisting melodies.

Top

Counterpoint

Eighteenth-century contrapuntal styles and techniques, emphasizing those of J. S. Bach.

MUSIC 483

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 294, 296.
Taught	Fall

Course Outcomes

18th Century Counterpoint

Learn techniques of 18th-century counterpoint and how they apply in principle to music of all subsequent periods.

Top

Jazz Arranging and Composition

Developing concepts and skills related to the orchestration, arranging, and composition of jazz and related contemporary styles of music.

MUSIC 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 295
Taught	Winter

Course Outcomes

Jazz Arranging

Students will develop concepts and skills related to the orchestration, arranging, and composition of jazz and related contemporary styles of music.

Commercial Music Capstone Project

Creating a demo CD and resume from course work, creative project, and internship experiences. Career goals and opportunities.

MUSIC 486

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 389; Commercial Music major status.
Taught	Fall, Winter

Course Outcomes

Professional Presentation

This capstone level course is a resume/demo-reel combination project presenatatio suitable to show a prospective employer within the music industry. In building a resume, the students are instructed how to show both national and local credits, weighting, effective descriptions and other presenting other related expeirence and proper formatting on the resume.
The demo-reel, (A/V recording) part of the requirement needs to show a finish level that would get the positive attention of an industry professional. Skills learned in prior upper division media music courses are all brought to bear here as a final presentaion of the students abilities are showcased.

Film Scoring

Introduction to techniques and technology of film scoring.

MUSIC 489

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 389; Instructor's consent.
Taught	Winter

Course Outcomes

Course Outcomes

Successful completion of this class will allow students:
1. To develop a practical understanding and approach to film scoring.
2. To develop an appreciation of film composition as an art form.
3. To have a practical ability of the creative and technical process of film composition.
4. Seek to develop a balance between the career and spiritual well-being.
5. Ultimately, to gain a greater fascination and increased skill of film composition.

Top

Independent Readings

MUSIC 494R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Advising professor's consent as certified by completing a contract obtained from undergraduate studies secretary in E-579 HFAC.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Independent Readings

Precise learning outcomes vary from student to student, and are negotiated prior to the experience and approved by the supervising faculty member. These specific requirements are written down in a contract and placed on file.

Honors Thesis

MUSIC 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Senior status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research

After completion of the project, the student should be prepared to do research at the graduate level.

Bibliography

Students will become familiar with, and use correctly, proper bibliographic styles.

End Product

Students will gain the experience of producing a well-written and researched thesis and/or thesis project.

Top

Musical Research Techniques

MUSIC 500

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Fall, Winter

Course Outcomes

Scholarly Inquiry, Information Literacy, and Writing

Develop skills of scholarly inquiry, information literacy, and writing that will (1) save time and make graduate coursework easier, (2) facilitate current awareness of developments in the music professions, (3) lay a foundation for your own professional development, (4) and enable lifelong personal learning.

Critical Thinking

Learn to think critically (make value judgments) about music and evaluate the purpose of your career in music. Add intellectual and spiritual depth to your musical activities.

Methodologies and Publication

Gain a broad understanding of methodologies and publication types commonly applied in music research.

Reference Sources, Public Services, and Actual Holdings

Become familiar with reference sources, public services, and actual holdings useful for music research and performance in the Harold B. Lee Library, in other significant music libraries throughout the world, and online.

Basic and Advanced Reference Sources

Learn the uses and comparative merits of basic and advanced reference sources related to music. Gain the ability to determine the best reference source for a given research need. Learn how to critique reference sources.

Correct Citations

Become proficient in basic and advanced aspects of bibliographic citation, using principles of the Chicago Manual of Style (16th edition) and other writing conventions common to scholarly music publications.

Evaluation of Sources

Develop basic skills necessary to locate and evaluate critically musical manuscripts and various

types of editions of scores.

Top

Music Education Research Techniques

MUSIC 501

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Summer

Course Outcomes

Research Design

Students will demonstrate their understanding of how to design research projects for different types of research.

Top

Aesthetics

Fundamental questions of aesthetic theory from classical antiquity to the present, emphasizing musical aesthetics.

MUSIC 503

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Music 306 or equivalent.
Taught	Fall

Course Outcomes

Aesthetics

Students will understand a broad historical range of literature in the philosophy of art, with particular emphasis on music.

Top

Applied Literature

Advanced survey and research of literature.

MUSIC 505A

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Minimum of one enrollment in Music 402-407 or equivalent.
Taught	

Course Outcomes

Organ Literature

Students will gain an overview of organ literature, throughout the instrument's history. Likewise, students will be able to readily engage in scholarly discussions about the studied literature

Brass Literature

Students will gain a working knowledge of the solo, chamber, orchestral, and pedagogical literature for their chosen instrument.
Through a study of specific repertoire, students will be able to identify and trace the development of their instrument's literature from its inception to the Contemporary period.

String Literature, graduate level

Be able to discuss, listen to and perform music beyond the standard repertoire as well as read and write about it. The ultimate purpose is to expand your ability and skill to study a portion of string literature in great depth.

MUS 505A - Percussion Literature

Familiarize students with solo literature for snare drum, drum set, timpani, and multiple percussion and discuss method book approaches and techniques. Students will learn analysis techniques by viewing works compositionally and pedagogically while developing a spread sheet file with information regarding level of difficulty, composer/publisher, and comments regarding the piece or method.

History and Development

Students will survey the operatic traditions, styles, and repertoire from 1600 to the present day.

Piano Literature

Students will gain an overview of (piano) literature, from (Renaissance to Avant Garde).

Composers

Students will gain depth of understanding about a particular style and/or composer through focused research and seminar presentations in class.

Oral Exam

Students will be able to readily engage in scholarly discussions about the studied literature.

Top

Applied Literature: Brass Literature

Advanced survey and research of literature.

MUSIC 505A

Composers

Students will gain depth of understanding about a particular style and/or composer through focused research and seminar presentations in class.

Oral Exam

Students will be able to readily engage in scholarly discussions about the studied literature.

Top

Applied Literature: Vocal Literature

Advanced survey and research of literature.

MUSIC 505A

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Minimum of one enrollment in Music 402-407 or equivalent.
Taught	

Course Outcomes

Organ Literature

Students will gain an overview of organ literature, throughout the instrument's history. Likewise, students will be able to readily engage in scholarly discussions about the studied literature

Brass Literature

Students will gain a working knowledge of the solo, chamber, orchestral, and pedagogical literature for their chosen instrument.
Through a study of specific repertoire, students will be able to identify and trace the development of their instrument's literature from its inception to the Contemporary period.

String Literature, graduate level

Be able to discuss, listen to and perform music beyond the standard repertoire as well as read and write about it. The ultimate purpose is to expand your ability and skill to study a portion of string literature in great depth.

MUS 505A - Percussion Literature

Familiarize students with solo literature for snare drum, drum set, timpani, and multiple percussion and discuss method book approaches and techniques. Students will learn analysis techniques by viewing works compositionally and pedagogically while developing a spread sheet file with information regarding level of difficulty, composer/publisher, and comments regarding the piece or method.

History and Development

Students will survey the operatic traditions, styles, and repertoire from 1600 to the present day.

Piano Literature

Students will gain an overview of (piano) literature, from (Renaissance to Avant Garde).

Composers

Students will gain depth of understanding about a particular style and/or composer through focused research and seminar presentations in class.

Oral Exam

Students will be able to readily engage in scholarly discussions about the studied literature.

Top

Top

Advanced Applied Literature

Intensification and deeper study of Music 505A materials.

MUSIC 505B

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	MUSIC 505A
Taught	

Course Outcomes

Brass Literature

Students will gain a working knowledge of the solo, chamber, orchestral, and pedagogical literature for their chosen instrument.
Through a study of specific repertoire, students will be able to identify and trace the development of their instrument's literature from its inception to the Contemporary period.

String Literature, graduate level

Be able to discuss, listen to, perform, read and write about an advanced topic (or topics) in string literature. The ultimate purpose is to pursue a specific subject that has greatly piqued your interest in string literature (such as performance practice, an aspect of pedagogy, development of your instrument, a select body of literature or techniques etc.)

Organ Literature

Students will gain an overview of organ literature, throughout the instrument's history. Likewise, students will be able to readily engage in scholarly discussions about the studied literature

MUS 505B - Percussion Literature

Expose students to an in depth study of percussion ensemble literature from trios to large ensembles of ten or more players. Student presentations will be made so that they can evaluate compositional techniques, instrumentation, styles, and difficulty. Use of recordings will help students become familiar with the variety of textures and sounds available. Score analysis will help students determine the quality of pieces when recordings are unavailable and will aid in their ability to conduct and teach the pieces to their own students.

Research

Students will engage in in-depth research on a topic of vocal literature that has been approved by the instructor.

Piano Literature

Students will gain an overview of piano literature, from the Renaissance to the Avant Garde.

Pedagogy

As future pedagogues, students will learn to evaluate and choose instructional materials for beginning, intermediate and advanced students.

Research Paper

Students will prepare a written research paper on their topic following the guidelines set by the instructor.

Research

At the conclusion of this course, students will be able to list and describe their instrument's primary resources available for historical, pedagogical and artistic research.

Oral Exam

Students will be able to readily engage in scholarly discussions about the studied literature.

Presentation

Students will present the results of their research to the class in a seminar presentation on their topic.

Choral Literature 1

Concentrated analytical study and application of choral literature through Beethoven.

MUSIC 506

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall odd years

Course Outcomes

Choral Lit 1

1. You will have begun to assemble your own personal choral music database and library.
2. You will have familiarized yourself with many representative pieces of major composers from each historical period. You will know their general characteristics and be able to apply this knowledge to the analysis of many kinds of choral music. You will know the important works of the major composers in each period. You will be able to recognize visually or aurally the musical characteristics of periods and composers in unidentified scores and recordings.
3. You will know the names and general characteristics of contemporary arrangers, and composers who write choral music for educational purposes. You will also be able to recognize desirable qualities of repertoire for varying levels of age and ability in school, church, or community choir settings.
4. You will know the criteria which affect choral programming. You will have compiled three sample programs, which demonstrate both your ability to create an artistic program and your knowledge of the repertoire.
5. You will know about the issues which affect the choral musician's search for repertoire: the focus of well known publishers, music in the public domain, internet resources, copyright issues, out of print music, etc.
6. You will have the necessary skills to evaluate each choral piece you encounter and be able to assess why a choral piece is or is not worth performing. Also, you will hopefully find great spiritual enlightenment as you come to know and better understand the world's choral masterpieces.

Choral Literature 2

Concentrated analytical study and application of choral literature from post-Beethoven to the present.

MUSIC 507

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall even years

Orchestra Literature 1

Concentrated analytical study and application of orchestral literature of the baroque and classical eras.

MUSIC 508

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Winter even years

Course Outcomes

508 Orchestral Literature 1

The purpose of this course is to study the standard orchestral literature through the eyes of a conductor. Upon completion of the course, students will be familiar with the most important literature of the Baroque, Classical, and Romantic periods up to through the works of Brahms. They will be able to identify the most important composers, their works, and the most significant passages with regards to challenges for the conductor.

Orchestra Literature 2

Concentrated analytical study and application of orchestral literature of the romantic era and the 20th century.

MUSIC 509

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Winter odd years

Course Outcomes

509 Orchestral Literature 2

The purpose of this course is to study the standard orchestral literature through the eyes of a conductor. Upon completion of the course, students will be familiar with the most important literature of the late Romantic period up to through the new music of today.. They will be able to identify the most important composers, their works, and the most significant passages with regards to challenges for the conductor.

Band Literature

Concentrated study of band literature through analysis and conducting.

MUSIC 510

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Winter

Course Outcomes

Score Analysis

Identify and describe elements of form, rhythm, melody, harmony, texture, dynamics, timbres, style and phrasing in a variety of band or orchestral scores.

Historical Knowledge

Describe the evolution of various large scale instrumental forms and trace the development of the styles and composition techniques in band history--while citing research sources for adding to that information.

Knowledge of Composers

List significant composers for the instrumental genres of band or orchestra music and name their most prominent works--while citing research sources for additional information.

Top

Oratorio Literature for Solo Voice

History, repertoire, and performance practice of sacred works with a focus on works from the Baroque Era to Contemporary.

MUSIC 511

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 402A or equivalent.
Taught	Winter

Course Outcomes

Outcomes

1. Students will study the history of oratorio repertoire and its styles of performance from the baroque era through to the present day.
2. Students will focus on specific recitative and arias from the oratorio repertoire, and perform extracts in class.
3. Students will complete assignments and give presentations in class that will pertain to their research on oratorio repertoire.

Score Preparation and Conducting: Instrumental

MUSIC 532R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall

Course Outcomes

Score Analysis

Identify and describe elements of form, rhythm, melody, harmony, texture, dynamics, timbres, style and phrasing in a variety of band or orchestral scores.

Score Marking

Use a variety of score marking techniques to notate preparation in score analysis and rehearsal planning.

Conducting Clarity

Demonstrate the ability to clearly signal changes in meter, tempo, style, phrasing and dynamics while conducting the ensemble.

Rehearsal Techniques

Demonstrate ability to forecast performance problems and demonstrate techniques and strategies for correcting them.

Choral Conducting and Development

Principles and practices of score preparation, conducting, and choral development as elements of choral artistry.

MUSIC 533R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter odd years, Summer

Course Outcomes

Learning Outcome

Students will demonstrate (1) the ability to analyze and graph a score, including factors of form, rhythm, melody, harmony, texture, dynamics, and balance, (2) the ability to prepare the score for rehearsal, creating a clear rehearsal plan, while showing challenges in the score and offering the means for meeting those challenges, and (3) conducting the score in a manner that communicates its style and character.

Top

Score Preparation and Direction: Jazz

MUSIC 534R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Summer odd years

Course Outcomes

Score Prep

Students will be able to prepare a score for rehearsal.

Top

Instrumental Conducting and Error Detection

Development of critical rehearsal and conducting skills through score preparation, lesson planning, rehearsal goals and predicting issues, performance accuracy, score transpositions, error detection, conducting gesture analysis, and music-mapping for the development of expressive conducting gesture.

MUSIC 535R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Conducting and Error Detection

- Demonstrate ability to study scores effectively to predict ensemble needs
- Demonstrate ability to prepare effectively for rehearsal and develop lesson plans
- Demonstrate ability to map a piece
- Demonstrate ability to use clear and effective conducting gestures to enhance ensemble's performance
- Conduct and perform for each other in micro teaching modules
- Demonstrate ability to perform in an ensemble with accuracy and precision
- Demonstrate ability to detect errors in score and performance in a positive manner, recommend solutions, and reinforce good behaviors
- Analyze and assess performance practice in live lab settings
- Demonstrate ability to transpose concert score for each instrument in the ensemble
- Students will show empathy, respect and courtesy towards each other throughout the learning process

Hours	1.0 - 2.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Graduate music student status.
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

560R Performance Instruction

Prepare performances at a high level, including knowledge of applicable solo and ensemble literature, and perform from a cross-section of that repertory.

Top

Music for Elementary School Teachers

Experiences in teaching various music activities in the elementary school.

MUSIC 570

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 371, 471, or elementary music teaching experience.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Music for Elementary Teachers

Students will have a greater understanding of the musical needs and abilities for K-6 students.

Elementary Education Music Pedagogy

Orff, Dalcroze, and Kodaly materials and techniques.

MUSIC 571

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Music 371 and equivalent of elementary education teaching minor in music.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Music ElEd Pedagogy

Students will learn different methods of teaching music to K-6 students.

Top

Instructional Methods 1

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of instructional methods.

Top

Instructional Methods 2

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of instructional methods.

Top

Instructional Methods 3

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of instructional methods.

Top

Literature and Research 1

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of how literature and research are related.

Top

Literature and Research 2

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of how literature and research are related.

Top

Literature and Research 3

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understanding of how literature and research are related.

Top

Prepatory Musicianship

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will begin to understand Musicianship.

Summer Music Workshops and Clinics

MUSIC 575R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Classroom Teaching Techniques

Students will demonstrate ability to apply to their classroom teaching those music education teaching techniques addressed in the given Summer Music Clinic.

Top

Teacher Musicianship 1

MUSIC 575R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen their understand of Musicianship.

Top

Teacher Musicianship 2

MUSIC 575R

Course Outcomes

Knowledge

Students will deepen their understand of Musicianship.

Top

Fundamentals and Techniques of the Marching Band

Planning, charting, and scoring for marching bands.

MUSIC 576

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Music 294, 296 (or equivalents); music education major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Twentieth-Century Orchestration

New techniques for standard and new instruments; analysis and listening.

MUSIC 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Music 481 or equivalent.
Taught	Winter

Course Outcomes

20th Century Orchestration

Learn specialized orchestrational techniques, primarily of the modern era.

Top

Sixteenth-Century Counterpoint

Strict modal counterpoint in sixteenth- century style (Palestrina); includes species, text setting, and motet.

MUSIC 583

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C- or higher in Music 294, 296, or equivalent.
Taught	Winter

Course Outcomes

16th Century Counterpoint

Learn the techniques of 16-century counterpoint, including principles applicable to later music.

Top

Composition

MUSIC 587R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Advanced Composition

Students will receive advanced training in composition, particularly emphasizing larger forces and extended forms.

Top

Advanced Topics in Keyboard Harmony

Topics vary.

MUSIC 591

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall

Course Outcomes

Advanced Keyboard

Through projects in keyboard harmony, sight-reading, transposition, modulation, improvisation, playing by ear, and score reading, advanced keyboard students will begin developing a complete keyboard fluency.

Score Analysis

Analysis of representative choral and instrumental works from the Renaissance through contemporary styles.

MUSIC 595

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years, Summer odd years

Course Outcomes

Score Analysis

Music 595 is to help you to
- Explore the nature and function of scores of all kinds.
- Answer the question of any score: what does this score tell me about the intended sound and what does it not tell me?
- Learn criteria for identifying style, period, and performance practice of any score.

Score types include:
1. *Vocal music*: various *a capella* genres (choral, barbershop, etc.), congregational hymns (including shape-note symbols and tonic sol-fa), *Lieder*, popular sheet music, folk transcriptions.
2. *Instrument-based genres:* works for solo instrument, chamber groups, and larger ensembles
3. *Alternative uses and adaptations of common-practice notation:* lead sheets/fake books, charts/graphs (e.g., Schenker graphs), short scores, piano reductions, transcriptions, various indeterminate notations.
4. *Miscellaneous non-common-practice notation*. These include tablatures, assorted graphic/pictographic representations, verbal scores, mathematical (e.g., ratio-based) notation.

Top

Schenker Analysis

Schenker's system of tonal analysis.

MUSIC 596

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Music 306, 395; or equivalents.
Taught	Winter

Course Outcomes

Structure and Prolongation

Will learn the principles of structure, prolongation, and related ideas (as articulated by Schenker and his followers).

Top

Academic Internship

Internship in creative, performing, producing, or teaching applications of major course work.

MUSIC 599R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Academic Internship

Precise learning outcomes vary from student to student, and are negotiated and explicated prior to the experience and approved by the supervising graduate faculty member.

Top

Essentials of Human Nutrition

Food-oriented study of nutritional facts and principles as a basis for dietary choices; consequences of choices; scientifically examining controversial topics.

NDFS 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Nutrients

Identify functions of nutrients and their major food sources.

Applications

Identify, interpret, and apply nutrition information.

Scientific Method

Apply the scientific method to identify and interpret credible nutrition information.

Linking Course Outcomes to GE Outcomes

GE Learning Outcomes for Scientific Principles and Reasoning: Biological, Physical, and Social Science

1. Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process.
2. Appreciate the excitement of discovery that has accompanied important scientific developments.
3. Demonstrate how scientific methodology can be used to analyze real-world science-related problems.
4. Evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community.
5. Express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data.
6. Reflect rationally upon the interface between science and religion.

Connected GE Learning Outcome	Course Outcome	Measured/Met By:
Scientific Principles and		

Reasoning		
2, 3, 4, 5	Identify function of nutrients and their major food sources.	Assignment 2: Computer Dietary Analysis Class discussion I-clicker questions Graded team problems Exam questions
1, 2, 3, 4, 5	Identify, interpret, and apply nutrition information.	Assignment 1: Interpreting Scientific Nutrition Studies Assignment 2: Computer Dietary Analysis Assignment 3A/B: Entrée or Menu Assignment 4: Paper on Feeding Children Class discussion I-clicker questions Graded team problems Exam questions
1, 2, 3, 4, 5, 6	Apply the scientific method to identify and interpret credible nutrition information.	Assignment 1: Interpreting Scientific Nutrition Studies Assignment 2: Computer Dietary Analysis Class discussion I-clicker questions Graded team problems Exam questions

Careers in Food Science

Guest lectures and exposure to vocations in food science.

NDFS 191

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Food Science Major

Determine if Food Science is the major for you

Career Preparation

Create a portfolio that includes a resume, a compilation of networking contacts, a summary of interviewing skills, and answers to potential interview questions. For Food Science majors, instructors of subsequent food science courses will require students to add major and assignments to their portfolio.

Nutrient Metabolism

Chemical structures of nutrients, their food sources, requirements, digestion, absorption, transport, metabolism, functions, storage and excretion; metabolic consequences of nutrient deficiencies, interactions, imbalances, and toxicities.

NDFS 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 100; Organic chemistry or concurrent enrollment.
Taught	Fall, Spring

Course Outcomes

Chemical Structure

Identify chemical structures of amino acids, lipids, carbohydrates, and vitamins.

Deficiencies and Toxicities

List functions, food sources, and consequences of deficiencies and toxicities for each of the essential nutrients.

Consequences of Dietary Practices

Explain the metabolic and physiological basis for the consequences of dietary practices that affect nutrient levels, and relate the consequences to the roles of essential nutrients in metabolic processes.

Diet Analysis

Analyze diets and alter food intake to reach predetermined targets for consumption of specific dietary components or to achieve an overall dietary pattern.

Original Research and Peer-Reviewed Scientific Journal

Analyze the primary nutrition literature and identify statistically and biologically significant data.

Society, Nutrition, and Chronic Disease

Behavioral, dietary, and environmental factors that influence nutrition and risks for chronic disease.

NDFS 201

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	NDFS 100
Taught	Fall, Winter

Course Outcomes

Understand:

Explain or describe how behavioral, dietary, and environmental factors influence nutrition and chronic disease risks.

Find/Evaluate:

Find scientific research articles and identify their key characteristics. Identify consistencies or inconsistencies in studies of diet and chronic disease risks.

Apply:

Apply information about behavioral, dietary, and environmental factors to reduce chronic disease risks.

Top

Essentials of Food Science

Overview of food science, including chemical, physical and microbiological principles related to food processing, storage, and utilization. Current issues in food science.

NDFS 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 101; or CHEM 105; or SFL 110; concurrent enrollment in NDFS 251
Note	This class should be taken concurrently with NDFS 251.
Taught	Fall, Winter, Spring

Course Outcomes

Concepts and Principles

Explain the basic concepts and principles of Food Science

Current Food Science Topics in the News

Recognize (distinguish) current topics in the news and in lay literature as being related to Food Science and Technology

Consumer Concerns

Evaluate the scientific validity of various consumer concerns regarding food production, preservation, and storage

Topics in Scientific Literature

Obtain further information on Food Science topics through library research of the scientific literature

Food Science in your Major

Explain how Food Science knowledge applies to your major field of study, and make the connection between what you're learning and what you plan to do after graduation

Problem Solving

Solve Food Science related problems.

Food Safety and Quality

Determine your level of confidence in the safety and quality of the food available to you, having gained an understanding of what happens to food between farm gate and dinner plate

Essentials of Food Science Laboratory

Laboratory experience in the chemistry of changes occurring during food processing, storage, and utilization.

NDFS 251

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	CHEM 101; or CHEM 105; or SFL 110; Concurrent enrollment in NDFS 250.
Note	This class should be taken concurrently with NDFS 250.
Taught	Fall, Winter, Spring

Course Outcomes

Food Chemistry Reactions

Explain the basic chemistry involved in ripening, processing, and storing food

Critical thinking skills

Apply critical thinking skills to solve food related questions and problems

Collaborative Laboratory Experiments

Develop the ability to work in teams to carry out laboratory experiments

Introduction to Dietetics

The profession of dietetics; exposure to specialty areas through guest lectures.

NDFS 290

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

How to become a Registered Dietitian Nutritionist

Understand how to become a Registered Dietitian Nutritionist, including:
Educational requirements and various routes to completion.
Requirements for acceptance to the Didactic Program in Dietetics at BYU.
Requirements for acceptance to a Dietetic Internship.
Requirements for eligibility for Registration by the Commission on Dietetic Registration (CDR)
Requirements for maintenance of continuing CDR Registration.

Defining a Registered Dietitian Nutritionist

Understand what a Registered Dietitian Nutritionist is.

Defining a Professional

Understand what it means to be a professional.

Exposure to Registered Dietitian Nutritionist Jobs

Have exposure to a variety of jobs currently held by Registered Dietitian Nutritionists.

Your Dietetic Area of Interest

Identify which area of dietetics is personally most appealing

Future Job Opportunities

Identify what future job opportunities are predicted in the profession of dietetics.

Top

Fieldwork in Dietetics

Fieldwork for international students.

NDFS 292R

Hours	0.5 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Gain skills through fieldwork

Students will demonstrate professional attributes such as customer focus, critical thinking, and time management and work prioritization while developing dietetics-related skills within various organizational structures.

Top

Nutrition Research Fundamentals

Design of protocols for and ethics of research with human subjects and animals. Scientific literature searches and presentations.

NDFS 294

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	NDFS 200
Note	Recommended during sophomore year.
Taught	Fall

Course Outcomes

Nutrition Experimental Design

Design a nutrition research experiment using metholdology employed by NDFS faculty and/or that found in peer reviewed nutritional research papers.

IRB and IACUC Standards

Pass the Institutional Review Board (IRB) research test and implement standards of the Institutional Animal Care and Use Committee (IACUC) into a research study design

Top

Medical Nutrition Therapy 1

Nutritional assessment and medical nutrition therapy across disease states.

NDFS 300

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Dietetics major status.
Taught	Fall

Course Outcomes

Educational Materials for Patient Teaching

Develop educational materials for patient teaching and use current nutrition knowledge related to general healthy eating, health promotion, or medical nutrition therapy counseling

Counseling and Interviewing Techniques

Be familiar with basic counseling and interviewing techniques

Counseling Techniques for Behavior Change

Demonstrate counseling techniques to facilitate behavior change

Pathophysiology of Diseases and Nutrition Intervention

Identify the pathophysiology of diseases discussed in this course and how they relate to nutrition intervention

Fluid and Electrolyte Requirements

Determine fluid and electrolyte requirements

Medical Terminology

Understand and use medical terminology

Biochemical Markers

Know biochemical markers related to nutrition and how to interpret them

Nutrient Composition of Foods/Menus

Gather, analyze and interpret the nutrient composition of foods/menus

Disease Specific Diets

Develop appropriate disease specific diets

Alternative Nutritional Therapies and Herbal Remedies

Be familiar with common alternative nutritional therapies and become familiar with resources on herbal remedies

Dietary Supplement Act

Understand the dietary supplement act

Assessing Health Status

Evolving methods of assessing health status

Nutritional Health Risks

Assessment and treatment of nutritional health risks

Appropriate Medical Nutrition Therapy and Intervention

Identify the appropriate medical nutrition therapy for specific disease states and provide the appropriate intervention, including calculating and defining diets

Professional Literature

Interpret, evaluate and use professional literature to make ethical evidence-based practice decisions

Evidence Based Guidelines and Protocols

Use current information technologies to locate and apply evidence based guidelines and protocols; (ADA evidence Analysis Library and the Cochrane Database of Systematic Reviews)

Nutrition Care Process

Use the nutrition care process to make decisions, to identify nutrition-related problems and determine and evaluate nutrition interventions, including MNT, disease prevention and health promotion

Menus for Diverse Groups

Modify and evaluate menus for diverse groups

Pharmacology, Nutrient Metabolism, Physiology, Genetics and

Demonstrate understanding of pharmacology, nutrient metabolism, physiology, genetics and biochemistry

Nutritional Implications of Disease

Nutritional assessment and medical nutrition therapy across disease states.

NDFS 305

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	NDFS 200 & PDBIO 305
Note	For nutritional science majors.
Taught	Winter

Course Outcomes

Nutritional Assessment and Intervention

Apply principles of nutrition assessment and evidence-based nutrition intervention to clinical diseases and conditions.

Pathophysiology

Analyze the pathophysiology of nutrition-related diseases and conditions and evaluate the role of medical nutrition therapy.

Evidence-Based Practice

Analyze and interpret nutrition research related to prevention and treatment of various clinical diseases and conditions.

Nutrition and Metabolism in Sports and Exercise

Scientific basis for the role of nutrition in human performance. Critical evaluation of popular practices; making optimal food choices for physical activity.

NDFS 310

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	NDFS 100 & PDBIO 305
Note	This course was formerly named Sports Nutrition.
Taught	Fall, Winter, Spring

Course Outcomes

Nutrition and Physical Performance

Students will apply their current understanding of nutrition to aspects of physical performance. Describe the factors (exercise intensity, duration, substrate availability and endocrine) that affect energy utilization.

Scientific Research and Evaluation

Search, interpret, and summarize original scientific information. Evaluate nutritional claims for scientific accuracy.

Nutrition Recommendations for Physical Activity

Apply evidence-based nutrition recommendations for sports and exercise in real or hypothetical situations.

Food Analysis

Principles, methods and techniques of qualitative and quantitative physical, chemical, and biological analysis of food and food ingredients.

NDFS 350

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	NDFS 250 & NDFS 251 & CHEM 285; or NDFS 250 & NDFS 251 & CHEM 352
Taught	Winter

Course Outcomes

Analytical Techniques

Explain the principles behind the analytical techniques used in food analysis (primarily chemical and physical analyses)

Measurement of Components of Food

Measure various components of food (found on the Nutrition Facts label) using laboratory techniques common to food chemistry and food analysis

Selecting Appropriate Techniques

Select the appropriate analytical technique when presented with a practical problem

Quality Assurance Tests

Prepare a written report and brief oral presentation covering the quality assurance tests required for the analysis of raw ingredients, intermediate products and final product of a food commodity having a standard of identity.

Top

Food Process Engineering

Mass and energy balances, thermodynamics, fluid flow, heat and mass transfer; unit operations in food processing, including thermal processing, frying, irradiation, refrigeration, freezing, and dehydration.

NDFS 355

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	PHSCS 105 & MATH 112; or PHSCS 105 & MATH 119; Food Science majors only.
Taught	Winter

Course Outcomes

Transport Processes and Unit Operations

Solve fluid flow problems to determine flow rate variables and pump requirements.
Assess fluid type and processing requirements to determine appropriate pump type.

Mass and Energy Balances

Calculate the effectiveness and amount of heat exchanged in tubular and plate heat exchangers under various flow conditions.
Calculate the amount of heat recovered in the regeneration section of a HTST pasteurizer under various flow conditions.
Determine the ideal conditions for heat transfer.

Mass and Energy Balances 2

Calculate the coefficient of performance for refrigeration cycles and make a judgment as to which refrigerant is appropriate for a hypothetical application.

Mass and Energy Balances 3

Calculate the amount of steam needed to achieve a hypothetical heating operation.

Unit Operations

Describe how various unit operations work individually and together.

Quality and Safety

Explain the function and operation of various processes and their controls that maximize food safety and processing efficiency while preserving food quality.
Determine thermal processing times.

Packaging

Know the chemistry and barrier properties of commonly used packaging types, including polymers.

Packaging 2

Know the functions of a packaging-type and be able to determine what functions the package is performing.

Top

Medical Nutrition Therapy 2

Medical nutrition therapy across disease states; continuation of NDFS 300.

NDFS 356

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 300
Taught	Winter

Course Outcomes

Communication Skills

Use oral and written communications in presenting an educational session for a group

Information Technologies

Use current information technologies

Effective Team Member

Work effectively as a team member

Public Speaking

Public Speaking

Media Presentations

Media Presentations

Specific Dietetic Knowledge

Knowledge of: exercise physiology, pathophysiology related to nutrition care, fluid and electrolyte requirements, pharmacology: nutrient-nutrient interaction.

Medical Nutrition Terminology

Demsonstrated ability to: interpret medical terminology, interpret laboratory parameters related to nutrition

Appropriate Documentation

Document appropriately a variety of activities

Nutrient Composition of Foods

Calculate and interpret nutrient composition of foods

Medical Nutrition Therapy Strategies

Knowledge of medical nutrition therapy strategies to assess need for adaptive feeding techniques and equipment

Diets for Health Conditions

Calculate and/or define diets for health conditions addressed by health promotion/disease (cancer, pulmonary, liver, pancreas, and kidney)

Enteral and Parenteral Nutrition Formulations

Calculate enteral and parenteral nutrition formulations

Assessing Health Status

Evolving methods of assessing health status

Nutritional Health Risks

Assessment and treatment of nutritional health risks

Appropriate Medical Nutrition Therapy and Intervention

Identify the appropriate medical nutrition therapy for specific disease states and provide the appropriate intervention, including calculating and defining diets

Professional Literature

Interpret, evaluate and use professional literature to make ethical evidence-based practice decisions

Evidence Based Guidelines and Protocols

Use current information technologies to locate and apply evidence based guidelines and protocols; (ADA evidence Analysis Library and the Cochrane Database of Systematic Reviews)

Nutrition Care Process

Use the nutrition care process to make decisions, to identify nutrition-related problems and determine and evaluate nutrition interventions, including MNT, disease prevention and health promotion

Menus for Diverse Groups

Modify and evaluate menus for diverse groups

Pharmacology, Nutrient Metabolism, Physiology, Genetics, and

Demonstrate understanding of pharmacology, nutrient metabolism, physiology, genetics and biochemistry

Food Microbiology

Pathogenic and spoilage microorganisms in foods and their control. Beneficial microorganisms in food systems. Influence of the food system on growth and survival of microorganisms.

NDFS 361

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	MMBIO 221 & MMBIO 222
Taught	Fall

Course Outcomes

Growth Requirements of Common Food Borne Pathogens

Understand the growth requirements of common food borne pathogens and spoilage microorganisms. Be able to attribute the characteristics of a food borne illness with unknown etiology to the most likely organism. Differentiate which organisms would be likely to grow in a specific food product.

Intrinsic and Environmental Aspects

Understand intrinsic and environmental aspects of foods and how they can be modified to affect the growth and metabolism of food borne microorganisms to include spoilage, pathogenic, and beneficial organisms.

Laboratory Experiments

Carry out a series of laboratory experiments aimed at isolating and identifying common food borne microbial pathogens

Spoilage Microorganisms

Classify spoilage microorganisms according to the food or foods they are most likely to affect based on the intrinsic and environmental characteristics of the food and compare to various storage methods to determine which method would be most appropriate for the given food product

Microbial Safety of a Common Food Product

Design and carry out a laboratory experiment to evaluate the microbial safety of a common food product

Food Commodity Processing

Characteristics of raw food material; principles of food preservation and food processing techniques; packaging materials and methods; sanitation and water and waste management.

NDFS 362

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	NDFS 250 & NDFS 251; Food Science majors only.
Taught	Fall

Course Outcomes

Food Plants

Apply knowledge of different food plants and their varieties to determine which are most appropriate for specific finished products.
Understand the processing operations involved in converting raw plants into finished products

Animal Commodities

Apply knowledge of different animal species, breeds, and types to determine which are most appropriate for specific finished products.
Understand the processing operations involved in converting raw animal commodities into finished products.

Confections

Understand the processing operations involved in confection manufacture.

Freshwater

Know the sources of and the processing operations involved in converting freshwater into water for various uses in a food production plant. Apply knowledge of freshwater characteristics and how they impact its use in a food production plant.

Wastewater

Understand the processing operations involved in wastewater treatment.

Research Project

Obtain further information on food commodity processing topics through research.

Top

Food Production Management

Managing processes and techniques of quantity food production in commercial and institutional food systems.

NDFS 374

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Dietetics major status.
Taught	Fall

Course Outcomes

Foodservice Industry

1. Explain the foodservice industry in the context of a system and describe food consumption issues and trends for various consumers.

Food Product Flow

2. Be able to identify different paths of food product flow and understand the advantages and disadvantages of these operations.

Menu Planning for Institutional Feeding

3. Demonstrate knowledge of principles of menu planning through creating an appropriate menu for institutional feeding to meet needs of target population.

Therapeutic Menus

4. Understand the importance of aesthetically pleasing therapeutic menus and apply knowledge to meet individual or group dietary needs.

Standardized Recipes

5. Discuss need for standardized recipes and appropriately quantify recipes for volume food production.

Quantity Food Production Techniques, Terminology, and Equipm

6. Be able to identify quantity food production techniques, terminology, and equipment used for: soups, sauces, meat, poultry, fish, egg and dairy foods, vegetables, fruits, salads, sandwiches, and baked goods

Food and Labor Costs

7. Be able to appropriately use basic principles of food and labor costs for financial accountability

Quantify Recipes and Costs

8. Accurately quantify recipes and calculate recipe costs.

Principles of Sanitation and Safety in Foodservice

9. Students are able to apply the principles of sanitation and safety to foodservice, and recognize the impact on consumers

Top

Food Production Management Laboratory

NDFS 375

Hours	2.0 Credit, 0.0 Lecture, 8.0 Lab
Prerequisites	NDFS 374 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Quantity Food Preparation Techniques and Food Science Knowle

1. Apply appropriate quantity food preparation techniques and Food Science knowledge for soups, sauces, meat, poultry, fish, dairy foods, vegetables, fruits, salads, sandwiches, and baked goods

Quantity Food Production

2. Use appropriate controls in quantity food production.

Safety and Sanitation Principles

3. Demonstrate use of appropriate safety and sanitation principles during food production and service to the customer.

Foodservice Equipment

4. Demonstrate safe and appropriate use of and cleaning of foodservice equipment.

Presentation and Service of Food

5. Demonstrate effective presentation and service of food.

Team Work Skills

6. Students will work effectively as a team member as evidenced through good communication, appropriate assertiveness, and effective time management skills.

Monitoring Tools for Quality Improvement

7. Use various monitoring tools to provide data for continuous quality improvement.

Production Management Skills

8. Demonstrate production management skills ensuring that foodservice operation meets the

needs of the clients.

Top

International Nutrition

Causes and consequences of nutrient deficiencies common in developing countries. Appropriate interventions to prevent or treat malnutrition.

NDFS 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 100
Taught	Fall, Winter

Course Outcomes

Nutrient Deficiencies and Cognitive Development

Relate critical nutrient requirement deficiencies to nutritional diseases and poor cognitive devolopment

Nutritional Problems in Developing Societies

Intrepret the scientific literature that relates to nutional problems in devloping societies

Solutions for Undernourishment

Relate the nutritional status of undernourished children to their diets and suggest plausible solutions

Top

Special Topics in Food Science and Nutrition

Topics vary.

NDFS 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Multiple Subject Areas in Food and Nutrition

Various subjects are covered as tailored by the faculty member and student, including:
International Fieldwork in Nutrition: Observe and evaluate food and nutriton practices in an international setting.
Food Science College Bowl: Increase knowledge of food science and develop team skilss by preparing for and competing in the IFT College Bowl competition.
Food Design: Work with Industrial Design program on food-related projects involving food technology and design.

Academic Internship

Off-campus work experience sponsored by industrial, government, or academic institutions.

NDFS 399R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practical Experience

Gain practical experience in food science and related areas.

Applying Classroom Knowledge

Apply classroom knowledge to practical situations through observation and involvement in different levels of the organization.

Confidence

Develop confidence in personal judgment and gain maturity and self-confidence

Top

Academic Internship in Dietetics

Off-campus work experience sponsored by industrial, government, or academic institutions.

NDFS 399R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practical Experience

Gain practical experience in food science and related areas.

Applying Classroom Knowledge

Apply classroom knowledge to practical situations through observation and involvement in different levels of the organization.

Confidence

Develop confidence in personal judgment and gain maturity and self-confidence

Academic Internship in Food Science

Off-campus work experience sponsored by industrial, government, or academic institutions.

NDFS 399R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practical Experience

Gain practical experience in food science and related areas.

Applying Classroom Knowledge

Apply classroom knowledge to practical situations through observation and involvement in different levels of the organization.

Confidence

Develop confidence in personal judgment and gain maturity and self-confidence

Academic Internship in Nutritional Science

Off-campus work experience sponsored by industrial, government, or academic institutions.

NDFS 399R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practical Experience

Gain practical experience in food science and related areas.

Applying Classroom Knowledge

Apply classroom knowledge to practical situations through observation and involvement in different levels of the organization.

Confidence

Develop confidence in personal judgment and gain maturity and self-confidence

Community Nutrition

Public health nutrition applied to community programs.

NDFS 400

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 200; or NDFS 201
Taught	Fall

Course Outcomes

Nutrition Programs and Policies

1. Describe various community nutrition programs, health care delivery systems, and policies aimed to enhance the nutritional status and overall health of individuals in the US population.

Grant Proposal

2. Effectively write a grant proposal that encompasses the basic elements of implementing community nutrition programs, including a needs assessment, program planning, implementation and evaluation, and budget preparation, and conduct the proposed project in a real-life community setting.

Oral and Written Communication

3. Exhibit competent communication skills in both written and oral communication for lay and professional audiences in the performance of course assignments.

Alternative and Complementary Nutrition

4. Evaluate accuracy of professional and lay resources for nutrition-related complementary and alternative medicine (CAM) products.

Culture and Socioeconomic Status

5. Demonstrate knowledge of the impact of culture and socioeconomic status on consumers' food and nutrition behaviors.

Ethical Principles

6. Demonstrate knowledge of ethical principles in community nutrition research and practice.

Community Nutrition Fieldwork

Fieldwork experience in public health and community nutrition programs.

NDFS 401

Hours	0.5 Credit, 0.0 Lecture, 1.5 Lab
Prerequisites	Dietetics major status; concurrent enrollment in NDFS 400.
Note	Flu vaccine and immunization record is required. Fee may be involved.
Taught	Fall

Course Outcomes

Nutrition Programs in a Community

1. Identify and describe a few selected nutrition programs in the community and the services the programs provide to meet the needs of the target population at risk (the life stages of pregnancy through older adults). Participate in activities to gain real-life experiences with each program site.

Communication Skills in Community Nutrition Activities

2. Utilize effective communication skills in both written and oral communication in community nutrition activities.

Top

Nutrition Assessment Lab

Developing skill in anthropometric, biochemical, clinical, and dietary parameters of nutritional assessment.

NDFS 405

Hours	0.5 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	NDFS 356
Taught	Fall Term 2

Course Outcomes

Locate, Interpret, Evaluate and Use Professional Literature

Demonstrate the ability to locate, interpret, evaluate and use professional literature in the process of nutritional assessment.

Assessment Procedures

Accurately perform and interpret assessment procedures (the first step in the nutrition care process) to identify nutrition-related problems.

Core Knowledge for the RD

Acreditation Council for Education in Nutrition and Dietetics Core Knowledge for the RD

Core Knowledge	By the conclusion of the course, students will:	Measured/Met by:
KRD 1.1	Demonstrate the ability to locate, interpret, evaluate and use professional literature in the process of nutritional assessment	Competency Sign-off, Blood Pressure Certification, Lab Worksheets
KRD 3.1	Accurately perform and interpret assessment procedures (the first step in the nutrition care process) to identify nutrition-related problems	Competency Sign-off, Lab Worksheets
KRD 4.2	Apply safety principles in laboratory procedures regarding blood-borne pathogens and the disposal of biohazardous waste	Quiz

2012 standards

Safety Principles in Laboratory Procedures

Apply safety principles in laboratory procedures regarding blood-borne pathogens and the disposal of biohazardous waste.

Nutrition Through the Life Cycle

Nutritional requirements, diet, and health concerns for pregnancy and lactation; infants; toddlers and preschoolers; school-age children; adolescents; and older adults.

NDFS 424

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	NDFS 300; or NDFS 305
Taught	Winter

Course Outcomes

Evidence-based Nutrient Requirements and Assessment Methodol

1. Demonstrate knowledge of evidence-based nutrient requirements (including the rationale for specific requirements throughout the life cycle) and nutritional status assessment methods used to determine diet adequacy among pregnant and lactating women; infants; children; adolescents; and older adults.

Nutrition and Pregnancy

2. Assess the nutritional status of a pregnant woman and provide appropriate recommendations for dietary improvement based on nutrient requirements during this life stage.

Child Nutrition

3. Assess the nutritional status of a young child and provide appropriate recommendations for dietary improvement based on nutrient requirements during this life stage.

Scientific Review Paper

4. Effectively write a scientific review paper based on searching, evaluating, and synthesizing previously published peer-reviewed research.

Peer Evaluation and Feedback

5. Evaluate and offer constructive feedback of peers' written works in a manner consistent with the "real-world" professional scientific article review process.

Top

Nutritional Bio-organic Chemistry

Principles of organic chemistry and biochemistry relating to the function and structure of macronutrients, vitamins, and minerals.

NDFS 434

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	NDFS 200 & CHEM 285 & PDBIO 305
Taught	Winter

Course Outcomes

Scientific Research and Communications

Demonstrate ability to search, interpret, and summarize original scientific information

Nutrient Chemical Structure and Metabolism

Demonstrate knowledge of the chemical structure of nutrients, their food sources, the scientific basis for nutrition requirements, digestion, absorption, transport, metabolism and functions, and the metabolic consequences of nutrient deficiencies, interactions, imbalances and toxicities.

Biochemical Functions and Pathways

Understand the biochemical functions and pathways of nutrients in the body.

Physiological and Biochemical Changes in the Body

Identify possible physiological and biochemical changes in the body associated with deficient or excessive nutrient intakes.

Enzymatic Reactions

Understand the role of enzyme kinetics, structure, and active sites in catalyzing biochemical reactions.

Nutritional Biochemistry and Metabolism

Biochemical and metabolic processes and interrelationships among nutrients.

NDFS 435

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	NDFS 200 & PDBIO 305 & CHEM 285; or NDFS 200 & PDBIO 305 & CHEM 481
Taught	Fall, Summer

Course Outcomes

Scientific Research and Writing

Demonstrate ability to search, interpret, and summarize original scientific information in an efficiently written scientific paper.

Nutrient Chemical Structure and Metabolism

Demonstrate knowledge of nutrient chemical structures, food sources, digestion, absorption, transport, metabolism and functions, and the metabolic consequences of nutrient deficiencies, interactions, imbalances and toxicities.

Experimental Design

Demonstrate knowledge of appropriate design for scientific experiments.

Biochemical Functions and Pathways

Understand the biochemical functions and pathways of nutrients in the body.

Nutrient Metabolism and Body Homeostasis

Identify physiological, biochemical and metabolic changes associated with deficient nutrient intake, excessive nutrient intake and selected metabolic diseases.

Top

Teaching Methods in Dietetics

Learning theory; curriculum development and dissemination; nutrition counseling; for dietetics majors.

NDFS 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Plan Teaching for Target Audience

Design teaching plans including objectives, concepts, and learning experiences appropriate for target audience.
KRD 2012: 2.1, 2.2, 3.2

Educational and Visual Support Materials

Develop appropriate educational and visual support materials for individual or group instruction.
KRD 2012: 2.1, 3.1, 3.2

Education and Counseling Techniques

Demonstrate effective education and counseling techniques.
KRD 2012: 2.2, 3.2, 3.3

Behavior Change Theories and Models

Evaluate behavior change theories and models as part of nutrition interventions
KRD 2012: 2.2, 3.1, 3.2, 3.3

Evaluation Techniques

Use formative and summative evaluation techniques for both self-assessment and learner assessment.
KRD 2012: 2.1, 3.1

Core Knowledge for the RDN

2012 ACEND Standards

Core Knowledge for the RDN	Learning Outcome	Measured Met by
2.2, 3.2, 3.3	Demonstrate effective education and counseling techniques.	Micro-teaching, Teaching Method

2.2, 3.1, 3.2, 3.3	Evaluate behavior change theories and models as part of nutrition interventions	Behavior theory paper, MNT Counseling Micro Teaching, Exams
2.1, 3.1, 3.2	Develop appropriate educational and visual support materials for individual and group instruction	Bulletin Board, Handout, Flip Chart, Lesson Plans, Social Media Project, Copyright Certificate
2.1, 2.2, 3.2	Design teaching plans including objectives, concepts, and learning experiences appropriate for target audience	Lesson Plans, Social Media Plan, Objective Assignment, Exam, Learning Styles Inventory
2.1, 3.1	Use formative and summative evaluation techniques for both self-assessment and learner assessment.	Verbal Non-verbal analysis, Exams, Lesson Plan, Harvard Implicit

Top

Foodservice Systems

Input, transformation, and output in the food service system; emphasizes procurement, production, service, and sanitation.

NDFS 445

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 374
Taught	Winter

Course Outcomes

Apply knowledge of management functions and skills to the technical operation of a foodservice system, and compare foodservice operations through application of systems theory

Discuss the response of industry segments to current societal, demographic, technological, and menu trends

Discuss the procurement subsystem and the functions of that subsystem, including:The functions of the marketing channel and its agents;Value analysis, sensory analysis, and other tools used in selection of products appropriate for organization's needs;Laws, standards, terminology, specifications, and references for the purchase of food, supplies, and services;Vendor selection and evaluation;Purchasing methods and procedures; and legal and ethical aspects of purchasing

Identify managerial roles in the food production subsystem, including:Use of forecasting models;Planning and purchasing equipment; Principles of facility design and work flow; and Principles of ergonomics and productivity enhancement.

Explain the distribution and service subsystem, including:Delivery systems for various types of foodservices;Types of table and self service;Large equipment and small wares used in distribution and service;Service oriented organizations

Discuss the sanitation and maintenance subsystem from the standpoint of personnel, product, and place

Identify the relationship of quality assessment programs, including Joint Commission, to foodservice subsystems and the organization

Identify the interrelated functions of the procurement, production, distribution/service, and maintenance subsystems of a foodservice operation

Describe the monitoring and marketing of nutrition throughout the foodservice system

Describe environmental issues related to food production and service.

Food Chemistry

Structure and properties of food components, including water, carbohydrates, protein, lipids, other nutrients, and food additives. Chemistry of changes occurring during processing, storage, and utilization.

NDFS 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 250 & NDFS 251 & CHEM 285; or NDFS 250 & NDFS 251 & CHEM 352
Taught	Fall

Course Outcomes

Food Components

Explain the chemistry of food components, including their properties and reactions

Food Processing and Storage

Explain the major chemical reactions that occur during food processing and storage, including those that limit food shelf life

Solving Real-world Problems

Solve real-world problems related to food chemistry

Research Proposal

Write a research proposal on a food chemistry topic. Include objectives, literature review, experimental design and references

Top

Management in Dietetics

Management cycle and theory applied to clinical and administrative dietetics.

NDFS 458

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 445
Taught	Fall

Course Outcomes

Dietetics Management

Explain dietetics management in the context of a system.

Group Work

Discuss group dynamics and work group formation and participate effectively in group tasks.

Communication and Negotiation

Identify and use principles of effective communication and negotiation.

Decision Making and Planning Processes

Identify tools used and steps in the decision making and planning processes.

Management Functions

Identify the management functions, including planning, organizing, staffing, leading, monitoring, and evaluating.

Financial Planning, Control, and Budgeting Tools

Use financial planning, control, and budgeting tools.

Human Resource Management

Identify principles of human resource management, including determining manpower needs, recruiting and interviewing, orientation and training, performance appraisal, diversity issues, conflict management, and labor relations laws.

Management and Leadership

Describe theories of effective management and leadership.

Motivational and Organizational Change

Identify theories of motivation and organizational change.

Disaster Planning and Risk Management

Discuss concepts of disaster planning and risk management.

Management Information Systems

Explain management information systems in dietetics

ACEND Knowledge Requirement for the RD

Management in Dietetics

ACEND Knowledge Requirement For the RD	By the conclusion of the course, students will:	Measured/Met by:
4.1.	1. Explain dietetics management in the context of a system.	Exam Reading Journal (RJ) Class Discussion (CD) Abstracts
4.1, 5.3	2. Discuss group dynamics and work group formation and participate effectively in group tasks.	Projects #1, #2 Peer Evaluations Exam RJ, CD
2.1	3. Identify and use principles of effective communication and negotiation.	Projects #1, #2 Peer Evaluations Exam RJ, CD
4.1, 4.2	4. Identify tools used and steps in the decision making and planning processes.	Projects #1, #2 Exam RJ, CD
4.1.	5. Identify the management functions, including planning, organizing, staffing, leading, monitoring, and evaluating.	Exam RJ, CD
4.1	6. Use financial planning, control, and budgeting tools.	Exam Budget Assignment
2.1, 4.1	7. Identify principles of human resource management, including determining manpower needs, recruiting and interviewing, orientation and training, performance appraisal, diversity issues, conflict management, and labor relations laws.	Exam Peer Evaluations Transfer Exercise RJ, CD
4.1	8. Describe theories of effective management and leadership.	Exam Project #1 RJ, CD
3.3, 4.1	9. Identify theories of motivation and organizational change.	Exam Project #1 Transfer Exercise RJ, CD
4.2	10. Discuss concepts of disaster planning and risk management.	Exam RJ, CD

2.3, 4.1	11. Explain management information systems in dietetics.	Exam RJ, CD

BRIGHAM YOUNG UNIVERSITY

Food Regulations and Quality Assurance

Federal and international food regulations and methods of assuring food quality.

NDFS 462

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	STAT 121 & NDFS 250 & NDFS 251
Taught	Fall

Course Outcomes

Ethical Reasoning

Apply ethical reasoning to make business decisions based on principles of integrity and honesty

Laws, Regulations, Guidelines, and Directives

Be able to locate, retrieve and interpret specific laws, regulations, guidelines and directives relating to food, its manufacture, labeling, distribution and sale

Assuring the Quality of Food Products

Be able to apply the principles of food science and statistics to control and assure the quality of food products

HACCP Documentation

Prepare a HACCP documentation system for any defined food product/process

Government Roles in Food Supply

Explain how the legislative, executive, and judicial branches of federal and state government function and interact to regulate and control the safety, wholesomeness, and economy of the food supply

Legal Food Labels

Prepare a legal food label

Food Sensory Evaluation

Analytical and affective methods of assessing sensory properties of food using statistical methods. Laboratory experience in sensory research and techniques. Integrative capstone course.

NDFS 464

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	STAT 121 & NDFS 250 & NDFS 251; Concurrent enrollment in NDFS 465.
Taught	Winter

Course Outcomes

Prepare for and conduct a sensory test

Create and execute a sensory consumer or discrimination test using a sensory questionnaire delivery, data collection and analysis software package.

Client reports

Using a computer, prepare a professional sensory report for a client.

Statistics

Use statistics to draw conclusions about data.

Test Types and Questions

Demonstrate understanding of sensory test types and which test type is best for meeting project objectives. Be able to select the appropriate questions, scales, and wording for each test type.

Quantitative Descriptive Panels

Demonstrate understanding of how quantitative descriptive panels are conducted. Show how to determine when Quantitative Descriptive panelists are sufficiently trained and when they need more training.

Leading and Participating in Groups

Lead and participate in groups in developing hypotheses, planning and conducting experimentation to test that hypothesis

Top

Food Product Development

Integration and application of food science principles to develop new food products. Laboratory experience in food product design and development. Integrative capstone course.

NDFS 465

Hours	3.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	NDFS 361 & NDFS 362 & NDFS 462; This class should be taken concurrently with NDFS 464.
Taught	Winter

Course Outcomes

Specifications

Prepare raw material, product, and process specifications for a product and related commercial manufacturing process

Commercializing

Work with a team in successfully commercializing a new or improved food product

Stability Test

Coordinate, plan, and execute a stability test

Plant Trial

Coordinate, plan, and execute a plant trial

Project Time-lines

Prepare and follow workable project time-lines for multiple development projects

Consumer Tests

Coordinate, plan, and execute an appropriate consumer test for guidance or decision making

Food Product Label

Properly prepare and document all information required for a finished food product label

Laboratory Notebook

Keep a precise, well-documented laboratory notebook that will stand up under scrutiny in a court of law

Top

Advanced Dietetics Practice

Skill development in specialized topics of medical nutrition therapy and administrative dietetics.

NDFS 466

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NDFS 356 & NDFS 440 & NDFS 458
Taught	Winter

Course Outcomes

Metabolic Responses

Apply the principles of the metabolic response to stress to the critical care setting.

Nutrition Support

Calculate, monitor, and make recommendations for all forms of nutrition support in inpatient and outpatient settings.

Nutrition Care Process and Principles of Medical Nutrition

Evaulate patients using the Nutrition Care Process and the principles of Medical Nutrition Therapy for following conditions: trauma, HIV disease, thermal injury, diabetes, high risk pregnancies, high risk infants, complex pediatric disorders, developmental disorders, metabolic disorders.

Menu Engineering Data

Use and interpret menu engineering data in making pricing and menu decisions.

Systems Approach and Management Issues

Develop proposals for food and nutrition services departments by applying knowledge of the systems approach and management issues in foodservice, clinical, and community settings.

Core Knowledge for the RD

Accreditation Council for Education in Nutrition and Dietetics Core Knowledge for the RD

Core Knowledge for the RD	By the conclusion of the course, students will:	Measured/Met by:
KRD 1.1, 3.1	Apply the principles of the metabolic response to stress to the critical care setting.	Clinical Nutrition Worksheets Nutrition Support Worksheets
KRD 1.1, 3.1	Calculate, monitor, and make recommendations for all forms	Clinical Nutrition Worksheets Nutrition Support Worksheets

	of nutrition support in inpatient and outpatient settings..	
KRD 1.1, 3.1, 4.5	Evaulate patients using the Nutrition Care Process and the principles of Medical Nutrition Therapy for following conditions: trauma, HIV disease, thermal injury, diabetes, high risk pregnancies, high risk infants, complex pediatric disorders, developmental disorders, metabolic disorders	Class Discussions Clinical Worksheets
KRD 4.2, 5.1	Use and interpret menu engineering data in making pricing and menu decisions.	Capstone Management Project
KRD 2.1, 2.3, 4.1, 4.2, 4.3, 4.4, 5.1	Develop proposals for food and nutrition services departments by applying knowledge of the systems approach and management issues in foodservice, clinical, and community settings	Capstone Management Project

Top

Research Methods in Dietetics

Research techniques in a variety of dietetics practice areas.

NDFS 475

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Senior status in dietetics program.
Taught	Winter

Course Outcomes

Types of Appropriate Research

Identify types of research and their appropriate use, including: research question, sample selection, methodologies, data collection methods, data analysis methods

Locate, Interpret and Evaluate and Use Professional Literatu

Demonstrate how to locate, interpret and evaluate and use professional literature to make ethical evidence based practice decisions

Using Information Technologies

Use current information technologies to locate and apply evidence based guidelines and protocols

Design Research Projects

Design research projects using appropriate methods of sample selection and data collection

Survey Questionnaire

Develop survey questionnaire for appropriate research objectives

Visual Aids and Communication Skills

Utilize visual aids and communication skills to present concepts in oral and written reports

Literature Research Reports

Interpret and evaluate research reports in literature

Basic Statistics

Interpret and apply basic statistics

Research Possibilities in Dietetic Employment Settings

Develop ability to see research possibilities in variety of dietetic employment settings

Top

Professionalism Seminar

Issues in professional practice.

NDFS 490

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Senior status in dietetics program.
Taught	Winter

Course Outcomes

Standards of Practice and Professional Performance

Analyze the Scope of Practice and Standards of Practice and Professional performance for dietitians and apply the scope and standards to specific cases.

Professionalism and Career Readiness

Demonstrate professionalism and career readiness including online presence, dress, and business etiquette.

Professional Issues Related to the Academy of Nutrition and

Examine current issues related to the profession of dietetics including ethics, quality, reimbursement, practice applications, and professional membership.

Core Knowledge for the RD

Accreditation Council for Education in Nutrition and Dietetics Core Knowledge for the RD

Core Knowledge	By the conclusion of the course, students will:	Measured/Met by:
KRD 2.1	Demonstrate professionalism and career readiness including online presence, dress, and business etiquette.	Portfolio with Resume, Academy Journal Presentation, Reading Response Dress
KRD 2.3	Analyze the Scope of Practice and Standards of Practice and Professional performance for dietitians and apply the scope and standards to specific cases.	Class discussion, Scope of Practice assignment, Reading Response Standards of Practice and Professional Performance
KRD 2.3, 4.2 4.3, 4.4, 4.5	Examine current issues related to the profession of dietetics including ethics, quality, reimbursement, practice applications, and professional	The Academy Journal Presentation, Position and Practice Paper presentation, Quality in Dietetics Video Response, Class Discussion

membership.

2012 standards

Internship Preparation

Selecting internship sites and preparing dietetic internship application packet.

NDFS 491

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Senior status in dietetics program.
Taught	Fall

Course Outcomes

Effective Application Packet

Prepare a succinct and clear application packet for the dietetic internship or other employment/graduate school pursuits.

Selecting Dietetic Internships

Evaluate personal strengths and weaknesses in context of future dietetic internship, employment, graduate school, or other pursuits.

Life After Graduation

Develop goals for professional development following graduation.

Professional Communication

Demonstrate effective professional oral and written communication.

Undergraduate Research in Nutrition, Dietetics, or Food Science

Mentored research experience.

NDFS 494R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 9.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Evaluation of original research

Students will develop an increased understanding of the most up-to-date findings in the areas we are researching in the lab.

Data Collection and Analysis Methodologies

Students will develop skillsets in data collection, data entry, and/or data analysis methods.

Presentation and critical thinking skills

Students will gain experience presenting research to the group and will increase their critical thinking skills discussing original research articles.

Supervised Practice Experience

Supervised practice experience in clinical, management, and community dietetics settings.

NDFS 520R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Acceptance into dietetic internship.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Scientific and Evidence Base of Practice

Scientific and Evidence Base of Practice: Be able to integratescientific information and research into practice. (CRD 1.1-1.5)

Practice Management and Use of Resources

Practice Management and Use of Resource: Use strategic application of principles of management and systems in the provision of services to individuals and organizations. (CRD 4.1-4.11)

Professional Practice Expectations

Professional Practice Expectations: Develop and showbeliefs, values, attitudes and behaviors for the professional dietitian level of practice. (CRD 2.1-2.13)

Clinical and Customer Services

Clinical and Customer Services: develop and deliver quality information, products and services to individuals, groups and populations. (CRD 3.1-3.6)

Leadership

Analyze the application of transfomational leadership components utilized and exhibited by preceptors. (LDI 5.2)

Top

Clinical Practice in Dietetics

Supervised practice in clinical dietetics.

NDFS 521

Hours	2.0 Credit, 2.0 Lecture, 32.0 Lab
Prerequisites	Acceptance into dietetic internship.
Taught	Fall Term 2

Course Outcomes

Evaluate emerging research for application in dietetics practice

Apply evidence-based guidelines, systematic reviews and scientific literature (such as the ADA EAL, Cochrane Database of Systemic Reviews and the U.S. DHHS, Agency for Healthcare Research and Quality, National Guideline Clearinghouse) in the nutrition care process and model and other areas of dietetics practice

Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the ADA Scope of Dietetics Practice Framework, Standards of Professional Performance and Code of Ethics for the Profession of Dietetics

Demonstrate professional writing skills in preparing professional communications (e.g. research manuscripts, project proposals, education materials, policies and procedures)

Design, implement and evaluate presentations considering life experiences, cultural diversity and education background of the target audience

Use effective education and counseling skills to facilitate behavior change

Demonstrate active participation, teamwork and contributions in group settings

Refer clients and patients to other professionals and services when needs are beyond individual scope of practice

Apply leadership principles effectively to achieve desired outcomes

Establish collaborative relationships with internal and external stakeholders, including patients, clients, care givers, physicians, nurses and other health professionals, administrative and support personnel to facilitate individual and organizational goals

Demonstrate professional attributes such as advocacy, customer focus, risk taking, critical thinking, flexibility, time management, work prioritization and work ethic within various cultures

Perform self assessment, develop goals and objectives and prepare a draft portfolio for professional development as defined by CDR

Assess the nutritional status of individuals, groups and populations in a variety of settings where nutrition care is or can be delivered

Diagnose nutrition problems and create problem, etiology, signs and symptoms (PES) statements.

Plan and implement nutrition interventions to include prioritizing the nutrition diagnosis, formulating a nutrition prescription, establishing goals and selecting and managing intervention

Monitor and evaluate problems, etiologies, signs, symptoms and the impact of interventions on the nutrition diagnosis

Develop and demonstrate effective communications skills using oral, print, visual, electronic and mass media methods for maximizing client education, employee training and marketing

Develop and deliver products, programs or services that promote consumer health, wellness and lifestyle management merging consumer desire for taste, convenience and economy with nutrition food safety and health messages and interventions

Deliver respectful, science-based answers to consumer questions concerning emerging trends

Complete documentation that follows professional guidelines, guidelines required by health care systems and guidelines required by the practice setting

Top

Food Systems Management Practice in Dietetics

Supervised practice in food service systems management.

NDFS 522

Hours	2.0 Credit, 2.0 Lecture, 32.0 Lab
Prerequisites	Acceptance into dietetic internship.
Taught	Fall Term 2

Course Outcomes

Quality

CRD 1.1: Select indicators of program quality and/or customer service and measure achievement of objectives.

Program quality

1	CRD 1.1: Select indicators of program quality and/or customer service and measure achievement of objectives.	• Dollar Data: productivity and economic

Compliance

2	CRD 2.1: Ensure Pendulum Court is in compliance with Health Department and ServSafe standards	• Participate in Health Department inspection • Obtain ServSafe Proctor certification • Teach ServSafe course to NDFS 374 • Teach ServSafe in-services to NDFS 375

Presentations

3	CRD 2.3: Design, implement and evaluate presentations	• Prepare/present Dollar Data weekly in NDFS 374 • Prepare/present In-service

		assignment in NDFS 375 • Financial accountability assignment, and presentation • Leadership assignment, and presentation • Intern final project report, and presentation
Active Participation		
4	CRD 2.5: Demonstrate active participation and teamwork contributions in group settings	• Collaborate/team teach ServSafe • Taste panel & evaluation • Theme day & evaluation • Prepare/present Dollar Data • Middle & final evaluation • Conduct daily production meetings • Prepare/present In-service assignment in NDFS 375 • Prepare/conduct individual performance evaluations
Leadership		
5	CRD 2.8: Apply leadership skills to achieve desired outcomes	• Middle & final performance evaluations • Receive/apply feedback from student evaluations of intern performance • Intern daily evaluation of student performance, tracked in Critical Incidents notebook • Prepare/conduct individual performance evaluations
Professional		
6	CRD 2.11: Demonstrate professional attributes within various organizational cultures.	• Middle & final performance evaluations • Intern evaluation of student performance
Negotiation		
7	CRD 2.13: Demonstrate negotiation skills	• Intern evaluation of student performance:

		middle and final performance evaluations • Human resource management of paid employees • Procurement practices • Daily production meetings
Communication		
8	CRD 3.2: Demonstrate effective communication skills for clinical and customer services in a variety of formats	• Class presentations • Intern final project report • Dollar data presentation • Marketing • Production meetings • Procurement • Student orientation and training • ServSafe instruction and proctoring
Consumer Health		
9	CRD 3.3: Develop and deliver products, programs or services that promote consumer health, wellness and lifestyle management	• Taste panel and evaluation • Theme day and evaluation • Production meetings • Menu planning assignment
Procurement, Production, Distribution		
10	CRD 3.5: Coordinate procurement, production, distribution and services of good and services	• Daily management meeting • Dollar data • Taste panel and evaluation • Theme day and evaluation
Recipe and Menu Development		
11	CRD 3.6: Develop and evaluate recipes, formulas and menus for acceptability and affordability that accommodate the cultural diversity and health needs of various populations, groups and individuals	• Theme day and evaluation • Menu planning assignment • Taste panel and evaluation • Recipe testing
Human Resources		

12	CRD 4.1: Participate in management of human resources	• Mid and final evaluations • Hiring and training of paid Pendulum Court employees

Safety, Security, Sanitation

13	CRD 4.2: Perform management functions related to safety, security and sanitation that affect employees, customers, patients, facilities and food	• Mid and final evaluations • Health Department inspections • ServSafe Certification

Quality Management

14	CRD 4.4: Conduct clinical and customer service quality management activities	• Customer satisfaction survey

Technology

15	CRD 4.5: Use current informatics technology to develop, store, and retrieve and disseminate information and data	• Dollar Data • Mid and final evaluations • Computrition program

Data Evaluation

16	CRD 4.6: Analyze quality, financial or productivity data and develop a plan for intervention	• Dollar Data • Daily management meeting • Mid and final evaluation

Environment

17	CRD 4.7: Propose and use procedures as appropriate to the practice setting to reduce waste and protect the environment	• Recipe testing • Menu planning assignment • Theme day evaluation

Feasibility Studies

18	CRD 4.8: Conduct feasibility studies for products, programs or services with consideration of costs and	• Dollar Data • Financial accountability assignment

Financial Data

19	CRD 4.9: Analyze financial data to assess utilization of resources	• Dollar Data • Financial accountability assignment

Studies in Modern Near Eastern Languages

Grammar, reading, writing, and conversational skills.

NE LG 321R

Hours	4.0 Credit, 4.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Top

Ancient Near Eastern Mythology

Major themes in mythological literature of Egypt, Canaan, Mesopotamia, Anatolia, and ancient Iran. All readings in English.

NE LG 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Top

Texts and Ancient Temples

Major ancient Near Eastern texts dealing with the temple; analysis of primary elements of ancient temple type as a place of worship.

NE LG 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

NE LG 345 Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:

1. Define the concept of sacred space and time.
2. Understand the temples as sacred space.
3. Analyze temple systems in the ancient world.
4. Understand that the church, synagogue, and mosque have decisively been influenced by the temple.

Top

Senior Seminar in Near Eastern Studies

Capstone course for Near Eastern Studies majors. Includes major research paper demonstrating ability to integrate cross-disciplinary information and methodology.

NE LG 495

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Near Eastern Studies major; senior status.
Taught	

Course Outcomes

Knowledge

Students will become familiar with current topics in this content area.

Top

Akkadian

NE LG 511R

Hours	0.5 - 4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will become familiar with a special topic in this content area.

Students will become familiar with a special topic in this content area.

Top

Studies in Ancient Near Eastern Languages

Grammar and reading skills.

NE LG 511R

Hours	0.5 - 4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will become familiar with a special topic in this content area.

Top

Syriac

NE LG 511R

Hours	0.5 - 4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will become familiar with a special topic in this content area.

Ugaritic

NE LG 511R

Hours	0.5 - 4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

NE LG 511R Learning Outcomes

Upon completion of this course, participants will have acquired the skills necessary to:

1. Understand and recognize the fundamental elements of subject grammar (i.e., Aramaic, Coptic, Egyptian, Syriac, Akkadian, etc.)
2. Define the top 300 vocabulary words of the subject language.
3. Analyze and categorize the verbal system.

Top

Near Eastern Mythology

NE LG 521R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge

Students will become familiar with current topics in this content area.

Top

Special Topics in Ancient Near Eastern Literature

Historical and comparative studies of ancient Near Eastern literature.

NE LG 521R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will become familiar with current topics in this content area.

Students will become familiar with current topics in this content area.

Top

Ancient Near Eastern Studies

Social science/humanities core course emphasizing ancient history extending to the Byzantine period.

NES 336R

Hours	1.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Elective credit for major and minor. Offered at the Jerusalem Center for Near Eastern Studies only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

(NES-Hist 242R) Arab and Islamic Civilization

Social science/humanities core course covering Arab and Islamic civilization; historical evolution of Middle East to present. Overview of modern Palestinian society.

NES 347R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Elective credit for major and minor in NES. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Knowledge

Students will deepen their understanding of Arab and Islamic civilization.

(NES-Hist 243R) Jewish Civilization

Social science/humanities core course; broad introduction to Jewish self-understanding and history, focusing on relationships among people, faith, and land.

NES 349R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Elective credit for major and minor. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Jerusalem Center Field Trips

The history, archaeology, and scriptural relevance of important places visited during participation in the BYU Jerusalem Center program.

NES 395R

Hours	0.5 - 1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Concurrent enrollment in NES 336R.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

JERUSALEM CENTER FIELD TRIPS

Field trips correlated with classroom study to maximize the advantage of on-site learning.

Top

Advanced Topics in Near Eastern Studies

Studies based on individual and program needs.

NES 398R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Elective credit for major and minor. Also offered at the Jerusalem Center for Near Eastern Studies.
Taught	

Course Outcomes

Special Topics

Students will deepen their understanding of special topics in Near Eastern Studies.

Top

Special Topics in Near Eastern Studies

Studies based on individual and program needs.

NES 499R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Special Topics

Students will deepen their understanding of special topics in Near Eastern Studies.

Top

Near East Special Topics

Studies based on individual and program needs.

NES 595R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Graduate standing and instructor's consent.
Taught	

Course Outcomes

Special topics

Students will deepen their understanding of special topics in Near Eastern Studies.

Neurobiology

The nervous system; cellular communication, neural basis of behavior, and hormonal influences.

NEURO 205

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 120; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Basic nervous system knowledge

Students will demonstrate an understanding of the structures and functions of the nervous system. This will include the cellular, regional and system organization and function of the brain, spinal cord and peripheral nerves. Students will apply this knowledge to solve neuroscience-related problems.

Preparation for future neuroscience courses

Students will demonstrate the building blocks of knowledge required to further their experience and training in other neuroscience courses.

Neuroscience Advanced Writing

Processes of research writing and oral presentation for neuroscience students.

NEURO 316

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NEURO 205; Engl 150 or equivalent; Neuroscience major status.
Note	Fulfills GE Advanced Written and Oral Communication requirement.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Write clearly and appropriately

Students will demonstrate that they can write clearly, focus on a well-defined purpose in writing, use conventions of format and structure appropriate to the field of neuroscience, and adopt a voice, tone, and level of formatlity suited to multiple purposes and audiences, including audiences both within and outside the discipline.

The role of writing in neuroscience

Students will demonstrate an understanding of the roles that writing plays in neuroscience as a way of learning, as a way of demonstrating and evaluating what one has learned, and as a way of communicating with others. Students will show their understanding of the different types, forms and styles of writing in the field of neuroscience.

Library research

Students will demonstrate the ability to use appropriate research tools and processes of research within the field of neuroscience. They will demonstrate their ability to identify and evaluate sources, retrieve and evaluate data, and follow conventions of quoting, paraphrasing and summarizing. They will cite sources properly and demonstrate an understanding of ethical issues related to research, including how to avoid plagiarism.

Neuroanatomy

Functonal anatomy of the human brain and spinal cord, including surface and cross-sectional gross anatomy, microscopic anatomy, and sensory, motor, and integrative systems' circuitry.

NEURO 360

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	NEURO 205; Neuroscience major status.
Taught	Fall, Winter

Course Outcomes

Knowledge of nervous system structures

Students will identify central nervous system structures on pictures, dissections, models, and cross sections of the brain and spinal cord.

Function and circuitry of nervous system structures

Students will state the function of identified brain structures and explain how each structure is anatomically connected (wired) to other CNS and PNS structures.

Solve clinical case studies

Students will use knowledge of brain and spinal cord anatomy to discuss and analyze neuroanatomy-based clinical case studies.

Behavioral Neuroscience

Critical examination of anatomical, physiological, and chemical bases of behavioral expression.

NEURO 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NEURO 205; Neuroscience major status.
Taught	Fall, Winter

Course Outcomes

Knowledge of behavioral neuroscience

Students will demonstrate a comprehensive knowledge of the basic theories, concepts, and applications of behavioral neuroscience. This includes the relationship between the brain, hormones, neurotransmitters and behavior, as well as the interplay between genes and the environment and how they modify the brain and ultimately behavior.

Integration of personal values

Students will improve their ability to integrate personal values and belief systems with the principles of psychology and the biological bases of behavior.

Synthesis and communication

Students will synthesize and evaluate theories and concepts of behavioral neuroscience and communicate their ideas to an audience. Students demonstrate this through written and/or oral assignments.

Undergraduate Research Experience

Undergraduate research experience in neuroscience.

NEURO 449R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Laboratory research experience

Students will gain neuroscience-related laboratory research skills required to review the literature, properly gather and interpret data from scientific experimentation as well as data analysis, writing, and publishing their research. Experiences will enhance student learning through hands-on activities and close collaboration with faculty or a qualified on-campus mentor.

Advanced Neuroscience

Principles of neural science. Structure-function relationships and integration of the nervous system.

NEURO 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	NEURO 205; or PDBIO 362; PDBio 360; Neuroscience or PDBio major status.
Taught	Fall, Winter

Course Outcomes

Advanced understanding of neuroscience principles

Students will demonstrate an advanced understanding of neuroscience principles, including molecular and cellular neuroscience, developmental neuroscience and neurophysiology.

Critical analysis of neuroscience literature

Students will read, interpret, analyze and discuss current neuroscience literature. Students will demonstrate understanding of current neuroscience methods, trends, ideas, and experimental results.

Top

Neuroscience Laboratory

Exposure to classical/modern experiments in neuroscience.

NEURO 481

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	NEURO 205; Neuro 480 or concurrent enrollment; Neuroscience major status.
Taught	Fall, Winter

Course Outcomes

Neuroscience Laboratory Techniques

Students will demonstrate an understanding of and an ability to perform and apply hands-on laboratory techniques to study nervous system histology, electrophysiology, and behavior.

Write a lab report

Students will produce a well-written scientific lab report.

Neuroscience Academic Internship

Off-campus internship experience in neuroscience.

NEURO 496R

Hours	0.5 - 12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practical work experiences

Students will gain practical work experiences related to the field of neuroscience. These experiences will enhance student learning through hands-on activities and close collaboration with a qualified off-campus mentor.

First-Year Norwegian

Basic language skills. Includes International Cinema.

NORWE 101

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Comprehension

Students will comprehend Norwegian as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Norwegian well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, obtain food and lodging, carry out simple transactions, and talk about a variety of topics of common interest primarily in the present, with limited use of other time frames.)

Writing

Students will be able to write short messages and well-articulated sentences in Norwegian on familiar topics.

Language Learning Strategies

Students will develop comprehension and learning strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Norwegian-speaking countries.

First-Year Norwegian

Basic language skills. Includes International Cinema.

NORWE 102

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Comprehension

Students will be able to comprehend Norwegian as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Norwegian well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.)

Writing

Students will be able to write short messages and well-articulated sentences in Norwegian on familiar topics.

Language Learning Strategies

Students will develop strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Norwegian-speaking countries.

Second-Year Norwegian

Conversation, vocabulary building, and reading and writing skills, emphasizing reading. Includes International Cinema.

NORWE 201

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	Norwe 102 or equivalent experience.
Taught	Fall even years

Course Outcomes

Comprehension

Students will be able to comprehend Norwegian as they hear and read authentic language relating to familiar topics with strategies to even derive meaning out of less familiar topics.

Speaking and Writing

Students will be able to speak and write Norwegian well enough to satisfy immediate needs. (Students will learn to communicate in social situations asking and answering questions, carrying out transactions, and talking about a variety of topics of common interest in present, past, and future times.)

Conversation

Students will be able to participate actively in conversations about Norwegian-speaking countries, concrete topics, and current events.

Opinions

Students will be able to begin expressing and supporting opinions about familiar topics.

Top

Second Year Norwegian

Emphasis on literature and culture with continued writing, grammar, listening, and speaking. Includes International Cinema.

NORWE 202

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	NORWE 201
Note	Culminating course for GE Foreign Language requirement (except for returned missionaries or those with equivalent experience). This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter odd years

Course Outcomes

Literature and Cultural History

Students will be able to identify and define key characteristics of the important moments in Norwegian cultural history and place significant works in a meaningful cultural and historical context using the basic tools of literary analysis.

Comprehension

Students will be able to comprehend Norwegian as they hear and read authentic language relating to familiar and less familiar topics.

Speaking and Writing

Students will improve their reading and writing skills in Norwegian by beginning to communicate in connected and extended discourse, expressing and supporting opinion, and navigating less-familiar topics and situations.

Norwegian Culture

Students will broaden and deepen their perception and appreciation of Norwegian culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

NORWE 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Norwe 102 or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to speak about autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions, and cope with gaps in knowledge.

Fluency

Students will be able to use an appropriate variety of vocabulary related to autobiographical and concrete topics.

Vocabulary

Students will speak in a way so as to be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

NORWE 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Norwe 211R or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to relate current events, plots of books or movies, and state opinion.

Fluency

Students will be able to initiate and maintain fluent conversations and cope with gaps in knowledge in contexts related to concrete topics.

Vocabulary

Students will be able to speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

Pronunciation

Students will speak in a way so as to be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Advanced Norwegian

Third-year course in Norwegian. Developing advanced language skills in speaking, reading, listening, and writing as defined by ACTFL standards.

NORWE 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Norwe 202 or equivalent experience.
Note	Entry course for returned missionaries or others with equivalent Norwegian language experience. Required course for obtaining language credit by examination (Norwe 101, 102, 201, 211R).
Taught	Fall odd years

Course Outcomes

Advanced Functions in Writing and Speech

Students will develop their ability to narrate and describe in past, present, and future time frames, use connected discourse, and learn to manage complications in the language through communicative strategies, all without patterns of error.

Critical Thinking

Students will employ proper grammatical, lexical, phonological, and stylistic features of advanced-level Norwegian in descriptive and narrative texts as well as in producing basic analyses.

Superior Functions in Writing and Speech

Students will develop partial control of their ability to support their opinions and hypothesize about abstract topics, in the context of extended discourse.

Norwegian Literature

Readings in Norwegian literature; introduction to basic literary concepts. Includes International Cinema.

NORWE 340

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	None
Note	Culminating course for GE Foreign Language requirement.
Taught	Winter even years

Course Outcomes

Norwegian Cultural History

Students will understand key trends and works from Norwegian cultural history, recognize connections between these works, and be able to relate them to the development of contemporary Norwegian culture.

Analytic, Research, and Writing Skills

Students should be able to insightfully analyze important literary and artistic works from Norwegian cultural history and be able to communicate this analysis through articulate written and oral presentations in Norwegian. Students will also develop basic research skills.

Cultural Literacy

Students should relate the ideas and issues raised by the works we study in class to the students' own cultural moment as well as to their own experience with contemporary Norwegian culture.

Lifelong Learning

Students should better know how to understand, interpret, and thoughtfully reflect upon the literature and art encountered later in life.

Top

Academic Internship

On-the-job experience in Norwegian.

NORWE 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department's consent.
Taught	

Course Outcomes

Professional Experience

Improve professional experience and appreciation of cultural practices in an international context.

Top

Nursing and Medical Terminology

Nursing and medical terminology for prenursing and beginning nursing students or those interested in health occupations.

NURS 102

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study also.

Course Outcomes

Medical Language Skills

Analyze a medical term and identify the different word parts.

Application of medical language

Use medical abbreviations appropriately.

Application of Medical Language

Use the most common medical terms in a sentence.

Medical Language and the Human Body

Categorize medical terms according to body systems.

Preview of Nursing

Development of nursing as a profession; the issues and trends evident throughout nursing history, and their impact on nursing today.

NURS 180

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2, Spring

Course Outcomes

Profession Development

Demonstrate an understanding of the development of nursing as a profession.

Roles, Expectations, Opportunities

Demonstrate an understanding of nursing roles, expectations, and opportunities.

Lifetime Career

Be able to formulate a personal definition of nursing and gain insight regarding nursing as a lifetime career.

BYU's Uniqueness

Be able to discover the uniqueness of the Brigham Young University's nursing program and program outcomes

Nursing Care of the Older Adult

Theory and content in the nursing care optimizing the functional status of older adults through health promotion, risk reduction, and disease prevention strategies.

NURS 291

Hours	2.5 Credit, 2.5 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 1.
Taught	Fall, Winter

Course Outcomes

Foundational Knowledge

1. Generate a knowledge base of the processes and issues associated with aging including the needs and functional capabilities of the older adult.

Application

1. Use knowledge concepts to solve aging issues recognizing that interdisciplinary care is essential for quality care.

Integration

1. Compare and connect aging for the individual, caregiver, family, and friends recognizing ethical/legal issues and the importance of culture.

Human Dimension

1. Compose a personal perspective on aging

Caring

1. Create a perspective on the aging of God's children that recognizes the potential and the possible and acknowledges that the aging process includes spiritual, physical and psychosocial perspectives

Learning How to Learn

Reflect on how personal development is connected to professional development as a life-long learner.

Top

Clinical Practicum for Nursing Care of the Older Adult

Clinical practicum for assessment, communication, critical thinking, and technical skills optimizing the functional status of older adults through health promotion, risk reduction, and disease prevention strategies.

NURS 292

Hours	1.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 1.
Note	6-hour clinical per week for 11 weeks.
Taught	Fall, Winter

Course Outcomes

Foundational Knowledge

1. Generate a knowledge base of the processes and issues associated with aging including the needs and functional capabilities of the older adult.

Application

1. Use knowledge concepts to solve aging issues recognizing that interdisciplinary care is essential for quality care.

Integration

1. Compare and connect aging for the individual, caregiver, family, and friends recognizing ethical/legal issues and the importance of culture.

Human Dimension

1. Compose a personal perspective on aging

Caring

1. Create a perspective on the aging of God's children that recognizes the potential and the possible and acknowledges that the aging process includes spiritual, physical and psychosocial perspectives

Learning How to Learn

1. Reflect on how personal development is connected to professional development as a life-long learner.

Communication Lab for Nursing Majors

NURS 293

Hours	0.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 1.
Note	Lab is 1.5 hours per week for 10 weeks.
Taught	Fall, Winter

Course Outcomes

Communication

Identify factors that affect interpersonal communication across the lifespan.

Factors that influence communication

Recognize cultural, gender and disabilities factors that can affect communication.

Application of communication skills

Demonstrate appropriate communication skills utilized in nursing practice.

Communication reflecting respect and integrity

Formulate strategies to enhance communication that incorporate respect for God's children.

Health Assessment and Promotion

Acquiring and applying health assessment knowledge and skills. Health promotion, health maintenance,and therapeutic communication.

NURS 294

Hours	3.0 Credit, 2.3 Lecture, 1.5 Lab
Prerequisites	Acceptance into Nursing Program.
Taught	Fall, Winter

Course Outcomes

Performance: History and Assessment

Perform a basic health history and assessment on the adult individual.

Identification: Personal History

Identify health problems or risks for health problems based on personal, family and social history.

Identification: Physical Assessment

Identify health problems or risks for health problems based on physical assessment.

Identification: Promotion and Prevention

Identify strategies for health promotion, risk reduction and disease preventions for adult clients.

Top

Fundamental Nursing Concepts and Care

Acquiring and applying basic nursing skills and concepts; utilizing the nursing process: assessment, diagnosis, planning, implementation, and evaluation.

NURS 295

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Courses in Nursing Semester 1.
Note	2.25 hour per lab each week.
Taught	Fall, Winter

Course Outcomes

Gospel Integration

Integrate the values of the gospel of Jesus Christ as part of caring.

Critical Thinking

Demonstrate critical thinking as it relates to beginning nursing concepts.

Basic Skill

Demonstrate proficiency in performing basic nursing skills.

Fundamental Concepts

Demonstrate knowledge of fundamental nursing concepts

Professional Communication

Communicate professionally with peers and faculty.

Top

Community Health Nursing

Applying principles of community and public health nursing to the health of individuals, family, populations, and groups.

NURS 296

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 1.
Note	Meets 2 hours every other week.
Taught	Fall, Winter

Course Outcomes

Community Health Nursing Practice

1. Describe the function and practice of community health nursing.

Access to health care

1. Discuss issues that affect access to health care for individuals, populations, and communities.

Community Resources

1. Identify community resources to promote health.

Top

Pharmacology in Nursing

Common categories of drugs: their action, use and desired and undesired effects; implications for nursing care.

NURS 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 2.
Taught	Fall, Winter

Course Outcomes

Uses and Effects

Name the common categories of drugs and their actions,uses, and desired effects.

Side Effects

Identify the side effects and contraindications of various drugs.

Implications

List the nursing implications for the administration of drugs.

Planning

Plan client teaching and other nursing interventions.

Scholarly Inquiry in Nursing

Acquiring knowledge of the research process, identifying clinical problems, evaluating and using evidence, and engaging in advanced writing and oral communication in the discipline.

NURS 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 2.
Note	Completion of both Nurs 320 and 339 fulfills GE Advanced Written and Oral Communication.
Taught	Fall, Winter

Course Outcomes

The Research Process

Describe the research process.

Appropriate use of writing skills.

Write clearly, focus on a well-defined purpose, use APA conventions of structure, and adopt a voice, tone, and level of formality suited to the audience.

Communication through a productive writing process.

Demonstrate productive writing processes, which includes organizing content to enhance logical flow of ideas; revising; editing grammar, word usage, spelling, and punctuation; proofreading; seeking and using peer review; properly citing sources to avoid plagiarism; and writing successive drafts of the same paper.

Knowledge of the application of EVP to nursing practice.

Critically appraise published research for strength of evidence and potential contribution to clinical practice.

Appropriately communicate in original written and oral forms

Synthesize information from current evidence and disseminate through original written and oral communication.

Top

(Nurs-Soc) End-of-Life Care

End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

NURS 333

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Attitudes Toward Death

Identify societal attitudes toward death

Guiding Prinicples Of Care

Outline guiding principles of end-of-life care

Palliative Care and Hospice Care

Compare and contrast palliative care versus hospice including historical factors.

Models of Care for the Dying

Distinguish between the medical model & patient-centered approach to dying

End of Life Preferences for Care

Summarize discrepancies in patient and provider end-of-life preferences

Personal Perspectives

Compose personal attitudes toward death and dying

Top

Ethics in Nursing

Overview of ethical principles and theories, emphasizing role of ethics in nursing; instruction and practice in advanced oral and written communication skills for professional nursing practice.

NURS 339

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	NURS 300 & NURS 320 & NURS 341
Note	Completion of both Nurs 320 and Nurs 339 fulfills GE Advanced Written and Oral Communication.
Taught	Fall, Winter

Course Outcomes

Write clearly and effectively.

Write clearly, focus on a well-defined purpose, use APA conventions of structure, and adopt a voice, tone, and level of formality suited to the audience.

Writing and the nursing discipline

Demonstrate an understanding of writing in the nursing discipline as a strategy for effectively communicating with others and as a way of learning and demonstrating what one has learned.

Productive writing processes

Demonstrate productive writing processes, which include developing ethically sound and persuasive arguments; organizing content to enhance logical flow of ideas; revising; editing grammar, word usage, spelling, and punctuation; proofreading; seeking and using peer review; properly citing sources to avoid plagiarism; and writing successive drafts of the same paper.

APA conventions of structure

Write clearly, focus on a well-defined purpose, use APA conventions of structure, and adopt a voice, tone, and level of

1. Demonstrate the ability to speak publicly and deliver effective presentations.
2. Engage in reflective thinking to clarify personal moral and ethical values.
3. Analyze ethical dilemmas faced by nurses in clinical practice; identify ethical principles, ethical theories, and common fallacies in thought; provide rationale for possible decisions through thinking and writing critically.
4. Use knowledge of ethics and communication skills to resolve ethical dilemmas with an interdisciplinary team.

Public speaking

Demonstrate the ability to speak publicly and deliver effective presentations.

Reflective thinking

Engage in reflective thinking to clarify personal moral and ethical values.

Ethical dilemmas faced by nurses

Analyze ethical dilemmas faced by nurses in clinical practice; identify ethical principles, ethical theories, and common fallacies in thought; provide rationale for possible decisions through thinking and writing critically.

Ethics and communication

1. Use knowledge of ethics and communication skills to resolve ethical dilemmas with an interdisciplinary team.

Top

Nursing Care of Adults with Acute and Chronic Illnesses

Theory and content in the nursing care of acutely and chronically ill adults; professional behavior; illness implications for patients and families.

NURS 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 2.
Taught	Fall, Winter

Course Outcomes

Design, provide, and evaluate professional nursing care for individuals, families, and communities.

- Differentiate pathophysiology, risk factors, diagnostic procedures, assessment findings and nursing interventions of common acute and chronic illnesses as well as surgical or procedural interventions.
- Identify treatment and rationale for each illness and surgical or procedural intervention.
- Articulate and understand the implications of acute and chronic illness for patients and their families.
- Correlate laboratory, procedure, treatments and other patient results to the effects of the disease process or treatments.
- Identify effects of chronic illness on the patient and their significant others (SO).

Integrate the values of the Gospel of Jesus Christ as part of caring.

- Value the importance of spirituality in the nursing process.
- Respect religious beliefs of the client.
- Utilize personal inspiration in clinical decisions as well as the learning process.

Demonstrate effective critical thinking and communication.

- Demonstrate professional behavior when communicating with instructors, other health care providers, patients and families.
- In practice case studies given in the didactic class, demonstrate critical thinking skills and is able to calculate priority nursing care interventions for various types of medical surgical hospitalized patient
- Identify situations where skills and knowledge beyond their scope is needed and accurately seeks assistance.

Exemplify life-long learning.

- Participate in activities that contribute to the ongoing development of personal knowledge as well as the Nursing profession's body of knowledge.

Clinical Practicum for Nursing Care of Adults with Acute and Chronic Illnesses

Clinical practicum in the nursing care of acutely and chronically ill adults in inpatient settings; professional behavior; illness implications for patients and families.

NURS 342

Hours	3.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 2.
Note	10.5 clinical hours per week for 14 weeks (includes pre-assessment).
Taught	Fall, Winter

Course Outcomes

Integrate the values of the Gospel of Jesus Christ as part of caring.

- Value the importance of spirituality in the nursing process.
- Respect religious beliefs of the client.
- Utilize personal inspiration in clinical decisions as well as the learning process.

Demonstrate effective critical thinking and communication.

- Demonstrate professional behavior when communicating with instructors, other health care providers, patients and families.
- Provide safe, competent, professional nursing care of adults in inpatients settings experiencing acute or chronic illnesses.

Design, provide, and evaluate professional nursing care for individuals, families, and communities.

- Participate in the peri-operative process as well as perform routines in aseptic and sterile technique.
- Articulate and understand the implications of acute and chronic illness for patients and their families.
- Demonstrate proficiency in the performance of given technical skills.

Lab/Simulation for Nursing Care of Adults with Acute and Chronic Illnesses

Lab/simulation experience in nursing care of acutely/chronically ill adults.

NURS 343

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 2.
Note	4 hours lab per week in first 2 weeks, then 2 hours lab or simulation per week for 12 weeks.
Taught	Fall, Winter

Course Outcomes

Integrate the values of the Gospel of Jesus Christ as part of caring.

- Value the importance of spirituality in the nursing process.
- Respect religious beliefs of the client.

Demonstrate effective critical thinking and communication.

- Demonstrate professional behavior when communicating with instructors, other students.

Design, provide, and evaluate professional nursing care for individuals, families, and communities.

- Demonstrate proficiency in the performance of given technical skills.
- Articulate and understand the implications of acute and chronic illness for patients and their families.
- Discusses rationale for each technical procedure/skill
- Identifies the impact of the procedure on the patient
- Completes the procedure in a satisfactory manner
- Reports and documents procedure and patient results
- Explains procedure and performs patient teaching to patient and SO

Nursing Care of Women and Newborns

Theory and content in the nursing care of childbearing families from diverse backgrounds. Health promotion, assessment, and interventions relating to complicated and uncomplicated pregnancy and birth.

NURS 351

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 3.
Taught	Fall, Winter

Course Outcomes

Childbearing Families

Demonstrate an understanding of the nursing knowledge necessary to provide care to diverse childbearing families as evidenced by successfully passing tests and assignments.

Nursing Assessment

Utilize principles essential to performing assessment and management of normal antepartum, intrapartum, postpartum, and newborn patients evidenced by successfully passing tests and lab simulations.

Communication and Collaboration

Demonstrate appropriate interpersonal communication and collaboration used when communicating with families, peers and faculty in varied settings as demonstrated by student presentations, faculty interactions and professional classroom behavior.

Scholarly Knowledge

Demonstrate retrieval, application and evaluation of scholarly knowledge related to practice issues in the care of childbearing families as evidenced by classroom discussions, presentations, and successfully passing tests.

Clinical Practicum for Nursing Care of Women and Newborns

Clinical practicum in the nursing care of childbearing families from diverse backgrounds. Health promotion, assessment, and interventions related to complicated and uncomplicated pregnancy and birth. Includes lab and simulation experiences.

NURS 352

Hours	1.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 3.
Note	6-12 hours clinical per week for 7 weeks.
Taught	Fall, Winter

Course Outcomes

Christ-like Caring

Recognize personal values regarding childbirth, families, and parenting and gain an understanding of the changes that occur within a family related to the childbirth process.

Critical Thinkging, Communication and Integration

Demonstrate the ability to utilize critical thinking skills to provide evidence-based care and to communicate effectively.

Providing Professional Nursing Care

Demonstrate competent nursing care by performing assessment and management of normal antepartum, intrapartum, postpartum and newborn patients.

Nursing Leadership, Local, National, and Global Issues

Identify challenges of nursing related to care of women and newborns and provide evidence-based information on issues concerning the childbearing family.

Life-long Learning

Formulate personal decisions regarding future birth experience as a patient or as a spouse based on current best practices along with health promotion strategies.

Top

Nursing Care of Children and Families

Theory and content in the nursing care of children and their families from diverse backgrounds. Health promotion, disease prevention, care of acute and chronic illness, and growth development.

NURS 361

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 3.
Taught	Fall, Winter

Course Outcomes

Knowledge and Critical Thinking

Use nursing knowledge and critical thinking to provide developmentally appropriate care to child-rearing families from diverse backgrounds as evidenced by successfully passing course tests, quizzes, and assignments.

Scholarly Knowledge

Demonstrate retrieval, evaluation, and application of scholarly knowledge related to practice issues in the care of child-rearing families as evidenced by contributing to classroom discussions and by successfully passing course tests, quizzes, and assignments.

Professional Behavior

Demonstrate professional behaviors in the classroom setting.

Top

Clinical Practicum for Nursing Care of Children and Families

Clinical practicum for nursing care of children and their families from diverse backgrounds (health promotion, disease prevention, acute/chronic illness, and growth development). Includes lab and simulation experience.

NURS 362

Hours	2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 3.
Note	12 hours clinical per week for 7 weeks.
Taught	Fall, Winter

Course Outcomes

1. Apply evidence based nursing knowledge and critical think

This will be evidenced by successfully completing and/or participating in:

- *Weekly clinical assignments*
- *Clinical examination*
- *Literature review presentation and handout*
- *Post clinical discussions*
- *Final clinical evaluation*
- *Pediatric simulation activity*

2. Communicate and collaborate with children, families, peer

This will be evidenced by successfully completing and or participating in:

- *Pediatric simulation activity*
- *Literature review presentation and handout*
- *Comments provided by staff each week on the weekly clinical assessment form*
- *Weekly clinical assignments*
- *Final clinical evaluation*

3. Behave professionally and incorporate the Healerâ??s Art

This will be evidenced by successfully completing and or participating in:

- *Acknowledging and caring for spiritual needs documented in the weekly clinical assignment*
- *Contributing in post clinical conferences*
- *Actively seeking learning activities*
- *Attending the Research Conference in the fall or Research Confernece in winter*
- *Completing a service experience*

Top

Independent Study in the Practice of Nursing

NURS 390R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

NCLEX

Students will complete a plan of action that will promote their successful completion of the NCLEX-RN examination. which includes: an **individual plan for test preparation;** demonstraton of increased motivation to prepare for NCLEX-RN exam; demonstration of increased confidence for taking the NCLEX-RN examination.

SNA Leadership

Students will be able to fulfill the responsibilities of a Student Nurses' Association officer and apply principles of peer leadership and student representation evidenced by: developing confidence in communication skills, applying principles of leadership through appropriate initiative and follow-through.

Understanding of the people, worldview, culture in setting of study.

Demonstrate an understanding of the people, worldview, culture (and language, where applicable) of setting in which the study.

Practice of discipline in a different cultural setting.

Articulate a deep awareness of one's academic discipline by comparing and contrasting how it is understood and practiced in a different cultural setting.

Develop Successful Test Taking Behaviors and Critical Thinking Skills

Identify the steps of Bloom's taxonomy;Evaluate test questions for level of content: Knowledge, Understanding, Application, Analysis;Successfully demonstrate five steps of question analysis;Demonstrate integrated ordered analysis and critical thinking skills into personal test-taking practice.

Employment Strategies

Develop skills that will enhance your employment seeking opportunities, e.g. resume development,

SMART goals, interview skills.

NURS 390R: Mentored Research: Organizational Science in Health Systems

Effectively collaborate with colleagues while engaging in the research process;Demonstrate progressing proficiency in various aspects of the research process;Demonstrate competence in oral and written research communication

Academic Internship in Nursing Practice

Work experience evaluated by supervisor and posted on student's transcript.

NURS 399R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Departmental approval.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Application of Nursing Prinicples of Care

The international student will be able to apply nursing skills, principles, and knowledge to clinical practice.

Personal Insights to Promote Effective Care

The international student will be use insights gained during the experience to effectively deliver patient and family care.

Role of the Registered Nurse

The international student will be able to demonstrate and increased knowledge and understanding of the registered nurse's role.

Public and Global Health Nursing

Theory for public health nursing; interventions and strategies targeting population-based care at multiple levels. In addition, theory and content of nursing in diverse populations in a global context emphasizing cultural competency skills.

NURS 403

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 3.
Taught	Fall, Winter

Course Outcomes

Population Based Nursing

Interpret and apply the key principles of population-based nursing in order to advocate and create change at the individual, community, and organizational level

Function/practice of public health nursing

Examine and evaluate the function and practice of public health nursing

Complex issues

Analyze the complex issues surrounding public and global health

Top

Clinical Practicum Public and Global Health Nursing

Clinical practicum for nursing care in diverse populations in a global context emphasizing public health and cultural competency skills.

NURS 404

Hours	3.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 4.
Taught	Spring

Course Outcomes

Culturally sensitive care to diverse populations.

Students will provide culturally sensitive health care for the needs of patients, families, and communities, with particular emphasis on the needs of diverse populations.

Access and use of evidence to create change and ensure social justice.

Students will demonstrate the continual need and ability to both access and use evidence from global health statistics and trends from local, national, and international governmental and non-governmental health organizations in order to create positive change and social justice

Informed awareness of culture and diversity.

Students will acquire informed awareness of culture and diversity within individuals, families, and communities as it affects health care decision-making and health seeking behaviors in a a culture outside their own.

Impact of social determiants on global health and health care systems.

Students will articulate an understanding of the impact of social determinants (political, social, cultural, and environmental issues) on global health and health care systems.

Supporting welfare principles of the Church of Jesus Christ of Latter-day Saints.

Students will identify culturally appropriate interventions that support the welfare principles of the Church of Jesus Christ of Latter-day Saints, especially self-reliance and empowerment.

Personal limitations and culturally competent care.

Students will understand personal limitations in culturally competent care and increase desire to learn from others and integrate cultural competency as a life- long learning process.

Thougtful reflection.

Students will experience *thoughtful reflection* on culture and diversity within individuals, families, and communities as it affects health care decision-making and health seeking behaviors in a a culture outside their own in a structured, guided manner.

Psychiatric and Mental Health Nursing

Theory and content in the nursing care for clients with complex psychiatric disorders.

NURS 461

Hours	2.5 Credit, 2.5 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 4.
Taught	Fall, Winter

Course Outcomes

Psychiatric Nursing knowledge and application

1) Demonstrate an understanding of the common adult and child psychiatric disorders, including substance abuse disorders and appropriate nursing interventions related to each disorder.

Psychiatric pharmycodyanmics

1) Describe and analyze the appropriate use of psychotropic medications in the care of clients with psychiatric disorders.

Communication skills and strategies

1) Apply therapeutic communication skills and strategies in providing recovery oriented care to clients and their families.

Nursing role in developing a therapeutic environment

1) Identify essential principles and the nursing role in the management of the therapeutic environment.

Legal and ethical implications in mental health nursing

1) Describe legal and ethical implications that impact the nursing care of clients with mental illness.

Clinical Practicum for Psychiatric and Mental Health Nursing

Clinical practicum in the nursing care for clients with complex psychiatric disorders.

NURS 462

Hours	1.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 4.
Note	14 hours clinical per week (two 7-hour days) for 4 weeks.
Taught	Fall, Winter

Course Outcomes

Therapeutic Communication

Establish and maintain a therapeutic relationship with a patient and demonstrate effective use of effective communication skills with staff and patients.

Applying Nursing Process

Identify and describe common psychiatric disorders and formulate appropriate nursing interventions related to each disorder.

Applying nursing principles in medication administration.

Identify the main categories of psychotropic medications (indications for use, side effects, dosing, nursing implications, patient/family teaching needs, and appropriate monitoring) and safely pass medications in clinical if appropriate in the clinical setting.

Holistic nursing care

Demonstrate an understanding of providing holistic care for those who suffer with mental illness through exploring your own feelings, strengths, gifts and spirituality.

Nursing Care of Adults in Crisis

Theory and content in the nursing interventions and care for individuals and families in crisis.

NURS 471

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 4.
Taught	Fall, Winter

Course Outcomes

Accountabilty

- Students are responsible to come prepared to class having read the assignments from the textbooks so they are prepared to participate in the discussion of the following topics during lecture;
  - Hemodynamics
  - Fluid shifts
  - Shock, MODS, SIRS
  - Laboratory data
  - Cardiovascular disease
  - Pulmonary disorders
  - Neurological disorders
  - Burns
  - Renal/GI/Endocrine disorders
  - Wound care
  - Trauma
  - End-of-Life

Nursing Knowledge and Application

- The student will be able to demonstrate knowledge and application of that knowledge through in-class quizzes, class participation, three course tests, and a comprehensive final exam in the above content areas of the acutely ill patient.

Professionalism

- Students will optimize their understanding and successfully accomplish the ATI module on Advanced Med/Surg material through study of the material in the ATI textbook. If necessary, the student will complete remediation of the ATI material in order to optimize their potential success in taking the NCLEX.

Clinical Practicum for Adults in Crisis

Clinical practicum in the nursing interventions and care for individuals and families in crisis.

NURS 472

Hours	2.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 4.
Note	13-14 hours clinical per week for 8 weeks (includes pre-assessment).
Taught	Fall, Winter

Course Outcomes

Application of Nursing Knowledge and Skills

- The student will be able to comprehensively assess, analyze, and manage critically ill patients utilizing the following data; pathophysiology, medications, lab data, hemodynamics, and physical assessment data to determine and implement an appropriate plan of nursing care.

Professionalism Provision of Nursing Cares

- The student will be able to demonstrate knowledge and application of that knowledge in the following content areas of the acutely ill patient by demonstrating expertise in clinical assessment papers and participation in post-clinical conference activities;
  - Hemodynamics
  - Fluid shifts
  - Shock, MODS, SIRS
  - Laboratory data
  - Cardiovascular disease
  - Pulmonary disorders
  - Neurological disorders
  - Burns
  - Renal/GI/Endocrine disorders
  - Wound care

Application of the Healer's Art

- Demonstrate, assess, develop and implement appropriate nursing interventions while providing care to the acutely ill patient in the clinical setting.

Top

Lab/Simulation for Adults in Crisis

Lab/simulation experience in nursing care for individuals and families in crisis.

NURS 473

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 4.
Note	4 hours first week of semester, then 2 hours lab and simulation per week for 10 weeks.
Taught	Fall, Winter

Course Outcomes

Nursing Practice and Care of Acutely Ill Patients

Demonstrate, assess, and implement appropriate nursing interventions related to the acutely ill patient

Nursing Practice and Pharmacodynamics

Identify and discuss the pharmacodynamics and appropriate nursing actions related to various medications commonly used in acute care settings.

Top

Nursing Capstone

Seminar in advanced theory and synthesis of concepts for the nursing profession focusing on planning, delivering, and managing patient care in complex environments including leadership in the health care environment.

NURS 491

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Courses in Nursing Semester 5.
Taught	Fall, Winter

Course Outcomes

Evidence Based Nursing and Health Systems

Initiate and contribute to evidence-based, patient-centered initiatives to improve quality and safety in health systems.

Leadership and Collaboration

Demonstrate beginning proficiency in collaborative leadership with an interdisciplinary team.

Technology and Health Information for Quality Care

Use new technologies and health information systems to improve care quality

Healthcare Delivery Models

Envision emerging healthcare delivery models in the context of a learning health system.

Healer's Art

Apply the Healer's Art to improve individuals, teams, and systems in healthcare.

Clinical Practicum for Capstone Nursing

Clinical practicum focusing on planning, delivering, and managing patient care in complex environments. Leadership components incorporated into clinical experiences and practices.

NURS 492

Hours	5.5 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Courses in Nursing Semester 5.
Note	Requires 230 hours per semester (210 clinical hours; 20 bridging hours, 1.5 hours per week).
Taught	Fall, Winter

Course Outcomes

Critical Thinking

2. Demonstrate critical thinking skills through the understanding, use, and implementation of evidence based nursing practice.

Evidence Based Care

1. Act in a responsible and accountable manner while providing safe, efficient, compassionate, evidence based nursing care.

Communication Skills

3. Demonstrate appropriate, accurate, and effective communication skills with patient/family, health-care team, and faculty.

Honors Thesis

Honors thesis preparation.

NURS 499R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Synthesis and Application of Scholarly Skills

Complete a project and scholarly paper that reflects: identification of a clinical or professional problem/concern that is significant to the discipline, complete a thorough literature reveiw to investigate the problem/concern and its relevance to nursing profession and/or practice, write a scholarly paper which describes the clinical problem/concern, reports the findings, compares and contrasts the data, identify the implications for nursing and patient care, and make recommendations for practice.

Pharmacology in Advanced Practice

Principles of pharmacology and drug therapy for advanced practice nurses.

NURS 555

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Pathophysiology of Disease States

Describe from a therapeutic standpoint the root causes of various disease states

Drug classification effects on disease cause and symptoms

Explain how various drug classes alter and treat the root causes or symptoms of the diseases

Drug Classifications

Ability to identify ambulatory care drugs in each drug class including their standard doses and directions

Appropriate Drug Therapy

Ability to select an appropriate therapy based on guidelines and cost-effectiveness

Prescribing Medications

Ability to correctly prescribe medications for various disease states

Top

Independent Study

Individualized study.

NURS 590R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Independent Study

1. Identify an area where increased skills and knowledge are needed and develop a plan to meet that needed.

Top

Organizational Effectiveness

Theories and concepts for creating effective organizations, e.g., individual, group, and organizational processes and human resource functions, including selection, compensation, and performance management.

ORG B 320

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Effective Organizations

Be able to describe the characteristics of an effective organization and explain how to create them.

Course Curriculum

Explain and discuss the following:
1.What are effective organizations and how do you create them?
2.How do you attract and train an effective workforce?
3.How do you motivate employees to accomplish the organization's goals?
4.How do you create a productive work environment?
5.What are the key processes leading to organizational effectiveness?
6.How do you improve organizational effectiveness?

Effective Workforce

Develop the knowledge needed to attract and train an effective workforce.

Employee Motivation

Accomplish an organization's goals through the motivation of employees.

Productive Work Environment

Be able to create a productive work environment.

Processes Leading to Effectiveness

Comprehend the key processes leading to organizational effectiveness.

Improving Organizational Effectiveness

Understand how to improve organizational effectiveness.

Top

Organizational Effectiveness

Theories and concepts for creating effective organizations, e.g., individual, group, and organizational processes and human resource functions, including selection, compensation, and performance management.

ORG B 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Marriott School of Management majors only.
Taught	Fall, Winter, Spring

Course Outcomes

Effective Organizations

Students will know how to explain and discuss the characteristics of an effective organization and how to create them, how to attract and train an effective workforce, how to motivate employees to accomlish the organization's goals, and how to create a productive work environment.

Team Work

Students will be able to effectively work in a team.

Change Management

The students will learn how to manage change effectively.

Top

Human Resource Management

Functions of human resource management: employee selection, wage and salary administration, training and development, employee relations, and human resource planning.

ORG B 327

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Purpose of HRM

Discuss the purpose, roles, frameworks, and activities of HRM within various types of organizations.

Recruitment Strategy

Explain important strategies and methods of effective recruitment, selection, and retention.

Performance Management

Discuss the primary purposes, criteria, approaches, advantages and disadvantages, issues, and evaluation of performance management.

Top

Organizational Development and Change

Macro topics in organizational behavior, including organizational structure, culture, design, change management, strategic implementation, and HR training and development.

ORG B 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Remembering

Students will show evidence of their ability to read and grasp change concepts and theories.

Summarizing

Students will be able to effectively synthesize and communicate various OD concepts, tools and methods about each day's readings, showing evidence they understand, can articulate and evaluate core principles in the classroom through the quantity and quality of their participation.

Justifying and Communicating Learning

At the end of the semester, there will be a final comprehensive exam that will include objective questions from the text, short essay questions, and brief case analyses. It will test one's ability to justify and communicate what has been learned. It will require students to integrate consulting information covered throughout the course and apply OD concepts and methodology to various organization problems.

Organizational Application

Students will individually or as a team (2-3 people) utilize core principles of OD to design a consulting strategy with an organization in need of change. This will be the major evidence for demonstrating students' capacity to practice what they study by taking action. It will show how OD tools and ideas have been critically examined, as well as how they have been assessed for their feasibility through practical applications. Evidence of building a logical approach and strong writing skills will be required. This learning outcome will be a synthesis of the semester's experience. This will be not only be a written deliverable, but an oral presentation to one's peers in which OD projects are made public and class criticisms are shared through feedback after each presentation.

Managerial Leadership Development

Principles and practices needed to serve as effective leaders in families, church, community, and work settings -- planning, decision making, self-awareness, effective human influence, and community building.

ORG B 347

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understanding Self

Gain increased awareness of personal leadership strengths and weaknesses.

Behavioral Guidelines

Describe the behavioral guidelines derived from relevant research for each of the skill areas in the course.

Leadership Skill Areas

Demonstrate measureable improvement in at least two of the leadership skill areas of the course.

Improving Skills

Demonstrate the ability to make continuous improvements in one's leadership skills.

Top

Business Ethics

Moral leadership, character development, and multiple perspectives for making ethical decisions in organizations.

ORG B 400

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Character Development

Describe how honesty and integrity are crucial elements of one's personal character and explain a theory regarding how character develops.

Ethical Leadership

Explain how ethical leadership contributes to creating a culture of integrity in organizations.

Ethical Criteria

Identify and describe five ethical criteria for making ethical decisions in organizations and explain how to use them to resolve ethical dilemmas.

Top

Compensation, Benefits, and Performance Management

Wage and salary administration, incentives, employee benefits, grievance and discipline systems, performance appraisal.

ORG B 429

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Org B 327 or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Financial Incentives

Explain how to use financial incentives to motivate employees through such programs as merit pay, individual or group bonuses, piece-rate incentives, commissions, bonuses, and profit sharing plans.

Wage Level Decisions

Explain how wage levels are determined and demonstrate how wage surveys are used to assign fair wage rates.

Job Evaluation

Use a job evaluation program, such as the point method, to create a wage structure in an organization.

Performance Evaluation

Explain how to develop and use a performance appraisal program to evaluate employee performance and describe the strengths and weaknesses of different appraisal methods.

Pay Administration

Explain how to administer a pay system, such as calculating take-home and overtime pay, creating executive compensation packages, and adjusting pay levels for inflation.

Employee Benefits Programs

Describe the common elements of employee benefits programs and explain how they are administered.

International Human Resources

International policies and practices in organizational behavior and human resource management.

ORG B 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Org B 327 or instructor's consent.
Taught	Fall

Course Outcomes

National Cultures

Describe ways in which national cultures vary.

Hofstede and Globe Models

Use the Hofstede and Globe models to understand cultural dimensions.

Cultural Differences

Describe how cultural differences alter work organizations.

Communication Skills

Develop personal communication skills that will be effective in different cultures.

Business Environments

Gather information and analyze descriptions of business environments located throughout the world.

Presenting Research

Improve ability to present results of personal research, both written and oral.

Withholding Judgment

Withhold judgments when interacting with cultures that are not your own.

Top

Microfinance

Theories and practice of designing and implementing grassroots strategies for empowering the global poor. Topics include micro-entrepreneurship skills, microcredit loan tools, and how to build sustainable microenterprises from the ground up.

ORG B 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Professional Development Seminar

Special topics in organizational behavior. Course content varies from year to year.

ORG B 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Deciding to Pursue a PhD

Help students decide whether to pursue a PhD.

Health Care Executive Lecture Series

Top executives share insights about the health care industry and related career opportunities.

P MGT 490

Hours	0.5 Credit, 0.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Executive Health Care Lecture Series

- Evaluate the effectiveness of health care delivery in the United States.
- Learn from leading health care executives from around the country.
- Gain greater understanding into how to succeed in the health care industry.
- Meet several leaders in the health care industry and begin to develop a network in the field.

International Development Policy

Designing and evaluating policy in international development. Empirical evidence from randomized control trials, best practices in development policy, behavioral economics and models of behavior change, and design thinking.

P MGT 519

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	P MGT 612; or ECON 110; or equivalent
Taught	Winter

Course Outcomes

Evidence-based policy

- Be familiar with current evidence-based research on what policies do and do not work in international development.

Credible evidence

- Distinguish between credible and non-credible evidence of effective policy.

Sources for quality evidence

- Access major portals of high quality research on policy effectiveness.

Expert economists

- Know the economists who are doing state-of-the-art research on development policy.

Design thinking

- Practice the steps of Design Thinking when developing new policy.

Behavioral economics

- Use insights from behavioral economic theory to design better policy.

RCTs

- Evaluate policy and theory using randomized control trial methodology.

Nonprofit Resource Development

Resource development skills including grant writing and contract management.

P MGT 552

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter Contact Department

Course Outcomes

Developing Career Opportunities

Students will engage reading and lecture material about best practices in the field of fund development to enhance their own professional development and managerial maturity.

Analysis

- Students will apply tenets of good fundraising in class practice and case assignments in order to understand the role of fund development in strategic planning and stakeholder analysis.

Teamwork

- Students will work both individually and in teams to complete course assignments.

Critical Thinking

- Students will gather and evaluate information about current nonprofit fund development programs and focus the reporting of this information to succinct memoranda.
- Students will understand grant writing and contract management.

Ethical Decisions

- Students will identify and resolve ethical and value-based dilemmas to engage the relevant ethical, legal, and sociological implications of actions in the profession of fundraising.

Top

Introduction to Policy Analysis

Models of policy analysis; defining policy; problems and policy analysis questions.

P POL 501

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Effective Research

Conduct extensive background research relevant to a wide range of social problems.

Policy-Making Processes

Understand the policy-making process, particularly the political realities associated with adopting, implementing, and evaluating policy.

Effective Writing

Write effectively for different audiences, including elected officials and other policy decision makers, policy analysts, and the public

Effective Communication

Achieve excellence in making oral presentations to different kinds of audiences and master presentation software.

Top

Policy Process

Models of public policy making; interaction of politics and policy making.

P POL 502

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Policy-Making Processes

Understand the policy-making process, particularly the political realities associated with adopting, implementing, and evaluating policy.

Write Effectively

Write effectively for different audiences, including elected officials and other policy decision makers, policy analysts, and the public

Effective Communication

Achieve excellence in making oral presentations to different kinds of audiences and master presentation software.

Top

Normative Theories of Policy Analysis

Alternative norms and values used in making policy choices.

P POL 505

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Policy Criteria Evaluation

Compare different normative criteria in making policy choices.

Policy Analysis

Identify the costs and benefits accruing to different groups of people from different policy alternatives.

Academic Internship

Internship with an organization conducting policy analysis.

P POL 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	P Pol 501, 502, 505, 603, 604; Econ 380, 382, 475, or equivalents.
Taught	

Course Outcomes

Internship

Complete a professional internship in the public policy field

Policy Brief

Write a policy brief relative to something you learned or studied in your internsihp

Honors Science of Biology

General biology course designed for biological science majors, emphasizing the scientific method, cell theory, biochemical unity, the central dogma, bioenergetics, reproduction, and evolutionary theory.

PDBIO 120

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Scientific Method

Understand and be able to use the scientific method:

1. Think critically about the purposes and objectives of scientific studies and data.
2. Become observant of and curious about patterns and processes in living things.
3. Ask essential, specific, answerable questions about observations.
4. Form hypotheses about biological patterns and processes that are testable.

Foundational Concepts

Understand well the following foundational concepts:

1. Cell theory and biological compartments
2. Chemistry of life (biochemical unity, central dogma)
3. Bioenergetics (biotransformation of energy)
4. Reproduction (fission,
5. mitosis, meiosis, etc.)
6. Evolutionary theory

Science of Biology

General biology course designed for biological science majors, emphasizing the scientific method, cell theory, biochemical unity, the central dogma, bioenergetics, reproduction, and evolutionary theory.

PDBIO 120

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring
Offered	Honors also

Course Outcomes

Scientific Method

Understand and be able to use the scientific method:

1. Think critically about the purposes and objectives of scientific studies and data.
2. Become observant of and curious about patterns and processes in living things.
3. Ask essential, specific, answerable questions about observations.
4. Form hypotheses about biological patterns and processes that are testable.

Foundational Concepts

Understand well the following foundational concepts:

1. Cell theory and biological compartments
2. Chemistry of life (biochemical unity, central dogma)
3. Bioenergetics (biotransformation of energy)
4. Reproduction (fission,
5. mitosis, meiosis, etc.)
6. Evolutionary theory

Top

Human Biology

Body systems and influence of heredity.

PDBIO 205

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For nonbiology majors. Currently offered online only.
Taught	
Offered	Independent Study online course.

Course Outcomes

Terminology and Effective Communication

Demonstrate understanding of the anatomic and physiologic terminology necessary forwritten and oral communication about the body, its functions, and its interaction with allother species on this planet.

Human Biology

Students will demonstrate understanding of human biology at the chemical, microscopic,anatomical, physiological, and ecological levels.

Body Functions and Survival

Demonstrate the ability to connect understanding of the body and its function with thefunction and survival of the world we live in.

Human Anatomy (with virtual lab)

Structure and function of the human body. Virtual lab experience included.

PDBIO 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Body Organs and Systems

Students will be able to list the name, location, and function of each of the body's organs and organ systems.

Tissue Structures

Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.

Appreciating the Human Body

Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.

Top

Human Anatomy (with lab)

Structure and function of the human body. Lab included.

PDBIO 220

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Tissue Structures

Students will demonstrate an understanding of the basic microscopic underpinnings of tissue structures and be able to name them.

Appreciating the Human Body

Students will demonstrate a greater understanding and appreciation for the human body, it's overall design and connections to other living organisms, and what a marvelous creation it is.

Organ and Organ Systems

Students will be able to list the name, location, and function of each of the body's organs and organ systems.

Human Physiology (with lab)

Function of body organ systems.

PDBIO 305

Hours	4.0 Credit, 4.0 Lecture, 2.0 Lab
Prerequisites	Chem 101 or equivalent; PDBio 210 or 220.
Recommended	A general biology course.
Note	Not acceptable for physiology and developmental biology, biophysics, or neuroscience majors. Designed for students with basic chemistry / no molecular biology. Students with chemistry/molecular biology should take PDBio 362.
Taught	Fall, Winter, Spring

Course Outcomes

Terminology

Students will demonstrate the proper use of physiology terminology.

Health and Disease in the Human Body

Student will demonstrate a well-integrated and comprehensive understanding of the human body in health and disease.

Cells and Organ Systems

Students will use knowledge of cells and organ systems to solve problems related to the function of the human body.

Physiology Fundamentals and Skills

Students will demonstrate the necessary knowledge and skills in physiology that are required for their majors and future aspirations for graduate and professional school

Appreciation and Respect for the Human Body

Students will develop and demonstrate in their daily lives a deeper appreciation and respect for the human body.

Making Informed Decisions

Students will demonstrate the knowledge to make informed personal (medical, ethical, and political) decisions regarding physiological concepts.

Top

Dissection Techniques in Human Anatomy

Techniques of human cadaver dissection.

PDBIO 320

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 220
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Dissection Assignments

Students will demonstrate they understand the composition of the human body through successfully completing various dissection assignments on human cadavers.

Professional Training

Students will manifest an increases preparation at both a spiritual and secular level, for professional training in the field of human health.

Tissue Biology (with lab)

Human anatomy and histology; function of cells in tissue; early stages of embryology.

PDBIO 325

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 120 & PDBIO 220
Note	Course should be taken during a student's second or third year and before courses in physiology and developmental biology.
Taught	Fall, Winter

Course Outcomes

Professional Communication

Students will be able to communicate with health professionals effectively regarding tissue/organ anatomy and physiology in instances of health and disease.

Cell Organization and Function

Students will demonstrate how the relationship between cell organization and cell function correlates with normal and pathological organ behavior.

Tissue Anatomy and Physiology

Students will be able to describe anatomical and physiological characteristics of epithelial, connective, nervous, and muscular tissue.

Physiology and Developmental Biology Teaching Seminar

Undergraduate students teaching small help sections for lecture portion of physiology and developomental biology courses or helping to teach departmental student laboratory.

PDBIO 349R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	B or above in the specific physiology and developmental biology course; instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Teaching Experience

Students will develop a more in depth understanding of the subject material of a course by having the students teach the course material to other students.

Mentoring Relationship

Students will develop a close professional relationship with the instructor for the course. The students should perceive that this individual is a mentor.

Oral Communication

Student instructors will increase oral communication skills for instruction by practicing laboratory materials with other undergraduate/graduate and/or mentoring faculty member(s).

Constructive Feedback

Student will receive constructive input from surveys that will be collected from laboratory sections and feedback provided by the graduate student and/or the mentoring faculty member.

Top

Cell Biology

Fundamentals of cell structure and function with reference to analytical methods used by cell biologists. Practice in designing, executing, and interpreting relative experiments.

PDBIO 360

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MMBIO 240; or CHEM 481M; or CHEM 481
Taught	Fall, Winter, Spring

Course Outcomes

Nuclear Architecture

Students will demonstrate knowledge of the molecular architecture of the nucleus, including the nuclear envelope, nucleoplasm and nucleolus, chromatin, and the nuclear pore.

Protein Transport

Students will demonstrate an understanding of protein transport, including nuclear import and export and vesicular transport through the secretory and sorting pathways.

Cytoskeletal Systems

Students will demonstrate knowledge of the molecular and cellular structure and dynamics of cytoskeletal systems.

Cellular Biology

Students will be able to apply the basic cell biological principles in outcomes 1-3 to more complicated cellular processes, including cell adhesion, cell migration, cell polarity, cell division, cancer, and development.

Experimental Design

Students will demonstrate the ability to generate hypothesis about how cell biological systems work at the molecular level and design experiments that test that hypothesis.

Data Interpretation

Students will demonstrate competence in interpreting original raw data from cell biology experiments, including microscopy, protein biochemistry, molecular biology, and genetics strategies

Literature Evaluation

Students will demonstrate the ability to critically evaluate primary cell biology literature, including the ability to evaluate the design and interpretation of experimental data.

Advanced Physiology

Integrated approach to organ system and cellular physiology. Problem solving/calculations.

PDBIO 362

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MMBIO 240 & PHSCS 106; or MMBIO 240 & PHSCS 220
Note	Requires background in chemistry and molecular biology. Students without this background should take PDBio 305.
Taught	Fall, Winter, Spring

Course Outcomes

Molecular Structure and Properties

Students will manifest an understanding of how structures at the molecular level lead to properties associated with cells, tissues, organs, and organ systems.

Physiological System Functions

Students will demonstrate a comprehension of the functions of the major physiological systems found in humans.

Organ System Homeostasis

Students will describe how organ systems work together interactively to maintain homeostasis.

Advanced Physiology Laboratory

Experiments and exercises in advanced physiology emphasizing human physiology. Computer simulations of muscle function, endocrine disease, and human physiology. Emphasizes problem solving and calculations.

PDBIO 363

Hours	1.0 Credit, 0.5 Lecture, 1.5 Lab
Prerequisites	PDBio 362 or concurrent enrollment; or instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Data Interpretation

Students will demonstrate the skills required to properly interpret data from scientific experimentation to discover how physiological systems function.

Physiological Principles

Students will manifest an understanding of basic physiological principles by modeling how human cells, organs, and organ systems function.

Organ System Homeostasis

Students will describe how interactions between human organ systems work to maintain homeostasis.

Pathophysiology

Variations in physiological mechanisms that account for development of common disturbances in normal control and activities of body's organs and organ systems.

PDBIO 365

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 305; or PDBIO 362
Taught	Fall, Winter, Spring

Course Outcomes

Disease Prevention and Treatment

Students will exhibit an integrative understanding of the biochemistry, molecular biology, genetics, cell biology, microbiology, environmental biology, and physiology related to the prevention, development, and treatment of common diseases.

Case Study Analysis

Students will demonstrate through case study analysis a command of problem solving skills related to the diagnosis and treatment of pathophysiological conditions.

Effective Communication

Pupils will manifest a command of the physiology and pathophysiological vocabulary necessary to effectively communicate with other biomedical professionals and the general public.

Pathophysiology and Ethics

Students will be able to articulate the ethical issues related to the treatment and prevention of pathophysiological conditions.

Respect for Human Body

Students will manifest an increase in their respect for the human body and adopt a life style consistent with this respect.

Top

Academic Internship: Physiology and Developmental Biology

On-the-job experience in off-campus laboratories with a focus related to physiology, biophysics, or developmental biology.

PDBIO 399R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Consent of internship coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research Proficiency

Students will demonstrate research proficiency.

Research Experience

Students will demonstrate that they have learned how to establish a research experience with an extramural provider.

Top

Introduction to Laboratory Techniques

PDBIO 450R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Experimental Techniques

Students will perform effectively any experimental techniques taught in the course.

Top

Protein Expression in Bacteria

PDBIO 450R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Techniques and Principles

Students will demonstrate an understanding of the scientific principles that underlie the techniques taught in the course.

Specialized Subject Matter

Pupils will demonstrate an understanding of the specialized subject matter presented in the course.

Literature Evaluation and Application

Students will be able to evaluate and critique all major sections of scientific papers, then apply the critique to their own research projects.

Topics in Physiology and Developmental Biology

Close interaction between small groups of students and instructor on topics in physiology, developmental biology, or biophysics. Topics vary.

PDBIO 450R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Techniques and Principles

Students will demonstrate an understanding of the scientific principles that underlie the techniques taught in the course.

Specialized Subject Matter

Pupils will demonstrate an understanding of the specialized subject matter presented in the course.

Literature Evaluation and Application

Students will be able to evaluate and critique all major sections of scientific papers, then apply the critique to their own research projects.

Physiology and Developmental Biology Seminar

Seminar (research) presentations for undergraduates in physiology and developmental biology.

PDBIO 455R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Scientific Seminar Presentation

Students will be able to demonstrate the format, organization, and presentation of a typical scientific seminar.

Scientific Etiquette

Students will demonstrate the proper etiquette of scientific interactions by participating in question/answer periods following each seminar.

Top

Developmental Biology

Invertebrate and vertebrate developmental biology. Embryonic gastrulation, neurulation, pattering, etc. Modern approaches and research strategies. Emphasizes gene function, cell signaling, signal transduction during embryogenesis.

PDBIO 482

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MMBIO 240 & PDBIO 360
Recommended	PDBio 325.
Taught	Fall, Winter

Course Outcomes

Invertebrate and Vertebrate Development

Students will be able to generally describe the early development (from fertilization to axis formation) of one invertebrate and one vertebrate model organism.

Embryonic Development

Students will be able to generally describe the concepts of cellular competence, induction, specification, commitment and differentiation in embryonic development.

Organogenesis

Students will be able to give two examples of organogenesis, including genes and signal transduction pathways that lead to organ system formation.

Embryonic Patterning

Students will be able to explain embryonic patterning, using examples that include genes known to act in patterning events.

Interdisciplinary Developmental Biology

Students will be able to explain at least two concepts in developmental biology that overlap with other sciences, such as stem cell research, cancer research, evolutionary sciences, or neuroscience.

Research and Literature Summary

Students will be able to discern and summarize the current state of knowledge on a given topic, construct pioneering research questions on that topic, and propose experiments aimed at answering those questions.

Top

Human Embryology

Developmental milestones of prenatal life: etiology of congenital malformations, emphasizing molecular and cellular changes and their functional consequences.

PDBIO 484

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBio 360 or equivalent.
Recommended	PDBio 325.
Taught	Fall

Course Outcomes

Organ Systems Development

Students will identify the developmental trajectories of the various organ systems and why abnormalities at any step in the lineage of organogenesis may cause birth defects.

Effective Communication

Students will be able to communicate with health professionals effectively regarding embryonic events from conception to birth and the ramifications of each event in instances of health and disease.

Intercellular Signaling

Students will demonstrate how signaling between participating cells leads to important events during the first, second, third, and fourth weeks of development.

Top

Undergraduate Research in Physiology and Developmental Biology

Basic (entry level) research laboratory experience for students interested in physiology and developmental biology.

PDBIO 494R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Laboratory Technique

Students will demonstrate the ability to properly perform basic laboratory-specific techniques.

Laboratory Safety Training

Students will complete laboratory-specific safety training.

Top

Advanced Undergraduate Research in Physiology and Developmental Biology

Senior level research laboratory experience for majors in physiology and developmental biology.

PDBIO 495R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	2 credit hours of PDBio 494R.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Experiment Design

Students will demonstrate an understanding of hypothesis development and the design of experiments to test hypothesis.

Independent Experiments

Students will independently carry out laboratory experiments.

Data Analysis

Students will analyze experimental data and, where appropriate, perform statistical analysis.

Advanced Senior Research Project

Special project course for advanced PDBio research students. Engaging in scientific research as specified in an approved research proposal. Comprehensive written work of research required.

PDBIO 498

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	PDBIO 494R & PDBIO 495R; Instructor's consent must be obtained during previous semester.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Hypothesis Formulation

Students will formulate a testable hypothesis relating to a topic in physiology and developmental biology .

Experimental Design

Students will design experiment (s) to test their hypothesis.

Research Proposal

Students will present a proposal describing their research topic, their hypothesis and experimental design.

Independent Research

Students will independently carry out their proposed research.

Data Analysis

Students will analyze their experimental data.

Research Reporting

Students will report their findings in a manuscript intended for publication in a scientific journal.

Senior Honors Thesis

Honors thesis. Topic to be cleared with Honors Program and Physiology and Developmental Biology Department.

PDBIO 499R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Data Generation, Analysis, and Reporting

Students will be expected to demonstrate acquisition of the necessary laboratory,analytical, and writing skills needed to:1. Successfully generate, analyze, and write about the scientific data they have collected.2. Demonstrate an understanding of the information previously published in the scientificliterature in order to write about their research efforts in the context of what is known andunderstood on their chosen thesis topic.3. Combine their skills, abilities, and efforts in both of the above areas sufficient togenerate a thesis acceptable to meet the requirements for graduation with honors.

Advanced Topics in Physiology and Developmental Biology

Close interaction between small groups of students and instructor on topics in physiology, developmental biology, or biophysics. Topics vary.

PDBIO 550R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Techniques and Principles

Students will prove they have an understanding of the scientific principles that underlie any techniques taught in the course.

Experimental Techniques

Students will master any experimental techniques taught in the course.

Clinical Anatomy

At the end of the semester the student should be able to 1) describe the structural and functional relationships of dermatomal and myotomal innervation for the upper and lower limbs; 2) utilize surface landmarks to determine clinically relevant diagnostic conditions, and understand surgical or radiologic procedures; 3) understand and describe a variety of philosophies dealing with diagnosis and treatment of musculoskeletal conditions.

Top

Molecular Dynamics

Close interaction between small groups of students and instructor on topics in physiology, developmental biology, or biophysics. Topics vary.

PDBIO 550R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Specialized Subject Matter

Students will demonstrate an understanding of the specialized subject matter presented in the course.

Planar Lipid Bilayers

Close interaction between small groups of students and instructor on topics in physiology, developmental biology, or biophysics. Topics vary.

PDBIO 550R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Scientific Techniques and Principles

Students will prove they have an understanding of the scientific principles that underlie any techniques taught in the course.

Experimental Techniques

Students will master any experimental techniques taught in the course.

Clinical Anatomy

At the end of the semester the student should be able to 1) describe the structural and functional relationships of dermatomal and myotomal innervation for the upper and lower limbs; 2) utilize surface landmarks to determine clinically relevant diagnostic conditions, and understand surgical or radiologic procedures; 3) understand and describe a variety of philosophies dealing with diagnosis and treatment of musculoskeletal conditions.

Physiology of Drug Mechanisms

Overview of physiological and pharmacological mechanisms and principles of human therapeutics as applied to clinically significant pathophysiology.

PDBIO 561

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 362
Taught	Fall

Course Outcomes

Drug Mechanisms

Students will manifest an interactive understanding of drug mechanisms at the molecular, cellular, tissue, organ, and/or systemic levels.

Cellular Pathways

Students will demonstrate that they understand the cellular pathways targeted for pharmacological treatment.

Body-Treatment Interaction

Pupils will demonstrate a comprehension of how the body interacts with compounds used for pharmacological treatments.

Communication

Students will manifest the knowledge, skills and vocabulary necessary to converse with health care providers concerning their own and family's medical treatments.

Top

Reproductive Physiology

Mammalian reproductive physiology.

PDBIO 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBio 362 or equivalent.
Recommended	Chem 481, PDBio 482; or equivalents.
Taught	Fall

Course Outcomes

Reproductive Processes, Research, and Appreciation

Students will be expected to demonstrate acquisition of both the basic and in-depthknowledge needed to be able to perform the following skills on course assignments, quizzes, and examinations:
1. Demonstrate understanding of various reproductive processes at the molecular,biochemical, microscopic, and physiological levels.
2. Demonstrate the skills needed to read, analyze, evaluate, comprehend, and synthesizescientific information from several different sources for use in both written and oralcommunication about various reproductive processes.
3. Demonstrate an appreciation for the sacred nature of the reproductive processes thatresult in the production of offspring during in-class oral communication.

Top

Endocrinology

Mammalian hormones.

PDBIO 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBio 362 or instructor's consent.
Taught	Winter

Course Outcomes

Hormone Actions

Students will be able to describe major actions of each hormone on target cells.

Hormone Pathways

Students will be able to describe pathways for synthesis and inactivation for steroid hormones, thyroid hormones, and catecholamines.

Hormone Synthesis and Secretion

Students will be able to describe the control of synthesis and secretion for each hormone, including feedback relationships.

Signaling Pathways

Students will be able to describe major signaling pathways in target cells for each hormone.

Methodologies in Endocrinology

Students will be able to describe methodologies used to test hypotheses in study of problems in endocrinology.

Endocrine Diseases

Students will be able to describe and recognize etiology and clinical symptoms of the major endocrine diseases

Cellular Electrophysiology and Biophysics

Using electrophysiology and biophysics as an approach to study of physiology. Extensive look at ion channels and cell signaling.

PDBIO 568

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 362 & PHSCS 140; or PDBIO 362 & PHSCS 220
Taught	Fall

Course Outcomes

Biophysical Fundamentals

Students will demonstrate biophysical knowledge gained in specific areas including membrane properties, voltage and ligand-gated receptors, neurotransmission and mathematical modeling.

Biophysics in the Laboratory

Students will apply the biophysical knowledge gained in a laboratory setting.

Research Proposal

Students will demonstrate critical thinking and evaluation skills gained in the course by preparing a competent and clearly written research proposal.

Oral Presentation

Students will demonstrate knowledge of a particular research topic and presentation skills in a clear and informative oral presentation.

Developmental Genetics

Gene function and regulation during cell specification and differentiation, pattern formation, and organogenesis in developing embryo.

PDBIO 582

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBio 482 or equivalent.
Taught	Winter

Course Outcomes

Research Evaluation and Critical Thinking

Students will demonstrate understanding of, and the ability to think critically about, primary developmental biology research articles.

Scientific Discussion

Students will demonstrate confidence in contributing to scientific discussions.

Research Proposal

Students will demonstrate the ability to think scientifically by formulating a research proposal.

Top

Elementary Skills and Activities

Physical skills and activities specific to elementary-age children.

PETE 169

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Required for elementary education majors.
Taught	Fall, Winter, Spring

Course Outcomes

Skills for Physical Education

1. The students will develop the skills for physical education activities taught in elementary schools.

Top

Physical Education for Elementary School Teachers

PETE 212

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	PETE 169; FBI fingerprint and background clearance.
Taught	Fall, Winter, Spring

Course Outcomes

Outcome 1

Identify the purposes and objectives of physical education in the elementary school curriculum as evidenced by written examinations.

Outcome 2

Describe the four basic parts of a lesson plan and the requisite planning required for effective presentation of the plan as evidenced by video analysis of actual teaching PE lessons in the public schools.

Outcome 3

Discuss the major ways to establish and maintain a teaching environment which is conducive to learning. Major categories should include instructional cues, feedback, teaching styles, and skill presentation as assessed by written examination.

Outcome 4

Effectively teach, manage, and discipline students in a physical education class as evidenced by successfully teaching in th epublic schools assessed by video analysis and final video project.

Outcome 5

Analyze your teaching using digital video by identifying instances of teaching which show your teaching abilities based on the desired competencies and explain how you met the competency as evidenced by video analysis final project.

Outcome 6

Understand basic principles of fitness, physical activity, and motivation and how these principles relate to children's growth and development in these areas as assessed by written examination.

Outcome 7

Understand motivation in physical education as assessed by written examination.

Outcome 8

Understand important liability principles applicable to a physical education class as assessed by written examination.

Outcome 9

Demonstrate ability to perform specific desired competencies as evidenced by the final video project.

Team Sport Fundamentals and Fitness for Life

Skills, content, and pedagogical knowledge in team sports: soccer, basketball, volleyball, and football. Also covers Fitness for Life.

PETE 228

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Team Sport Fundamentals

- Students will demonstrate knowledge of sport/activity specific skills, drills, rules and strategies and their applications to secondary PE settings as demonstrated on an exam.
- Students will know a variety of sport/activity specific drills and activities that can be used in future teaching through participation in class.
- Students will demonstrate how to teach a sport/activity specific skill, drill, or strategy through a group teaching assignment.
- Students will demonstrate skill ability in the basic sport/activity skills through a skill assessment.
- Students will demonstrate understanding of the five fitness components and apply them in individual life: cardiovascular endurance, flexibility, muscular strength and endurance, and body composition.

Physical Education Pedagogy

Sport pedagogy for students minoring in coaching and teaching physical education.

PETE 229

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PETE 228; physical education/coaching minor status.
Taught	Winter

Course Outcomes

content knowledge

Acquire the basic knowledge and skills necessary to effectively help secondary students become physically educated.

instructional strategies

Understand current instructional methods and the theories upon which they are based.

planning

Develop and demonstrate the ability to teach using a variety of teaching styles and methods effectively in the physical education setting.

learning environment

Learn the tools to effectively manage and instruct a physical education classroom.

professionalism

Analyze and evaluate your teaching performance by watching the video of each of your teaching performance and completing a self-evaluation form setting goals and strategies to be implemented in the next lesson.

professionalism

Learn how to be an effective observer and evaluator of your peer by completing a peer evaluation form for each lesson taught.

K-12 Physical Activities Content and Skills 1

Skills, content, and pedagogical knowledge in lifetime activities: golf, soccer, tennis. Also covers Fitness for Life and legal issues in PE.

PETE 230

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance into PETE program.
Taught	Fall

Course Outcomes

Technique of Each Sport

Demonstrate proper technique for the major skills of each sport

Skills of Each Sport

Develop basic skills for each sport/activity

Rules of Each Sport

Learn the basic rules of each sport/activity

Drills and Lead-up Games

Learn basic drills and lead-up games for each sport

Ensuring Safety

Understand how to ensure safety in the physical education program, focusing on prevention

K-12 Physical Activities Content and Skills 2

Skills, content, and pedagogical knowledge in lifetime activities: aerobics, badminton, basketball, flag football, and volleyball.

PETE 231

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance into PETE program.
Taught	Winter

Course Outcomes

Application to Secondary PE

The students will demonstrate knowledge of sport/activity specific skills, drills, rules and strategies and their applications to Secondary PE settings as demonstrated on an exam.

Sport Specific Drills

The students will know a variety of sport/activity specific drills and activities that can be used in future teaching through participation in class.

Group Teaching Assignment

The students wil demonstrate how to teach a sport/activity specific skill, drill, or strategy through a group teaching assignment.

Skills Assessment

Demonstrate skill ability in the basic sport/activity skills through a skill assessment.

Fundamental Skills and Teaching Methods for Elementary Physical Education

Identifying and demonstrating fundamental skills; identifying immature and mature movement patterns; selecting developmentally appropriate activities; appropriate management techniques.

PETE 274

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Concurrent enrollment in PETE 230; FBI fingerprint and background clearance.
Taught	Fall

Course Outcomes

National Standard

Demonstrate an understanding of the National Standards for Elementary School Physical Education

Classroom Management

Learn the tools to effectively manage and instruct a classroom

Lessons Management

Learn, select and implement in your lessons management and instruction strategies based on developmental levels, and safety issues.

Apply Activities from Diverse Perspectives

Apply activities and techniques that encourages learners to see, question, and interpret physical activity from diverse perspectives

Top

Exploration of Teaching

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

PETE 276R

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	PETE 230 & PETE 274; FBI fingerprint and background clearance.
Taught	Winter

Course Outcomes

National Standards

Demonstrate an understanding of the National Standards in relationship to junior high school students as evidenced through the TWS assignment.

Professionalism

Demonstrate attitudes and behaviors that exhibit professionalism. Students will demonstrate competence as evidences by their attendance in class, appropriate dress, lesson plan preparation, and the group TWS assignment.

Assessment Strategies

Students will demonstrate traditional and authentic assessment strategies by applying them to an assigned unit of instruction, creating objectives and designing assessments to meet those objectives in all three learning domains completing two sections of the Teacher Work Sample (TWS).

Lesson Planning

Write developmentally appropriate lesson plans for junior high school students using the known characteristics of junior high students. Students will demonstrate competence as evidenced by completed lesson plans required as a part of the middle school teaching practicum experience.

Trends in Physical Education

Students will demonstrate the ability to identify the current trends in physical education assessment and grading strategies as evidenced through written reaction papers, and quizzes.

Management Skills

Model appropriate instruction and management skills when teaching junior high students. Students will demonstrate competence through completion of the desired competency viewing assignment, and the final desired competency project from their middle school teaching practicum experience.

Advocacy for Physical Education

Historical and sociological cornerstones of physical education.

PETE 300

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance into PETE program.
Taught	Fall

Course Outcomes

Past, Present and Future

Use the knowledge and experience of the past to understand the programs of today and apply it toward building programs of the future. Students will demonstrate competence as evidenced by the advocacy mid-term exam.

Written and Verbal Communication

Be able to interpret and communicate knowledge and experience in both written and verbal forms. Students will demonstrate competence as evidences by the professionalism reaction papers, advocacy exam, advocacy media campaign, physical education history presentation, and the final teaching philosophy paper

Effective Advocacy

Demonstrate an understanding of the principles of effective advocacy in the K-12 school teaching setting. Students will demonstrate competence as evidences by the professionalism reaction papers, advocacy mid-term exam, and the media campaign assignment.

History of Physical Education

Demonstrate an understanding of the history of physical education and its impact on the future. Students will demonstrate competence of this on the physical education history quiz and group presentation.

Professionalism

Be examples of Christian living by being kind and attentive during class discussions, classmates' presentations, and looking for opportunities to serve one another. Students will demonstrate competence through the professionalism assignments, group media campaign assignment, and the physical education history group presentation.

K-12 Healthy and Active Lifestyle Management

Understanding the content and pedagogical knowledge required to manage a healthy and active lifestyle; how to impart this knowledge to public school students.

PETE 301

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance into PETE program.
Taught	Winter

Course Outcomes

content knowledge

Learn and apply lifestyle (nutrition/weight control and physical activity) management skills in their personal lives as assessed via LoseIt online logging program.

curriculum knowledge

Demonstrate understanding of current curricular trends specific to healthy lifestyle choices such as the health club model as assessed via written examinations.

learning environments

Demonstrate understanding and ability to design, implement and manage a healthy and active school environment program as evidenced by completing a group project and presentation.

Pedagogy

Demonstrate understanding and application of concepts specific to healthy and active lifestyle management and their accompanying pedagogical strategies as evidenced by micro/peer teaching assignment.

Coaching Selected Sports

Theory, fundamentals, strategies, and techniques of coaching golf, tennis, or wrestling.

PETE 330R

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Winter

Course Outcomes

Risk Management

Understand procedures, guidelines, and duties of the coach as they relate to risk management.

Offense, Defense, etc.

Gain an understanding of offense, defense, special situations, and philosophy.

Discuss with Other Coaches

Understand the importance of discussing the sport, how it should be taught, and safety procedures with other coaches.

Rules and Strategies

Demonstrate knowledge of the rules and strategies of your selected sport.

Top

Coaching Competitive Swimming

Theory, fundamentals, strategies, and techniques of coaching swimming.

PETE 335

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Fall

Course Outcomes

Rules and Strategies

The students will demonstrate knowledge of the rules and strategies of your selected sport .

Top

Coaching Basketball

Theory, fundamentals, strategies, and techniques of coaching basketball.

PETE 341

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Fall

Course Outcomes

Rules of Strategies

The students will demonstrate knowledge of the rules and strategies of your selected sport .

Top

Coaching Track and Field

Theory, fundamentals, strategies, and techniques of coaching track and field.

PETE 342

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Fall

Course Outcomes

Rules and Strategies

The students will demonstrate knowledge of the rules and strategies of your selected sport .

Top

Coaching Football

Theory, fundamentals, strategies, and techniques of coaching football.

PETE 344

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent
Taught	Winter

Course Outcomes

Rules and Strategies

The students will demonstrate knowledge of the rules and strategies of football .

Top

Coaching Volleyball

Theory, fundamentals, strategies, and techniques of coaching volleyball.

PETE 345

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Winter

Course Outcomes

Rules and Strategies

The students will demonstrate knowledge of the rules and strategies of volleyball.

Top

Coaching Baseball and Softball

Theory, fundamentals, strategies, and techniques of coaching baseball and softball.

PETE 346

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Fall

Course Outcomes

Rules and Strategies

The students will demonstrate knowledge of the rules and strategies of baseball and softbball.

Top

Coaching Soccer

Theory, fundamentals, strategies, and techniques of coaching soccer.

PETE 347

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Appropriate skills and teaching techniques class or equivalent.
Taught	Fall

Course Outcomes

Rules and Strategies

The students will demonstrate knowledge of the rules and strategies of soccer .

Scientific Bases of Sport: Motor Learning

Motor learning principles for physical education and coaching.

PETE 364

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Practice Session Design

The student will be able to understand and design practice sessions for students/athlete by successfully completing their final project

Foundations of Skill Instruction

The student will be able to know foundations of skill instruction by successfully completing their final project.

Student/Athlete Skill Needs

The student will be able to know students/athletes skill need by successfully completing their final project and passing the final exam.

Top

Exercise Physiology for Physical Educators

Physiology of activity for physical education teaching students.

PETE 366

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PETE 230 for majors; PETE 228 for minors.
Recommended	PDBio 305.
Taught	Fall, Winter

Course Outcomes

Exercise Physiology for Physical Educators

- Students will deepen their understanding of how the human body functions and maintains homeostatis during the increased metabolic demands of exercise.
- Students will understand the interaction of the nervous, muscle, cardiovascular, pulmonary, and metabolic systems at rest and during exercise.
- Students will be able to design an age and developmentally appropriate, sport specific exercise and conditioning prescription for one of the following purposes: endurance, strength, and weight control.

Top

Secondary Practicum

Written and practical teaching assignments designed to help prospective teachers plan, conduct, and evaluate lessons and unit plans appropriate to adolescent students.

PETE 377

Hours	3.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	PETE 231 & PETE 276R; FBI fingerprint and background clearance.
Taught	Fall

Course Outcomes

Tasks for Running Program

The students will understand the tasks associated with the effective running of a physical education program by completing a Task Summary sheet at their assigned school.

Tournaments

The students will understand types of tournaments and when to use them as evidenced by passing the tournament quiz.

Adapt ScEd 276 Plan

The students will adapt the discipline plan that they created in ScEd 276 and make it applicable for high school students.

Unit Plan

The students will demonstrate competency in instructional design principles by completing a unit plan of instruction and passing the assignment.

Design lesson plans

Design effective lesson plans that include adaptations to accommodate all students' needs.

Management and Instructional Strategies

The students will incorporate effective management and instructional strategies when teaching by obtaining an average rating above "1."

Self-evaluation of teaching

Analyze their teaching by completing a self-evaluation form after each teaching experience, completing desired competencies and transcriptions of their teaching instances by using StudioCode software, and a final reflective paper on their teaching.

Peer evaluator

Be a useful observer and evaluator on their teaching team by completing peer evaluation forms.

Literacy in Physical Education

Understand how to integrate reading skills into the physical education curriculum by passing the reading assignment.

Academic Internship: Coaching

On-the-job experience in coaching.

PETE 399R

Hours	1.0 - 4.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Advisor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Internship Hours

Students will demonstrate their abitlity to coach by completing atleast 50 hours under the supervision of a head coach.

Goals

Students will demonstrate their ability to set goals for themselves and the athletes they work with by completing a goal assignment that asks them to set 3 goals for themselves and 3 goals for the athletes they work with then completing an assignment in which they evaluate their progress with those goals at the end of their internship.

Evaluations

Students will demonstrate their ablity to grow and improve as a coach by receiving daily feedback, a mid season evaluation and a final evaluation from the head coach they work with.

Top

Principles of Coaching

Developing a philosophy of coaching; understanding coaching responsibilities and techniques; preparing athletes; valuing professional relationships with others.

PETE 430

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Philosophy of Coaching

The student will develop a philosophy of coaching after discussion of the psychological, physiological and sociological implications of coaching students. Students will complete a written final discussing their philosophy in 23 different topic areas.

Professionalism

The student will gain an understanding of various coaching responsibilities and team organizational procedures. Students will complete a detailed team budget, complete NFHS concussion certification, and complete reflection assignments.

Literate in the Content

The student will become aware of the literature and resources available to aid coaches. Students will give group presentations after reviewing the UHSAA Handbook and completing a review of literature regarding Title IX, and students will complete reflection assignments in the areas of sport specialization and current topics.

Officiating Skills

The student will gain an understanding of the preparation necessary for becoming an official for youth sports. Students will be able to discuss basic requirements to officiate their chosen sport/s.

Developing Professional Relationships

The student will develop an understanding of methods to develop a professional relationship with all stakeholders within the school. 1) Students will complete a written final. 2) Students will also be able to answer questions (Written Q and A) regarding their relationship as a coach with various stakeholders.

Top

Psychology of Sport

Basic overview of sports psychology.

PETE 450

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Psychology of Sport

PETE 450 is an inactive course. Learning Outcomes will be created if the course is offered.

Top

Adapted and Multicultural Physical Education for Teaching Majors

Legal mandates, assessing and identifying special needs students, multicultural issues, and management and instructional techniques.

PETE 461

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	FBI fingerprint and background clearance.
Taught	Winter

Course Outcomes

Instruction

*Identify, select, and implement appropriate instruction that is sensitive to the strength/weaknesses, multiple needs, learning style, and experiences of diverse learners.

Meet needs

*Use appropriate strategies, services, and resources to meet special and diverse learning needs.

Learning Environment

*Create a learning environment which respects and incorporates learners' personal, family, cultural, and community experiences

Physical Applications

Know the principles that address the physiological and biomechanical applications encountered when working with diverse populations.

Assessment

Know how to assess and evaluate students with disabilities in order to make appropriate decisions about special services and program components.

Student Integration

Know how to teach students with disabilities integrated in regular physical education programs.

IEP

Learn how to provide consultation and staff development activities related to students with disabilities and their IEP.

Multicultural Integration

Learn how to work and attend to the needs of multicultural students integrated in physical education

Top

Student Teaching - Physical Education

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

PETE 476R

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or departmental approval; requires a total GPA of 3.0; at least a C in Sc Ed 377; FBI fingerprint and background clearance.
Taught	Fall, Winter

Course Outcomes

Mangagement and Instruction

Student teachers will demonstrate competency in the Healthy and Active Lifestyle management and instructional desired competencies as evidenced by their final video desired competency project, and university supervisor and mentor teacher CPAS evaluations.

National Standards

Student teachers will demonstrate an understanding of the National Standards as evidenced through their employment portfolio and the TWS.

Lesson Planning

Student teachers will write developmentally appropriate lesson plans using the known characteristics of K-12 high students. Students will demonstrate competence as evidenced by completed lesson plans for university supervisor observations, employment portfolio, and the TWS.

Reflective Practice

Student teachers will demonstrate reflective practice in making necessary adaptions for student learning as evidenced by their final video desired competency project, TWS, and the university supervisor and mentor teacher CPAS evaluations.

Employment Preparation

Students will demonstrate competence in professional job preparation skills as evidenced by their resume, employment portfolio, and mock interview performance.

Professionalism

Student teachers will demonstrate attitudes and behaviors that exhibit professionalism as

evidenced by their attendance at student teaching seminars, school PLC's and/or department collaboration meetings, and the university and mentor teacher CPAS evaluations.

Top

Honors Introduction to Philosophy

Articulating, assessing, and defending fundamental positions on topics such as reason, knowledge, science, education, ethics, politics, and religion.

PHIL 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Figures and Topics

Become acquainted with important figures, topics, and issues in the history of philosophy.

Basic Critical Reasoning, Reading and Writing

Learn to read and discuss philosophical texts; learn basic logic skills used in critical reasoning and be able to identify invalid, unsound, and fallacious arguments

Writing and Rhetoric

Write a clear and cogent philosophical essay.

Application

Learn to integrate philosophical skills and practices with religious convictions, while cultivating a respect for contrary points of view.

Top

Introduction to Philosophy

Articulating, assessing, and defending fundamental positions on topics such as reason, knowledge, science, education, ethics, politics, and religion.

PHIL 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring
Offered	Honors also.

Top

Honors Reasoning and Writing

Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.

PHIL 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Recommended for philosophy majors and minors.
Note	Fulfills GE First-Year Writing requirement. No course challenges accepted.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Writing and Rhetoric

Write clearly on a well-defined topic using correct grammar and conventions appropriate to philosophy, and employing a voice, tone, and diction suited to one's intended audience.

Basic Writing

Cultivate basic reading and writing skills including summarizing, paraphrasing, prewriting, drafting, revising, editing, and proofreading

Basic Research

Use appropriate research tools including library and internet resources, and apply them to the writing of a cogent philosophical essay

Critical Reasoning

Learn basic logic skills used in critical reasoning and be able to identify invalid, unsound, and fallacious arguments

Reasoning and Writing

Informal grammar, logic, and rhetoric as tools for reading and writing. Library research.

PHIL 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Recommended for philosophy majors and minors.
Note	Fulfills GE First-Year Writing requirement. No course challenges accepted.

Use appropriate research tools including library and internet resources, and apply them to the writing of a cogent philosophical essay

Critical Reasoning

Learn basic logic skills used in critical reasoning and be able to identify invalid, unsound, and fallacious arguments

Philosophy Major Orientation and ePortfolio Training

Overview of philosophy as a discipline; review of philosophy major requirements and course sequence; complete introduction to philosophy research methods and ePortfolio training.

PHIL 200

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Learning Outcomes

- Know the philosophy major program outcomes, graduation requirements, course sequencing, and fundamentals of philosophy research methods
- Develop a working familiarity with the Philosophy ePortfolio platform

History of Philosophy 1

Western civilization from Greek antiquity to Renaissance, primarily from perspective of philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

PHIL 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department
Offered	Honors also.

Course Outcomes

History

Know milestones of Western history and culture from antiquity through the Renaissance or Reformation.

Figures and Topics

Acquire a basic understanding of the most important philosophical figures, texts, and issues in ancient, medieval, and early modern philosophy.

Writing

Write a cogent philosophical essay.

Top

Honors History of Philosophy 1

Western civilization from Greek antiquity to Renaissance, primarily from perspective of philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

Course Outcomes

History

Know milestones of Western history and culture from the Renaissance or Reformation through the present

Figures and Topics

Acquire a basic understanding of the most important philosophical figures, texts, and issues in late modern and contemporary philosophy.

Writing

Write a cogent philosophical essay.

Top

Introduction to Formal Logic

History and use of syllogistic and propositional logic; evaluating arguments with Venn diagrams, truth tables, and Copi-style proofs and proof strategies; informal reasoning and fallacies.

PHIL 205

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Logic

Know the basic vocabulary and concepts of formal and informal logic.

Logic

Learn how to appraise validity by refuting invalid arguments and by constructing formal proofs for valid ones.

Logic

Learn how to translate ordinary language into logical symbolism.

Top

Honors Science and Civilization 1

History of Civilization from Greek antiquity up to 1500; concepts and methods in early science and their philosophical significance; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

PHIL 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

History

Know about the development of scientific ideas and practices in their cultural context, including the major figures and methods of science from antiquity to 1500.

Critical Reading and Writing

Read, analyze, and critically summarize a book-length study of science.

Application

Learn to integrate philosophical skills and practices with religious convictions, while cultivating a respect for contrary points of view.

Top

Top

Introduction to Ethics

Nature and justification of moral standards, beliefs, and decisions.

PHIL 213

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer Contact Department

Course Outcomes

Figures and Topics

Know basic concepts, figures, texts, and issues of moral philosophy; know basic normative theories in ethics, including deontology, utilitarianism, virtue theory, subjectivism, relativism, divine command theory, natural law, social contract theory, and care ethics.

Application

Learn how to apply normative theories to ethical problems, questions, and situations.

Application

Learn how to integrate philosophical skills and practices with religious convictions, while cultivating a respect for contrary points of view.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on ethics.

Top

Introduction to the Philosophy of Art

The experience of beauty in nature, in literature, and in the arts.

PHIL 214

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Figures and Topics

Know basic concepts, theories, figures, texts, and issues in Western philosophy of art and beauty.

Application

Learn how to use the philosophy of art and theories of taste to appreciate and critique individual works of art.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on the philosophy of art and beauty.

Introduction to the Philosophy of Religion

Existence and nature of God, God's foreknowledge and man's free will, faith, immortality, and religious experience and language.

PHIL 215

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

History

Know central problems in philosophy of religion, and traditional responses to those problems; know central figures and texts in philosophy of religion.

Figures and Topics

Know and evaluate major arguments for God's existence, and learn how to examine the role of reason and evidence in religious belief.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on the philosophy of religion.

Classical and Medieval Political Philosophy

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Figures and Topics

Know basic concepts, figures, texts, and issues of Classical and Medieval political philosophy.

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Classical or Medieval political philosophy.

Contemporary Political Philosophy

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Figures and Topics

Know basic concepts, figures, texts, and issues of Contemporary political philosophy.

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Contemporary political philosophy.

John Rawls

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Figures and Topics

Know basic concepts, texts, and issues of Rawls' political philosophy.

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Rawls' political philosophy.

Top

Modern Political Philosophy

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Figures and Topics

Know basic concepts, figures, texts, and issues of Modern political philosophy

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on Modern political philosophy.

Political Liberalism

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Figures and Topics

Know basic concepts, figures, texts, and issues of political liberalism.

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on political liberalism.

Social and Political Philosophy

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Figures and Topics

Know basic concepts, theories, figures, texts, and issues in social and political philosophy.

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical reading and writing

Practice philosophical analysis and argument orally and in writing; write a clear and cogent essay on social and political philosophy.

Social Contract Theory

Examine selected topics, periods, and figures in social and political philosophy with an aim to understand and apply theories to particular problems and questions.

PHIL 217R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Figures and Topics

Know basic concepts, figures, texts, and issues of Social Contract Theory.

Application

Learn how to apply philosophical skills and practices in discussing and critiquing political issues.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Social Contract Theory.

Honors Philosophical Writing

Writing philosophical papers about philosophical texts or problems. Research methods in philosophy. Library research paper.

PHIL 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 201 and Phil 202 and Phil 205.
Note	Fulfills GE Advanced Written and Oral Communications requirement. No course challenges accepted.
Taught	Fall, Winter

Course Outcomes

Writing and Rhetoric

Learn advanced strategies of writing clearly on a well-defined topic using correct grammar, accepted usage, stylistic conventions appropriate to philosophy, and a voice, tone, and level of formality suited to one's intended audience

Critical Reading and Writing

Cultivate advanced critical reading and writing skills used in summarizing, paraphrasing, formulating, analyzing and evaluating philosophical arguments, and in prewriting, drafting, revising, critiquing, editing, and proofreading philosophical essays.

Research

Use scholarly research tools (including library and internet resources) in writing expository, persuasive, and philosophical essays; effectively use and cite researched material

Philosophical Writing

Writing philosophical papers about philosophical texts or problems. Research methods in philosophy. Library research paper.

PHIL 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 201 and Phil 202 and Phil 205.
Note	Fulfills GE Advanced Written and Oral Communications requirement. No course challenges accepted.
Taught	Fall, Winter
Offered	Honors also

Course Outcomes

Top

Intermediate Formal Logic

History and use of first-order logic and second-order logic; natural-deduction and axiomatic proofs; modal logic; set theory and foundations of mathematics.

PHIL 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHIL 205; or MATH 290
Note	Fulfills GE Languages of Learning requirement.
Taught	Fall, Winter

Course Outcomes

Logic

Learn first order logic including the correct use of symbols and the construction of proofs.

Logic

Learn to construct proofs within axiom systems in such areas as identity, set theory, arithmetic, and modal logic.

History

Understand key historical developments such as Cantor's theory of transfinite numbers, Frege's attempt to reduce arithmetic to logic, the logical paradoxes, and Gödel's theorems.

History of Ethics

Designed to survey the history of ethics or to examine multiple periods and figures in the history of philosophy.

PHIL 313R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202, 213, 300, and 300 or equivalent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

History

Understand a movement or constellation of related figures, texts, or problems in the history of philosophical ethics

Critical Rreading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on ethics

Utilitarianism

Designed to survey the history of ethics or to examine multiple periods and figures in the history of philosophy.

PHIL 313R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 150 or equivalent.
Recommended	Phil 201, 202, 213, 300, and 300 or equivalent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

History

Understand a movement or constellation of related figures, texts, or problems in the history of philosophical ethics

Critical Rreading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on ethics

Top

Aristotle
